Appendix A

Combined Specialty Programs

Combined specialty programs in two or more specialties are approved by each respective specialty board; resident physicians completing these programs are eligible for board certification. The Accreditation Council for Graduate Medical Education (ACGME) and its Residency Review Committees do not accredit combined programs; instead, they separately accredit the core specialty programs that form the combined program. In 2001, the ACGME began to list all active combined programs in its accreditation database and on its Web site (www.acgme.org). Requests for information about the guidelines for these programs should be directed to the specialty boards at the addresses listed in Appendix B. Applicants to combined specialty programs are encouraged to review requirements for admission to the certification process of each board, also listed in Appendix B.

Diagnostic Radiology/Nuclear Medicine/ Nuclear Radiology

The American Board of Radiology (ABR) and the American Board of Nuclear Medicine (ABNM) offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both boards and successfully passed the certifying examination of both boards.

To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include a) a preparatory clinical year in an ACGME-accredited program and b) 4 years of education in an ACGME-accredited diagnostic radiology program that includes 6 months of nuclear medicine training, followed by c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed.

Internal Medicine/Emergency Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency consists of 5 years of balanced education in the two disciplines. It is strongly recommended that the participating residencies be in the same academic health center.

To be eligible for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The certifying examinations cannot be taken until all 5 years are completed.

Internal Medicine/Emergency Medicine/ Critical Care Medicine

The American Board of Internal Medicine and the American Board of Emergency Medicine offer triple certification for candidates who complete a 6-year (72-month) integrated, coherent program of combined training in internal medicine, emergency medicine, and critical care medicine, approved by both boards.

Upon successful completion and verification of the first 5 years of this program, candidates may apply to take the certification examinations in internal medicine and emergency medicine. To meet eligibility for certification in critical care medicine, the candidate must: 1) have satisfactorily completed the 6-year combined program; 2) be certified by the American Board of Internal Medicine; and 3) have met the certification requirements of the American Board of Emergency Medicine.

Internal Medicine/Family Practice

The American Board of Internal Medicine and the American Board of Family Practice offer dual certification for candidates who have

satisfactorily completed 4 years of combined training in programs approved by both boards.

To be eligible for dual certification, combined residency training in internal medicine and family practice must include at least 48 months of balanced education in the two disciplines and be verified by the training director(s) of the program. The written certifying examinations cannot be taken until all required years in both specialties are completed.

Internal Medicine/Neurology

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined training suitable to both boards. A combined residency in internal medicine and neurology must include at least 5 years of coherent education integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

Internal Medicine/Nuclear Medicine

The American Board of Internal Medicine and the American Board of Nuclear Medicine offer a training pathway for candidates who have completed 4 years of combined accredited training in internal medicine and nuclear medicine leading to admissibility to certification in both specialties. To meet eligibility for dual certification, the resident must satisfactorily complete 48 months of combined training that is verified by the directors of both training programs. It is strongly recommended that combined training occur in the same institution. Residents will be eligible for admission to the written certifying examination in internal medicine after successfully completing the R-3 year of training and for the nuclear medicine examination after the R-4 year.

Internal Medicine/Pediatrics

The American Board of Internal Medicine and the American Board of Pediatrics offer dual certification in internal medicine and pediatrics. A combined residency must include at least 2 years in each specialty, for a total of 4 years of coherent training integral to residencies in the two disciplines. The participating residencies should be in the same academic health center. Continuity clinics in each specialty should be provided throughout the 4 years.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 48 months of combined education, and clinical competence in both specialties must be verified by the directors of both programs. The certifying examinations cannot be taken until all required years in both specialties are satisfactorily completed.

Internal Medicine/Physical Medicine and Rehabilitation

The American Board of Internal Medicine and the American Board of Physical Medicine and Rehabilitation offer dual certification for candidates who have completed at least 2½ years of suitable accredited training in each specialty. A combined residency must include at least 5 years of coherent training integral to residencies in the two disciplines. It is strongly recommended that the participating residencies be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The

written certifying examinations cannot be taken until required training in a specialty has been satisfactorily completed. The certifying examination in internal medicine cannot be taken prior to the fall of the fifth year in the combined program.

Internal Medicine/Preventive Medicine

The American Board of Internal Medicine (ABIM) and the American Board of Preventive Medicine (ABPM) offer dual certification for candidates who have completed a minimum of 4 years of accredited training in combined internal medicine/preventive medicine programs that meet the *Guidelines for Combined Internal Medicine - Preventive Medicine Residency Training Programs* approved by ABPM and ABIM. In addition to satisfactory completion of the combined training programs, applicants for the ABPM certifying examination must have completed the required year of preventive medicine practice to qualify.

Internal Medicine/Psychiatry

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology offer dual certification in internal medicine and psychiatry. A combined residency must include at least 5 years of coherent education integral to residencies in the two disciplines. Participating residencies must be in the same institution.

To meet eligibility requirements for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the directors of both programs. The written certifying examinations cannot be taken until all required years of training in both specialties are satisfactorily completed.

Neurology/Nuclear Medicine

The American Board of Psychiatry and Neurology and the American Board of Nuclear Medicine offer dual certification in neurology and nuclear medicine. A combined residency must include 5 years of combined education. It is strongly recommended that the participating residencies be in the same institution.

To qualify for dual certification, the resident must satisfactorily complete 60 months of combined education, which must be verified by the respective directors of both programs. The written certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed.

Neurology/Physical Medicine and Rehabilitation

The American Board of Psychiatry and Neurology and the American Board of Physical Medicine and Rehabilitation offer dual certification in neurology and physical medicine and rehabilitation. A combined residency must include 5 years of combined education. This combined training must follow a year in a residency program that meets the requirements for neurology and should be completed in the same institution. All required years in both specialties must be satisfactorily completed prior to admission to the certifying examinations of each board.

Neurology/Diagnostic Radiology/Neuroradiology

The American Board of Psychiatry and Neurology and the American Board of Radiology offer certification in neurology, diagnostic radiology, and neuroradiology. The combined residency must include at least 7 years of coherent training integral to all three residencies. It is recommended that the participating residencies be in the same academic health center.

To meet eligibility requirements for triple certification, the resident must satisfactorily complete 84 months of combined training, which must be verified by the directors of each program. Lacking verification of acceptable clinical competence in the combined program, the resident must satisfactorily complete the standard length

of residency training and all other requirements before each certifying examination may be taken. Applicants may not take the certifying examination until all required years of training have been completed. In order to be eligible for the neuroradiology exam, a resident must have completed certification in both diagnostic radiology and neurology.

Pediatrics/Emergency Medicine

The American Board of Pediatrics and the American Board of Emergency Medicine offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Medical Genetics

The American Board of Pediatrics and the American Board of Medical Genetics offer dual certification for candidates who fulfill the requirements of both boards by completing joint training in 5 years. All 5 years should be completed in the same combined program; exceptions must be approved in advance by both boards. Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Physical Medicine and Rehabilitation

The American Board of Pediatrics and the American Board of Physical Medicine and Rehabilitation permit applicants interested in pediatric rehabilitation to qualify for admission to the certifying examinations of both boards by completing a 5-year combined program. All 5 years should be completed at one academic institution; exceptions must be approved in advance by both boards.

Applicants may not take the certifying examinations until all required years in both specialties have been completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, and the Committee on Certification in Child and Adolescent Psychiatry have developed a committee that is overseeing training via a different format. This is a 5-year curriculum with 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirement for certification in all three areas. Applicants pursuing training in these programs may not take the certifying examinations until all training has been completed. Credit for training via this route may be obtained only by training in one of these programs.

Psychiatry/Family Practice

The American Board of Family Practice and the American Board of Psychiatry and Neurology offer dual certification in family practice and psychiatry. A combined residency in family practice and psychiatry must include at least 5 years of coherent training integral to

Combined Specialty Programs

775	IEC	6	Y		Internal Medicine/Emergency Medicine/Critical Care Medicine
780	INM	4	Y		Internal Medicine/Nuclear Medicine
				212	Total

*Y = Graduate year 1 positions available

N = No GYI positions available

residencies in the two disciplines. It is required that the combined training be under the aegis of the same academic institution.

To meet eligibility for dual certification, the resident must satisfactorily complete 60 months of combined training, which must be verified by the directors of both programs. The certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed.

Psychiatry/Neurology

The American Board of Psychiatry and Neurology has established guidelines for combined training in psychiatry and neurology. A combined residency must include one postgraduate year (PGY1) of training that is acceptable to neurology plus a minimum of 5 years of combined residency training. The 5 years of residency training are usually taken at one approved institution but may be taken at no more than two approved institutions.

Appendix B

Medical Specialty Board Certification Requirements

Twenty-four medical specialty boards have been approved by the American Board of Medical Specialties (ABMS) and the American Medical Association (AMA) Council on Medical Education through the Liaison Committee for Specialty Boards (LCSB). Applications for recognition as a specialty board are submitted to the LCSB and reviewed for compliance with the requirements and criteria published in the *Essentials for Approval of New Examining Boards in Medical Specialties* approved by both the ABMS and the AMA. If an applicant is approved for recognition as a medical specialty board by the LCSB, the application must then be approved by the membership of the ABMS and the AMA Council on Medical Education. The *Essentials* may be obtained from the office of the Executive Vice President of the ABMS, 1007 Church St/Ste 404, Evanston, IL 60201-5913, or from the Council on Medical Education, AMA, 515 N State St, Chicago, IL 60610.

The primary objective of medical specialty boards is the improvement of the quality of medical education and medical care. The primary functions of each of the medical specialty boards are to evaluate candidates in a medical specialty field who voluntarily appear for examination and to certify as diplomates those candidates who are qualified. To accomplish these functions, medical specialty boards determine whether candidates have received adequate preparation in accordance with established educational standards; provide comprehensive examinations designed to assess knowledge, skills, and experience required to provide quality patient care in that specialty; and certify those candidates who have satisfied the requirements.

In collaboration with the other organizations and agencies concerned, the approved medical specialty boards assist in improving the quality of medical education by elevating the standards of graduate medical education and approving facilities for specialty training.

The actual accreditation review for the approval of residency programs in each specialty is conducted by a Residency Review Committee on which the respective specialty board has equal representation with the AMA Council on Medical Education and, in some cases, with a related specialty society.

Medical specialty board certification is an additional process to receiving a medical degree, completing residency training, and receiving a license to practice medicine.

Certification requirements of each member board of ABMS are included on subsequent pages. Inquiries regarding specialty board certification requirements should be directed to the specialty board executive offices listed in Table 1. The member boards of ABMS publish materials containing statements on the requirements for certification, which are also reprinted in each edition of the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*. This publication contains certification and biographical information on each specialist who has been certified by a member board of ABMS. The *Directory* is available from Elsevier Science, 655 Avenue of the Americas, New York, NY 10010; 888 437-4636; fax 212 633-3820.

John W Yunginger, MD, Executive Secretary, Philadelphia, Pennsylvania

(The Board reserves the right to make changes in its policies and procedures at any time and cannot assume responsibility for giving advance notice thereof. All applicants are advised to contact the American Board of Allergy and Immunology [ABAI] to determine whether the following information remains current.)

Significance of Certification

A certified specialist in allergy and immunology is a physician who previously has passed the certification examination of the American Board of Internal Medicine (ABIM) and/or the American Board of Pediatrics (ABP) with additional certification by the American Board of Allergy and Immunology (ABAI), a Conjoint Board of the ABIM and the ABP. Diplomates of the ABAI have detailed knowledge of the underlying pathophysiology and the diagnosis, treatment, and prevention of allergic diseases such as allergic rhinitis, allergic asthma, urticaria, anaphylaxis, hypersensitivity pneumonitis, atopic and contact dermatitis, and allergic gastrointestinal disorders, as well as comparable clinical problems without an apparent allergic etiology or component such as vasomotor rhinitis, nonallergic asthma, and idiopathic and/or hereditary forms of urticaria and/or angioedema. Diplomates also have expertise in the management of pulmonary complications of certain of these diseases.

Diplomates of the ABAI also possess advanced understanding of immunochemistry, immunobiology, and pharmacology and experience in the application of this knowledge to the diagnosis, management, and therapy of immunologic diseases. This includes inborn or acquired defects of host resistance, autoimmune diseases, bone marrow and solid organ transplantation, gene replacement therapy, adverse drug reactions, and related conditions. Diplomates have demonstrated to the satisfaction of their peers that they possess the

general qualifications specified and are ethical and humanistic practitioners of medicine.

The purpose of certification by the ABAI is to provide assurance to the public and the medical profession that a certified internist or pediatrician has successfully completed an accredited educational program and an evaluation, including a secure, proctored examination, and possesses the knowledge, skills, and experience requisite to the provision of high-quality patient care in allergy and immunology.

Organization and Purpose

The ABAI was established in 1971 as a nonprofit organization and is one of 24 member boards of the American Board of Medical Specialties (ABMS). The ABAI is a Conjoint Board of the ABIM and the ABP and is sponsored jointly by the American Academy of Allergy, Asthma and Immunology (AAAAI), the American Academy of Pediatrics (AAP) - Section on Allergy and Immunology, the American College of Allergy, Asthma and Immunology (ACAAI), the American Medical Association (AMA) - Section Council of Allergy and Immunology, and the Clinical Immunology Society (CIS). The Board of Directors consists of an equal number of ABAI-certified internists and ABAI-certified pediatricians, who are nominated by the AAAAI, AAP, ACAAI, AMA, CIS and the ABAI Board of Directors themselves. The nominees are appointed by the ABIM and ABP for a 6-year term of office.

ABAI's major purposes are to

- establish qualifications and examine physician candidates for certification as specialists in allergy/immunology,
- serve the public and the health care community by providing the names of physicians certified as allergists/immunologists,
- improve the quality of health care,
- establish and improve standards for the teaching and practice of allergy/immunology, and
- establish standards for training programs in allergy/immunology working with the Residency Review Committee for Allergy and Immunology of the Accreditation Council for Graduate Medical Education (ACGME).

Certification

The ABAI serves candidates who have embarked on a graduate program of study with the express purpose of excelling in the practice of the subspecialty of allergy/immunology. The ABAI is responsible for the establishment and maintenance of the standards of knowledge required for certification. The ABAI anticipates that during a post-medical school training program, the candidates will acquire adequate knowledge in basic science, as applied to this discipline. In outlining its requirements, the ABAI assists the candidate to select superior educational programs that will develop his/her competency in allergy/immunology. The ABAI believes that all allergists/immunologists should have a fundamental knowledge of the biological science basic to this discipline. The responsibility of acquiring the knowledge rests with the candidate. Such knowledge is essential to the continued professional progress of any qualified allergist/immunologist.

To justify certification in allergy and immunology, each candidate must satisfy the general and professional qualifications listed below.

Content for Certification Examination

The examination covers all content areas listed in the current Program Requirements for Residency Education in Allergy and Immunology and the Content Outline determined by the Board of Directors, which is distributed with the application, and the following:

Candidates must be familiar with the fundamental elements of the immune system, such as the types of immune cells and the anatomical organs that constitute the immune system, the circulation patterns of immune cells, the biologic roles of products of the immune system, the abnormal conditions of the immune system that constitute immunopathology, and the biology of inflammation. Moreover, the candidate will be expected to be proficient in understanding the molecular basis of allergic and other immune reactions, including interaction between immune cells, cell membrane signal transduction pathways, gene expression, cytokine release, receptor targeting, cellular differentiation, and cell death. Proficiency must be demonstrated in the diagnosis and treatment of allergic and other immunologic diseases.

Because the ABAI is a conjoint board representing pediatric and adult medicine, the candidate must master the spectrum of allergic and immunologic diseases as it presents in children and adults. In addition to a familiarity with allergic diseases, including allergic rhinitis, asthma, atopic dermatitis, and urticaria, the candidate must be knowledgeable in autoimmune conditions. Equally important as knowledge in diseases of immune dysfunction is the knowledge of human pathology that results from an absence of immunity, whole or partial, congenital or acquired. Thus, an understanding of the primary immunodeficiency states is required, including congenital disorders, absence of specific complement components, lack of specific neutrophil function, absence of specific adhesive cellular glycoproteins, and dysfunctional states of the immune system produced by external agents. Candidates must be familiar with the immunologic factors operative in bone marrow and solid organ transplantation.

It is important for the candidate to demonstrate proficiency in the proper selection of appropriate clinical and laboratory tests, which aid the formulation of a clinical diagnosis based upon first obtaining a detailed medical history and performing a complete physical examination. The candidate must understand the scientific basis of the following list (noninclusive) of tests:

- serum immunoglobulin determination;
- functional antibody measurement;
- complement component and functional assays;
- lymphocyte subset analysis using monoclonal antibodies and flow cytometry;
- lymphocyte proliferation assays with mitogen and antigens; and
- neutrophil and monocyte chemotaxis, phagocytosis, and killing assessment.

In addition, the candidate must be familiar with the use of molecular diagnostic techniques involving the binding of ligands to nucleic acid or polypeptide sequences. The importance of DNA replication technology must be understood. The molecular basis for immediate hypersensitivity skin testing must be understood in the context of the detailed molecular events occurring in the tissue mast cell and blood basophil, particularly the release of preformed mediators, and in the generation of newly formed mediators. Similarly, skin testing for T cell competence with recall antigens must be understood in relation to antigen presentation, cytokine secretion and interaction, and lymphocyte subset activation and function. Candidates must also have familiarity with the misuse of standard tests and with controversial tests in allergy and immunology. The candidate must understand the principles and analytic methods employed in experimental clinical studies for determining the diagnostic utility of specific tests and in evaluating the safety, toxicity, efficacy, and outcomes of treatments and drugs for allergic and immunologic disease. Candidates must be familiar with the principles and methods employed in epidemiologic studies.

A corollary of the competence of the candidate in understanding the pathophysiology, clinical presentation, and immunologic testing

of allergic and other immunologic diseases is the knowledge of appropriate treatment options. For example, the common aspect of all types of asthma is the presence of airway inflammation. Definitive treatment of asthma demands interruption of the inflammatory response. Thus, candidates must understand use of drugs that decrease airway inflammation in asthma. Based upon the molecular knowledge of the allergic response, the candidate must appreciate the importance of allergen avoidance and medical treatment of allergic rhinitis before initiation of the more intense treatment of immunotherapy. In the latter therapy, candidates must have experience in allergen selection and administration in successful treatment regimens. Therapy for immunologic diseases must be understood, such as (noninclusive): intravenous immune globulin for antibody deficiency, treatment of immunodeficiency with biologic response modifiers, HLA-identical and HLA-haploidentical (T cell-depleted) bone marrow transplants for cellular immunodeficiencies, and gene replacement therapy currently used for the immunodeficiency associated with adenosine deaminase deficiency as well as theoretical principles/potential approaches in other congenital immune disorders.

Requirements for Certification

The candidate qualifies for examination by:

1. holding certification by the ABIM and/or ABP as of the date of the ABAI examination, *and*;
2. presenting evidence acceptable to the Board of Directors of at least 2 years of full-time residency/fellowship in allergy/immunology programs accredited by the ACGME or other acceptable training in allergy/immunology programs. These programs are listed in the *Graduate Medical Education Directory*, published by the American Medical Association; *and*
3. written documentation and evaluations from the training program director substantiating clinical competence and 2 full-time years of allergy/immunology training. Areas to be reviewed include clinical judgment; medical knowledge; clinical skills of history taking, physical examination, and procedural skills; humanistic qualities, attitudes, and professional behavior; medical care (utilizing laboratory tests and diagnostic procedures); commitment to scholarship; and work habits. Procedural skills assessed include immediate hypersensitivity skin testing, delayed hypersensitivity skin testing, specific allergen immunotherapy, drug desensitization, pulmonary function testing, and intravenous immunoglobulin therapy.

The training program director must also provide written evidence of the candidate's clinical experience and readiness to sit for the examination. In compliance with the ACGME Program Requirements for Residency Education in Allergy and Immunology, a semi-annual record must be maintained with copies to the ABAI for tracking purposes. The Evaluation Form together with the Explanation of Ratings Scale may be obtained from the ABAI. If a trainee has received two consecutive evaluations with overall unsatisfactory ratings, the training program director must provide the trainee and the ABAI with a written plan for remediation of the trainee's deficiencies. After 6 months, the training program director must provide the ABAI and the trainee with a report of the success or failure of the remediation program, as well as any additional plans for corrective action; *and*
4. documentation from the chief of medicine or pediatrics, ABAI Diplomates in the geographical area, chiefs of community hospitals, or officers of state or regional societies to verify the medical, ethical, and moral standing and clinical competence of the candidate as a specialist in allergy/immunology; *and*
5. evidence of a valid (current), unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada where the individual practices medicine

or providing a written explanation of extenuating circumstances. Candidates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or certified. Restrictions include, but are not limited to, conditions, contingencies, probation, and stipulated agreements.

Conjoint Committees—The nature of a Conjoint Board requires involvement of the sponsoring primary boards in critical areas of decision-making. The ABAI has formed two advisory committees with representation from the ABAI, ABIM, and ABP. The Conjoint Credentials Committee reviews the credentials of candidates for the certification examination and makes recommendations to the Board for its determination. The Conjoint Standards Committee recommends the passing grade for the certification examination to the Board for its determination.

Pathways for Dual Certification

Formal special pathways exist for individuals wishing to qualify for dual certification in allergy/immunology and pediatric pulmonology; allergy/immunology and pediatric rheumatology; and allergy/immunology and adult rheumatology. Additional information regarding special pathways is available upon request to the ABAI.

Recertification

Since 1977, the ABAI has offered its Diplomates a recertification process every other year so that the effectiveness of each diplomate's own efforts in continuing education would be evaluated.

Beginning with 1989, new ABAI Diplomates receive certificates valid for 10 years. Time-unlimited certificates were issued prior to October 1, 1989. However, all Diplomates, especially those involved in training programs, are strongly encouraged to recertify at a minimum of every 10 years. Maintaining a current certificate is an expression of professional accountability. Presently 1,465 ABAI Diplomates hold time-limited certificates; renewal may be achieved in the interim.

The two-part recertification process is composed of the home study examination, available August 1 with completion by November 30, and the proctored examination administered the following summer. Recertification candidates will be required to attain an 80% correct score on the 150-item home study examination to gain entry to the proctored examination. If such an absolute score is not attained, the Diplomate will be required to pass a subsequent remedial examination and attain an 80% correct score. Should performance not meet this standard, the Diplomate will not be permitted entry to the proctored examination.

The proctored examination contains 200 items, including 50 items emphasizing new knowledge in the specialty and 150 items in allergy and immunology. The ABAI anticipates that most Diplomates seeking recertification will be successful. Diplomates will be required to attain an absolute minimum score to ultimately gain recertification in allergy/immunology. Standards are established to justify public confidence.

Content for Recertification Examination

The content of the home study examination covers the broad area of allergy and immunology listed previously under "Content for Certification Examination" and will provide Diplomates a learning experience in the following areas of clinical science: immediate hypersensitivity, immunological disorders, pharmacology and therapeutics, specific diagnostic modalities, and allergens and antigens. Attention will also be given to the following areas of basic science: immune mechanisms, cells involved in immune responses, specific immune mechanisms, and laboratory tests.

The proctored examination reflects the current ABAI Content Outline, which is distributed upon successful performance on the home study examination.

Requirements for Recertification

The Diplomate qualifies for examination:

1. by having previously been certified by the ABAI (recertification in internal medicine or pediatrics is encouraged of ABAI Diplomates); *and*
2. by presenting documentation from physicians in the ABAI Diplomate's community that he/she is recognized as an allergist/immunologist; *and*
3. by presenting evidence of a valid (current), unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada or provide a written explanation of extenuating circumstances. Diplomates with a restricted, suspended, or revoked license at the time of application or examination will not be admitted to the examination or recertified. Restrictions include, but are not limited to, conditions, contingencies, probation, and stipulated agreements.

Clinical and Laboratory Immunology (CLI)

In 1983 the ABMS approved Certification of Special Qualification in Diagnostic Laboratory Immunology (DLI) for Diplomates of the ABAI, ABIM, and ABP. Such recognition was awarded in 1986, 1988, and 1990 following successful examination performance to specialists with significant experience (at least 4 years) in comprehensive DLI or at least 1 year's training in DLI, who were involved in the teaching, research, or practice setting in which the diagnostic immunology laboratory is of central importance and who were recognized by their peers as having made significant contributions to DLI.

In 1991 ABMS approved the change to a Certificate of Added Qualification in Clinical and Laboratory Immunology (CLI) for those specialists with 1 year of formal training following subspecialty certification in an immunologically based subspecialty in order to recognize the clinical interpretative skills inherent with such training. The first CLI examination was administered in 1994.

Content for Clinical and Laboratory Immunology (CLI) Examination

With the goal of certifying candidates in the broader sense of clinical skills and laboratory expertise in clinical immunology, CLI candidates will be examined in the theory and practice of the following (noninclusive) clinical areas:

1. allergic diseases;
2. primary and secondary immunodeficiency diseases;
3. autoimmune diseases;
4. immunologic aspects of bone marrow and organ transplantation;
5. immune aspects of gene replacement therapy;
6. immunologic aspects of organ-specific inflammatory conditions; *and*
7. immune aspects of malignancy and cancer.

Although knowledge in these areas is expected of the traditional candidate in allergy and immunology, the candidate for CLI will be expected to master these concepts to a far greater degree. CLI candidates should be qualified to supervise an immunology laboratory. Therefore, expertise will be required in the following (noninclusive) areas:

1. quantitation of immunoglobulins;
2. measurement of specific antibodies;
3. functional and quantitative complement tests;
4. assays of lymphocyte, monocyte, neutrophil, and basophil function and quantitation;
5. autoantibody measurement;

6. rapid tests for infectious diseases;
7. DNA amplification and binding tests;
8. genetic testing;
9. histocompatibility testing;
10. prenatal diagnosis;
11. quality control testing;
12. data management and statistical analysis; and
13. regulatory agency interactions.

The examination reflects the current ACGME Program Requirements for Residency Education in CLI and the Content Outline determined by the Joint Testing Committee of the ABAI, ABIM, and ABP, which is distributed with the application.

Requirements for Clinical and Laboratory Immunology (CLI)

The examination will be administered to those ABAI, ABIM, and ABP Diplomates following a 2-year allergy/immunology training program or immunologically related subspecialty training, eg, rheumatology, infectious diseases, etc, with subspecialty certification, and a third year of CLI training. Satisfactory completion of the additional 1-year training must be verified by the training program director. Candidates whose applications were previously accepted and whose training meets the Program Requirements for Residency Education in CLI may also file an application.

Physicians qualified for examination are expected to be involved with applying laboratory methods to problems in human diseases involving changes in immune responses and will be able to develop, perform, interpret, and evaluate the clinical relevance of special laboratory procedures related to immunologically based diseases.

Examination Methodology

Announcements

The proctored certification and recertification examinations are administered simultaneously in a few US locations in alternate years. The times and places are determined by the ABAI and announced in the appropriate specialty journals.

Applications

The act of filing an application is the candidate's responsibility. The application form is available from the ABAI. Two recent photographs that are signed by the candidate and the necessary fees must be received with the completed application on or before the close of registration (postmark applicable).

Board Review Courses

The ABAI does not sponsor or maintain any records on any courses that claim to be review courses in preparation for its examinations, nor does it offer or endorse any specific publications or courses to prepare for its examinations.

Cancellations

Candidates who are accepted for examination, but fail to appear or who withdraw after the deadline for cancellation will have their examination fee placed into an escrow account for the next examination. For each subsequent examination, candidates will be required to pay the current registration and examination fees.

Certificates

Candidates/Diplomates who pass the examinations will be certified or recertified in the specialty of allergy/immunology or CLI as of the date of the examination and receive a 10-year time limited certificate (subject to revocation by the ABAI for cause), expiring the end of December 10 years later. This information becomes public information and will be listed in *The Official ABMS Directory of Board Certified Specialists*.

Description

The written examinations vary in length, certification and CLI being two 4-hour sessions and recertification being one 4-hour session. The multiple-choice questions are objective and designed to test the individual's knowledge through recall, interpretation, and problem solving. Each examination may contain previously used questions and new questions.

Disabled Candidates

Individuals who may need accommodation during the examination must provide written details to the ABAI at the time of application for examination in order to receive information about ABAI's disability policy and accommodations approval from the Credentials Committee.

Fees

The fees are set forth in the instruction sheet included with the application. Candidates whose applications are rejected will receive a refund of the examination fee; however, the ABAI will retain the registration fee to cover the processing and evaluation costs. A nonrefundable late fee will apply to those applications received after the close of registration and prior to the cancellation deadline.

Irregular Behavior

All Board examinations are supervised by proctors, who are required to report any irregular behavior, which includes, but is not limited to, giving or obtaining unauthorized information or aid before, during, or after the examination as evidenced by observation or subsequent statistical analysis of answer sheets. Offering financial or other benefit to a proctor, employee, or agent of the ABAI is forbidden.

Reexamination

Candidates who are unsuccessful on any examination may reapply, as there is no restriction on the number of opportunities for reexamination. Once admitted to an examination, candidates will be considered to have fulfilled the training requirements for future examination in that discipline. All candidates for reexamination must meet the current requirements for licensure and professional standing.

Rescores

On written request and payment of a nominal fee, candidates may obtain rescoring within 3 months of receiving results. Answer sheets will be destroyed 12 months after administration of the examination.

Results

Individuals will be informed of the results of the examinations within 3 months of administration. The validity of the individual's performance on the examination is secured by every means available.

Special Policies

Verification of Board Status

Based on ABMS-recommended policy, the ABAI does not issue statements of or implying "Board eligibility" for any reason. Medical specialty certification is a process of advancement through several individual steps including examination. Having completed one step, such as the minimal educational requirements, should not imply that a candidate is now possessed of some special qualification that is more or less equivalent to certification. For written verification of the status of an allergist/immunologist, ABAI charges a nominal fee per name.

Revocation of Certificate

Certificates issued by the ABAI shall be subject to revocation under specific circumstances, including but not limited to a state medical license revocation or revocation of certification by either the ABIM or ABP.

Absences During Residency

Absences in excess of a total of 2 months over the 2-year allergy/immunology training program, whether for vacation, sick leave, maternity leave, etc, should be made up. If the training program director believes that an absence of more than 2 months is justified, he/she should send a letter of explanation for review and approval by the Credentials Committee.

Changes in Policies and Procedures

The ABAI reserves the right to make changes in its Policies and Procedures and fees at any time, and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABAI.

Examination Schedule**Certification**

Date: August 11, 2003
 Registration period: November 1, 2002 - January 31, 2003
 Fee: \$2,100
 Cancellation Date: July 15, 2003

Recertification

Home Study Examination: available August 1, 2002
 Proctored Examination: August 11, 2003
 Registration period: January 1 - June 30, 2002
 Fee: \$2,100
 Cancellation date: July 15, 2003

Clinical and Laboratory Immunology

Date: August 11, 2003
 Registration Period: November 1, 2002 - January 31, 2003
 Fee: \$2,100

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Anesthesiology [ABA] to ascertain whether the information below is current.)

Introduction

The chair of the anesthesiology department is the director of the residency program. Although the department chair may delegate responsibility for administering the program, the ABA corresponds officially about training matters only with the department chair.

The department chair must ensure that each resident's training fulfills all criteria for entering the ABA examination system. However, it is crucial that the resident know the requirements described in the Booklet of Information since *the resident ultimately bears responsibility for compliance with the requirements and bears the consequences if one or more aspects of training prove unacceptable*. This is especially important when requests are made for special training sequences or sites or for exemptions. If, after speaking with the department chair, there is any question about the acceptability of any portion of training, the resident should write the Secretary of the ABA directly at the ABA office.

Applicants and candidates for ABA examinations have the ultimate responsibility to know and comply with the Board's policies, procedures, requirements, and deadlines regarding admission to and opportunities for examination.

Primary Certification in Anesthesiology Certification Requirements

At the time of certification by the ABA, the candidate shall be capable of performing independently the entire scope of anesthesiology practice and must:

- A. Hold a permanent, unconditional, unrestricted, and unexpired license to practice medicine or osteopathy in one state or jurisdiction of the United States or province of Canada.
- B. Have fulfilled all the requirements of the continuum of education in anesthesiology.
- C. Have on file with the ABA a Certificate of Clinical Competence with an overall satisfactory rating covering the final 6-month

period of clinical anesthesia training in each anesthesiology residency program.

- D. Have satisfied all examination requirements of the Board.
- E. Have a moral, ethical, and professional standing satisfactory to the ABA.

ABA certificates in anesthesiology issued on or after January 1, 2000, are valid for 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate when to apply to the ABA for examination and recertification in anesthesiology.

A person certified by the ABA is designated a diplomate in publications of the American Board of Medical Specialties (ABMS) and the American Society of Anesthesiologists.

Continuum of Education in Anesthesiology

The continuum of education in anesthesiology consists of 4 years of training subsequent to the date that the medical or osteopathic degree has been conferred. The continuum consists of a Clinical Base Year (CBY) and 36 months approved training in anesthesia (CA-1, CA-2, and CA-3 years).

- A. Acceptable **Clinical Base** experiences include training in internal or emergency medicine, pediatrics, surgery or any of the surgical specialties, obstetrics and gynecology, neurology, family practice, critical care medicine, or any combination of these as approved for the individual resident by the director of his or her training program in anesthesiology. The clinical base year must include at least 10 months of clinical rotations, during which the resident has responsibility for the diagnosis and treatment of patients with a variety of medical and surgical problems, of which at most 1 month may involve the administration of anesthesia. At most 2 months of the Clinical Base year may involve training in specialties that do not meet the aforementioned criteria.

During the Clinical Base year the physician must be enrolled and training as a resident in a transitional year or specialty training program in the United States or its territories that is accredited by the Accreditation Council for Graduate Medical Education (ACGME) or approved by the American Osteopathic Association or outside the United States and its territories in institutions affiliated with medical schools approved by the Liaison Committee on Medical Education (LCME).

The resident must complete the Clinical Base year before beginning CA-3 year clinical rotations.

- B. The 3-year **Clinical Anesthesia** curriculum (CA-1 through CA-3) consists of experience in basic anesthesia training, subspecialty anesthesia training, and advanced anesthesia training. It is a graded curriculum of increasing difficulty and learning that is progressively more challenging of the resident's intellect and technical skills.
 1. Experience in **Basic Anesthesia Training** is intended to emphasize basic and fundamental aspects of the management of anesthesia. It is recommended that at least 12 months of the CA-1 and CA-2 years be spent in basic anesthesia training, with a majority of this time occurring during the CA-1 year.
 2. **Subspecialty anesthesia training** is required to emphasize the theoretical background, subject material, and practice of subdisciplines of anesthesiology. These subdisciplines include obstetric anesthesia, pediatric anesthesia, cardiothoracic anesthesia, neuroanesthesia, anesthesia for outpatient surgery, recovery room care, regional anesthesia, and pain management. It is recommended that these experiences be subspecialty rotations and occupy 7 to 12 months of the CA-1 and CA-2 years. The sequencing of these rotations in the CA-1 and CA-2 years is left to the discretion of the program director.

In addition to the above requirements for subspecialty experiences, 2 months of training in critical care medicine are required during clinical anesthesia years. An acceptable critical care rotation should include active participation in patient care, active involvement by anesthesia faculty experienced in the practice and teaching of critical care, and an appropriate population of critically ill patients. Experience in short-term overnight post-anesthesia units, intermediate step-down units, or emergency rooms does not fulfill this requirement.

- 3. Experience in **Advanced Anesthesia Training** constitutes the CA-3 year. The CA-3 year is a distinctly different experience from the CA 1-2 years, requiring progressively more complex training experiences and increased independence and responsibility for the resident. *Residents must complete the Clinical Base and CA 1-2 years of training before they begin clinical rotations in fulfillment of the CA-3 year requirement.* The program director, in collaboration with the resident, will design the resident's CA-3 year of training. They will select one of two tracks designated as the advanced clinical track and the clinical scientist track. Regardless of the track selected, resident assignments in the CA-3 year should include the more difficult or complex anesthetic procedures and care of the most seriously ill patients.

Residents in the **Advanced Clinical Track** are required to complete a minimum of 6 months of advanced anesthesia training. They may spend the remaining 6 months in advanced anesthesia training or in one to three selected subspecialty rotations. Residents may train in one anesthesia subspecialty for at most 6 months during the CA-3 year and no more than 12 months during the CA 1-3 years.

The **Clinical Scientist Track** consists of clinical training in combination with research experience. Research may occur at any time during residency training although often it will be conducted in the CA-3 year. *The resident must be enrolled in an ACGME-accredited anesthesiology program and remain active in the educational component of the program while pursuing research.* There are two options for fulfilling the requirements of this track.

Option A of the Clinical Scientist Track may be fulfilled by completing 6 months of clinical or laboratory research experience during 48 months of training, which must include 12 months of Clinical Base and a minimum of 30 months of clinical anesthesia.

Option B of the Clinical Scientist Track, intended for residents who plan careers as **academic investigators**, may be fulfilled by completing 18 months of clinical or laboratory research at any time during 60 months of training, which must include 12 months of Clinical Base and a minimum of 30 months of clinical anesthesia. They are eligible for entrance into the ABA examination system after they have completed their Clinical Base requirement, 30 months of clinical anesthesia satisfactorily, and a minimum of 6 months of research experience.

Regardless of which clinical scientist option is chosen, a resident who elects this track must have a satisfactory Clinical Competence Committee report for the 6 months of clinical anesthesia training immediately preceding any research period.

The anesthesiology program director may request 6 months of credit toward the research component of Option B for a resident with a PhD degree in a discipline relevant to anesthesiology. Documents supporting this request should include documentation of the PhD degree, a description of the current research, and a copy of the resident's curriculum vitae. Approval is at the discretion of the Credentials Committee and

must be obtained prior to the start of the last 12 months of residency training. Credit will be granted only upon *completion* of all other requirements of Option B of the clinical scientist track.

- C. The ABA grants credit toward the CA1-3 year requirements for clinical anesthesia training that satisfies *all four* of the following conditions:

1. The CA 1-3 years of training are spent as a resident enrolled with the ABA by no more than two ACGME-accredited residency programs in the United States or its territories.
2. The period of clinical anesthesia training as an enrolled resident of any single program is at least 6 months of uninterrupted training.
3. The 6-month period clinical anesthesia training in any one program ends with receipt of a satisfactory Certificate of Clinical Competence.

To receive credit from the ABA for a period of clinical anesthesia training that occurs on or after July 1, 2000, and is not satisfactory, the resident must immediately complete an additional 6 months of uninterrupted clinical anesthesia training in the same program with receipt of a satisfactory Certificate of Clinical Competence. If a resident receives consecutive Certificates of Clinical Competence that are not satisfactory, additional training is required. When a resident receives a satisfactory Certificate of Clinical Competence immediately following consecutive periods of training that are not satisfactory, the ABA will grant credit only for the period of satisfactory training and the period of unsatisfactory training immediately preceding it.

4. No more than 6 months during the first 2 clinical anesthesia years and a maximum of 12 months during the 3 years of clinical anesthesia training are spent training outside the parent programs in affiliated or nonaffiliated institutions. The Credentials Committee of the ABA must prospectively approve clinical anesthesia training in nonaffiliated programs. The prospective request for approval must include a chronological description of the rotations, information about the supervision of the resident, and assurances that the resident will be in compliance with the limits on training outside the parent program. Further, the resident must remain enrolled in the parent program while training at an affiliated or nonaffiliated institution, and the parent program must report the training on the Clinical Competence Committee report filed for the period involved.
- D. Prospective approval is required for exceptions to policies regarding the training planned for residents. The Credentials Committee of the ABA considers requests for prospective approval on an individual basis. The ABA office must receive the request from the department chair on behalf of a resident at least *2 months* before the resident begins the training in question. It is the responsibility of the department chair and the resident to assure that the request is received in a timely manner.

Principal Objectives

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

A Board-certified anesthesiologist is a physician who provides medical management and consultation during the perioperative period in pain management and in critical care medicine. A diplomate of the Board must possess knowledge, judgment, adaptability, clinical skills, technical facility, and personal characteristics sufficient to carry out the entire scope of anesthesiology practice. An ABA

diplomate must logically organize and effectively present rational diagnoses and appropriate treatment protocols to peers, patients, their families, and others involved in the medical community. A diplomate of the Board can serve as an expert in matters related to anesthesiology, deliberate with others, and provide advice and defend opinions in all aspects of the specialty of anesthesiology. A Board-certified anesthesiologist is able to function as the leader of the anesthesiology care team.

Because of the nature of anesthesiology, the ABA diplomate must be able to manage emergent life-threatening situations in an independent and timely fashion. The ability to independently acquire and process information in a timely manner is central to assure individual responsibility for all aspects of anesthesiology care. Adequate physical and sensory faculties, such as eyesight, hearing, speech, and coordinated function of the extremities, are essential to the independent performance of the Board-certified anesthesiologist. Freedom from the influence of or dependency on chemical substances that impair cognitive, physical, sensory, or motor function also is an essential characteristic of the Board-certified anesthesiologist.

The **written examination** is designed to assess the candidate's knowledge of basic and clinical sciences as applied to anesthesiology. Written examinations are held annually in locations throughout the United States and Canada on a Saturday in July. A passing grade, as determined by the Board, is required.

It is necessary for candidates to pass the written examination to qualify for the oral examination. Candidates must wait at least 6 months after passing the written examination to be eligible to appear for the oral examination.

The **oral examination** is designed to assess the candidate's ability to manage patients presented in clinical scenarios, with particular emphasis on the scientific and clinical rationale that supports the management. The ABA conducts oral examinations in the spring and fall of each year at a single location in the United States. Examiners are Directors of the Board and other ABA diplomates who assist as associate examiners. A passing grade, as determined by the Board, is required.

Irregular Behavior

The Board acts to maintain the integrity of its examination and certification process and to ensure the equitable and objective administration of its examinations to all candidates. Information about behavior the Board considers a violation of the integrity of its examination and certification process is sent to all candidates scheduled for examination. Statistical analyses may be conducted to verify observations and reports of suspected irregularities in the conduct of an examination. The examination of a candidate whose conduct, in the Board's judgment, violates or attempts to violate the integrity of its examination and certification process will be invalidated and no results will be reported. Furthermore, the candidate will be subject to punitive action as determined by the Board. In that event the candidate would be informed of the reasons for the Board's actions and could request an opportunity to present information deemed relevant to the issue and to petition the Board to reconsider its decision.

Nonstandard Examination Administration

The ABA supports the intent of the Americans with Disabilities Act (ADA) and has a process for considering requests that its assessment programs be modified to accommodate an individual with a disability. Anyone having questions about the process should write or call the Executive Vice President of the Board at the ABA office.

Unforeseeable Events

In the event a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation facilities, or other unforeseeable events make it inadvisable, illegal, or impossible for the ABA to administer an examination to a candidate at the appointed date, time, and location, or to conclude a candidate's examination, the ABA is not responsible for any personal expense the candidate may have incurred to be present for the examination or for any such expense the candidate may incur for any subsequent examination.

Application Form

Application for admission to the examination system of the ABA must be made to the Secretary on a form prescribed by the Board. *Photocopies or facsimiles of the application form are not acceptable.*

The proper application form and other information may be obtained from the ABA Web site or by writing to the Secretary, American Board of Anesthesiology, 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. An applicant must request an application form by writing to the Board. *Telephone requests are not acceptable.*

Filing and Documentation Deadlines

The ABA must receive the completed application and the appropriate fee on or before January 10 of the year in which the written examination is to be administered. *The January 10 deadline for receipt of completed applications is absolute, and no application will be accepted after that date for any reason.*

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to examination no later than March 10 of the year in which the written examination is to be administered. This includes but is not limited to references and evidence of medical licensure or of having qualified for such licensure. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.

Applicant Acknowledgement and Release

The application form includes the following Acknowledgement, which the applicant shall be required to sign:

I, the undersigned applicant ("Applicant"), hereby apply to the American Board of Anesthesiology, Inc. ("ABA"), for entrance into its examination system for the purpose of obtaining ABA certification status ("Certification"), I acknowledge that my application is subject to the ABA rules and regulations.

I represent and warrant to the ABA that all information contained in this application ("Application") is true, correct and complete in all material respects. I understand and acknowledge that any material misstatement in or omission from this Application shall constitute cause for disqualification from the ABA examination system or from the issuance of an ABA Certificate or to forfeiture and redelivery of such Certificate.

I understand that if the Application is electronically submitted to the ABA, the Acknowledgement portion of the Application will be assigned a number (# _____), which will match the portion of the Application submitted electronically. I agree that the Acknowledgement shall survive the electronic submission of the Application, regardless of whether or not the information or data provided in the Application has been aggregated or reformatted in any manner by the ABA. I also agree that this Acknowledgement precludes me from claiming the Acknowledgement does not relate to the Application.

I acknowledge that I have received a copy of the applicable ABA Booklet of Information and read the Booklet. I agree to be bound by the policies, rules, regulations and requirements published in the applicable Booklet, in all matters relating to consideration of and action upon this Application and Certification should it be granted. In addition, I understand and acknowledge that in the event I have violated any of the ABA rules governing my Application and/or Certification, or in the event I fail to comply with any provisions of the ABA Certificate of Incorporation or Bylaws, such violations shall constitute cause for disqualification from the ABA examination system or from the issuance of an ABA Certificate or to forfeiture and redelivery of such Certificate.

The application form also includes the following Release, which the applicant shall be required to sign:

I, the undersigned applicant ("Applicant"), hereby apply to the American Board of Anesthesiology, Inc. ("ABA") for entrance into its examination system for the purpose of obtaining ABA certification status ("Certification"). I acknowledge that this application ("Application") is subject to the ABA rules and regulations.

In connection with my Application, (if electronically submitted, Application [# _____], I authorize all persons holding testimony, records, documents, opinions, information and data relevant to or pertaining to my professional competence and ethical conduct and/or behavior (the "Information") to release such Information to the ABA, its employees and agents. This authorization applies whether or not such persons are listed as a reference on my Application. The Information includes any information relating to any abusive use of alcohol and/or illegal use of drugs, and any treatment or rehabilitation related thereto. The purpose of releasing such Information is to determine or verify my qualifications for entrance into the ABA entrance examination and ABA Certification. A copy of this release may accompany any request made by the ABA for such Information.

I authorize the ABA to: (1) report my status in the examination system, including the results of any written or oral examination, to the Director of the program from which I completed my clinical training; (2) use any score in psychometric analyses to confirm observations and reports of suspected irregularities in the conduct of an examination; and (3) respond to any inquiry about my status in the ABA examination system. I also authorize the ABA to use any and all Information for the purpose of conducting longitudinal studies to assess the ABA certification process. Such Information may be reported or released only in the aggregate, and any results of such studies will have no direct bearing on my Application or Certification status. Subject to applicable state and federal law requirements, the ABA shall hold all Information in confidence.

I release and agree to hold harmless each person from any liability to me arising out of the giving or releasing of Information to the ABA. This release and agreement includes liability for the inaccuracy or untruth of the Information, so long as such Information is provided in good faith. I also release and agree to hold harmless the ABA and its agents and employees, including but not limited to its directors, officers and examiners, from any liability to me as a result of any acts or proceedings undertaken or performed in connection with my Application, provided such acts or proceedings are made or conducted in good faith.

Entrance Requirements

At the time of application to enter the examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology practice and must:

A. Have graduated from a medical school in a state or jurisdiction of the United States or in Canada that was accredited at the date of

graduation by the LCME, the Committee on Accreditation of Canadian Medical Schools, or the American Osteopathic Association. Graduates of medical schools outside the jurisdiction of the United States and Canada must have one of the following: a permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates, comparable credentials from the Medical Council of Canada, or documentation of training for those who entered postdoctoral medical training in the United States via the Fifth Pathway as proposed by the American Medical Association.

- B. Provide evidence satisfactory to the Board of having been awarded a medical or osteopathic degree acceptable to the Board.
- C. Provide evidence acceptable to the Board of having satisfied the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the ABA examination system.
- Residents in training may submit evidence with their application of having qualified on examinations that provide eligibility for medical licensure (eg, United States Medical Licensing Examination Steps 1, 2, and 3). Residents who do so must have evidence of permanent, unconditional, unrestricted, and currently unexpired medical licensure on file in the ABA office by November 30 of the year in which the written examination for which they applied is administered.
- D. Have on file in the Board office evidence of having satisfactorily fulfilled all requirements of the continuum of education in anesthesiology before the date of examination and after receiving a medical or osteopathic degree acceptable to the ABA. Such evidence must include a satisfactory Certificate of Clinical Competence covering the final 6 months of clinical anesthesia training in each residency program. A grace period will be permitted so that applicants completing this requirement by August 31 may apply for the immediately preceding July written examination.
- E. Have on file with the Board evaluations of various aspects of his or her current practice of anesthesiology as solicited by the Board in determining the applicant's qualifications for admission to the examination system. The ABA may request such evaluations from the residency program director or others familiar with the applicant's current practice of anesthesiology. The Clinical Competence Committee report from the department *and* the evaluation of the program director and others will be used as the basis for assessing admission qualifications.
- F. If residency training was completed more than 12 years before the date of application or if a second or subsequent application has been declared void, the applicant must submit proof of having reestablished his or her qualifications for admission to the examination system.

Acceptable proof consists of documentation of having qualified on an entry examination designated by the Board. The Board has designated the examination administered annually by the Joint Council on In-Training Examinations as the entry examination. Information about the entry examination and a registration form may be obtained by writing the Joint Council c/o the American Society of Anesthesiologists. Alternatively, the applicant may complete 12 consecutive months of additional clinical training in anesthesia as a CA-3 year resident in one ACGME-accredited program with receipt of a satisfactory Certificate of Clinical Competence covering the final 6 months.

The applicant must qualify on the entry examination or satisfactorily complete the year of additional training after the date

the ABA declared her or his most recent application void. The applicant must complete the requalifying examination before applying to the ABA. If the applicant will complete the year of additional training by August 31, he or she may apply to the ABA for the immediately preceding July written examination. The applicant must apply to the ABA within 3 years of having reestablished her or his qualifications for admission to examination.

The ABA will *not* validate or report the results to applicants who sit for the written examination and do not fulfill those conditions by the deadlines.

The Board shall determine that entry into the examination system is merited when a judgment of adequate levels of scholarship and clinical competence can be made from the information submitted. After approval of all of their credentials, the ABA will notify applicants that they are accepted as candidates for certification.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

Certificate of Clinical Competence

The Board requires every residency training program to file, on forms provided by the Board, an Evaluation of Clinical Competence in January and July on behalf of each resident who has spent any portion of the prior 6 months in clinical anesthesia training in or under the sponsorship of the residency program and its affiliates. The program director (department chair) must *not* chair the Clinical Competence Committee.

Entry into the examination system is contingent upon the applicant having a Certificate of Clinical Competence on file with the Board attesting to satisfactory clinical competence during the final period of clinical anesthesia training in or under the sponsorship of each program. The Board, therefore, will deny entry into the examination system until this requirement is fulfilled.

Absence From Training

The total of any and all absences during clinical anesthesia training may not exceed the equivalent of 20 working days per year. Attendance at scientific meetings, not to exceed 5 working days per year, shall be considered a part of the training program. Duration of absence during the clinical base year may conform to the policy of the institution and department in which that portion of the training is served. Absences in excess of those specified will require lengthening of the total training time to the extent of the additional absence.

A lengthy interruption in training may have a deleterious effect on the resident's knowledge or clinical competence. Therefore, when there is an absence for a period in excess of 6 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA examination system.

Entrance Into the System

The examination system for the ABA's primary certificate has two distinct parts, the written examination and the oral examination. Each is designed to assess different qualities of a Board-certified anesthesiologist.

The **written examination** is designed to assess the candidate's knowledge of basic and clinical sciences as applied to anesthesiology. Written examinations are held annually in locations throughout

the United States and Canada on a Saturday in July. A passing grade, as determined by the Board, is required.

It is necessary for candidates to pass the written examination to qualify for the oral examination. Candidates must wait at least 6 months after passing the written examination to be eligible to appear for the oral examination.

The **oral examination** is designed to assess the candidate's ability to manage patients presented in clinical scenarios with particular emphasis on the scientific and clinical rationale that supports the management. The ABA conducts oral examinations in the spring and fall of each year at a single location in the United States. Examiners are Directors of the Board and other ABA diplomates who assist as associate examiners. A passing grade, as determined by the Board, is required.

The ABA will *not* schedule candidates to appear at consecutive oral examinations. Candidates who do not take or do not pass an oral examination for which they are scheduled, for whatever reason, are not eligible to appear at the next regularly scheduled oral examination.

A. The **duration of candidate status** is limited. Candidates are given one opportunity a calendar year, for 3 years, to successfully complete each examination requirement. They must satisfactorily complete the written examination within 4 years of the date of the first examination that follows acceptance of the application, and they must satisfactorily complete the oral examination within 7 years of that date. The ABA will declare the candidate's application void if the candidate does not satisfy an examination requirement within the prescribed number of opportunities or time, whichever comes first.

B. The ABA sends **notification of an examination** and a reply form to every candidate eligible to appear for the examination at least 4 months prior to the examination date. The notification is sent to candidates at their address of record on file in the Board office.

Candidates are *required* to respond to every written and oral examination notice by the response date established by the ABA, whether or not they accept the examination opportunity. The ABA will acknowledge every reply to an examination notice within 2 weeks of the response deadline.

Candidates scheduled to appear for examination are notified of the exact date, time, and location of their examination and the rules for its conduct at least 2 months before the date of examination.

The Board office is not responsible for an interruption in communication with a candidate that is due to circumstances beyond its control. Candidates must send the Board written notice of an address change immediately. Candidates must call the Board office if they do not receive an examination notice they are expecting within the time frame described above. The candidate's social security number is used by the Board for identification purposes and should be included on all correspondence with the Board.

C. The ABA requires each candidate to accept each opportunity offered by the Board to appear for examination. The ABA must receive the candidate's written response to the notice of opportunity for examination by the deadline specified in the notification. The candidate forfeits the examination opportunity if the ABA does not receive acceptance of the examination opportunity or a request to be excused from the examination by the response deadline. A candidate who accepts the opportunity and fails to appear for the examination forfeits the opportunity and the examination fee.

Under certain circumstances the ABA, at its discretion, may grant a candidate's request for an **excused absence** from any

scheduled examination without forfeiture of the opportunity or fee. Such a request must be filed in writing, include the candidate's reason, and arrive in the ABA office by the response deadline specified in the examination notice or, for scheduled candidates, by the examination date. A candidate may be excused from examination if it is determined the reason warrants such a decision and there is sufficient time remaining in the application period to provide the number of examination opportunities the candidate is permitted. Candidates excused from an examination are required to appear at the next examination for which they are eligible.

The Board reserves the right to limit the number of candidates to be admitted to any examination. Places in the **oral examination schedule** are assigned randomly when more candidates request the examination than can be accommodated. Candidates who are not given an examination appointment, whether or not they accepted the examination opportunity, are required to appear at the next examination for which they are eligible.

Fees

The **application fee** for primary certification in anesthesiology is \$1,700. It must accompany the application.

For completed applications received between January 11 and November 20 of the previous year, the application fee is \$1,600—a reduction of \$100 for early filing.

The application fee includes a nonrefundable fee for administrative services. It is \$200 for applications for primary certification that arrive after November 20 and \$100 for those received on or before that date. In the event an application is not accepted, or the application is accepted and subsequently withdrawn by the candidate, the fee for administrative services will be retained and the balance of the application fee will be refunded. No fee will be remitted if the candidate's notice of withdrawal from the examination system is received in the Board office after the deadline by which candidates must notify the Board of their choice of test center for the first written examination for which they are eligible.

The **reexamination fee** is \$400 for the anesthesiology written examination and \$1,100 for the oral examination. The reexamination fee will be charged to candidates whether they have failed a previous examination, canceled a scheduled appointment for examination, or failed to appear for any examination for which they were properly scheduled.

A charge of \$50 will be made whenever a check is returned for nonpayment.

The ABA is a nonprofit organization. The fees for application and examination are computed on a basis of cost of maintaining the functions of the Board. The Board reserves the right to change the fees when necessary.

Reapplication

The ABA declares void the application of a candidate who does not satisfy the examination requirements in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who meets existing requirements will be readmitted into the examination system.

The re-applicant for primary certification who has had a second or subsequent application declared void for any cause, or has completed anesthesiology residency training more than 12 years before the date of reapplication, must reestablish his or her qualifications for admission to the examination system before filing another application. In all instances, the candidate must pass both the written and oral examinations under the new application.

Status of Individuals

The ABA reserves to itself exclusively the right to define and confer "Board eligible" status whenever such status refers to an individual's relationship to the ABA examination and certification system. *The ABA shall confer Board eligible status only on physicians who are candidates in the ABA examination and certification system.* The ABA does not confer Board eligible status indefinitely.

Inquiries about the current status of individuals should be addressed to the ABA office. They must include the physician's full name and ABA identification number (ie, social security number). The ABA responds to inquiries with one of the following statements:

- The physician is certified by the ABA.
- The physician was certified by the ABA from (date of certification) to (date certification expired) and presently is a candidate in the ABA recertification system.
- The physician was certified by the ABA from (date of certification) to (date certification expired) and is not recertified at this time.
- The physician is Board eligible in anesthesiology.
- The physician has applied to the ABA, and the ABA is determining whether the applicant meets its requirements to be Board eligible.
- The physician is neither certified by the American Board of Anesthesiology nor Board eligible.

The fee for written confirmation of an individual's status is \$10.

Alcoholism and Substance Abuse

The Americans with Disabilities Act (ADA) protects individuals with a history of alcohol or substance abuse who are not currently abusing alcohol or using drugs illegally. The ABA supports the intent of the ADA.

The ABA will admit qualified applicants and candidates with a history of alcohol abuse to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they do not currently pose a direct threat to the health and safety of others.

The ABA will admit qualified applicants and candidates with a history of illegal use of drugs to its examination system and to examination if, in response to its inquiries, the ABA receives acceptable documentation that they are not currently engaged in the illegal use of drugs.

After a candidate with a history of alcohol abuse or illegal use of drugs satisfies the examination requirements for certification, the ABA will determine whether it should defer awarding its certification to the candidate for a period of time to avoid certifying a candidate who poses a direct threat to the health and safety of others. If the ABA determines that deferral of the candidate's certification is appropriate because the candidate does currently pose a threat to the health and safety of others, the ABA will assess the specific circumstances of the candidate's history of alcohol abuse or illegal use of drugs to determine when the candidate should write the Board to request issuance of its certification.

Revocation of Certificate

A certificate is issued by the Board with the understanding that it remains the property of the Board during the life of the diplomate. Any certificate issued by the Board shall be subject to revocation in the event that:

- A. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this Board or its By-Laws; or
- B. The person certified shall not have been eligible to receive such certificate whether or not the facts making him or her ineligible

- C. The person certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the Board or its representatives; or
- D. The person certified shall fail to maintain moral, ethical, or professional behavior satisfactory to the Board.

The Board shall be the sole judge of whether or not the evidence or information before it is sufficient to require or permit revocation of any certificate issued by the Board, and the decision of the Board shall be final. The individual has the right to seek review of such decision.

Certification by Other Organizations

The ABA will make no statement about the comparability of the ABA certificate and another organization's certificate. The ABA will not accept certification by another entity as meeting the requirements for entrance into the ABA examination system for specialty or subspecialty certification or recertification.

Records Retention

The ABA retains documents pertaining to an individual's residency training, application for certification, examination opportunities, and examination results for the sole purpose of determining that its requirements for admission to examination and for certification are fulfilled.

In the absence of an application for certification, documents pertaining to the ABA entrance requirements are retained for 7 years from the date of the most recent correspondence to or from the ABA regarding the requirements. Documents pertaining to an unsuccessful application are retained until the individual submits another application to the ABA or the aforementioned 7-year period expires, whichever occurs first. Documentation corroborating the results of a candidate's examination is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the results. Documentation corroborating the candidate's fulfillment of the ABA certification requirements is retained until 1 year after the date of the most recent correspondence to or from the ABA regarding the candidate's certification by the ABA. The ABA sees to the secure destruction of the documents in its file for an individual when the period specified for retention of the documents has expired.

The ABA retains indefinitely an electronic record for residents who trained in an ACGME-accredited anesthesiology program. This record includes entries that identify the training program, the dates of training, and the overall evaluation of the resident.

The ABA retains indefinitely microfiche and electronic records for candidates issued its certification. These records include documents and entries attesting that each certification requirement was met.

Review Process

The only actions of the ABA that are subject to review are a decision not to accept an application, a decision not to grant a request for an examination under nonstandard testing conditions, and a decision to revoke a certificate issued by the ABA.

The individual must give the ABA written notification of the intention to seek review within 30 days of receiving notification of the Board's decision. The notice shall be addressed to the ABA Secretary at the Board office and shall set forth the grounds upon which the request for review is based. If the individual does not give the ABA written notification of the intent to seek review within the time and in the manner prescribed, the individual shall be considered to have accepted the decision of the Board and the decision shall become final.

Upon receipt of notice of the intent to seek review within the time and in the manner prescribed, the ABA will send the individual information about the ABA review process.

Subspecialty Certification in Critical Care Medicine

A. Definition of Critical Care Medicine

The discipline of critical care medicine has evolved over the last few decades in parallel with the development of techniques and technology for acute and long-term life support of patients with multiple organ system derangement. Because the problems encountered in the critically ill patient encompass aspects of many different specialties, critical care medicine is a multidisciplinary endeavor that crosses traditional department and specialty lines.

The critical care medicine physician is a specialist whose knowledge is of necessity broad, involving all aspects of management of the critically ill patient, and whose primary base of operation is the intensive care unit (ICU). This physician has completed training in a primary specialty and has received additional training in critical care medicine aspects of many disciplines. This background enables the physician to work in concert with the various specialists on the patient care team in the ICU; to utilize recognized techniques for vital support; to teach other physicians, nurses, and health professionals the practice of intensive care; and to foster research.

B. Certification Requirements

At the time of subspecialty certification in critical care medicine by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

- Be a diplomate of the ABA.
- Fulfill the licensure requirement for certification.
- Have fulfilled the requirement of the continuum of education in critical care medicine as defined by the ABA.
- Have satisfied the critical care medicine examination requirement of the ABA.

ABA subspecialty certificates in critical care medicine issued on or after January 1, 2000, are valid for 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate when to apply to the ABA for examination and recertification in the subspecialty.

C. Continuum of Education in Critical Care Medicine

The continuum of education in critical care medicine consists of 12 months of full-time training in critical care medicine. The training must be in an anesthesiology critical care medicine program in the United States or its territories accredited by the ACGME. The training must follow completion of the continuum of education in anesthesiology (ie, Clinical Base and CA 1-3 years) unless the Credentials Committee of the ABA prospectively approves a different training sequence for the resident.

Training in critical care medicine must *not* be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA subspecialty examination system.

D. Entrance Requirements

At the time of application to enter the critical care medicine examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology critical care medicine practice and must:

- Be certified by the ABA.

- Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the ABA examination system.
- Have on file in the ABA office documentation of having fulfilled the requirement of the continuum of education in critical care medicine.

The ABA will solicit evaluations of various aspects of the applicant's current practice of anesthesiology critical care medicine as part of its assessment of the applicant's qualifications for admission to its critical care medicine examination system. The Board shall determine that entry into its critical care medicine examination system is merited when a judgment of clinical competence can be made from the information submitted. The ABA will notify an applicant who is accepted as a candidate for its critical care medicine examination after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

E. Application Procedure

1. The proper application form and other information may be obtained from the ABA Web site or by writing to the Secretary of the ABA at 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. *Telephone requests are not acceptable.*

Application for admission to the examination system of the ABA must be made to the Secretary on a form prescribed by the Board. *Photocopies or facsimiles of the application form are not acceptable.*

2. The application form includes the identical Acknowledgement and Release statements included in the application for primary certification. The applicant for examination in critical care medicine shall be required to sign each statement.

F. Filing and Documentation Deadlines

The ABA must receive the completed application and the appropriate fee for the critical care medicine examination on or before March 1 of the examination year. *Applications received after the deadline will not be accepted.*

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to the examination no later than May 1 of the examination year. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date. It ultimately is the responsibility of every applicant to assure that the ABA receives all required documentation in a timely manner.

G. Fees

The application fee for admission to the critical care medicine examination system is \$1,000. It must accompany the application.

The application fee includes a nonrefundable fee for administrative services of \$250. The reexamination fee for the critical care medicine examination is \$750.

A charge of \$50 will be made whenever a check is returned for nonpayment.

H. Examination System

The written examination in critical care medicine is designed to test for the presence of knowledge that is considered essential for

the ABA diplomate to function as a practitioner of critical care medicine. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The critical care medicine examination will be administered annually beginning in 2001. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the critical care medicine examination approximately 4 months prior to the date of its scheduled administration.

Every candidate has three opportunities to satisfy the critical care medicine examination requirement. At its discretion, the ABA may excuse a candidate from at most one examination without forfeiture of the opportunity. The ABA will declare an application void when the candidate does not pass the examination on the third opportunity. Physicians whose application has been declared void may reapply to the ABA.

I. Status of Individual

Inquiries about the current status of physicians relative to the ABA critical care medicine certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in critical care medicine by the ABA. For others, the response to the inquiry will be in keeping with the ABA policy.

J. Reapplication

The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for any reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year continuum of education in critical care medicine before reapplying for the subspecialty certificate.

Subspecialty Certification in Pain Management

A. Definition of Pain Management

Pain management is the medical discipline concerned with the diagnosis and treatment of the entire range of painful disorders. Because of the vast scope of the field, pain management is a multidisciplinary subspecialty. The expertise of several disciplines is brought together in an effort to provide the maximum benefit to each patient. Although the care of patients is heavily influenced by the primary specialty of physicians who subspecialize in pain management, each member of the pain treatment team understands the anatomical and physiological basis of pain perception, the psychological factors that modify the pain experience, and the basic principles of pain management.

B. Certification Requirements

At the time of subspecialty certification in pain management by the ABA, each candidate shall be capable of performing independently the entire scope of anesthesiology pain management practice and must:

- Be a diplomate of the ABA.
- Fulfill the licensure requirement for certification.
- Have fulfilled the requirement of the continuum of education in pain management as defined by the ABA.
- Have satisfied the pain management examination requirement of the ABA.

The ABA subspecialty certificate in pain management is valid for a period of 10 years after the year the candidate passes the examination for certification. It is left to the holder of the certificate

when to apply to the ABA for examination and recertification in the subspecialty.

C. Continuum of Education in Pain Management

The continuum of education in pain management consists of 12 months of full-time training in acute, chronic, and oncology pain management. The training must be in an anesthesiology pain management program in the United States or its territories accredited by the ACGME. The training must follow completion of the continuum of education in anesthesiology (ie, Clinical Base and CA 1-3 years), unless the Credentials Committee of the ABA prospectively approves a different training sequence for the resident.

Training in pain management must *not* be interrupted by frequent or prolonged periods of absence. When there is an absence for a period in excess of 2 months, the Credentials Committee of the ABA shall determine the number of months of training the resident will have to complete subsequent to resumption of the residency program to satisfy the training required for admission to the ABA subspecialty examination system.

D. Entrance Requirements

At the time of application to enter the pain management examination system of the ABA, the applicant shall be capable of performing independently the entire scope of anesthesiology pain management practice and must:

- Be certified by the ABA.
- Submit proof of having fulfilled the licensure requirement for certification. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the ABA examination system.
- Have on file in the Board office documentation of having fulfilled the requirement of the continuum of education in pain management.

The ABA will solicit evaluations of various aspects of the applicant's current practice of anesthesiology pain management as part of its assessment of the applicant's qualifications for admission to its pain management examination system. The Board shall determine that entry into its pain management examination system is merited when a judgment of clinical competence can be made from the information submitted. The ABA will notify an applicant who is accepted as a candidate for its pain management examination after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

E. Application Procedure

1. The proper application form and other information may be obtained from the ABA Web site or by writing to the Secretary of the ABA at 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. *Telephone requests are not acceptable.*

Application for admission to the examination system of the ABA must be made to the Secretary on a form prescribed by the Board. *Photocopies or facsimiles of the application form are not acceptable.*

2. The application form includes the identical Acknowledgement and Release statements in the application for primary certification. The applicant for examination in pain management shall be required to sign each statement.

F. Filing and Documentation Deadlines

The ABA must receive the completed application and the appropriate fee for the pain management examination on or before March 1 of the examination year. *Applications received after the deadline will not be accepted.*

The ABA must receive all documentation it requires to make a determination about an applicant's qualifications for admission to the examination no later than May 1 of the examination year. This includes but is not limited to references, evidence of medical licensure, and verification that the training requirement is met. An application will not be accepted if the required documentation is not received by that date. *It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.*

G. Fees

The application fee for admission to the pain management examination system is \$1,000. The fee must accompany the application.

The application fee includes a nonrefundable fee for administrative services of \$250. The reexamination fee for the pain management examination is \$750.

A charge of \$50 will be made whenever a check is returned for nonpayment.

H. Examination System

The written examination in pain management is designed to test for the presence of knowledge that is considered essential for the ABA diplomate to function as a practitioner of pain management. The examination analyzes the cognitive and deductive skills as well as the clinical judgment of the candidates.

The pain management examination is administered annually. The ABA will mail notice to all eligible candidates announcing the location(s) and date of the pain management examination approximately 4 months prior to the date of its scheduled administration.

Every candidate has three opportunities to satisfy the pain management examination requirement. At its discretion, the ABA may excuse a candidate from at most one examination without forfeiture of the opportunity. The ABA will declare an application void when the candidate does not pass the examination on the third opportunity. Physicians whose application has been declared void may reapply to the ABA.

I. Status of Individuals

Inquiries about the current status of physicians relative to the ABA pain management certification system should be addressed to the ABA office. The ABA will affirm the status of physicians who are certified in pain management by the ABA. For others, the response to the inquiry will be in keeping with ABA policy.

J. Reapplication

The ABA declares void the application of a candidate who has failed to satisfy the examination requirement in the prescribed number of opportunities or time for whatever reason. The physician may reapply by submitting a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be readmitted into the examination system.

Every reapplicant who qualified previously by Temporary Criteria is required to have completed satisfactorily the 1-year continuum of education in pain management before reapplying for the subspecialty certificate.

Program for Recertification

A. Background

Initiatives at federal, state, and local levels convinced the ABA that some of its diplomates would need or desire a mechanism to demonstrate their continuing qualifications. In May 1989, the ABA announced its intent to develop a program for continued demonstration of qualifications (CDQ), which would afford its diplomates the opportunity to *voluntarily* demonstrate current knowledge and quality of practice. The ABA approved a policy of time-limited certification in 1994-1995. All certificates issued by the ABA on or after January 1, 2000, will expire 10 years after the year the candidate passed the certification examination. The ABA took this step to reassure the public that the diplomate continues to demonstrate the attributes of a Board-certified anesthesiologist. The ABMS approved the ABA recertification proposal in March 1996. Subsequently, the ABA changed the name of the CDQ program to recertification.

In 1998, the ABMS approved the ABA proposals for recertification in the subspecialties of critical care medicine and pain management. The credentialing requirements, examination, and passing standard are the same for certification and recertification. The ABA will administer the pain management examination to recertification candidates annually beginning in 2001.

The ABA Recertification Programs include a commitment to continuing education, assessment of the quality of practice in the local environment, and an evaluation of knowledge. *Diplomates who hold a certificate that is not time-limited may voluntarily elect to apply to the ABA for recertification. The ABA will not alter the status of their certification if they do not recertify.*

B. Requirements

The ABA recertification programs include two major components: an evaluation of the quality of current practice conducted at the local level and a secure written examination.

To be admissible to an ABA recertification examination, the applicant shall be capable of performing independently the entire scope of specialty or subspecialty practice and must:

- Be a physician to whom the ABA previously awarded certification in the specialty or subspecialty.
- Submit evidence that he or she holds a permanent, unconditional, unrestricted, and unexpired license to practice medicine in the state or jurisdiction of the United States or the province of Canada where a substantial portion of the applicant's practice takes place. The applicant must inform the ABA of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the ABA will determine whether the applicant shall be admitted to the recertification examination.
- Have on file in the ABA office documentation solicited by the ABA from the hospital/facility chief of staff, or equivalent, attesting to the applicant's current privileges where a substantial portion of the applicant's practice takes place. If the applicant's practice is entirely office-based, three letters of reference solicited by the ABA from referring physicians should be on file.

The ABA shall issue a recertification certificate to the applicant who is accepted for and satisfies the recertification examination requirement established by the ABA.

C. Application Procedure

Individuals may apply for admission to the recertification program at whatever interval they prefer following certification by the ABA in the specialty or subspecialty.

The proper application form and other information may be obtained from the ABA Web site or by writing to the Secretary of the

ABA at 4101 Lake Boone Trail, Suite 510, Raleigh, NC 27607-7506. *Telephone requests are not acceptable.*

Application for admission to an ABA recertification program must be made to the Secretary on a form prescribed by the Board. *Photocopies or facsimiles of the application form are not acceptable.*

The application form includes the identical Acknowledgement and Release statements included in the application for initial certification. The recertification applicant shall be required to sign each statement.

D. Filing and Documentation Deadlines

The ABA must receive the completed application and the appropriate fee for the specialty recertification examination on or before November 15 of the year prior to the examination year. The ABA must receive the completed application and the appropriate fee for a subspecialty recertification examination on or before March 1 of the examination year. *Applications received after the deadline will not be accepted.*

The ABA must receive all the documentation it requires to make a determination about an applicant's qualifications for admission to the specialty recertification examination no later than January 15, and to subspecialty recertification examination no later than May 1, of the examination year. This includes but is not limited to evidence of medical licensure and verification of current credentialing/hospital privileges. An application will not be accepted if the required documentation is not received by that date. *It ultimately is the responsibility of every applicant to ensure that the ABA receives all required documentation in a timely manner.*

E. Fees

The application fee is \$700 for admission to the anesthesiology recertification program and \$1,000 for admission to a subspecialty recertification program. The fee must accompany the application.

The specialty application fee includes a nonrefundable fee for administrative services of \$200. The subspecialty application fee includes a nonrefundable fee of \$250 for administrative services.

The reexamination fee is \$500 for the anesthesiology recertification examination and \$750 for a subspecialty recertification examination.

A charge of \$50 will be made whenever a check is returned for nonpayment.

F. Examination System

The ABA shall determine that admission to the recertification examination is warranted when a judgment of clinical competence can be made from the information submitted by and on behalf of the applicant. The ABA will notify an applicant who is accepted as a candidate for recertification after approval of all credentials.

The Board, acting as a committee of the whole, reserves the right not to accept an application. The applicant has the right to seek review of such decision.

The Board reserves the right to correct clerical errors affecting its decisions.

The specialty recertification examination is designed to assess current knowledge of the breadth of anesthesia practice and presents clinically relevant items that apply to all types of anesthesia practice. The subspecialty recertification examinations are designed to test for the presence of knowledge considered essential for the ABA diplomate to function as a practitioner of the subspecialty.

The recertification examinations are administered once each year. The ABA will mail notice to all eligible candidates announcing the location(s) and date of a recertification examination approximately 4 months prior to the date of its scheduled administration.

Every candidate has three opportunities to satisfy the recertification examination requirement. At its discretion, the ABA may excuse a candidate from at most one recertification examination without forfeiture of the opportunity. The ABA will declare an application void when the candidate does not pass the examination on the third opportunity. Physicians whose application has been declared void may reapply to the ABA.

G. Status of Individuals

Inquiries about the current status of physicians should be addressed to the ABA office. For physicians certified by the ABA who subsequently complete the recertification program, the ABA will affirm their diplomate status and the year of their recertification. For others, the response to the inquiry will be in keeping with ABA policy.

H. Reapplication

Physicians, whether previously recertified or not, may apply for recertification at whatever interval they prefer. To reapply, the physician must submit a new application. Such application shall be subject to the fees, rules, privileges, and requirements that apply at the time of reapplication. The applicant who is judged to meet existing requirements will be accepted as a candidate for recertification.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Colon and Rectal Surgery [ABCRS] to ascertain whether the information below is current.)

Qualifications of Candidates

All candidates shall comply with the following regulations:

General Requirements

1. A candidate shall appear personally before the Board and shall submit to the required examinations.
2. A candidate shall limit the majority of his/her practice to colon and rectal surgery.
3. A candidate may be required to deliver to the Board sufficient case reports to demonstrate proficiency in colon and rectal surgery.
4. A bibliography of papers and books published by the candidate shall be submitted to the Board upon its request.
5. The moral and ethical fitness of a candidate must be satisfactory to the Board and in conformity with the *Statements on Principles* of the American College of Surgeons and the *Principles of Medical Ethics* of the American Medical Association. Practices not conforming therewith may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

Professional Qualifications

1. A candidate must have completed an accredited residency program in colon and rectal surgery following successful completion of general surgical training in an ACGME-accredited residency program.
2. All candidates must have a currently *valid* registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province and must continue to be licensed throughout the certification process.
3. A candidate must successfully complete the Qualifying Examination of the American Board of Surgery before being admitted to the ABCRS Written Examination (Part I).

4. A candidate must achieve certification by the American Board of Surgery before being admitted to the ABCRS Oral Examination (Part II).

Application for Examination

Each candidate for examination must complete and submit an Application for Examination, which may be obtained from the secretary of the Board. Applications must be submitted before July 15 of each year.

The application must be accompanied by two unmounted, recent photographs of the applicant and the required application fee.

Within 2 weeks after conclusion of the training program, the applicant must submit to the secretary of the Board a prescribed form, listing all operative procedures performed during the training period. This form is available from the secretary of the Board and must be countersigned by the program director.

The acceptability of a candidate for examination depends not only upon completion of the requirements listed under "Qualifications for Candidates" but also upon information available to the Board regarding the candidate's professional maturity, surgical judgment, and technical competence.

Examinations

To achieve certification by the ABCRS, a candidate must pass a Written Examination (Part I) and an Oral Examination (Part II). The Written Examination is offered in the spring of the year, and a candidate is required to pass this examination before being permitted to take the Oral Examination, which is given in the fall of the year.

Examinations are conducted at times and places determined by the Board, and this information may be obtained from the Board office. It is also published in *Diseases of the Colon and Rectum* and in the *Journal of the American Medical Association*. Examinations will be held in one designated city in the United States.

Part I—Written Examination

The Written Examination is an assessment of a candidate's knowledge of the theory and practice of colon and rectal surgery, with separate examinations in pathology and radiology. The written portion of the examination is a 4-hour test of multiple-choice questions covering the spectrum of colon and rectal surgery and the body of basic science pertinent to it. The pathology and radiology portions of the examination are each 1 hour in length and consist of questions and slide presentations.

Part II—Oral Examination

The Oral Examination is conducted by members of the Board or its designated examiners. Its objective is to evaluate the candidate's clinical experience, problem-solving ability, and surgical judgment and to ascertain the candidate's knowledge of current literature on colon and rectal diseases and surgery. Each candidate will undergo at least three 30-minute oral examinations by three 2-member examining teams.

Examination Results

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

Reexaminations

A candidate who has failed either the written or oral part of the examination may be reexamined after 1 year has elapsed.

A candidate who fails to pass either the written or oral portion of the examination may repeat that part of the examination twice,

thus offering the candidate three opportunities to pass each part of the examination.

A candidate who fails to pass either the written or oral portion of the examination three times may not repeat the examination without satisfactory completion of an approved colon and rectal surgery residency program and submission of a new application for examination.

Status of Applicant

The Board does not use or sanction the terms "Board eligible" or "Board qualified." The status of an applicant with the Board is determined by and varies with the current status of his/her credentials.

A candidate must apply to the Board's certification process within 5 years after completion of approved colon and rectal surgery training.

The entire certification process with the Board must be successfully completed within 7 years following approval of the formal application. In addition, a candidate whose application for examination has been approved but who does not take the examination within 3 years must submit a new application.

In exceptional or unusual circumstances, the Board may, at its discretion, waive one or more of the limitations specified under "Status of Applicant."

Fees

Application fee: A nonrefundable fee of \$300 shall accompany the application.

Written Examination fee (Part I): A fee of \$400 is due and payable when the candidate is notified of approval to take the Written Examination.

Oral Examination fee (Part II): A fee of \$500 is due and payable when the candidate is notified of approval to take the Oral Examination.

Reexamination fee: Fees for reexamination are the same as shown above for each examination.

Withdrawal from examination: A candidate who withdraws must notify the Board office at least 10 business days before a scheduled examination. A candidate who fails to appear for examination or who withdraws without giving at least 10 days' notice as defined above will forfeit \$100 of the designated examination fee and will have to resubmit the forfeited amount before being admitted to the next scheduled examination.

Late applications: Recognizing that a situation may arise that prevents an applicant from meeting the July 15 deadline, the Board has a provision for late applications. Late applications are those that are postmarked from July 16 through August 15 each year. There is a nonrefundable late application fee of \$100, bringing the total processing fee for a late application to \$400. No applications postmarked after August 15 will be accepted.

Fees are subject to change as directed by the Board.

Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants. A request for reconsideration, which is the first step, must be made in writing and received by the Board office within 60 days of the date of notice from the Board of the action in question. A copy of the Reconsideration and Appeals Policy may be obtained from the Board office upon request.

Certification

A candidate who has met all the requirements and successfully completed the examinations of the ABCRS will be issued a certificate attesting to his/her qualifications in colon and rectal surgery.

The certificate shall be signed by the president or vice president and the secretary and shall bear the corporate seal of the Board.

The certificate granted by the Board does not confer privilege or license to practice colon and rectal surgery but is evidence that a physician's qualifications for specialty practice are recognized by his/her peers. It is not intended to define the requirements for membership on hospital staffs, to gain special recognition or privileges for its diplomates, to define the scope of specialty practice, or to state who may or may not engage in the practice of the specialty.

Unless the candidate specifies otherwise, the Board forwards the names of candidates who have achieved certification to the American Board of Medical Specialties (ABMS) for publication in the *Official ABMS Directory of Board Certified Medical Specialists*, published jointly by the ABMS and Elsevier Science.

Time-Limited Certification

Beginning with those candidates who passed the certifying examination in 1990 and thereafter, the ABCRS will issue time-limited certificates. Certificates will be valid for 10 years from the date of certification, after which the certificates will no longer be valid. (*Note: Time-limited certification will not affect diplomates holding certificates issued prior to 1990.*)

Recertification

The ABCRS offers recertification in the specialty. Certificates can be renewed prior to expiration by fulfilling the requirements for recertification specified by the Board. The recertification examination is offered annually, on a voluntary basis, to all certified colon and rectal surgeons who apply and meet the Board's requirements. A recertification information booklet, which outlines the requirements and procedures, is available by writing to the Board office.

Revocation of Certificates

The filing of an application for examination, participating in examination, and accepting a certificate are voluntary acts. Therefore, the Board assumes no responsibility for any effect that certification or failure to obtain certification may have on the private or professional activities of candidates.

When an application is submitted, candidates are required to sign an agreement, a portion of which reads as follows: "I agree to disqualification from examination or from the issuance of a certificate, and I agree to the forfeiture and redelivery of such certificate in the event that any of the statements herein made by me at this time or at any time in the past or future in regard to my application for a certificate are false or in the event that any of the rules and regulations of the Board governing such examinations and certificate are violated by me."

Certificates that have been issued are subject to the provisions of the Articles of Incorporation and the Constitution and Bylaws of the American Board of Colon and Rectal Surgery, Inc, and may be revoked for violation of any of these provisions.

Examination of Candidates With Disabilities

The ABCRS supports the intent of the Americans with Disabilities Act. The Board will make a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process that are appropriate for such disabilities but that do not alter the measurement of the skills or knowledge that the examination process is intended to test.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Dermatology [ABD] to ascertain whether the information below is current.)

Requirements for Eligibility to Take the Examination

Each applicant must satisfy the following requirements before he/she is eligible to take the certifying examination of the Board.

General Qualifications

1. The candidate must have graduated from a medical school in the United States accredited by the Liaison Committee for Medical Education (LCME), an accredited medical school in Canada, or an accredited osteopathic school in the United States; if a graduate of a foreign medical school, the candidate must possess the standard certificate of the Educational Commission for Foreign Medical Graduates (ECFMG). If, however, the foreign medical school graduate is in training in an accredited program in Canada, the Board will recognize the certificate of the Medical Council of Canada.
2. The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

Residency Training Requirements

1. Candidates for certification by the ABD are required to have a total of 4 years of postgraduate training, as described below in Sections (a) and (b).
 - a. The first year must consist of clinical training in one of the following types of broad-based programs in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a similar program in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC): transitional year (formerly called flexible first postgraduate year) or a first-year residency in internal medi-

cine, general surgery, family practice, obstetrics and gynecology, pediatrics, or emergency medicine.

- b. Three years of full-time training as a resident in a dermatology residency training program in the United States accredited by the ACGME or 3 years of full-time training as a resident in a dermatology residency training program in Canada accredited by the RCPSC. Accreditation of dermatology training programs in the United States is the responsibility of the Residency Review Committee (RRC) for Dermatology acting with authority delegated to it by the ACGME (accredited dermatology residency training programs and clinical programs for first post-graduate year credit are listed in this directory).
- c. At least 75% of the resident's time throughout each year (PGY-2, PGY-3, PGY-4) of dermatology residency training must be related to the direct care of dermatologic outpatients and inpatients; this includes clinical conferences and didactic lectures related to patient care, consultations, and inpatient rounds. During the 3 years of dermatology residency, therefore, 225% of the 300% (100% per year) of training must involve these direct patient care activities. In special training tracks, which are discussed further under d. below, residents must satisfy the 225% requirement over the 3 years (PGY-2, PGY-3, PGY-4), 4 years (PGY-2, PGY-3, PGY-4, PGY-5), or 5 years (PGY-2, PGY-3, PGY-4, PGY-5, PGY-6) of dermatology training.

In addition, special-training tracks must include the equivalent of one 1/2 day clinic per week each year until the 225% requirement is met. Continuity of patient care should be stressed as much as possible in this clinic experience. Rotations on the consultation service, for a period comparable to the time similarly scheduled for general dermatology residents, may be substituted for the clinic time during the special training track years of the residency.

Dermatopathology, microbiology, and other basic science lectures, seminars, and conferences are essential components of the resident's training (see the Program Requirements for Residency Education in Dermatology).

The Board also emphasizes the importance of basic and clinical investigation in the educational experience of trainees. Accordingly, all residents should participate in basic and/or clinical research during their training.

- d. For those candidates whose career plans involve a primary commitment to investigative or academic dermatology, a special training track, which must assure adequate clinical education and experience in accordance with the general requirements described above, may also be acceptable. Program directors should contact the executive director of the Board for information concerning this special track, such as eligibility requirements and when and how to submit applications to the Board. The essential elements of such training tracks are as follows:

- 1) The first year (PGY2) of this track must be at least 75% clinical in character.
- 2) Investigative or academic experience can be integrated with the required additional clinical training during the second (PGY3) and/or third (PGY4) year(s).
- 3) Please refer to c. above.
- 4) Requests for approval of this special track must be submitted *prospectively*, at least 4 months prior to the beginning of such training. This will be on or before March 1 of the PGY2 year for a special track beginning on July 1 of the PGY3 year, or later if special track training is to begin later. Requests earlier than January 1 of the PGY2 year will not be considered because the program director must have had an opportunity to judge the clinical potential of the trainee.

The request for consideration of this investigative/academic track must include details of the scheduled program and time commitments during the entire training period of these candidates. It is incumbent upon program directors to select candidates for this special training track whose skills and learning capabilities permit the acquisition of clinical competence as well as the execution of their investigative or academic responsibilities. Moreover, the program director must monitor the training of these residents throughout their residency and must validate their clinical experience at the completion of their residencies.

2. A preliminary registration form must be filed by the candidate and signed by his/her training director shortly after the resident begins residency training in dermatology (ie, by August 1 or within 30 days of the start of training).
3. It is mandatory that the training director submit a yearly report form for each resident to the Board office by August 1 after completion of the first and second year of training and by May 15 for residents who will complete their third year of training on June 30. In order for a candidate to take the certifying examination, the training director must certify that each year of training was completed in a satisfactory manner.
4. Training must be completed within 5 years after the beginning of dermatology residency, except when military service or other compelling circumstances intervene.
5. It is the responsibility of the residency program director to determine if a resident has satisfactorily completed the required 3 years of dermatology training and is therefore eligible to sit for the certifying examination of the ABD.

Guidelines for Determining Adequacy of Clinical Training

The following guidelines are designed to assist program directors in their determination of the adequacy of the clinical training of residents and to assure satisfaction of the eligibility requirements for certification by the ABD. Of special concern are those residents on the special investigative/academic track or those residents whose training experience differs from the standard 36 months of full-time clinical training, as approved for each program by the RRC of the ACGME:

- a. In general, high priority should be given to completing 36 continuous months of full-time dermatology training. For most residents, this will consist of full-time clinical training; for residents with a primary commitment to investigative or academic dermatology, this may be a special training track, as defined previously.
- b. Any departure from (a), as required, for example, for a medical leave of absence, should be documented and fully justified in the resident evaluation forms filed annually with the Board by the training program director.
- c. An absence exceeding 6 weeks in any 1 academic year or a total of 14 weeks over 3 years, including vacation, should be approved only under truly exceptional circumstances. In addition, any resident approved to sit for the certifying examination despite such an absence should have completed each year of training in an above-average or excellent manner.
- d. Any resident who will have been absent more than 6 weeks in 1 year or 14 weeks over 3 years and whose performance has not been uniformly above average or excellent throughout residency training should be required to complete an additional period of training at least equal in length to the total period of absence in excess of routinely provided total vacation time. If the program director anticipates that this additional training will be completed in a satisfactory manner before September 1, the director may approve the resident to sit for the certifying examination in that year, just as if training had been completed by July 1.

Registration for the Examination of the Board

Candidates who have completed the training requirements as outlined above are eligible to apply for examination by the Board. Candidates should request an Application for Certification Form from the office of the executive director of the Board. However, for those candidates who are completing their residency training, application forms will be sent to the program directors for distribution to each candidate. The completed application must be filed with the Board office before May 1 of the year in which the candidate plans to take the examination. Physicians who complete their residency training in dermatology by July 1 of a given year are eligible to apply to take the examination in the fall of that year. Under the special conditions described previously ("Guidelines for Determining Adequacy of Clinical Training"), candidates completing additional (make-up) training before September 1 may also be eligible to take the fall certifying examination. It is emphasized that it is the candidate's responsibility to send a completed application form to the Board if he/she plans to take the certifying examination of the Board.

A candidate is not considered an "active" candidate until his/her application has been received and approved by the Board. This approval includes a review of the application and annual evaluation reports from the candidate's training director. After the application is approved, the candidate is required to take the examination within 3 years. Candidates who do not exercise the examination privilege within 3 years of the date they are declared eligible will be required to file a new application and have their eligibility for examination reviewed by the Requirements Committee. If the reapplication is approved by the Board, the candidate is again eligible to take the examination for another 3-year period.

The Board does not use the term "Board eligible" in corresponding with directors of hospitals or others who send inquiries to the Board office. On written request by a candidate and payment of a fee, the Board will send to the candidate a letter stating his/her status with the Board at any given time.

Combined Training in Dermatology and Internal Medicine

The American Board of Dermatology and the American Board of Internal Medicine have conjointly approved the Guidelines for Combined Training in Dermatology and Internal Medicine, copies of which may be obtained from the Board office.

Program directors interested in establishing a combined training program should write to the Board office for application forms, which must be reviewed and approved by the American Board of Dermatology and the American Board of Internal Medicine.

Board Examination

The certifying examination in dermatology, which is administered over a period of 2 days, includes the following:

1. **Comprehensive Multiple-Choice Examination in Dermatology (Part I):** This is a 3-hour comprehensive examination, and was formerly referred to as the Written examination. It tests the candidate's knowledge of the basic science and clinical aspects of dermatology, including all the related disciplines. Among the topics included in this part of the examination are clinical dermatology, pediatric dermatology, preventive dermatology, entomology, epidemiology, dermatopathology, cutaneous allergy and immunology, dermatologic surgery, cutaneous oncology, sexually transmitted diseases, internal medicine as it pertains to dermatology, medical ethics, photobiology, and cutaneous microbiology, as well as anatomy, physiology, biochemistry, molecular biology, radiation physics, radiation therapy, physical therapy, pharmacology, genetics, and electron microscopy as related to dermatology.

Considerable emphasis is placed on comprehensive knowledge of the literature.

2. **Examination in Clinical and Laboratory Dermatology (Part IIA):** Projected Kodachrome slides are utilized in this part of the examination. Candidates must answer multiple-choice-type questions about the projected pictorial material, which is drawn from all areas of clinical and laboratory dermatology. Examples of the types of slides used include photographs of patients; diagrams and illustrative drawings and pictures of dermatologic surgical procedures, including Mohs micrographic surgery, hair transplantation, dermabrasion, sclerotherapy, liposuction, chemical peels and tissue augmentation, histopathologic sections, fungal cultures, culture mounts, bacterial cultures, Tzanck preparations, skin scrapings and smears, roentgenograms, histochemical and fluorescent photomicrographs, electron micrographs, darkfield micrographs and drawings or photographs of organisms, including viruses, rickettsiae, bacteria, and parasites that affect the skin.
3. **Examination in Dermatopathology (Part IIB):** In this section, candidates are questioned on histopathologic slides that they examine microscopically, utilizing personal or rented microscopes. This section of the examination encompasses the entire spectrum of dermatopathology.

For the purposes of scoring, the Examination in Clinical and Laboratory Dermatology is combined with the Examination in Dermatopathology, and candidates must pass this combined examination as well as the Comprehensive Multiple Choice Examination in Dermatology in order to be certified. If a candidate fails either the combined Examination in Clinical and Laboratory Dermatology/Examination in Dermatopathology or the Comprehensive Multiple Choice Examination in Dermatology and not the other, only the failed component must be repeated.

A candidate who, after investigation by the Board, has been found to have engaged in cheating or irregular behavior in connection with an examination of the Board, whether or not such behavior had an effect on the candidate's performance on the examination, shall have his or her examination invalidated. Such candidate shall not be certified and may be barred from retaking the examination in the future for a period determined by the Board in its sole discretion. Also see Appeals Procedure, below.

The examination is given annually in the fall over a 2-day period and lasts a total of approximately 10 hours. In 2002, it will be held on October 13 and 14 at the Holiday Inn O'Hare in Rosemont, Illinois, which is in the O'Hare International Airport area of Chicago.

Reexamination

With their initial examination application, candidates have a 3-year period during which they may take the examination or any necessary reexamination on either a failed part (see above) or both parts of the examination. For a reexamination, they must notify the Board office by May 1 of the year they plan to retake the examination. If a candidate has not passed or does not take the examination during this 3-year period, he/she must reapply and complete the necessary forms, after which he/she will have another 3-year period of eligibility during which to take the examination or reexamination. For further information concerning this as well as the appropriate fees required, the Board office should be contacted.

Candidates With Disabilities

The ABD supports the intent of the Americans with Disabilities Act (ADA) and, therefore, will provide or allow the use of necessary auxiliary aids, services, or testing conditions that do not fundamentally alter the measurement of the skills or knowledge the Board assessment program is intended to test. In order to implement this

policy, notification of the need for special testing circumstances must be given to the ABD by a candidate for certification at the time that he/she submits the application for any of the Board's certifying examinations. This deadline is necessary in order to allow the Board to request the necessary documentation, to review the records, and to verify the disability, if necessary. In addition, since this policy also applies to the In-Training Examination, which is under the jurisdiction of the ABD, appropriate advance notification of the need for special testing circumstances must be provided when the application for the In-Training Examination is submitted by the department.

Upon receipt of such request, the ABD will initiate the appropriate procedural steps, but it should be understood that all special arrangements must be made and agreed upon in advance; special arrangements cannot be made at the time the examination is given. Therefore, early notification of the need for special testing circumstances is encouraged.

Chemical Dependency or Substance Abuse

A candidate with a chemical dependency or substance abuse problem will not be permitted to take the examination unless he/she can submit evidence, which must be verifiable, that the disorder is being treated and is under control. Individuals with such problems or a history thereof must provide the necessary documentation at the time of application to take the examination. A confirmatory letter from a licensed physician within 1 month of the examination stating that the disorder no longer exists or is currently controlled is also necessary.

Certification

After meeting the above requirements and passing the examination, the candidate will be awarded a certificate that acknowledges that he/she has completed the required course of graduate study and clinical training, has met other specific standards and qualifications, and has passed the examination conducted by the Board. The candidate is then referred to as a diplomate of the American Board of Dermatology, Inc. The names of diplomates of the Board appear in *The Official ABMS Directory of Board Certified Medical Specialists*, published by Elsevier Science in cooperation with the American Board of Medical Specialties (ABMS).

Each certificate is subject to revocation in the event that (a) the diplomate was not eligible to receive the certificate, whether or not the facts concerning ineligibility were known to the Board when the certificate was issued; (b) the diplomate has made any material misrepresentation or omission in the application for certification or in any other statement to the Board; (c) the diplomate is convicted of or pleads nolo contendere to a crime that, in the judgment of the Board, relates to the practice of medicine; (d) the diplomate is found to have engaged in conduct which, in the judgment of the Board, (i) reflects unethical activity relating to the practice of medicine, or (ii) casts significant doubt on the ability of the diplomate to practice medicine in the best interests of patients; or (e) the diplomate is found by the Board to have (i) engaged in irregular behavior in connection with the examination, (ii) had a license to practice medicine revoked or suspended, (iii) been expelled from a medical society for reasons other than nonpayment of dues or failure to attend meetings, or (iv) taken other action reasonably deemed by the Board to be inconsistent with diplomate status.

Appeals Procedure

The ABD recognizes a candidate's right of appeal following an adverse action at any stage of the certification process. Within the residency program, trainees must be accorded due process in compliance with provisions established by the parent institution and as

stipulated in the *Essentials of Accredited Residencies in Graduate Medical Education* (July 1, 1982) of the ACGME.

Candidates whom the Board has declared ineligible to sit for the certifying examination on the basis of qualifications may appeal such decisions by written request within 90 days of the date of notification of the Board's ruling. A candidate failing a certifying examination may request in writing that his/her examination be re-scored by hand to verify the accuracy of the results as reported. Such requests must be received in the Board office within 60 days of the date of mailing of the examination results to the candidates. A check in the amount of \$35 payable to the American Board of Dermatology must accompany this written request. There shall be no further appeal from failure of an examination.

A candidate found to have engaged in cheating or other irregular behavior in connection with an examination may appeal the Board's finding, any consequent invalidation of the candidate's examination, and any disbarment from future examinations. Such appeal must be received in the Board office within 30 days of mailing the notification of the finding by the Board.

Recertification

The Board began issuing time-limited certificates, valid for 10 years, in 1991, and its process of voluntary recertification was approved by the ABMS in 1994. The first recertification examination, which is a clinically focused, take-home, open-book examination tailored to the candidate's practice profile, was administered for the first time in 1999 and will be administered biennially thereafter. There is no limit on the number of times diplomates may undertake the recertification process. If the candidate does not successfully complete the recertification process prior to expiration of his/her time-limited certificate, he/she will remain eligible to participate in the recertification process but will cease to be Board certified until the process is successfully completed and a new time-limited certificate is issued. If the candidate successfully completes the recertification process before expiration of his/her certificate, eg, in year 8 or 9 of the 10 years, the new certificate will be issued for 10 years commencing January 1 of the year immediately following the expiration date of the prior certificate. Diplomates with time-limited certificates may take a recertification examination any year in which it is offered. For formal (official) completion of the recertification process, however, candidates must take either of the two recertification examinations that immediately precede the expiration of their time-limited certificate.

Diplomates with lifetime certification may elect to pursue voluntary recertification in any given year the examination is offered. Any questions or correspondence relating to the recertification process should be directed to the executive director of the ABD. Candidates are reminded that recertification requires completion of 90 hours of Category 1 CME during the 3 years preceding the date of the recertification application but including also the first 3 months of the year of administration of the recertification examination. This CME should be spent in educational activities that are related to dermatology, specifically those that would be approved by the AAD for its CME Award. Contact the Board for further information.

Deadline for receipt of applications is March 1. Requests for applications should be directed to the office of the ABD. Applications may also be downloaded from the Board's Web site (<http://www.abderm.org>). Examinations are mailed to approved candidates on June 1. Candidates have 6 weeks to complete the examination and return the answer sheets. Notification of performance on the examination and other pertinent information will be mailed to the candidates approximately 6 to 8 weeks later.

An **appeals procedure** similar to that described for the certifying examination is available for candidates for recertification who were declared ineligible by the Board for the recertification process or who failed the recertification examination. Candidates submitting such appeals should contact the Board for additional current information.

It is to be noted that at this time a recertification process has not been approved for subspecialty certification processes in dermatopathology, clinical and laboratory dermatological immunology, or pediatric dermatology.

Fees for Examination and Reexamination

The directors of the Board serve without compensation. Fees are based on the actual expenses incurred in administration of the Board office and related activities and on the costs of development and administration of the Board examinations.

All fees are payable when the application for an examination is submitted and are applied to the first examination of that type given after approval of the application. Except as indicated below, or because of verifiable extenuating circumstances, there will be no refunds of any of these fees. Contact the Board office for the current fee schedule.

All checks are to be made payable to The American Board of Dermatology, Inc.

When a candidate's application for the certifying examination in Dermatology or a subspecialty certification examination is disapproved, the Board retains an administrative fee of \$100 and will refund the balance to the candidate.

If a candidate withdraws within 10 days of the examination or fails to appear for the examination and does not provide verifiable evidence of extenuating circumstances that prevented him or her from appearing for the examination, the Board will retain the entire examination fee. On reapplying, such candidates will be required to again submit the examination fee in effect at the time of the application.

Candidates who fail the certifying examination in Dermatology retain the right to *apply* to retake the examination in subsequent years. For further information concerning Board policy in effect and for the applicable examination fee, candidates are advised to write or call the Board office (313 874-1088). Candidates who *do not take* the certifying examination at the first opportunity after completion of their training are also advised to contact the Board office for clarification of Board policy and the examination fee if they intend to apply to take the certifying examination in any given year.

Publication

The ABD publishes a booklet of information, which may be obtained from the Board office.

All correspondence should be sent to

Antoinette F Hood, MD
Executive Director

Henry Ford Health System
One Ford Place
Detroit, MI 48202-3450

Dermatopathology Subspecialty Certification

Subspecialty certification in Dermatopathology is a joint and equal function of the ABD and the American Board of Pathology (ABP). Such function will relate to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying to sit for this certifying examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in either the United States or Canada.

All candidates for this certification must satisfy the following requirements:

Prerequisites

1. Primary certification by both the ABD and the ABP (anatomic pathology or anatomic and clinical pathology).
2. Primary certification by either the ABD or the ABP (anatomic pathology or anatomic and clinical pathology) and the satisfactory completion of 1 year of training in dermatopathology in a program accredited for such training (see below) by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in dermatology or pathology. The dermatologist applicant must spend one-half of the required training time in pathology. The pathologist applicant must spend one-half of the required training time in clinical dermatology.

Training

Accredited institutional training programs in dermatopathology are an equal and joint function of the departments of dermatology and pathology of that institution. Training programs in dermatopathology are reviewed and accredited by the Residency Review Subcommittee for Dermatopathology, which includes three members from the RRC for Dermatology and three members from the RRC for Pathology. Upon recommendation by this subcommittee, training programs in dermatopathology are accredited by conjoint action of the RRCs for Dermatology and Pathology acting with authority delegated by the ACGME. Information concerning accredited dermatopathology training programs may be found in this *Directory*.

Examination: Deadline for Application and Date of Examination

Candidates who have satisfied the above requirements are eligible to apply to the Board to take the examination for subspecialty certification in Dermatopathology, which is a comprehensive assessment of the candidates' knowledge of dermatopathology, including the related basic sciences, and laboratory and clinical areas pertaining to this discipline.

Candidates planning to take the subspecialty certification examination should request an application from the office of the executive director of the ABD. The deadline for receipt of applications is July 1 of the year in which the candidate plans to take the examination. The date of the next examination has not been determined.

Pediatric Dermatology Subspecialty Certification

A certification process is being developed for the subspecialty of pediatric dermatology. It is anticipated that the first examination will be administered in 2002 or 2003. Further details about this examination will be available from the Board office.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Emergency Medicine [ABEM] to ascertain whether the information below is current.)

Requirements for Certification in Emergency Medicine

An applicant must satisfy all credential requirements at the time the application is submitted. Requirements fulfilled after the date of application will not be considered.

The applicant must have graduated from medical school.

1. Graduates of approved schools of osteopathic medicine in the United States are considered when they have satisfactorily met the credential requirements as outlined.
2. An applicant graduating from a medical school other than one in the United States, its territories, or Canada must provide the Board with a verified and translated diploma.

Throughout the certification process, applicants and candidates must hold a current license to practice medicine in at least one jurisdiction in the United States, its territories, or Canada, and in each jurisdiction in which they practice. All licenses held by the applicant must be valid, unrestricted, and unqualified.

The applicant must have successfully completed a total of 36 months of postmedical school training, under the control of an accredited emergency medicine residency program. Emergency medicine programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada for Canadian programs.

If the emergency medicine residency training program is structured so that it exceeds the length of training specified above, the resident must successfully complete the requirements of his/her residency program to apply under the emergency medicine residency category of application.

(Note: For residents who began their emergency medicine training prior to July 1, 1987, the candidate must have successfully completed a total of 36 months of postmedical school training, at least 24 months of which were under the control of an accredited emergency medicine residency program at the PGY2 level and above.)

The applicant must submit evidence of 50 hours of continuing medical education in emergency medicine annually, acceptable to the Board, starting 1 year from the date of graduation from the emergency medicine residency program and continuing until the date of application. If a resident applies to the Board within 1 year of graduation, no continuing medical education is required.

Combined Training Programs

A special agreement exists between the ABEM and the American Board of Pediatrics whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available from either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

A special agreement exists between the ABEM and the American Board of Internal Medicine whereby an applicant may fulfill the training requirements of both Boards by completing joint training in 5 years. Training programs must be approved prospectively by both Boards. Guidelines for combined training have been approved by both Boards and are available from either Board office. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

The American Board of Internal Medicine and the ABEM have approved guidelines for 6-year training that, upon completion, will provide physicians the option for certification in internal medicine, emergency medicine, and critical care medicine. These guidelines, approved by both boards in February 1999, are applicable to ACGME-accredited programs and residents entering training in July 1999 and after. The guidelines are available from both Board offices. Applicants may not appear for the certifying examination until all training has been satisfactorily completed.

Applications

Applications are distributed in the spring of each year (mid April) and are available from the Board office. Applications are accepted from April 15 through July 31 of each year. A mailing list is maintained throughout the year for requests received during times when applications are not available.

A nonrefundable processing fee must accompany the application at the time it is submitted.

Applicants wishing to be considered for examination must submit a fully completed application form to the Board. The Board will not be responsible for any opinion expressed concerning the individual's credentials for the examination unless it is in writing and over the signature of the president or secretary of the Board.

Examination Information

The certification examination in emergency medicine is composed of two parts, a written examination and an oral examination.

The written certification examination is a 6.5-hour comprehensive examination that is administered once a year. It includes

approximately 335 single-best-answer, multiple-choice test items. Approximately 10% to 15% of the items have a pictorial stimulus.

The oral certification examination is administered twice a year. It includes five simulated patient encounters, each involving one patient, and two simulated situation encounters, each involving more than one patient.

A candidate must successfully complete the fall written examination to be scheduled for either the spring or fall oral examination the following year.

Examination fees are due upon assignment to an examination administration.

Certification

All candidates who successfully complete both the written and the oral certification examinations shall be known as diplomates of the ABEM. Diplomates receive an appropriate certificate, which shall remain the property of ABEM. Certification is for a period of 10 years.

Any certificate issued by the Board shall be subject to revocation at any time, should the Board determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to receive or retain it.

Recertification

To achieve recertification, successful completion of one of the following three examinations is required: the written or oral certification examination or the written recertification examination. In order to maintain diplomate status without lapse, diplomates must successfully complete an examination prior to the expiration of their certificate. If a diplomate does not take a recertification examination within 3 years of the expiration of the certificate, the certification examination (both the written and the oral portions) must be successfully completed to regain diplomate status. Recertification is for a period of 10 years.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Family Practice [ABFP] to ascertain whether the information below is current.)

ABFP Official Definition of Family Practice

Family practice is the medical specialty which is concerned with the total health care of the individual and the family. It is the specialty in breadth which integrates the biological, clinical, and behavioral sciences. The scope of family practice is not limited by age, sex, organ system, or disease entity.

Board Eligibility

The ABFP does not recognize or use the term "board eligible" and does not issue statements concerning "board eligibility." The Board informs an applicant of admissibility to an examination to be given on a specified date after a formal application has been reviewed and approved.

Certification Process

The ABFP administers the certification and recertification examinations in various centers throughout the United States annually, on the second Friday in July.

The ABFP certification and recertification examinations are written tests of cognitive knowledge and problem-solving abilities relevant to family practice. Appropriate subject areas of the following disciplines are included: internal medicine, pediatrics, surgery, obstetrics, gynecology, psychiatry and behavioral sciences, emergent and urgent care, community medicine, and geriatrics.

Elements of the examination include but are not limited to diagnosis, management, and prevention of disease.

The Board makes every effort to be as prompt as possible in notifying candidates of their examination results, and letters of notification may be expected within 4 to 6 weeks following the examination.

Eligibility

All candidates for the American Board of Family Practice Certification Examination must have satisfactorily completed 3 years of training (a full 36 calendar months with 12 months in each of the G1, G2, and G3 years) in a family practice residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) subsequent to receipt of the MD or DO degree from an accredited institution and, when applicable, a Fifth Pathway year, or receipt of a Standard Certificate from the Educational Commission for Foreign Medical Graduates (ECFMG), or compliance with other ACGME requirements for entry into graduate medical training in the United States. If a physician does not meet the eligibility requirements of the ACGME for residency training in family practice, his/her training will not be recognized by the Board.

Candidates who obtained their MD degree from medical schools in the United States or Canada must have attended a school accredited by the Liaison Committee on Medical Education or the Committee for Accreditation of Canadian Medical Schools. Candidates who obtained a DO degree must have graduated from a college of osteopathic medicine accredited by the American Osteopathic Association (AOA). All applicants for the Certification Examination are subject to the approval of the Board, and the final decision regarding any applications rests solely with the ABFP. No candidate will be allowed to take the examination until all fees are paid and all requirements have been satisfactorily met.

The Board prefers all 3 years of postgraduate training to be in the same ACGME-accredited family practice program; however, other training may be considered as equivalent (eg, Flexible/Transitional year, AOA Osteopathic Internship, etc). In these cases, and for physicians who have had international training, each individual's training will be evaluated by the Board. The ABFP requires residency programs to submit prospective requests for advanced placement of residents. Program directors are responsible for notifying the Board prior to the entry of the transferring resident. If a Program director fails to comply, the Board will determine the amount of transfer credit at the time of its discovery of the transfer. Consequently, the resident may receive less credit toward certification than anticipated and may be required to extend the duration of training.

The last 2 years of family practice residency training must be completed in the same accredited program. Transfers after the beginning of the G2 year are approved only in extraordinary circumstances.

Verification of satisfactory completion of residency training must be stated in writing by the program director. All applicants for the certification examination are subject to the approval of the Board, and the final decision regarding any application rests solely with the ABFP.

All candidates' education and training experiences are subject to review and approval by the ABFP. Any variance from the above must have prior written approval of the Board. No credit may be given for any previous training as equivalent to family practice training without the written approval of the Board.

Candidates must complete all training requirements of the Board no later than June 30 of the year of the examination. Applications, supplied to the residents directly through the program director, are made available only to residents expected to meet this requirement. Complete written documentation from the program director

that the resident has, or is expected to have, satisfactorily completed the residency must be received by the Board by June 30. Any such documentation that is received beyond June 30 will result in the candidate being deferred to the following year's examination. Residents who complete their training at an interim date must write to the Board for an application.

Continuing Medical Education (CME)

Candidates who apply for the Certification Examination within 3 years of completion of an ACGME-accredited family practice residency are not required to document any continuing medical education. Candidates who apply after the 3-year period must provide documentation of 50 hours of CME for each subsequent year. A form for documentation of CME and an explanation of the types of CME acceptable to the Board will be provided with the application for those candidates applying after the 3-year period.

Licensure Requirements

All candidates must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by the candidate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the candidate in effect practices in such state, territory, or province. Candidates shall be required to maintain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Any adverse action by a state licensing agency, agreement between a licensing agency and a physician, or voluntary action by a physician that revokes, restricts, or suspends the physician's medical license is a violation of ABFP policy.

Any candidate whose license to practice medicine has been revoked, suspended, or restricted in *any* state or territory of the United States or province of Canada shall be ineligible for certification until such time as the encumbered license is reinstated in full. Should a license be revoked, restricted, or suspended following the submission of an application for certification but prior to the notification of examination results, the application and certification will be simultaneously invalidated.

It is the responsibility of the candidate to inform the Board immediately upon a change in licensure status. If the candidate fails to notify the Board of any suspension, revocation, restriction, or probation within 60 days after the effective date, he/she shall be ineligible to seek certification for up to 1 year following the reinstatement of full and unrestricted licensure. Candidates should be aware that the ABFP receives periodic *Disciplinary Action Reports* from the American Medical Association of actions by states against medical licenses.

In cases where a physician has changed his or her residency deliberately to avoid prosecution, loss of license, or disciplinary action by a state licensing agency, the Board reserves the right to revoke or suspend diplomate status, and/or prohibit application for certification.

An opportunity for certification will be denied to any physician otherwise eligible who has been involved in the fraudulent misrepresentation of certification by the ABFP. Eligibility to make application for certification will be denied to the offending party for a period not to exceed 6 years from the date of discovery of the offense. In the event the individual appeals or otherwise challenges the declaration of ineligibility, the 6-year period shall be postponed until the action of the Board is determined to be final and enforceable. Questions about licensure should be presented to the Board in writing.

Osteopathic Physicians

Physicians who have graduated from an American Osteopathic Association (AOA)-approved school of osteopathic medicine in the United States may qualify for certification if they meet all the same requirements as specified for allopathic medical school graduates. They may apply to ACGME-accredited family practice programs for entry into the first year (G1). Osteopathic physicians who have documented satisfactory completion of an AOA-approved internship (G1) year may receive credit for that portion of the G1 year which meets the American Board of Family Practice guidelines for Advanced-Level Entry or Interprogram Transfers.

All candidates (MD or DO) must satisfactorily complete at least 36 calendar months of accredited graduate medical education. Only the G1 year may be fulfilled by an AOA-approved internship year. The training beyond the G1 year must be completed in continuity in an ACGME-accredited family practice residency program.

Reciprocity Agreements

The American Board of Family Practice has reciprocity agreements with the College of Family Physicians of Canada, the Royal New Zealand College of General Practitioners, and the Royal Australian College of General Practitioners. Diplomates of the ABFP may be eligible to seek certification by these colleges. Members in good standing of these colleges (and the Royal College of General Practitioners of Great Britain) who meet all of the other requirements of the ABFP and reside in the United States may be eligible to take the Certification Examination. Eligibility to sit for the American Board of Family Practice Certification Examination through reciprocity is available only to physicians who have satisfactorily completed formal family practice training accredited by a nationally recognized accrediting organization within the country in which they are certified. Effective August 2000, diplomates of the American Board of Family Practice are no longer eligible to seek certification by the Royal College of General Practitioners of Great Britain.

Canadian Applicants

The following two options are available:

1. Physicians who have satisfactorily completed 2 years of training in a family practice residency program accredited by the College of Family Physicians of Canada may apply for certification by the ABFP upon the successful completion of a third year of accredited family practice residency. The third year of training must be satisfactorily completed in an ACGME-accredited family practice program or, if taken in Canada, must be approved by the College of Family Physicians of Canada. The third year must have prior approval of the American Board of Family Practice and bring the total residency experience into compliance with the ACGME Program Requirements for Residency Education in Family Practice. The request must be accompanied by documentation of satisfactory performance of the first 2 years of training (including a description of the curriculum) signed by the program director.
2. Physicians who have passed the College of Family Physicians of Canada Certification Examination in Family Medicine may apply to sit for the American Board of Family Practice Certification Examination, if they:
 - are members in good standing of the College of Family Physicians of Canada;
 - have completed postgraduate residency training in family medicine accredited by the College of Family Physicians of Canada;
 - have been residents of the United States for at least 6 months;
 - hold a valid and unrestricted license to practice medicine in the United States; and
 - are actively involved in family practice in the United States.

Registrants of the Royal College of General Practitioners (Great Britain)

Physicians who have been certified by the Royal College of General Practitioners by examination may apply to sit for the American Board of Family Practice Certification Examination if they:

- are members in good standing of the Royal College of General Practitioners;
- possess a Certificate of Prescribed/Equivalent Experience issued by the Joint Committee on Postgraduate Training for General Practice;
- reside in the United States;
- hold a valid and unrestricted license to practice medicine in the United States; and
- are actively involved in family practice in the United States.

Members of the Royal New Zealand College of General Practitioners

Physicians who are members of the Royal New Zealand College of General Practitioners may apply to sit for the American Board of Family Practice Certification Examination if they:

- are members in good standing of the Royal New Zealand College of General Practitioners;
- have completed the General Practice Vocational Training Program;
- reside in the United States;
- hold a valid and unrestricted license to practice medicine in the United States; and
- are actively involved in family practice in the United States.

Fellows of the Royal Australian College of General Practitioners

Physicians who are fellows of the Royal Australian College of General Practitioners may apply to sit for the American Board of Family Practice Certification Examination if they:

- are members in good standing of the Royal Australian College of General Practitioners;
- have completed the Royal Australian College of General Practice Training Program;
- reside in the United States;
- hold a valid and unrestricted license to practice medicine in the United States; and
- are actively involved in family practice in the United States.

Recertification Process

The American Board of Family Practice confers diplomate status for the 7-year period specified on the certificate. In order to maintain diplomate status, the physician must be recertified before the certificate expires. Although the certificate is dated for 7 years, the Board offers the recertification process on a 6-year cycle. This allows a reserve year for those diplomates who for some reason are unable to participate in the sixth year, or in cases where the diplomate fails to receive a satisfactory score in the sixth year. For diplomates who participate in the recertification process during the sixth year and pass, the new certificate of 7 years' duration is dated from the time of that examination.

Should a diplomate not be recertified by the end of the seventh year, the certificate will expire and the physician will lose diplomate status. Once the certificate has expired, the physician may not represent himself/herself to the profession or the public as being certified unless and until successfully recertified by the American Board of Family Practice. The physician may reapply for a future recertification examination, but must meet all criteria in effect at that time.

Requirements for Recertification

- A. Submission of a formal application.

- B. Documentation of 300 hours of approvable continuing medical education.
- C. Submission of statement of acknowledgment and compliance with Board policy regarding medical licensure.
- D. Satisfactory completion of the office record review portion of the recertification process.
- E. Satisfactory performance on the written test of cognitive knowledge.

Diplomates will be given advance notice of any changes in the recertification requirements.

Reexamination

Candidates who fail the examination may apply for admission to the next annual examination. There is no limit to the number of times a qualified candidate may take the examination when it is offered, provided the qualifications are met with each reapplication. In addition to valid and unrestricted licensure status, 50 hours per year of CME since the last application are required for reexamination. Full fees are charged for each examination.

Certificates of Added Qualifications (CAQs)

The American Board of Family Practice currently offers Certificates of Added Qualifications (CAQs) in Geriatrics, Sports Medicine, and Adolescent Medicine. These CAQs are offered in conjunction with other medical boards. Successful CAQ candidates will be awarded the ABFP Certificate of Added Qualifications. The certificate will be valid for 10 years, at which time recertification is required for renewal of the certificate.

If for any reason *primary* certification in family practice is lost (eg, expiration, revocation, etc), the certificate of added qualification will be simultaneously withdrawn. With restoration of the primary certificate, the CAQ will be reinstated for any remaining period of time on the CAQ certificate.

Questions or comments about the CAQ may be addressed to ABFP staff at 888 995-5700, extension 300.

Geriatric Medicine

In a joint venture, the American Board of Family Practice and the American Board of Internal Medicine offer a Certificate of Added Qualifications in Geriatric Medicine. The "added certificate" is designed to recognize excellence among those diplomates who provide care to the elderly. Geriatric Medicine Examinations are given annually. Announcements will be made in the *Journal of the American Board of Family Practice* and on the ABFP Web page concerning exact dates and the application process.

Certification Requirements

1. Family physicians must be certified by the American Board of Family Practice and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Diplomates may qualify by satisfactory completion of an ACGME-accredited fellowship training program in geriatric medicine.
4. Diplomates must achieve a satisfactory score on the one-day Geriatric Medicine Examination.

Recertification Requirements

The recertification process for the geriatric medicine certificate is completed over a 2-year period. It may begin in the eighth year of the 10-year certificate and includes the following requirements:

1. current primary certification in family practice at the time of the examination;

2. completion of a geriatric medicine recertification preapplication form and submission of a self-evaluation fee;
3. completion of three Self-Evaluation Process (SEP) modules. The SEP modules are at-home, open book examinations of 60 questions each. All candidates must complete three modules to be eligible to sit for the examination. The SEP modules will be scored and incorrect answers will be identified. No references to the literature will be given with the score report. Should a candidate be unsuccessful on any of the SEP modules, the candidate will be required to repeat the particular module until successful;
4. completion of a formal geriatric medicine examination application form and submission of an examination fee;
5. verification that all licenses held in the United States and Canada are currently valid, full, and unrestricted; and,
6. successful completion of a half-day written examination.

Sports Medicine

The American Board of Family Practice offers certification in sports medicine. The Certificate of Added Qualifications in Sports Medicine is offered annually in conjunction with the American Board of Emergency Medicine, the American Board of Internal Medicine, and the American Board of Pediatrics.

Certification Requirements

1. Family physicians must be certified by the American Board of Family Practice and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Family physicians must have satisfactorily completed, or will have completed by June 30 of the examination year, a minimum of 1 year in an ACGME-accredited sports medicine fellowship program associated with an ACGME-accredited residency in family practice, emergency medicine, internal medicine, or pediatrics.
4. Diplomates must achieve a satisfactory score on a half-day written examination.

Recertification Requirements

All candidates for recertification must provide documentation which indicates that the immediate past 5 years of their practice consisted of at least 20% professional time devoted to sports medicine, defined as one or more of the following:

1. Field supervision of athletes.
2. Emergency assessment and care of acutely injured athletes.
3. Diagnosis, treatment, management, and disposition of common sports injuries and illness.
4. Management of medical problems in the athlete.
5. Rehabilitation of ill and injured athletes.
6. Exercise as treatment.

A completed Verification of Medical Practice Form, available upon request from the American Board of Family Practice, must be submitted. This form should be completed by a person in a position such as a coach, high school or college administrator, hospital director, county medical society administrator, or other practitioner who is knowledgeable of the candidate's practice.

Adolescent Medicine

The American Board of Family Practice offers certification in adolescent medicine. The Certificate of Added Qualifications in Adolescent Medicine will be offered biennially in odd-numbered years in conjunction with the American Board of Pediatrics and the American Board of Internal Medicine.

Certification Requirements

1. Family physicians must be certified by the American Board of Family Practice and must be diplomates in good standing at the time of the examination.
2. The diplomate must hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada.
3. Diplomates may apply through one of the plans described below.
4. Diplomates must achieve a satisfactory score on a half-day written examination.

Qualifying Plans for Adolescent Medicine CAQ

Plans II-A, II-B, and III will be available through the 2005 examination only. Currently exams are scheduled for 2003 and 2005. Candidates applying after the 2005 examination must have completed 2 years of approved full-time fellowship training in adolescent medicine. The approval of fellowships not accredited by the ACGME will be the responsibility of the ABFP until such time as accreditation of adolescent medicine fellowships is established by the Residency Review Committee. Adolescent medicine fellowships in pediatrics or internal medicine commencing on or after July 1, 2000, must be accredited by the ACGME.

Plan I—Adolescent Medicine Fellowship Training

A candidate must have completed a minimum of 2 years in an adolescent medicine fellowship program approved by the ACGME or by the American Board of Family Practice until such time as accreditation of all programs is established by the Residency Review Committee. A Verification of Fellowship Training Form must be completed by the program director. No credit will be given for fellowship training and/or practice experience in adolescent medicine obtained during the core family practice residency. All training must be completed by September 30, 2001, in order to qualify for the 2001 examination.

Plans II-A and II-B—Partial Adolescent Medicine Fellowship and Practice Route

Candidates may qualify by documenting a combination of approved adolescent medicine fellowship training and practice experience (a minimum of 25% of professional time devoted to the care of adolescents) equal to 5 years as outlined in the two plans listed below. For Plans II-A, II-B, and III, a Verification of Medical Practice Form (provided with the application) must be completed by the chief of family practice at the hospital or outpatient setting where the applicant practices. Also, for plans I, II-A, and II-B a Verification of Fellowship Training Form (provided with the application) must be completed by the fellowship program director.

II-A—This plan is intended for those physicians who have completed less than 12 months of fellowship training in adolescent medicine acceptable to the ABFP. Following ABFP approval, practice credit will be awarded on a month-for-month basis. For example, a 10-month fellowship would be credited as 10 months of experience; this, added to 4 years and 2 months of adolescent medicine experience (a minimum of 25% of professional time devoted to the care of adolescents), would total 60 months or 5 years.

II-B—This plan is intended for those physicians who have completed 12–23 months of fellowship training in adolescent medicine acceptable to the ABFP. Following ABFP approval, practice credit will be awarded on a two-for-one basis. For example, a 19-month fellowship would be credited as 38 months of experience; this, added to 1 year and 10 months of adolescent medicine experience (a minimum of 25% of professional time devoted to the care of adolescents), would total 60 months or 5 years.

Plan III—Practice Route

Five years of practice experience with substantial portions (a minimum of 25% of professional time devoted to the care of adolescents) is required. A Verification of Medical Practice Form (provided with

the application) must be completed by the chief of family practice at the hospital or outpatient setting where the applicant practices.

Revocation of Diplomate Status

Authority to Revoke Certification

The Board of Directors of the American Board of Family Practice shall have sole power and authority to determine whether or not the evidence or information before it is sufficient to constitute grounds for revocation of any certificate issued by the Board. The Board of Directors may, however, at its discretion, require any person so certified to appear before the Board of Directors, upon not less than 30 days' written notice by registered mail, and to show cause, at the time and place specified in such notice, why the certificate should not be revoked. The failure of any person so notified to appear as required in such notice shall, at the discretion of the Board of Directors, constitute cause for revocation of the certificate. The decision of the Board of Directors in all such matters shall be final.

Misrepresentations by the Candidate

Each certificate issued by the Board of Directors shall be subject to revocation in any of the following circumstances:

1. The issuance of such certificate or its receipt by the person so certified shall have been contrary to, or in violation of, any provision of the Articles of Incorporation of the American Board of Family Practice, Inc. or of the Bylaws of the American Board of Family Practice.
2. The person so certified shall not have been eligible to receive such certificate, irrespective of whether or not the facts constituting such ineligibility were known to, or could have been ascertained by, the Directors of the Corporation or its representatives.
3. The person so certified shall have made a misstatement of fact in the application for such certificate or in any other statement or representation to the Board or its representatives.
4. The person so certified shall at any time have neglected to maintain the degree of competency in the field of family practice as established by the Board.
5. The person so certified has fraudulently altered, copied, or changed a certificate of the American Board of Family Practice, or has fraudulently presented, or allowed to be presented on behalf of the individual, an altered, copied or changed certificate of the Board. In such cases, the Board reserves the right to revoke, suspend, and/or prohibit subsequent certification of the offending party for a period not to exceed 6 years from the date of discovery of the offense. In the event the individual appeals or otherwise challenges the suspension, the 6-year period shall be postponed until the action of the Board is determined to be final and enforceable.

Licensure Status

A diplomate of the American Board of Family Practice is required to hold a currently valid, full, and unrestricted license to practice medicine in the United States or Canada. Furthermore, every license to practice medicine held by a diplomate in any state or territory of the United States or province of Canada must be currently valid, full, and unrestricted, whether or not the diplomate in effect practices in such state, territory, or province. Diplomates shall be required to retain a full and unrestricted medical license in the United States or Canada even if they are out of the country for extended periods of time. Failure to retain a license will result in loss of diplomate status and will result in loss of the ability to make application for certification, recertification, or other examinations offered by the Board.

In the event a diplomate's license to practice in *any* state or territory of the United States or province of Canada is revoked, restricted, or suspended, the diplomate's certificate is simultaneously rescinded at the time of the licensure revocation, restriction, or suspension. The physician must advise the American Board of Family Practice within 60 days and cease immediately identifying himself/herself in any way directly or indirectly as a diplomate of the American Board of Family Practice. If the physician fails to notify the American Board of Family Practice of any revocation, restriction, or suspension within 60 days after the effective date, he/she shall be ineligible to seek reinstatement of diplomate status for up to 1 year following the reinstatement of full and unrestricted licensure. Candidates for recertification and diplomates of the ABFP should be aware that the ABFP receives periodic *Disciplinary Action Reports* from the American Medical Association of actions by states against medical licenses.

Any adverse action by a state licensing agency, agreement between a licensing agency and a physician, or voluntary action by a physician, that revokes, restricts, or suspends the physician's medical license is a violation of ABFP policy. In cases where a physician has changed his or her residence deliberately to avoid prosecution, loss of license, or disciplinary action by a state licensing agency, the Board reserves the right to revoke or suspend diplomate status and/or prohibit application for certification. Questions about licensure should be presented to the Board in writing.

If and when the physician's revoked, restricted, or suspended license is reinstated in full (with no restrictions) and official written documentation of reinstatement is provided, the ABFP will honor the remainder of the current certificate and the diplomate will not be required to be reexamined. If the current certificate has expired prior to the reinstatement of the license, the physician may make application for the next annual examination. Successful compliance with all application requirements in effect at that time will be expected.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Internal Medicine [ABIM] to ascertain whether the information below is current.)

Preface

The Board's decision about a candidate's eligibility for certification is determined by the policies and procedures described in this document. This edition of policies and procedures supersedes all previous publications.

The Board reserves the right to make changes in its fees, examinations, policies, and procedures at any time without advance notice.

Admission to the Board's examinations will be determined under policies in force at the time of application.

Introduction

The ABIM was established in 1936 and is a private, not-for-profit corporation. Its members are elected by the Board of Directors and serve 2-year terms. The Board receives no public funds and has no licensing authority or function.

The mission of the ABIM is to enhance the quality of health care available to the American public by continuously improving the process and maintaining high standards for certifying internists and subspecialists who possess the knowledge, skills, and attitudes essential for the provision of excellent care.

The Board's core values are: assuring the public of the highest quality patient care; professionalism and excellence in the practice of medicine; science-based medicine and intellectual rigor as exemplified by the specialty of internal medicine; leadership in evaluation and standard setting; and maintaining autonomy to preserve these values.

Certification by the ABIM recognizes excellence in the discipline of internal medicine, its subspecialties, and areas of added qualifications. Certification is not a requirement to practice internal medicine, and the Board does not confer privileges to practice. The ABIM does not intend either to interfere with or to restrict the professional activities of a licensed physician based on certification status.

The ABIM administers the certification and recertification processes by (1) establishing training requirements, (2) assessing the credentials of candidates, (3) obtaining substantiation by appropriate authorities of the clinical competence and professional standing of candidates, and (4) developing and conducting examinations for certification and recertification.

The duration of the validity of all certificates issued by the Board in 1990 (1987 for critical care medicine and 1988 for geriatric medicine) and thereafter is 10 years, and the dates of validity are noted on the certificates. Certificates issued before these dates will continue to be valid indefinitely.

Information about the ABIM Recertification Program is available upon request.

Training Requirements for Certification in Internal Medicine

Physicians who are awarded a certificate in internal medicine must have completed the required predoctoral medical education, met the postdoctoral training requirements, demonstrated clinical competence in the care of patients, and passed the Certification Examination in Internal Medicine.

Predocotoral Medical Education

Candidates from medical schools in the United States or Canada must have attended a school accredited at the date of graduation by the Liaison Committee on Medical Education (LCME), the Committee for Accreditation of Canadian Medical Schools, or the American Osteopathic Association.

Graduates of international medical schools are required to submit either a permanent (valid indefinitely) certificate from the Educational Commission for Foreign Medical Graduates or comparable credentials from the Medical Council of Canada.

Postdoctoral Graduate Medical Education (GME)

To be admitted to the Certification Examination in Internal Medicine physicians must have completed, by August 31 of the year of examination, 36 months of GME in a program accredited by the Accreditation Council on Graduate Medical Education (ACGME), the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. Residency or research experience occurring before the completion of the requirements for the MD or DO degree cannot be credited toward the Board's requirements.

The 36 months of residency training must include (1) a minimum of 12 months of internal medicine training at the R-1 level and (2) a minimum of 24 months of training in an accredited internal

medicine program, 12 months at the R-2 level and 12 months at the R-3 level.

Content of Training

The 36 months of full-time medical residency education must include the following:

1. At least 30 months of training in general internal medicine, subspecialty internal medicine, critical care medicine, geriatric medicine, and emergency medicine. Up to 4 months of the 30 months may include training in primary care areas (eg, neurology, dermatology, office gynecology, or orthopedics);
2. Up to 3 months of other electives approved by the internal medicine program director; and
3. Up to 3 months of leave for vacation time, parental leave, or illness. Vacation or other leave cannot be forfeited to reduce training time.

In addition, the following requirements for direct patient responsibility must be met:

- At least 24 months of the 36 months of residency education must occur in settings where the resident personally provides, or supervises junior residents who provide, direct care to patients in inpatient or ambulatory settings.
- At least 6 months of the direct patient responsibility on internal medicine rotations must occur during the R-1 year.

Clinical Competence Requirements

The Board requires documentation that candidates for certification in internal medicine are competent in clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, and provision of medical care.

Through its tracking process, the Board requires program directors to complete clinical competence evaluations each spring for internal medicine residents. A candidate may be excluded from an ABIM examination if the components of required clinical competence are not satisfactorily documented by the training program.

All residents must receive satisfactory ratings of overall clinical competence, humanistic qualities, and moral and ethical behavior in each year of training. In addition, residents must receive satisfactory ratings in each of the components of clinical competence during the final year of required training. It is the resident's responsibility to arrange for any additional training required.

- Internal medicine residents rated as marginal in overall clinical competence in either their GY1 or GY2 will receive credit for that year of training.
- If a resident receives marginal ratings in overall clinical competence in both GY1 and GY2, an additional year of accredited internal medicine GME will be required.
- For each year rated unsatisfactory in overall clinical competence, 1 additional year of accredited internal medicine GME (including satisfactory completion and performance) is required.
- Residents with deficiencies in any year of training solely in humanistic qualities or moral and ethical behavior may, at the discretion of the Board, be required to complete additional training and/or a specified period of observation.
- During the *final* year of required training, an unsatisfactory rating in any of the components of clinical competence requires an additional year of accredited training. It is the resident's responsibility to arrange for any additional training required.

Procedures Required for Internal Medicine

At the conclusion of training, each resident must be judged by the program director to be proficient in the procedures listed below. Although the Board does not prescribe an absolute number of times a procedure must be performed to assure competence, it has

developed guidelines (indicated in parentheses) for the minimum number of directly supervised, successfully performed procedures; confirmation of proficiency is not credible with fewer than: abdominal paracentesis (3), arterial puncture for blood gas analysis (5), arthrocentesis of the knee joint (3), central venous line placement (5), lumbar puncture (5), nasogastric intubation (3), thoracentesis (5), critical life-saving procedures (this requirement can be met by documentation of successful training in advanced cardiac life support), breast examinations (5), rectal examinations (5), and pelvic examinations and pap smear, including wet mount (5).

Credit in Lieu of Standard Training

Training Completed Prior to Entering Internal Medicine Residency

The Board may grant credit for some or all of the 12-month requirement at the R-1 level for training taken prior to entering training in internal medicine as outlined below. Only the director of an accredited internal medicine residency program may petition the Board regarding such credit. *No credit may be granted to substitute for 24 months of accredited R-2 and R-3 internal medicine training.*

1. Month-for-month credit toward the R-1 requirement may be granted for satisfactory completion of internal medicine rotations taken during an accredited non-internal medicine residency program if all of the following criteria are met:
 - a. the internal medicine training occurred under the direction of a program director of an accredited internal medicine program;
 - b. the training occurred in an institution accredited for training internal medicine residents; and
 - c. the rotations were identical to the rotations of the residents enrolled in the accredited internal medicine residency program.
2. For trainees who have satisfactorily completed at least 12 months of accredited training in another specialty, the Board may grant:
 - a. month-for-month credit for the internal medicine rotations that meet the criteria listed under (1) above; plus
 - b. a maximum of 6 months' credit for the training in a family practice or pediatrics program; or
 - c. a maximum of 3 months' credit for training in another non-internal medicine specialty program.
3. Up to 12 months' credit for the R-1 training requirement may be granted for at least 3 years of US or Canadian accredited training in another clinical specialty and certification by an ABMS member Board in that specialty.
4. Twelve months credit for the R-1 training requirement may be granted for at least 3 years of verified internal medicine training abroad.

Training Completed Abroad by Current Full-Time US or Canadian Faculty

Full-time internal medicine faculty members in an LCME-accredited medical school or an accredited Canadian medical school may qualify for admission to the Certification Examination in Internal Medicine if they:

1. are proposed by the chair or program director of an accredited internal medicine residency;
2. have completed 3 or more years of verified internal medicine training abroad;
3. hold an appointment at the level of associate professor or higher at the time of proposal; and
4. have completed 8 years, after formal training, as a clinician-educator or a clinical investigator in internal medicine with a full-time appointment on a medical school faculty.

Guidelines for proposals by internal medicine department chairs are available from the Board.

Training in Combined Programs

Training guidelines and requirements for credit toward the ABIM Certification Examination in Internal Medicine are available upon request in the following combined programs:

- Dermatology/internal medicine
- Emergency medicine/internal medicine
- Emergency medicine/internal medicine/critical care medicine
- Family practice/internal medicine
- Internal medicine/neurology
- Internal medicine/nuclear medicine
- Internal medicine/pediatrics
- Internal medicine/physical medicine and rehabilitation
- Internal medicine/preventive medicine
- Internal medicine/psychiatry

Subspecialties and Added Qualifications

General Requirements

In addition to the primary certificate in internal medicine, the Board offers subspecialty certificates and certificates of added qualifications. Subspecialty certificates are offered in cardiovascular disease; endocrinology, diabetes, and metabolism; gastroenterology; hematology; infectious disease; medical oncology; nephrology; pulmonary disease; and rheumatology.

The certificates of added qualifications recognize special expertise in areas that have a fundamental practice-oriented relationship to an underlying discipline, and are offered currently in adolescent medicine, clinical cardiac electrophysiology, clinical and laboratory immunology, critical care medicine, geriatric medicine, interventional cardiology, and sports medicine. Diplomates must maintain a valid underlying ABIM certificate to maintain certification in an added qualification.

Physicians who are awarded a certificate in a subspecialty or an area of added qualifications must have been previously certified in internal medicine by the ABIM, completed the requisite training, demonstrated clinical competence in the care of patients, and passed the subspecialty or area of added qualifications examination.

Information regarding each of the added qualifications examinations is available from the Board upon request.

For information and application forms for the Clinical and Laboratory Immunology Examination, contact the American Board of Allergy and Immunology, 510 Walnut St, Ste 1701, Philadelphia, PA 19106-3699.

Subspecialty training must be accredited by the ACGME, the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. No credit will be granted toward certification in a subspecialty or area of added qualifications for training completed outside of an accredited US or Canadian program.

Fellowship training taken before the date of completion of the requirements for the MD or DO degree, and training as a chief medical resident, do not count toward the requirements for subspecialty certification. In addition, practice experience and attendance at postgraduate courses cannot be credited.

To be admitted to an examination, candidates must have completed the required training in the subspecialty or area of added qualifications by October 31 of the year of examination. This extended deadline is intended to accommodate candidates whose internal medicine and/or fellowship training is off-cycle.

Candidates for certification in the subspecialties must meet the Board's requirements for the total duration of training as well as

minimum clinical training. Clinical training requirements may be met by aggregating full-time clinical training that occurs throughout the entire fellowship training period; clinical training need not be completed in successive months. Educational rotations completed during training may not be double counted to satisfy both internal medicine and subspecialty training requirements.

Training and Procedures Required

The total months of training required, including specific clinical months, and requisite procedures for each subspecialty and area of added qualifications, are listed below:

Adolescent Medicine (24 months/12 clinical months)

No required procedures.

Cardiovascular Disease (*36 months/24 clinical months)

Advanced cardiac life support (ACLS), including cardioversion; electrocardiography, including ambulatory monitoring and exercise testing; echocardiography; arterial catheter insertion; and right-heart catheterization, including insertion and management of temporary pacemakers.

*(*Twenty-four months of accredited cardiovascular disease training are required for candidates who initiated training prior to 1990.)*

Clinical Cardiac Electrophysiology (12 months/12 clinical months)

Electrophysiologic studies including mapping, both with a catheter and intraoperatively; surgical and other ablation procedures; and implantation of pacemakers, cardioverters, and defibrillators (a minimum of 150 intracardiac procedures in at least 75 patients, of which 75 are catheter ablation procedures, including postdiagnostic testing, and 25 are initial implantable cardioverter-defibrillator procedures, including programming).

Critical Care Medicine (24 months/12 clinical months)

Maintenance of open airway; oral/nasal intubation; ventilator management, including experience with various modes; insertion and management of chest tubes; ACLS; placement of arterial, central venous, and pulmonary artery balloon flotation catheters; and calibration and operation of hemodynamic recording systems.

Endocrinology, Diabetes, and Metabolism (24 months/12 clinical months)

Thyroid aspiration biopsy.

Gastroenterology (*36 months/18 clinical months)

Proctoscopy and/or flexible sigmoidoscopy; diagnostic upper gastrointestinal endoscopy; colonoscopy, including biopsy and polypectomy; esophageal dilation; therapeutic upper and lower gastrointestinal endoscopy; and liver biopsy.

*(*Twenty-four months of accredited gastroenterology fellowship training are required for candidates who initiated fellowship training prior to June 1996.)*

Geriatric Medicine (12 months/12 clinical months)

No required procedures.

Hematology (24 months/12 clinical months)

Minimum ½ day per week in continuity outpatient clinic; bone marrow aspiration and biopsy, including preparation, staining, examination, and interpretation of blood smears, bone marrow aspirates, and touch preparations of bone marrow biopsies; measurement of complete blood count, including platelets and white cell differential, using automated or manual techniques with appropriate quality control; administration of chemotherapeutic agents and

biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

Infectious Disease (24 months/12 clinical months)

Microscopic evaluation of diagnostic specimens including preparation, staining, and interpretation; management, maintenance, and removal of indwelling venous access catheters; and administration of antimicrobial and biological products via all routes.

Interventional Cardiology (12 months/12 clinical months)

A minimum of 250 therapeutic interventional cardiac procedures during 12 months of acceptable interventional cardiology fellowship training.

Medical Oncology (24 months/12 clinical months)

A minimum of ½ day per week in continuity outpatient clinic; bone marrow aspiration and biopsy; administration of chemotherapeutic agents and biological products through all therapeutic routes; and management and care of indwelling venous access catheters.

Nephrology (24 months/12 clinical months)

Placement of temporary vascular access for hemodialysis and related procedures; acute and chronic hemodialysis; peritoneal dialysis (excluding placement of temporary peritoneal catheters); continuous renal replacement therapy (CRRT); and percutaneous biopsy of both autologous and transplanted kidneys.

Pulmonary Disease (24 months/12 clinical months)

Oral/nasal intubation; fiberoptic bronchoscopy and accompanying procedures; ventilator management; thoracentesis and percutaneous pleural biopsy; arterial puncture; placement of arterial and pulmonary artery balloon flotation catheters; calibration and operation of hemodynamic recording systems; supervision of the technical aspects of pulmonary function testing; progressive exercise testing; and insertion and management of chest tubes.

Rheumatology (24 months/12 clinical months)

Diagnostic aspiration of and analysis by light and polarized light microscopy of synovial fluid from diarthrodial joints, bursae, and tenosynovial structures; and therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and entheses.

Sports Medicine (12 months)

No required procedures.

Clinical Competence Requirements

The Board requires documentation that candidates for certification in the subspecialties are competent in clinical judgment, medical knowledge, clinical skills (medical interviewing, physical examination, and procedural skills), humanistic qualities, professionalism, provision of medical care, and continuing scholarship.

Through its tracking process, the Board requires verification of the subspecialty fellows' clinical competence from both the subspecialty training program director and the chair of the department of medicine.

All fellows must receive satisfactory ratings of overall clinical competence, humanistic qualities, and moral and ethical behavior in each of the required years of training.

- Fellows with an unsatisfactory rating in overall clinical competence during any year of training will be required to satisfactorily complete an additional year of accredited fellowship training.
- Fellows with an unsatisfactory rating solely in humanistic qualities or moral and ethical behavior for any year of training may, at the discretion of the Board, be required to complete additional training and/or a specified period of observation.
- For the final year of required training, fellows with an unsatisfactory rating in any area of clinical competence, including required

procedures, must obtain an additional year of accredited training. It is the fellow's responsibility to arrange for this training.

Dual Certification Requirements

Hematology and Medical Oncology

Dual certification in hematology and medical oncology requires 3 years of full-time combined accredited training, which must include: (a) a minimum of 18 months of prospectively designed full-time clinical training with patient care responsibility, (b) a minimum of 12 months in the diagnosis and management of a broad spectrum of neoplastic diseases, including hematological malignancies, and (c) a minimum of 6 months of training in the diagnosis and management of a broad spectrum of non-neoplastic hematological disorders.

Full-time clinical training is defined as at least 80% of the fellow's professional time during a working week dedicated to clinical (patient care or educational) activities. During the entire 3 years the fellow must attend a minimum of 1 half-day per week in a continuity outpatient clinic.

The ABIM recommends that the 3 years of combined training be taken in programs in the same institution that are accredited both in hematology and medical oncology by the ACGME, the Royal College of Physicians and Surgeons of Canada, or the Professional Corporation of Physicians of Quebec. If circumstances dictate that this training be taken in two different programs, 24 continuous months must be in one institution, and both institutions must be accredited in hematology and medical oncology.

Candidates must complete all 3 years of required combined training before being admitted to an examination in either subspecialty. Those who elect to undertake an examination in one subspecialty following only 2 years of fellowship training will be required to complete 4 years of accredited training for dual certification. Candidates who have completed all 3 years of required combined training may take the Hematology and Medical Oncology Examinations in the same year or in different years.

Pulmonary Disease and Critical Care Medicine

Candidates seeking dual certification in pulmonary disease and critical care medicine must complete a minimum of 3 years of accredited combined training, 18 months of which must be clinical training. Critical care medicine is an added qualification to the subspecialty of pulmonary disease; thus, certification in pulmonary disease must be achieved before the candidate is eligible to apply for admission to the Critical Care Medicine Examination.

Rheumatology and Allergy and Immunology

Dual certification in rheumatology and allergy and immunology requires a minimum of 3 years of full-time training which must include: (a) at least 12 months full-time clinical rheumatology supervised by the director of an accredited rheumatology training program, (b) weekly attendance for 18 consecutive months in an ambulatory care program supervised by rheumatology faculty, which must include continuity of patient care within ambulatory clinics, and (c) at least 18 months of full-time allergy and immunology training supervised by the training program director of an accredited program in allergy and immunology.

Plans for combined training should be approved in writing by both the rheumatology and the allergy and immunology training program directors and by the ABIM Subspecialty Board on Rheumatology and the American Board of Allergy and Immunology before training begins. Admission to either examination requires (1) certification in internal medicine, (2) satisfactory clinical competence, and (3) completion of the entire 3-year combined program.

Candidates seeking dual certification for other subspecialty combinations should write to the Board for information.

Candidates for Special Consideration

ABIM Diplomates in Internal Medicine may be proposed for special consideration for admission to a subspecialty or added qualifications examination by the program director of an accredited fellowship program if they:

1. have completed the full training required by ABIM in the subspecialty or area of added qualifications in another country;
2. are a full-time associate professor or higher in the specified subspecialty division of the department of medicine in an LCME-accredited medical school or an accredited Canadian medical school;
3. have served 8 years, after formal training, as a clinician-educator or clinical investigator with a full-time appointment on a medical school faculty; and
4. possess a valid, unrestricted license to practice medicine in a state, territory, commonwealth, province, or possession of the United States or Canada.

Guidelines for proposing candidates for special consideration for admission to the subspecialty and added qualifications examinations are available upon request.

Research Pathway

The research pathway is intended for trainees who anticipate academic careers as investigators in basic science or clinical research. It integrates training in clinical medicine with 3 years of training in basic or clinical research. Although prospective planning of this pathway by trainees and program directors is necessary, prospective approval by the Board is no longer a requirement. Program directors must document the clinical and research training experience through the Board's tracking program.

At least 36 months of research training in which the trainee devotes 80% of time to research and 20% to clinical work are required. The Board defines research as scholarly activities intended to develop new scientific knowledge. The research experience of trainees should be mentored and reviewed; training should include completion of work leading to a graduate degree (if not already acquired) or its equivalent. The last year of research training may be undertaken in a full-time faculty position if the level of commitment to mentored research is maintained at 80%.

During internal medicine research training, 20% of each year must be spent in clinical experiences including a half-day per week in a continuity clinic. During subspecialty research training, at least one half-day per week must be spent in an ambulatory clinic. Ratings of satisfactory clinical performance must be maintained annually for each trainee in the ABIM Research Pathway.

The specific requirements for the ABIM Research Pathway are summarized below:

Internal Medicine Research Pathway

Internal medicine training	24 months
Direct patient responsibility	20 months
Research training (80%)	36 months
Clinical training during research (20%)	equivalent of 1 day/week
<i>Total training</i>	<i>5 years</i>
Internal Medicine examination	August, GY5

Subspecialty Research Pathway

Internal medicine training	24 months
Direct patient responsibility	20 months
Subspecialty clinical training (80%)	12-24 months*
Research training (80%)	36 months

Ambulatory clinic during research training (10%)	equivalent of ½ day/week
<i>Total training</i>	<i>6 or 7 years*</i>
Internal Medicine examination	August, GY4
Subspecialty/AQ examination	November, GY6 or GY7*

*depending on the subspecialty

More information about the Research Pathway is available upon request.

Special Training Policies

Disclosure of Performance Information

For trainees planning to change programs, the Board expects the trainee to request that a written evaluation of past performance be sent from the previous program to the new program. Upon request of the new program director, the Board will provide (when available) a summary of the previous performance ratings and the total credits accumulated toward the Board's training requirements. In addition, at the trainee's request, the Board will provide the new program director with comments or other information obtained from previous training programs.

Due Process for Evaluations

The responsibility for the evaluation of a trainee rests with the program, not with the Board. The Board is not in a position to reexamine the facts and circumstances of an individual's performance. As required by the ACGME in its *Essentials of Accredited Residencies in Graduate Medical Education*, the educational institution must provide appropriate due process for its decisions regarding trainees' performance.

Leave of Absence

Trainees may take up to 1 month per year of training for vacation time, parental or family leave, or illness (including pregnancy-related disabilities). Training must be extended to make up any absences exceeding 1 month per year. Vacation leave is essential and must not be forfeited to compensate for extended illness, late starts, parental leave, or other purposes.

Reduced-Schedule Training

Interrupted full-time training is acceptable, provided that no period of full-time training is shorter than 1 month. In any 12-month period, at least 6 months must be spent in training. Patient care responsibilities should be maintained in a continuity clinic during the non-training component of the year. Board approval must be obtained before initiating an interrupted training plan. Part-time training, whether or not continuous, is not acceptable.

Other Policies

Board Eligibility

The Board does not use, define, or recognize the term "Board Eligible." Admissibility to certifying examinations is not affected by prior examination attempts, nor is it time-limited. Candidates will be admissible to certifying examinations provided they meet all the requirements of the Board as set forth in its Policies and Procedures brochure and on ABIM's Home Page (www.abim.org).

The Board will routinely report by mail, fax, or online (www.abim.org) whether candidates are certified (including dates) or not certified. If a Diplomate was previously certified, this fact and dates of former certification will be reported. If certification is suspended or revoked, this also will be reported.

On a candidate's written request to the Board, the following information will also be reported: (1) that an application is currently

in process and/or (2) the year the candidate was last admitted to examination.

Professional Standing of Practitioners

Every 4 years following formal training, the Board requires verification that candidates applying for certification are recognized as specialists or subspecialists in good standing. Verification is sought from the chief of the medical service at the institution(s) where the candidate's principal staff appointment is held. Any challenge to good standing, including charges made by a licensing board, must be resolved locally to the Board's satisfaction before admission to the examination. For example, substance abuse, convictions for felonies related to medical practice, or substantial disciplinary action by the institution may lead to deferred admission or rejection.

Confidentiality Policy

The ABIM considers the certification or recertification status of its diplomates to be public information. The ABIM regards all other information about individuals as strictly confidential. The ABIM does not provide such information to others except in response to a court order. The Board notifies physicians prior to complying with such an order.

The ABIM provides information about a diplomate's certification status, city and state of residence, and social security number to the American Board of Medical Specialties (ABMS), which publishes *The Official ABMS Directory of Board Certified Medical Specialists*. The ABMS utilizes social security numbers as a unique internal identifier and does not provide them to anyone without the authorization of the diplomate.

The ABIM provides residency training directors with information about a resident's prior training and pass/fail status on certifying examinations. The ABIM uses examination and other information for research purposes. In these instances, the Board does not identify specific individuals, hospitals, or practice associations.

The ABIM reserves the right to disclose information it possesses about any individual whom it judges has violated ABIM rules or engaged in misrepresentation or other unprofessional behavior.

Licensure

All candidates for certification must possess a valid, unrestricted, and unchallenged license to practice medicine in a jurisdiction of the United States or Canada. Candidates with a restricted, suspended, or revoked license in any jurisdiction will not be admitted to the examination or certified. Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements.

Diplomates with restricted, suspended, or revoked licenses in any jurisdiction will not be reissued certificates. Furthermore, the Board at its discretion may suspend the certification of Diplomates whose licenses are restricted, suspended, or revoked. Reinstatement of suspended certification requires licensure without restriction.

Disabled Candidates

The Board recognizes that some candidates may have physical limitations that may make them unable to fulfill the requirement for proficiency in performing procedures. For such individuals, the procedural skills requirement may be waived. Program directors should write to the Board for approval before the individual enters training.

The Board is also committed to offering suitable examination accommodations for all candidates, including individuals with disabilities. When necessary, alternative arrangements under comparable conditions to those provided for nondisabled individuals are offered to disabled individuals. Candidates who need accommodation for a disability during an examination must provide a written request to

the Board at the time of application for examination. The Board will then inform the candidate of the documentation needed, which must be received by the Board no later than 4 months prior to the date of the examination. Reapplication for special accommodation is required for each examination administration.

Substance Abuse

If a history of substance abuse exists, candidates must provide documentation that they can safely and effectively perform the duties and responsibilities of an ABIM Diplomate. Evidence of successful completion of a treatment program and/or a documented period of abstinence (usually at least 1 year) is required. The Board treats such information as confidential.

Suspension and Revocation of Certificates

The Board may, at its discretion, revoke certification if the Diplomate was not qualified to receive the certificate at the time it was issued, even if the certificate was issued as a result of a mistake on the part of the Board. It may also revoke the certificate if the Diplomate fails to maintain moral, ethical, or professional behavior satisfactory to the Board or engages in misconduct that adversely affects professional competence or integrity. It may revoke or suspend the certificate if (1) the Diplomate made any material misstatement of fact or omission of fact to the Board in connection with application or otherwise or to any third party concerning the Diplomate's certification status; or (2) the Diplomate's license to practice medicine has been revoked, suspended, or restricted in any jurisdiction. To be considered for reinstatement of certification, the Diplomate must provide documentation that the license has been restored without restrictions.

Irregular Behavior on Examinations

The Board's examinations are copyrighted and administered in secured testing centers by proctors who are responsible for maintaining the integrity and security of the certification process. Proctors are required to report to the Board any irregular or improper behavior by a candidate, such as giving or obtaining information or aid, looking at the test material of others, removing an examination from the test center, taking notes, bringing electronic devices (eg, beepers, pagers, cell phones, etc) into the examination, failing to comply with time limits or instructions, talking, or other disruptive behavior. Irregular or improper behavior that is observed, that is made apparent by statistical analysis, or that is shown by other means will be considered a subversion of the certification process and will constitute grounds for invalidation of a candidate's examination. Other sanctions, which may be invoked at the Board's discretion, include excluding a candidate from future examinations and informing program director(s), licensing bodies, or law enforcement agencies.

Late Applications

Awareness of and meeting registration deadlines are the candidate's responsibility. There is a nonrefundable penalty fee of \$300 for any application postmarked between December 2, 2001, and February 1, 2002, for the August Internal Medicine Examination; and between April 2, 2002, and June 1, 2002, for the November subspecialty and added qualifications certification examinations.

Reexamination

Candidates who are unsuccessful on any certification examination may apply for reexamination. There is no restriction on the number of opportunities for reexamination. Once admitted to an examination, candidates will be considered to have fulfilled the training requirements for future examinations in that discipline.

All candidates for reexamination must meet the requirements for licensure status and professional standing.

Board Publications

The following Board publications are available upon request. These are not designed to aid in preparation for examinations.

2001 Board of Directors

Miriam G Blitzer, PhD, Baltimore, Maryland
Maureen Bocian, MD, Orange, California
Nancy J Carpenter, PhD, Tulsa, Oklahoma
Suzanne B Cassidy, MD, Orange, California
Richard W Erbe, MD, Buffalo, New York
Mary L Marazita, PhD, Pittsburgh, Pennsylvania
Karla J Matteson, PhD, Knoxville, Tennessee
Cynthia C Morton, PhD, Boston, Massachusetts
Maximilian Muenke, MD, Bethesda, Maryland
Roberta A Pagon, MD, Seattle, Washington
Georgia L Wiesner, MD, MS, Cleveland, Ohio

(These criteria and conditions apply to the 2002 certification examination cycle and are subject to change without notice. The American Board of Medical Genetics [ABMG] offers examinations every 3 years; the next examination cycle is August 14-15, 2002. All applicants are advised to contact the Board to ascertain whether the information below is current.)

Purpose and Sponsorship

The ABMG certifies individuals who provide services in medical genetics. The ABMG determines the doctoral degree requirements, the graduate medical training requirements, the medical genetics training requirements, the credentialing requirements, and the examination requirements for ABMG certification. The ABMG offers certification in five primary specialty areas:

- clinical genetics,
- PhD medical genetics,
- clinical cytogenetics,
- clinical biochemical genetics, and
- clinical molecular genetics.

The ABMG is responsible for preparation, administration, and grading of the certifying examinations in medical genetics.

The ABMG provides accreditation for medical genetics training programs. The ABMG accredits medical genetics fellowship programs in the specialties of PhD medical genetics, clinical cytogenetics, clinical biochemical genetics, and clinical molecular genetics. The Residency Review Committee (RRC) for Medical Genetics of the Accreditation Council for Graduate Medical Education (ACGME) accredits genetics residency programs in the specialty of clinical genetics.

The ABMG was incorporated in 1980 under sponsorship of the American Society of Human Genetics, Inc, and has been recognized as a member board of the American Board of Medical Specialties (ABMS) since 1991.

I. Training Requirements for Certification by the American Board of Medical Genetics

Individuals seeking certification by the ABMG must fulfill all requirements for certification as detailed in this document. For an individual who has a doctoral degree earned outside of the US, Canada, or Puerto Rico, or graduate medical training outside of the US

or Puerto Rico, additional requirements may pertain (see Section XII).

A. Doctoral Degree requirements:

Clinical Genetics	MD or DO
PhD Medical Genetics	PhD*
Clinical Cytogenetics	MD, DO, or PhD*
Clinical Biochemical Genetics	MD, DO, or PhD*
Clinical Molecular Genetics	MD, DO, or PhD*

* PhD must be in genetics, human genetics or a related field, as determined by the ABMG.

B. For applicants for the Clinical Genetics specialty only, graduate medical training requirements are either:

1. Twenty-four months of satisfactorily completed full-time training in an ACGME-accredited residency program in a specialty (other than clinical genetics) that is recognized by the ABMS (eg, pediatrics, ob-gyn, internal medicine)
- or*
2. Forty-eight months of satisfactorily completed full-time training in an ACGME-accredited 4-year clinical genetics residency. [Note: In this instance the 48 months of training satisfy both the graduate medical training requirement and the medical genetics training requirement];

or

3. Five years of satisfactorily completed full-time training in an ACGME-accredited combined pediatrics/medical genetics residency. Upon successful completion of all requirements of the combined pediatrics and medical genetics residency, a trainee is qualified to apply for certification by either or both the American Board of Pediatrics (ABP) and the ABMG. Applicants must satisfactorily complete the specific credentialing requirements of each Board to be eligible to sit for the examination of that Board. Certification in one specialty is not contingent upon certification in the other.

C. Medical genetics training requirements for all specialties:

1. For certification in any one of the ABMG specialties: 24 months of completed full-time training in an ABMG-accredited fellowship program in that specialty or ACGME-accredited clinical genetics residency.
2. For certification in clinical genetics as an additional ABMG specialty: 24 months of completed full-time training in an ACGME-accredited clinical genetics residency.
3. For certification in each additional ABMG specialty (except clinical genetics): an additional 12 months of completed full-time training in an ABMG-accredited fellowship program in that specialty.

Number of ABMG specialty certifications*	Months of completed ABMG-approved medical genetics training
1	24 months
2	36 months
3	48 months
4	60 months

*Note: Certification in clinical genetics always requires 24 months of completed training in an ACGME-accredited clinical genetics residency.

4. An individual who holds an earned PhD from a training program that also has an ABMG-accredited PhD medical genetics training program may, at the discretion of the program director of the individual's ABMG-accredited medical genetics training program, apply for certification in the PhD medical genetics specialty and one laboratory specialty after 2 years of combined medical genetics training in these two specialties in an ABMG-accredited program, if and only if:

- The earned PhD is from a degree-granting program that is documented to be integrated with a postdoctoral program that is ABMG-accredited for at least PhD medical genetics and one laboratory specialty; and
- During the degree program, the individual has taken graduate course work including formal medical genetics and mathematical genetics courses, and the individual documents significant participation in clinical genetics: interacting with patients, communicating with referring physicians, and regular attendance at clinical conferences. These activities must be documented and described in detail by the director of the ABMG-accredited medical genetics program and by the institution's director of the PhD program granting the doctoral degree; and
- The applicant submits two logbooks, one of 150 cases for the laboratory specialty collected during the medical genetics fellowship training and one of 75 cases for the specialty of PhD medical genetics (unrelated to the laboratory specialty) also collected during the medical genetics fellowship training.

The applicant's proposed medical genetics training program, along with a description of the clinical experience during training for the doctoral degree, must be submitted in writing by the director of the ABMG-accredited medical genetics program to the ABMG in advance of initiating the fellowship and must be approved by the ABMG Credentials Committee.

II. Credentialing Requirements for Certification by the American Board of Medical Genetics

The credentialing process determines an applicant's candidate status for the ABMG certifying examination. All documents required for the credentialing process must be submitted to the ABMG Administrative Office and postmarked by the deadline (see Deadlines, Section IX).

Four categories of applicants are recognized:

- First-time applicants for ABMG certification;
- ABMG diplomates seeking certification in an additional specialty or specialties;
- Individuals who have been active candidates but who have failed to achieve certification in two consecutive examination cycles or within 6 years of initial application;
- Individuals who have been active candidates but who failed to achieve certification in one cycle and who are reapplicants for the following examination cycle.

A. First-time applicants for ABMG certification must submit:

1. A completed and notarized application form
2. Application review fee (see Fees, Section X)
3. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, postdoctoral training, medical genetics training, and professional employment
4. Documentation of doctoral degree: An official final transcript (including degree earned, field in which the degree was earned, and date the degree was earned). A photocopy of a final transcript is not acceptable.
5. Documentation of required medical genetics training in an ABMG-accredited fellowship or ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director or clinical genetics residency director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.

An applicant completing his/her required medical genetics training by July 31, 2002, may apply for ABMG certification in 2002. If the required medical genetics training is not completed by December 31, 2001, the ABMG Administrative Office will contact the program/residency director at the conclusion of the medical genetics training period for verification of successful completion of training.

6. Three letters of endorsement: Each letter must support the applicant's candidacy for ABMG certification and at a minimum attest to the applicant's honesty, integrity, and good moral character. At least one letter must be from an ABMG diplomate who is a faculty member, other than the program director, in the ABMG-accredited fellowship/ACGME-accredited clinical genetics program in which the applicant trained; the other two letters must be from ABMG diplomates who are in good standing with the ABMG. Each letter of endorsement must be in a sealed envelope and signed by the diplomate over the seal.
7. Logbook of 150 cases obtained during the inclusive dates of the applicant's medical genetics training for each specialty area in which the applicant is seeking certification: The logbook must be in the format specified by the ABMG with appropriate signatures. (Note the exception from Section I.C.4 above.)

An applicant who has completed his/her entire medical genetics training by December 31, 2001, must submit a completed logbook with the application. An applicant whose training in a specialty is completed between January 1, 2002, and July 31, 2002, must submit a logbook with at least 100 cases by November 30, 2001, and must submit a logbook with the remainder of the cases postmarked by March 1, 2002. [Note: Late fees do not apply to the portion of the logbook submitted between December 1, 2001, and December 15, 2001].

8. For applicants in clinical genetics:

- a. Documentation of 24 months of training in an ACGME-accredited residency other than clinical genetics: Either a letter from the director of the ACGME-accredited residency program (other than clinical genetics) documenting satisfactory completion of 24 months of the ACGME-accredited residency training and/or documentation of board certification in an ABMS-recognized specialty. [Note: completion of 48 months of training in an ACGME-accredited clinical genetics residency fulfills this requirement.]
- b. Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.

B. ABMG diplomates seeking certification in an additional specialty must submit:

1. A completed and notarized application form
2. Application review fee (see Fees, Section X)
3. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, postdoctoral training, medical genetics training, and professional employment
4. Documentation of doctoral degree for applicants whose ABMG certification was prior to 1999: An official final transcript (including degree earned, field in which the degree was earned, date the degree was earned). A photocopy of the final transcript is not acceptable.
5. Documentation of required medical genetics training in an ABMG-accredited fellowship or ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics"

form completed and signed by the trainee's medical genetics fellowship program director or clinical genetics residency director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.

6. Three letters of endorsement: Each letter must support the applicant's candidacy for ABMG certification and at a minimum attest to the applicant's honesty, integrity, and good moral character. At least one letter must be from an ABMG diplomate who is a faculty member, other than the program director, in the ABMG-accredited fellowship/ACGME-accredited clinical genetics residency in which the applicant trained; the other two letters must be from ABMG diplomates who are in good standing with the ABMG. Each letter of endorsement must be in a sealed envelope and signed by the diplomate over the seal.
7. Logbook of 150 cases obtained during the inclusive dates of the applicant's medical genetics training for each specialty area in which the applicant is seeking certification. The logbook must be in the format specified by the ABMG with the appropriate signatures. An applicant who has completed his/her entire medical genetics training by December 31, 2001, must submit a completed logbook with the application. An applicant whose training in a specialty is completed between January 1, 2002, and July 31, 2002, must submit a logbook with at least 100 cases by November 30, 2001, and must submit a logbook with the remainder of the cases postmarked by March 1, 2002. [Note: Late fees do not apply to the portion of the logbook submitted between December 17, 2001, and March 1, 2002.]
8. Those individuals seeking additional certification in clinical cytogenetics, clinical biochemical genetics, clinical molecular genetics or PhD medical genetics must submit documentation of 12 months required medical genetics training in an ABMG-accredited fellowship: "Verification of Training in Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.

An applicant completing his/her required medical genetics training by July 31, 2002, may apply for ABMG certification in 2002. If the required medical genetics training has not been completed by December 31, 2001, the ABMG Administrative Office will contact the program director at the conclusion of the medical genetics training period for verification of successful completion of training.

9. Those applicants seeking additional certification in clinical genetics who have completed 24 months of training in an ACGME-accredited clinical genetics residency must submit:
 - a. Documentation of 24 months of training in an ACGME-accredited residency other than clinical genetics: Either a letter from the director of the ACGME-accredited residency program (other than clinical genetics) documenting successful completion of the 24 months of the ACGME-accredited residency training and/or documentation of board certification in an ABMG-recognized specialty. [Note: completion of 48 months of training in an ACGME-accredited clinical genetics residency fulfills this requirement.]
 - b. Documentation of 24 months required medical genetics training in an ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics" form completed and signed by the trainee's clinical genetics residency program director verifying the inclusive dates of

training, satisfactory progress of the trainee, and good character of the trainee.

An applicant completing his/her required medical genetics training by July 31, 2002, may apply for ABMG certification in 2002. If the required medical genetics training has not been completed by December 31, 2001, the ABMG Administrative Office will contact the residency program director at the conclusion of the clinical genetics residency for verification of successful completion of training.

- c. Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.
- C. Individuals who have been active candidates, but who have failed to achieve certification in two consecutive examination cycles or within 6 years of initial application:
 - All such individuals must complete the equivalent of an additional 12 months of full-time medical genetics training in an ABMG-accredited fellowship program in that specialty or in an ACGME-accredited clinical genetics residency. A letter requesting approval for this additional training should be submitted by the program director to the ABMG Credentials Committee at the ABMG Administrative Office prior to the onset of the additional training. This letter must specify the inclusive dates and content of the additional training and must be signed by the trainee and the program director. [Note: It is the applicant's responsibility to assure that this request is submitted before, or no later than 2 months after, commencement of the additional training.]

Individuals who will have completed their additional 12 months of training by July 31, 2002, must submit:

1. A completed and notarized application form
2. Application review fee (see Fees, Section X)
3. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, post-doctoral training, medical genetics training, and professional employment
4. Documentation of doctoral degree: An official final transcript (including the degree earned, the field in which the degree was earned, and the date the degree was earned). A photocopy of the final transcript is not acceptable.
5. Documentation of the required additional year of medical genetics training in an ABMG-accredited fellowship program or ACGME-accredited clinical genetics residency: "Verification of Training in Medical Genetics" form completed and signed by the trainee's medical genetics fellowship program director or clinical genetics residency director verifying the specialty area(s) of training, inclusive dates of training, satisfactory progress of the trainee, and good character of the trainee.
6. Three letters of endorsement: Each letter must support the applicant's candidacy for ABMG certification and at a minimum attest to the applicant's honesty, integrity, and good moral character. At least one letter must be from an ABMG diplomate who is a faculty member, other than the program director, in the ABMG-accredited fellowship/ACGME-accredited medical genetics residency program in which the applicant trained; the other two letters must be from ABMG diplomates who are in good standing with the ABMG. Each letter of endorsement must be in a sealed envelope and signed by the diplomate over the seal.
7. A new logbook of 150 additional cases in the specialty area in which the applicant is seeking certification collected during the inclusive dates of the approved additional training period in an ABMG-accredited fellowship/ACGME-accredited clinical

genetics residency program. The logbook must be in the format specified by the ABMG with the appropriate signatures.

An applicant who has completed his/her approved additional medical genetics training by December 31, 2001, must submit a completed logbook with the application.

An applicant whose training in a specialty is completed between January 1, 2002, and July 31, 2002, must submit a logbook with at least 100 cases by November 30, 2001, and must submit a logbook with the remainder of the cases postmarked by March 1, 2002. (Note: Late fees do not apply to the portion of the logbook submitted between December 17, 2001, and March 1, 2002).

8. Applicants in clinical genetics: Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.
- D. Individuals who have been active candidates, but who have failed to achieve certification in one cycle and who are reapplicants for the following examination cycle, must submit:
 1. A completed and notarized application form
 2. Reapplication review fee (see Fees, Section X)
 3. Examination fees (see Fees, Section X)
 4. Applicants in clinical genetics only: Copy of current, valid, unrestricted license to practice medicine in the US. The license must be valid on the date on which the ABMG certifying examination is taken. A temporary, limited license such as an educational or institutional license or housestaff permit is not acceptable.

III. Applicants with a Disability Requesting Special Accommodations During the Certification Examination

Applicants with a physical or mental disability who need special accommodations during the certifying examinations must check the "Application for Special Accommodations" box on the application form and must complete and submit the "Application for Special Accommodations" form with the application. The ABMG supports the intent of the Americans with Disabilities Act (ADA) and attempts to make reasonable accommodations for applicants with disabilities. The ABMG offers examinations in a place and manner accessible to individuals with disabilities or offers alternative accessible arrangements for such individuals. Auxiliary aids and services are offered only if they do not fundamentally alter the measurement of the skills and knowledge the examination is intended to test.

The applicant must notify the ABMG Administrative Office immediately if new circumstances arise after submission of the application that cause the applicant to request special accommodations during the certifying examination.

IV. Results of Application Review

- A. If further documentation is required and/or the application is in some manner incomplete, the applicant will be notified.
- B. The Credentials Committee of the ABMG will notify, in writing, each applicant of his/her candidate status.
 1. Active candidate status granted—All credentialing requirements have been satisfied in one or more specialty areas and all application review fees have been paid. The active candidate is eligible to sit the certifying examination(s). The active candidate will be asked to submit the examination fees at this time (see Fees, Section X).

Note: The term "Board eligible" is not used to describe active candidate status. Active candidate status expires at the time that the results of the ABMG certifying examination are released. If a candidate fails to achieve certification for any reason (including withdrawing from the examination process), the individual loses active candidate status.

2. Active candidate status denied—The applicant has failed to satisfy one or more credentialing requirements.

Applicants who are denied active candidate status and who are considering an appeal may write to the ABMG Administrative Office to obtain a copy of the "Appeal Process for Adverse Decisions Affecting Certification." Appeals of candidate status must be made in writing to the ABMG Administrative Office within 30 days after receipt by the applicant of notice of the adverse decision.

V. ABMG Certifying Examination

The ABMG certifying examination is offered every 3 years. The next ABMG certifying examination will be held August 14-15, 2002. Approved applicants will be sent written notification of active candidate status. This letter will also include information on examination fees and deadlines and examination sites and scheduling procedures. The 2002 examination will be computer-based and held at Prometric centers throughout the US and Canada.

- A. Admission to the examination site: Candidates must bring a current government-issued photo ID (eg, driver's license or passport) to the examination and the scheduling permit that will be mailed to the candidate in March 2002. No one will be admitted to the examination without a government-issued photo identification and the scheduling permit.
- B. The ABMG certifying examination is composed of two parts: a general examination and a specialty examination in one of five specialty areas. An active candidate for ABMG certification must take the general examination and at least one specialty examination. A candidate may only take the specialty examination(s) for which s/he has been credentialed.
- C. An active candidate who is an ABMG diplomate and who is applying for certification in an additional specialty or specialties must take both the general examination and the specialty examination(s) for which s/he has been credentialed.
- D. To be certified by the ABMG, active candidates must pass both the general examination and at least one specialty examination.
- E. Failure to pass the certifying examination is not grounds for appeal.
- F. Candidates must inform the proctor of any difficulties encountered at the examination site. In addition, candidates must inform the ABMG Administrative Office in writing within 1 week of the examination of any such difficulties encountered at the examination site.
- G. The content of the certification examinations is proprietary and strictly confidential information. Applicants must sign a notarized statement agreeing that they will not disclose, either directly or indirectly, any question or any part of any question from the examination to any person or entity. The unauthorized receipt, retention, possession, copying, or disclosure of any certification examination materials, including but not limited to the content of any examination question, before, during, or after the examination may subject the applicant to legal action. Such legal action may result in monetary damages and/or disciplinary action including denial or revocation of certification.

VI. ABMG Certification

A. Time-limited ABMG certificates

Candidates for ABMG certification who pass the general examination and at least one specialty examination will become diplomates of the ABMG for a period of 10 years from the date of the certifying examination. A certificate will be mailed to all diplomates in the spring following the examination. This information becomes public information and is listed in the *Official ABMS Directory of Board Certified Medical Specialists*.

B. Revocation of ABMG certificates

Any certificate issued by the ABMG shall be subject to revocation at any time should the ABMG determine, in its sole judgment, that a candidate who has received a certificate was in some respect not properly qualified to have received it or is in some respect not properly qualified to retain it.

VII. Failure to Achieve ABMG Certification

A. Individuals who do not pass the ABMG certifying examination, who withdraw from the certifying examination, or who do not appear at the certifying examination site fail to achieve ABMG certification.

B. No portion of the ABMG certifying examination score will be carried forward to any future certifying examination cycle. Thus, if an applicant has passed either the general examination or a specialty examination, but not both, neither score will be carried forward.

VIII. Request to Withdraw

If an approved applicant withdraws from the examination, examination fees will not be refunded. All fees are nonrefundable.

Active candidate status is not maintained after examination results are released. Such applicants may reapply for "active candidate status." Applicants are required to achieve certification within two successive examination cycles or within 6 years of achieving active candidate status, whichever comes first. Credentials carry an applicant for two cycles. Withdrawing from an examination cycle is counted as failure to achieve certification during that cycle.

IX. Deadline for Applications

A. The electronic portions of the application must be completed online no later than November 30, 2001, and other nonelectronic materials must be postmarked no later than November 30, 2001. All required fees, documents, letters of endorsement, and other nonelectronic materials must be submitted to the ABMG Administrative Office and must be postmarked no later than November 30, 2001.

B. Late Fee: Applications electronically submitted and/or postmarked between December 1, 2001, and December 15, 2001, must be accompanied by a late fee (see Fees, Section X).

C. Applications electronically submitted and/or postmarked December 17, 2001, or later will be returned to the applicant without review.

D. Notification of receipt of applications

- Candidates will automatically be notified of the receipt of an online application form.
- The ABMG Administrative Office cannot respond to individual inquiries regarding receipt of other application materials. Candidates should send any required written materials via United States Postal Service certified mail with a return receipt of delivery. It is the applicant's responsibility to ensure on-time delivery of the application.

X. Fees

All fees must be paid in US currency by check or money order made payable to the American Board of Medical Genetics. The ABMG does not accept credit card payments. All fees are nonrefundable.

A. Application Review Fee

All application review fees must accompany the application (see Deadlines for Application, Section IX). Fees for all first-time applicants, ABMG diplomates seeking certification in another specialty, and individuals who have failed to achieve certification in two examination cycles or within 6 years:

One specialty	\$450
Two specialties	\$500
Three specialties	\$550
Four specialties	\$600

B. Reapplication Review Fee

Fee for all individuals who have been active candidates, but who failed to achieve certification in one cycle and who are reapplicants within one examination cycle: \$100

C. Late Application Review Fee

Additional fee for any application which is postmarked (or electronically submitted) between December 1, 2001, and December 15, 2001: \$250

D. Examination Fees

1. Examinations Fees:

a) General examination	\$450
b) Specialty examination:	
Clinical genetics	\$500
PhD medical genetics	\$500
Clinical cytogenetics	\$500
Clinical biochemical genetics	\$500
Clinical molecular genetics	\$500

2. First-time applicants for ABMG certification, ABMG diplomates seeking certification in an additional specialty(ies), and individuals who have been active candidates and who have failed to achieve certification in two consecutive examination cycles or within 6 years of initial application must submit the examination fees to the ABMG Administrative Office upon notification of active candidate status.

3. Individuals who have been active candidates but who failed to achieve certification in one cycle and who are reapplicants within one examination cycle must submit the examination fees with the application and the reapplication fee (see Deadline for Applications).

XI. Recognition of Training by the Canadian College of Medical Geneticists (CCMG)-Accredited Programs and ACGME/ABMG-Accredited Programs

A. The ABMG recognizes CCMG specialty certification as evidence of equivalence of successful completion of ABMG- or ACGME-accredited training.

B. Applicants for ABMG certification who are CCMG diplomates or who have received medical genetics training in a CCMG-accredited program must also meet all other applicable credentialing requirements of the ABMG.

C. Individuals trained in a CCMG-accredited training program, but who are not CCMG certified, may apply to the ABMG for certification. Evidence of completion of a prescribed course of accredited training must be submitted by the applicant's training program director. Cases obtained from a CCMG-accredited training program are acceptable and must be submitted in the ABMG log-book format. The ABMG reserves the right to require additional training to ensure that its requirements for certification are met.

- D. Three letters of endorsement may be submitted by CCMG or ABMG diplomates, one of whom must be the director of the applicant's medical genetics training program.
- E. Applicants are responsible to the ABMG for the full application review fee, examination fee(s), and any other applicable fees (see Section X) and deadlines (see Section IX).

XII. International Doctoral Degrees and International Graduate Medical Training

- A. All individuals seeking certification by the ABMG must fulfill all basic requirements for certification detailed above.
- B. All individuals with a doctoral degree earned outside of the US, Canada, or Puerto Rico are strongly urged to petition the ABMG Credentials Committee at the ABMG Administrative Office in writing prior to the onset of medical genetics training in an ABMG-accredited fellowship or ACGME-accredited clinical genetics residency program for determination of equivalency of the doctoral degree.

The following should accompany the petitioning letter:

1. Copy of the doctoral diploma and transcript of doctoral degree
2. Curriculum vitae with bibliography that includes dates and location of undergraduate education, doctoral education, post-doctoral training, and professional employment
3. For an individual with an MD degree: Copy of a standard certificate from the Educational Commission for Foreign Medical Graduates (ECFMG). This is required for all individuals in the specialty of clinical genetics. This is strongly recommended for individuals in the specialties of clinical biochemical genetics, clinical cytogenetics, and clinical molecular genetics for the 2002 examination cycle and is required for the 2005 examination cycle.
4. It is strongly recommended for the 2002 examination cycle, and will be required for the 2005 examination cycle, that an individual with an earned PhD degree from a country in which English is not the primary language must have taken the Test of Spoken English as a Foreign Language (TSE) examination within 2 years of entering an accredited training program or applying for ABMG certification. A minimal acceptable TSE score is 45.

Individuals applying for ABMG certification in 2002 must have the official TSE examination scores sent directly to the ABMG Administrative Office by the Educational Testing Service (Rosedale Rd, Princeton, NJ, 08541; 609 921-9000) no later than November 30, 2001.

Note: Because the Educational Testing Service retains TSE examination scores for only 2 years following the examination, applicants for ABMG certification must have these scores sent to the ABMG Administrative Office within 2 years of taking the examination. The TSE examination scores may be sent to the ABMG Administrative Office before the applicant submits any other portions of the application. It is suggested that official scores be sent to the ABMG Administrative Office as soon as an individual enters a training program.

- C. Individuals interested in entering an ACGME-accredited clinical genetics residency who have received graduate medical training outside the US, Canada, or Puerto Rico should petition the ABMG Credentials Committee at the ABMG Administrative Office in writing prior to beginning training for determination of equivalency of their graduate medical training. The following must accompany the petitioning letter: Copy of certificate of graduate medical training and letter from the director of the graduate medical training program stating the inclusive dates and the amount of time the individual spent in the training program.

The Credentials Committee may grant graduate medical training equivalency for 2 years, 1 year, or no years.

If the Credentials Committee grants 1 year of graduate medical training equivalency, the individual must complete 12 months of full-time training in an ACGME-accredited residency program (other than clinical genetics).

If no graduate medical training equivalency is granted, the individual must complete 24 months of full-time training in an ACGME-accredited residency program (other than clinical genetics) or 48 months of full-time training in an ACGME-accredited 4-year clinical genetics residency.

XIII. Points Offered to Help Understand the Process of ABMG Certification

- A. Requirements for ABMG certification, including doctoral degree requirements, medical training requirements, medical genetics training requirements, credentialing process, and certifying examinations reside exclusively with the Board of Directors of the ABMG. Any questions that trainees or program directors have about the ABMG certification process must be directed in writing to the ABMG Administrative Office, at 9650 Rockville Pike, Bethesda, MD 20814-3998.
- B. Individuals interested in pursuing ABMG certification must be enrolled in an ABMG-accredited fellowship or an ACGME-accredited clinical genetics residency. The program must be accredited in the specialty(ies) in which the trainee plans to seek certification. The list of ABMG-accredited fellowships and ACGME-accredited clinical genetics residencies is available in the *Training Guide to North American Graduate and Post-Graduate Training Programs in Human Genetics* prepared by the American Society of Human Genetics (<http://www.faseb.org/genetics/ashg/tpg99/98tpgmen.htm>).
- C. The program director must submit to the ABMG Administrative Office documents verifying the training of each medical genetics trainee planning to seek ABMG certification. Trainees are advised to check with their program director to assure that these forms contain correct information and have been properly filed. The required documents are:
 1. The "Trainee Information Sheet" which is submitted to the ABMG Administrative Office by the program director at the onset of the applicant's training. Of note, the specific date, month, and year of the start and conclusion of the trainee's medical genetics training, and the ABMG specialty(ies) for which the trainee is receiving training must be reported on this form.
 2. The annual report of the training program which is filed each year with the ABMG Administrative Office. The annual report includes for each trainee the inclusive dates of training and the ABMG specialty(ies) for which the trainee is receiving training.
- D. A trainee is only eligible to apply for ABMG certification in 2002 in specialties for which the necessary training will have been completed by July 31, 2002.
- E. An individual who is interested in pursuing medical genetics training and ABMG certification and who has received a doctoral degree and/or some or all graduate medical training outside of the US, Canada, or Puerto Rico may need to fulfill additional requirements for certification (see Section XII). The interested person and the director of the medical genetics training program should petition the ABMG Credentials Committee in writing via the ABMG Administrative Office to clarify any additional requirements for ABMG certification before that individual commences medical genetics training.

- F. The ABMG limits "active candidate status" to individuals who fulfill the criteria for certification. Those practitioners working in the field of medical genetics who do not meet the specific criteria, despite academic or clinical backgrounds, are not eligible to sit for the ABMG certifying examination.
- G. It is strongly recommended that an interested person or trainee whose training does not conform to the training requirements outlined in this document petition the ABMG in writing prior to the onset of medical genetics training to clarify the requirements for certification by the ABMG.

Description of Specialties in Medical Genetics

To be an active candidate for certification by the ABMG, an individual must meet the criteria in the area of desired certification and provide the required supporting documentation. Certification is offered in clinical genetics, PhD medical genetics, clinical cytogenetics, clinical biochemical genetics, and clinical molecular genetics.

Clinical Geneticist

A clinical geneticist is an individual who holds a US- or Canadian-earned, or the equivalent of an earned, MD or DO degree, has had 2 years in an ACGME-accredited clinical residency program in another medical specialty, 2 years in an ACGME-accredited residency in clinical genetics (or 4 years in an accredited clinical genetics residency program), a valid medical license, and demonstrates competence to provide comprehensive genetic diagnostic, management, therapeutic, and counseling services.

These requirements imply that the individual possesses

- broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders;
- diagnostic and therapeutic skills in a wide range of genetic disorders;
- the ability to elicit and interpret individual and family histories;
- the ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures;
- expertise in genetic and mathematical principles to perform risk assessment;
- skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion; (2) anticipate areas of difficulty and conflict; (3) help families and individuals recognize and cope with their emotional and psychological needs; (4) recognize situations requiring psychiatric referral; and (5) transmit pertinent information in a way that is comprehensible to the individual or family; and
- knowledge of available health care resources (community, regional, and national) required for appropriate referral or support.

PhD Medical Geneticist

A PhD medical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, PhD degree in genetics, human genetics, or a related field who demonstrates competence to provide comprehensive genetic diagnostic, management, and counseling services, as well as expertise in complex risk assessments and in the integration of clinical and genetic information.

These requirements imply that the individual possesses

- broad knowledge in human and medical genetics, including an understanding of heterogeneity, variability, and natural history of genetic disorders;
- the ability to elicit and interpret individual and family histories;

- the ability to integrate clinical and genetic information and understand the uses, limitations, interpretation, and significance of specialized laboratory and clinical procedures;
- expertise in genetic and mathematical principles to perform complex risk assessments and paternity and forensic computations, interpret pedigree analysis (both segregation and linkage), and understand the principles of medical genetics;
- skills in interviewing and counseling techniques required to (1) elicit from the patient or family the information necessary to reach an appropriate conclusion, (2) anticipate areas of difficulty and conflict, (3) help families and individuals recognize and cope with their emotional and psychological needs, (4) recognize situations requiring psychiatric referral, and (5) transmit pertinent information in a comprehensible way to the individual or family; and
- knowledge of available health care resources (community, regional, and national) required for appropriate referral or support.

Clinical Biochemical Geneticist

A clinical biochemical geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret biochemical analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis of a broad range of biochemical genetic disorders.

These requirements imply that the individual possesses

- the ability to supervise and direct the operations of a clinical biochemical genetics diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures;
- broad knowledge of (1) basic biochemistry and genetics, (2) the application of biochemical techniques to the diagnosis and management of genetic diseases, and (3) the etiology, pathogenesis, clinical manifestations, and management of human inherited biochemical disorders;
- an understanding of the heterogeneity, variability, and natural history of biochemical genetic disorders;
- diagnostic and interpretive skills in a wide range of biochemical genetic problems; and
- the ability to communicate biochemical laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Clinical Cytogeneticist

A clinical cytogeneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret cytogenetic analyses relevant to the diagnosis and management of human genetic diseases and who acts as a consultant regarding laboratory diagnosis for a broad range of cytogenetic disorders, including inherited and acquired conditions.

These requirements imply that the individual possesses

- the ability to supervise and direct the operations of a clinical cytogenetic diagnostic laboratory, including technical expertise and knowledge in quality control and quality assessment procedures;
- broad knowledge in human cytogenetics, including prenatal and postnatal cytogenetic diagnosis, infertility and pregnancy loss, cancer, and leukemia;
- an understanding of the heterogeneity, variability, and natural history of cytogenetic disorders;
- diagnostic and interpretive skills in a wide range of cytogenetic problems; and

- the ability to communicate cytogenetic laboratory results in the capacity of consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

Clinical Molecular Geneticist

A clinical molecular geneticist is an individual with a US- or Canadian-earned, or the equivalent of an earned, doctoral degree (MD, DO, PhD) who can correctly perform and interpret molecular analyses relevant to the diagnosis and management of human genetic diseases and who can act as a consultant regarding laboratory diagnosis of a broad range of molecular genetic disorders.

These requirements imply that the individual possesses

- the ability to supervise and direct the operations of a clinical molecular genetics diagnostic laboratory, including technical experience and knowledge in quality control and quality assessment procedures;
- the ability to perform a variety of molecular diagnostic assays;
- an understanding of the heterogeneity, variability, and natural history of molecular genetic disorders;
- a broad knowledge of (1) basic molecular biology and genetics; (2) the application of recombinant DNA techniques and linkage analysis to the diagnosis of genetic diseases; and (3) the etiology, pathogenesis, clinical manifestations, and management of human genetic disorders;
- diagnostic and interpretive skills in a wide range of clinical molecular genetics problems; and
- the ability to communicate molecular diagnostic laboratory results in the capacity of a consultant to medical genetics professionals and other clinicians and directly to patients in concert with other professional staff.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Neurological Surgery to ascertain whether the information below is current.)

Diplomates

A list of diplomates and the bylaws of the American Board of Neurological Surgery (ABNS) appear in the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*, which can be obtained from Elsevier Science (655 Avenue of the Americas, New York, NY 10010; 888 437-4636; fax 212 633-3820). In addition, a list of new diplomates is published in the *Journal of Neurosurgery* shortly after each oral examination.

Information regarding training programs acceptable for certification can be found in the *Graduate Medical Education Directory*. This directory can be purchased from the American Medical Association (515 N State St, Chicago, IL 60610).

Qualifications

The ABNS evaluates all qualified applicants for their proficiency in neurosurgery.

The minimum educational requirements of the Board do not restrict programs to these standards. To ensure satisfactory competence in neurosurgery, neurosurgical program directors may retain residents in their programs beyond the required 5 years of training.

It is the responsibility of the candidate to seek information concerning current requirements for certification by the ABNS. Even though directors of approved neurosurgical residency programs are well informed regarding requirements for certification, placement in an approved program does not guarantee adequate training for certification. The candidate must make sure he/she receives such training.

Training Prior to Neurosurgery Residency

1. Graduation from a medical school that is acceptable to the Board.

2. Currently valid license to practice medicine in the state, province, or country of residence.
3. Twelve months devoted to acquiring adequate knowledge of fundamental clinical skills. This is known as postgraduate year one (PGY1), general surgery year one, or internship; completion is recommended prior to beginning neurosurgical training but must be done prior to beginning the third year of residency. It may be achieved by 1 year of training in a general surgery program accredited by the Accreditation Council for Graduate Medical Education (ACGME) in the United States or, for applicants entering training programs prior to July 16, 1997, a Canadian equivalent. It may also be acquired during the course of training in an ACGME-accredited neurosurgical residency program in the US or, for applicants entering training programs prior to July 16, 1997, a Canadian equivalent. Such training must include not less than 6 months in surgical disciplines other than neurosurgery. The remaining 6 months must consist of clinical skills considered appropriate by the program director but may not include more than 6 weeks of neurosurgery; however, this portion may include up to 3 months of neurology.

Neurological Surgery Training Requirements

For residents beginning the neurosurgery portion of their training on or after July 1, 1979:

1. Completion of a minimum of 5 years of training in neurological sciences following PGY1. Neurosurgery training must occur in residency programs accredited by the Residency Review Committee for Neurosurgery. For applicants entering residency training prior to July 16, 1997, training programs may be accredited by the Canadian equivalent.
2. Sixty months of training must include at least 36 months of core clinical neurosurgery with progressive responsibility culminating in 12 months served as a senior or chief resident with major, primary patient management and administrative responsibilities, all as deemed appropriate and designated by the program director.
3. Training in clinical neurosurgery must be progressive and not obtained during repeated short intervals in a number of institutions. At least 24 months of training in core clinical neurosurgery must be obtained in one institution.
4. At least 3 months must be devoted to training in clinical neurology as a full-time assigned resident in an accredited neurology training program. Six months is recommended. Up to 3 months of this training may be undertaken during PGY1.
5. The unobligated 21 or more months must be devoted to aspects of the basic or clinical neurological sciences which, at the discretion of the program director, may include neurology, neurosurgery, neuropathology, neuroradiology, research, and/or other disciplines related to the nervous system. Trainees are expected to acquire basic knowledge and skills in each of these disciplines.
6. Elective training by residents outside of their parent neurosurgical residency program does not count toward fulfilling training requirements unless specifically arranged by the trainee's program director and approved by the Board in advance. In such instances, the secretary of the Board must be notified in writing of the prospective rotation. Such training may in no way compromise the 36 months of core neurosurgery.
7. Residents are required to record and supply to the Board, in a fashion determined by the Board, a log of their operative procedures during all clinical years.
8. The program director must notify the Board of the appointment of each new neurosurgical resident and whether he/she is entering the program with intent to obtain certification. If so, the director must inform the trainee of the requirements necessary to obtain such certification.
9. Prior to acceptance for the certification process, the Board requires a statement from the candidate's program director to the effect that the candidate has met the minimum time requirements, has performed in a satisfactory manner, and is well prepared to enter into the independent practice of neurosurgery.

Exceptional Modifying Circumstances

Upon recommendation of the program director, the Board may at its own discretion consider and give retroactive credit for previous training if a resident, before entering an approved neurosurgical training program, has had substantially more than the prerequisite training in general surgery, medical neurology, or the basic neurological sciences. Such credit is not automatic and must be approved by the Board. If a resident transfers from one accredited neurosurgical training program to another accredited program, the director of the program from which the candidate transfers must indicate in writing to the new program director and to the Board the credit for training, in respect to time and category, he/she is prepared to certify that the trainee successfully completed. The new program director may or may not honor such credit, depending upon appraisal of the resident's professional and educational progress in the new program. A statement of how much training credit will be accepted must be submitted to the Board by the new program director.

Training by preceptorship is not considered as fulfilling certification requirements. No credit is given for time spent in such training.

Credit for elective training in foreign or other nonapproved centers may be granted by the Board on an individual basis when this training is carried out as an integral part of the residency program with the advice and approval of the trainee's program director. (See 6. above.)

Requests for training away from a parent institution or for transfer from one program to another should be submitted in writing to the Board prospectively, not retroactively.

The above provisions in no way alter the basic minimum requirement of 60 months of neurosurgical residency training, including a minimum of 3 months of training in clinical neurology and 36 months of clinical neurosurgery in accredited institutions, 12 months of which must be as senior resident and 24 months in one institution.

Primary Examination

Each applicant for the ABNS oral examination must first pass for credit the Primary Examination, which is a written examination prepared by the Board with the assistance of a professional testing organization. The examination includes information on neuroanatomy, neurobiology, neurology, neuropathology, neuropharmacology, neurophysiology, neuroimaging, neurosurgery, fundamental clinical skills, and critical care, plus material from other relevant disciplines deemed suitable and important by the Board.

The Primary Examination is given in March of each year at neurosurgery residency programs throughout the United States and Canada. Residents may take it for self-assessment or credit toward certification at the discretion of their program directors. It is also open to all neurosurgeons who have successfully completed training at accredited programs; they may take it as often as desired for self-assessment or credit. An application must be filed before the first of January, the deadline for receipt of applications by the Board. They must be accompanied by the fee set by the Board. The fee will be refunded only until the deadline date for receipt of applications. Examinees are required to sign a pledge that states they 1) agree to be bound by the Board's ruling regarding credentials, irrespective of scores on the examination, 2) grant permission to the ABNS and its testing organization to release the results, either for credit or

self-assessment, to the examinee's program director, and 3) will not reproduce or copy the examination in any form in part or in whole.

Practice Requirements

After beginning practice, the candidate shall furnish to the Board the names of three physicians in the community (two neurosurgeons, including one ABNS diplomate) who are knowledgeable about the quality of the candidate's practice. The Board will request reference letters from these physicians and others in the candidate's community. It is also the prerogative of the Board to send representatives to review the candidate's practice.

The candidate shall submit the names and addresses of all hospitals where he/she has or has had privileges. Letters will be requested to advise the Board of the candidate's status regarding admitting and operating privileges in each hospital. At the time of credentialing, each candidate must be in possession of hospital staff privileges in all hospitals in which he/she cares for patients. Such privileges must be unrestricted in respect to the hospital's requirements for a neurosurgeon.

The candidate must also submit a typewritten, chronological list of all inpatients for whom he/she was the responsible physician or surgeon. Twelve current, consecutive months are required. The total experience must be tabulated by the candidate in the format defined by the Board. The case material must be signed by the chief of staff, chief of service, president of the medical staff, or hospital administrator of each hospital where the candidate practices in verification of the essential accuracy of the data. These data must be approved by the Board prior to scheduling for oral examination.

A candidate must be scheduled for oral examination by the Board within 5 years of completing an accredited training program. Compliance with this regulation requires early submission of applications after training. If a candidate is not scheduled within the 5-year limit, he/she must once again pass the Primary Examination for credit. The candidate will then have 3 years to become certified. Candidates should keep in mind that at least 12 months are required between submission of a complete application and oral examination.

Certification of Those Training in Canadian Programs

Individuals who began neurological residency training in approved Canadian programs before July 16, 1997, and hold a fellowship in neurosurgery from the Royal College of Physicians and Surgeons of Canada are eligible for certification through the same route as candidates training in the United States, as outlined above.

Applications

Applications for oral examination and certification are automatically sent to residents at the end of their last year of training. Additional applications and practice data information are available from the Board's office. The application should be filled out and returned to the Board soon after beginning practice.

A pledge is part of the application for oral examination. By signing the application, the applicant agrees to abide by all the Bylaws and Rules and Regulations of the Board.

Upon receipt of an application, the Board takes such steps as deemed appropriate to verify the statements of facts made therein. Inquiries are made from references and others familiar with the candidate to obtain information relevant to the requirements for examination. Once the year of practice data is received, it is reviewed and, when approved, becomes part of the application.

The Board makes the final decision regarding a candidate's eligibility for oral examination and potential certification after

considering all available information pertaining to the entire process of certification.

Application fees are not refunded, even when the application for oral examination is denied.

Oral Examination

The oral examination, a clinical problem-solving and patient-management examination, is held twice a year. Candidates are given case histories and, where appropriate, x-rays, scans, and other visual aids to augment the presentation and development of cases. The candidate must be able to explain orally how he/she would proceed in evaluating and managing a case, and in planning and performing any proposed operation or operations, if indicated. One hour is devoted to neurological surgery-intracranial diseases; 1 hour to neurological surgery-spinal and peripheral nerve diseases; and 1 hour to a mixture. Neurosurgical neurology is included in all sections. Each of the 3 hours is conducted in an interview setting with two examiners.

A candidate who passes the oral examination is thereby certified and will be forwarded the Board's certificate, once it has been suitably engrossed and signed by the officers of the Board.

Reexamination Rules

A candidate failing the oral examination once may request reexamination within 3 years. A minimum of 1 year must elapse before taking the examination for the second time. A new examination fee must be paid.

A candidate who has failed the oral examination on two or more occasions must pass the Primary Examination for credit again before becoming eligible to retake the oral examination. Two letters of reference from neurosurgeons certifying the nature and quality of the candidate's practice must be submitted to the Board, as well as hospital privilege letters and a year of current practice data. In addition, the candidate must pay the oral examination fee. Under these circumstances, candidates must take the oral examination within 3 years of repassing the Primary Examination. Should the candidate not apply for or fail to appear for oral examination within the 3-year period, he/she must re-pass the Primary Examination before being eligible for the oral examination once again.

Payment of Fees

All fees are determined by the Board and reflect the costs that the Board incurs through obligations associated with the certification process.

Revocation of Certification

Pursuant to the Rules and Regulations established by the ABNS, the Board has the authority to revoke any certificate issued by it for reasons such as: the person to whom the certificate was issued is convicted of a felony, or his/her license to practice medicine has been lost or encumbered, or false information was given on the application for oral examination. Should revocation be disputed, there is a hearing mechanism for such an action.

American Board of Nuclear Medicine

900 Veteran Ave
Los Angeles, CA 90024-1786
310 825-6787
310 794-4821 Fax

Ronald L Van Heertum, MD, Chairman, New York, New York

Christopher J Palestro, MD, New Hyde Park, New York
David C Price, MD, San Francisco, California
Edward B Silberstein, MD, Cincinnati, Ohio
S Ted Treves, MD, Boston, Massachusetts

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Nuclear Medicine [ABNM] to ascertain whether the information below is current.)

General Requirements for Each Candidate

Assurance that the applicant represents himself/herself to be a specialist in nuclear medicine.

General Professional Education

Graduation from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy. If the applicant is a graduate of a medical school outside the United States or Canada, he/she must hold a currently valid ECFMG certificate issued by the Educational Commission for Foreign Medical Graduates, 3624 Market St, Philadelphia, PA 19104-2685; 215 386-5900.

Preparatory Postdoctoral Training

Training required for admission to the certifying examination in nuclear medicine shall be comprised of 1 or more years of preparatory postdoctoral training and 2 or more years of residency training in nuclear medicine.

Preparatory postdoctoral training shall consist of 1 or more years of residency training in programs satisfactory to the American Board of Nuclear Medicine. Such programs shall provide broad experience in clinical medicine in which the primary emphasis is on the patient and his or her clinical problems. Preparatory training may be in any specialty in a residency program in the US that is accredited by the Accreditation Council for Graduate Medical Education (ACGME), or programs in Canada approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) or the Professional Corporation of Physicians of Quebec (PCPQ), or alternative training as approved by the ABNM. Preparatory postdoctoral training must precede the training in nuclear medicine.

Each nuclear medicine residency training program director must ensure that for each resident entering his/her program the preparatory postdoctoral training has been in (1) a US program accredited by the ACGME or (2) a Canadian program approved by the RCPSC

or the PCPQ or (3) an alternative training program as approved by the ABNM.

Postdoctoral Training in Nuclear Medicine

1. After completion of the preparatory postdoctoral training program, there shall be satisfactory completion of a 2-year formal residency training program in nuclear medicine in a nuclear medicine residency training program recognized and approved by the Residency Review Committee for Nuclear Medicine of the ACGME or a Canadian program approved by the RCPSC or PCPQ as competent to provide satisfactory training in nuclear medicine.
2. The 2-year formal residency training program in nuclear medicine must include:
 - a. Training in clinical nuclear medicine which must include, but not be limited to, performance and interpretation of in vivo imaging studies of body organs and systems using radiopharmaceuticals; training and experience in the application of nonimaging procedures, including instruction in principles of immunology, radioimmunoassay, and receptor assay technology; radiopharmaceutical absorption, dilution, excretion, and organ function studies; and therapeutic uses of unsealed radiopharmaceuticals, including patient selection, dosimetry, and dose administration in the treatment of cancer and hematologic and metabolic disorders. In vivo studies will include use of external detectors and scintillation cameras, including single-photon tomography and positron emission tomography; cardiovascular nuclear medicine procedures, including exercise and pharmacologic stress testing, as well as management of cardiac emergencies related to such testing; and correlation of nuclear medicine procedures with other imaging modalities, such as computed tomography, ultrasonography, nuclear magnetic resonance imaging, and angiography.
 - b. Training in basic and allied sciences, which must include medical nuclear physics; instrumentation; radiopharmaceutical chemistry including reactor, cyclotron, and generator production of radionuclides; computer sciences; statistics; radiation biology; and radiation safety, including safe management and disposal of radioactive substances. Training in allied sciences may include pathology, physiology, and other basic sciences associated with nuclear medicine. The time spent in training in allied science may be spaced throughout the period of training in nuclear medicine and in a manner that does not exceed 6 months of training.
 - c. For applicants who have completed residency training programs in clinical disciplines closely related to nuclear medicine in residency programs accredited by the ACGME, the RCPSC, or the PCPQ, credit may be given for some of that training. Applicants desiring credit toward the nuclear medicine requirements should write to the Board requesting such credit (see "Applications," below).

Combined Training Programs

1. Nuclear Medicine and Diagnostic Radiology/ Nuclear Radiology

The American Board of Nuclear Medicine and the American Board of Radiology offer dual certification for candidates who have satisfactorily completed a combined total of 6 years of suitable accredited training in programs approved by both boards and successfully passed the certifying examination of both boards.

To be eligible for dual certification, a resident must obtain residency training in diagnostic radiology and nuclear medicine that must include a) a preparatory clinical year and b) 4 years of

education in diagnostic radiology program that includes 6 months of nuclear medicine training, followed by c) 1 year of education in a combined nuclear medicine and nuclear radiology program. Certifying examinations of each board cannot be taken until all required years of training in both specialties are satisfactorily completed. All training must be in ACGME-, RCPSC- or PCPQ-accredited programs and approved by the director of each program.

2. Nuclear Medicine and Internal Medicine

The American Board of Nuclear Medicine and the American Board of Internal Medicine offer a training pathway for candidates who have completed 4 years of combined accredited training in internal medicine and nuclear medicine leading to admissibility to certification in both specialties. To meet eligibility for dual certification, the resident must satisfactorily complete 48 months of combined training that is verified by the directors of both training programs. It is strongly recommended that combined training occur in the same institution. Residents will be eligible for admission to the written certifying examination in internal medicine after successfully completing the R-3 year of training and for the nuclear medicine examination after the R-4 year. All training must be in ACGME-, RCPSC-, or PCPQ-accredited programs and approved by the director of each program.

3. Nuclear Medicine and Cardiology

Applicants who have completed an accredited program in internal medicine/cardiology, which includes 3 months in the clinical subspecialties of internal medicine, 3 months of invasive cardiology, and 6 months of noninvasive cardiology (with an emphasis on nuclear cardiology), may apply to take the ABNM examination upon completion of an additional 12 months of nuclear medicine training (with an emphasis on noncardiac aspects of nuclear medicine) in an accredited nuclear medicine program. All training must be in programs accredited by the ACGME, RCPSC, or PCPQ and approved by the director of each program.

4. Nuclear Medicine and Neurology

The American Board of Nuclear Medicine and the American Board of Psychiatry and Neurology offer dual certification for candidates who have completed 5 years of combined accredited training in nuclear medicine and neurology. It is strongly recommended that the participating residencies be in the same institution.

To be eligible for dual certification, the resident must satisfactorily complete 60 months of training, which must be verified by the respective directors of both programs. The certifying examinations may not be taken until all required years of training in both specialties are satisfactorily completed. All training must be in ACGME-, RCPSC-, or PCPQ-accredited programs and approved by the directors of each program.

Evaluation of Clinical Training in Nuclear Medicine

1. The Board considers demonstration of clinical competence in the management of the nuclear medicine patient of paramount importance in its qualification of the applicant to take the certifying examination. The Board designates the directors of nuclear medicine residency programs and their supporting evaluation committees as the authorities who most appropriately can provide to the Board the necessary documentation of competence in clinical nuclear medicine, and requires that all program directors certify to the Board that each applicant from their programs is competent in clinical nuclear medicine. These reports will be reviewed by the Board before accepting an applicant to take the certifying examination.
2. If a residency program director's evaluation indicates an applicant's competence in clinical nuclear medicine is unsatisfactory,

the applicant will not be admitted to the examination unless the Board finds that the applicant's overall performance meets its standards. An applicant not admitted to an examination on the basis of these findings may appeal in writing to the Board for a special evaluation of competence in clinical nuclear medicine within 45 days of receipt of notification. The appeal should state that a request is made for review of the decision not to admit to the examination and why the applicant considers the decision to be in error. Applicants whose clinical competence is judged satisfactory in this evaluation will be admitted to the next examination for which they apply. Applicants judged not satisfactory in this evaluation are advised to spend an additional year in training before applying again for special evaluation of competence.

Applicants submitting false credentials are subject to disqualification from examination or revocation of certification.

3. All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

Patient Care Responsibility

Applicants for certification in nuclear medicine will have 1 or more years of training in which the primary emphasis is on the patient and his/her clinical problems.

Canadian Training

Physicians who satisfactorily complete training in Canadian nuclear medicine programs approved by the RCPSC or the PCPQ are eligible for admission to the ABNM certifying examinations.

Completion of Training

All preliminary and nuclear medicine residency training must be completed prior to September 1 of the year the candidate takes the certifying examination.

Licensure Requirement

A valid, unrestricted license to practice medicine in a state, territory, possession, or province of the United States or Canada will be required of all applicants for the certifying examination. If a candidate is licensed in more than one such jurisdiction, each license must be valid and unrestricted. A photocopy of every license held by the candidate must be submitted to the Board.

Approved Residency Training Programs

Residency training programs in nuclear medicine accredited by the ACGME may be found in the *Graduate Medical Education Directory*, published annually by the American Medical Association and the ACGME, or may be obtained by contacting the Secretary, Residency Review Committee for Nuclear Medicine, ACGME, 515 N State St/Ste 2000, Chicago, IL 60610.

Admissibility to Examination

An applicant is admissible to the examination only when all of the preliminary and graduate educational requirements of the Board currently in force at the time of receipt of the formal application have been satisfactorily fulfilled and deemed acceptable.

Examination

An objective type examination is administered in a morning and an afternoon session. The examination evaluates the candidate's knowledge of and competence in the management of patients in the area of clinical nuclear medicine, including, but not limited to, principles of radioassay/radiobioassay, in vitro and in vivo measurements, nuclear imaging, therapy with unsealed radionuclides, the medical effects of exposure to ionizing radiation, and the medical

management and disposal of radioactive substances. Also included is an evaluation of the candidate's knowledge in the related sciences of medical nuclear physics, radiation biology, radiation protection, instrumentation, radiopharmaceutical chemistry, computer sciences, and statistics; it may also include pathology, physiology, and other basic sciences associated with nuclear medicine.

Applications

Applicants who wish to be examined by the Board must complete, sign, and file with the Board office an application on the official form together with the supporting data required by the application. It is the responsibility of the applicant to make certain that the required evaluation forms have been completed by his/her program director and sent to and received by the ABNM.

As soon as determination is made concerning admission or nonadmission to the examination, the applicant will be notified by mail, and, if admitted, assignment of the candidate number and notification of the examination site will be given. Applications must be complete with *all* required documentation by July 20.

Before the final action on applications, officers, members, and employees of the Board are not authorized to estimate the eligibility of applicants. Applicants are requested not to discuss or write for opinions regarding the status of their applications. The Board decides on eligibility to take the examination only by approving or disapproving individual applications and accordingly has no "Board-eligible" category.

Inquiries concerning the applicability of previous training and experience should be sent with complete documentation of all education and training to the Board office. A copy of the Board's response to these inquiries should be forwarded with any subsequent examination application.

Release of Information

Candidates will receive the results of their examinations (pass/fail letter) approximately 4 months after the examination.

A list of diplomates of the ABNM will be found in the *Official American Board of Medical Specialties Directory of Board Certified Medical Specialists*, published by the American Board of Medical Specialties and Elsevier Science.

Upon request, and with the approval of the Board chairman, the Board releases information on diplomates to federal and state licensing bodies and to educational and professional organizations for specific, limited, and appropriate professional use. An authorization for release of this information is a part of the examination application form.

Policy on Reexamination

Candidates who fail the examination are eligible for reexamination. An examination fee must accompany each completed application for reexamination. If a candidate is disqualified from the examination by reason of dishonesty in the application or in taking the examination and his/her examination is invalidated by the Board, reexamination shall be at the Board's discretion.

Recertification

The ABNM offers its diplomates voluntary recertification based upon fulfillment of certain requirements, including passing an objective cognitive examination. The ABNM will not rescind initial certification granted prior to 1992. Beginning in 1992 certification will be valid for a period of 10 years and may be revalidated by recertification.

Journals Publishing Information on Application and Examination Schedules

Annals of Internal Medicine (Medical News Section)

Journal of the American Medical Association (Examinations and Licensure Monthly Section)

Journal of Nuclear Medicine

Radiology

Journal of Clinical Pathology

Changes in Policies and Procedures

The Board reserves the right to make changes in its fees, policies, and procedures at any time and cannot assume responsibility for giving advance notice thereof. The provisions of this publication are not to be construed as a contract between any candidate and the ABNM.

Fees

The examination fee must accompany the application. If the applicant is rejected by the Board or withdraws prior to August 1, the application processing fee will be retained by the Board. If the applicant withdraws after August 1, the entire examination fee will be retained by the Board.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Obstetrics and Gynecology [ABOG] to ascertain whether the information below is current.)

Objectives and Purposes

As stated in the Articles of Incorporation, the purposes of the Board include the functions: "To arrange and conduct examinations and/or other procedures to test the qualifications of voluntary candidates for certification and recertification by this Corporation. The criteria for certification and recertification shall be applied equally to all candidates regardless of sex, race, color or national origin. To issue Certificates or any other evidences of competence to eligible physicians whom this Corporation considers to have demonstrated special knowledge and professional competence relating to Obstetrics and Gynecology, which Certificates or any other evidences of competence may, at the discretion of this Corporation, be valid only for a limited period of time. To determine from time to time whether physicians who have been issued Certificates or other evidences of competence have continued to maintain their professional qualifications and to issue recertification Certificates or other evidences of competence to those physicians who successfully demonstrate continued maintenance of such qualifications."

Definitions

Obstetrician-gynecologists are physicians who, by virtue of satisfactory completion of a defined course of graduate medical education and appropriate certification, possess special knowledge, skills, and professional capability in the medical and surgical care of the female reproductive system and associated disorders, such that it distinguishes them from other physicians and enables them to serve as consultants to other physicians and as primary physicians for women.

Over the years of practice, each obstetrician-gynecologist builds upon this broad base of knowledge and skills and may develop a unique type of practice and changing professional focus. Such diversity contributes to high quality health care for women.

A physician's certification by the American Board of Obstetrics and Gynecology attests to the physician's professional colleagues and to the public that the diplomate possesses special knowledge and professional capability. Each certificate granted or issued does not of itself confer or purport to confer upon any person any degree or legal qualifications, privileges, or license to practice obstetrics and/or gynecology, nor does the Board intend in any way to interfere with or limit the professional activities of any duly licensed physician who is not certified by this Board. The privileges granted physicians in the practice of obstetrics and gynecology in any hospital are the prerogative of that hospital, not of this Board. The Board certifies as specialists those who voluntarily appear before the Board for the purpose of evaluation and certification.

Types of Board Status

1. Residency Graduate

An individual is registered with the Board when, upon application, the Board rules that he/she has fulfilled the requirements to take the written examination (see "Requirements" for the written examination).

2. Active Candidate

- An individual achieves active candidate status by passing the written examination.
- To maintain active candidate status, the candidate must fulfill all requirements for admission to the oral examination (see "Requirements") and must not have exceeded the *limitations* to admissibility for the oral examination (see "Limitations").
- Active candidate status that has expired may be regained by repeating and passing the Board's written examination.

3. Diplomate

- An individual becomes a diplomate of the Board when the written and the oral examinations have been satisfactorily completed and the Board's certifying diploma has been awarded.
- Certificates have limited duration of validity (see "Duration").

4. Expired Certificate

- An individual has failed to complete successfully a maintenance of certification examination prior to the expiration date printed on his/her time-limited certifying diploma (see "Duration").
- Individuals in this category are no longer diplomates of the American Board of Obstetrics and Gynecology.

5. Retired Diplomate

- An individual has retired from clinical practice at a time when they were a diplomate.
- Individuals in this category are retired diplomates. If they return to active practice after their time-limited certificate has expired, they must become recertified in order to reactivate their diplomate status.
- Individuals choosing to be a retired diplomate must notify the Board. Failure to take this action will result in an Expired Certificate status for an individual holding a time-limited certificate that has expired.

Rights of Applicants and Diplomates

Jurisdiction and Venue

The Corporation shall require, as a condition precedent for any person or entity to become a member, director, officer, employee, agent, applicant for examination, a diplomate certified by the Corporation, a committee or division member, whether paid or volunteer (hereinafter, individually and collectively, "Person or Entity"), that such person or entity agree as follows: In any dispute of any kind with the Corporation or any Person or Entity, such Person or Entity shall be subject to suit, if at all, only in the County and State where the Corporation maintains its principal place of business and its headquarters, which is currently Dallas, Dallas County, Texas. Each Person or Entity shall be required to consent to the exclusive jurisdiction and venue of courts located in Dallas, Texas and laws of the State of Texas for the resolution of any and all such disputes. Further, in the event any diplomate engages in any activity or form of conduct which would reasonably diminish the reputation of the Corporation and the value of its certification, the Board may require such Diplomate to appear and show cause why his/her certification should not be revoked and diplomate status terminated. The Board of Directors shall establish procedures to assure that any

diplomate required to appear shall be afforded due process and the opportunity to defend him/her self.

Obligations

The acceptance of an applicant for examination by the Corporation and the granting of diplomate status to a physician who has satisfied the requirements for certification is contingent on the agreement of the applicant or diplomate to abide, at all times, with the rules, Regulations and Directives of the Corporation, its Board of Directors and Officers, of which they are advised or on notice.

Rights

Individuals who are certified as diplomates by the Corporation acquire no property right or vested interest in their certification or in their diplomate status, the duration, terms, and conditions of which may be extended, reduced, modified, or otherwise changed as determined by the Board of Directors, in its absolute discretion to assure greater protection of the public, to recognize knowledge and skills deemed to require further evaluation or to accommodate legal requirements.

Candidate Responsibility

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an obstetrician and gynecologist. The Board does not assume responsibility for notifying a candidate of changing requirements for admissibility to any examination or impending loss of admissibility to any examination. Moreover, the candidate must meet the eligibility requirements published in the Bulletin dated for the year in which they are to take the examination.

It is the candidate's responsibility to read the applicable Bulletin, to follow the published requirements, and to meet the published deadlines.

Certification Process

Certification as a specialist in obstetrics and gynecology is the end of a process lasting many years. The required minimum duration of graduate education is 4 years.

Written Examination

During the final year of graduate training, it is necessary to initiate certain measures. Candidates due to complete their graduate training program prior to September 30 should, between September 1 and November 30 of the final year of residency, request and complete the application for the written examination. If ruled admissible to take the examination, the candidate will do so on the last Monday in June of the final year of residency.

For candidates who will complete their residency training after September 30, application for the written examination must be delayed until the following year. If ruled admissible to take the examination, the candidate will do so in June of the following year.

Oral Examination

To be ruled admissible to take the oral examination, candidates are required to provide a list of patients under their care for a 12-month period beginning on July 1 of the second year of practice after the written examination is passed. After November 1 of this second year of practice and before the following February 28, candidates should request and complete the application (November 1-February 28).

The candidate's list of patients must be mailed to the Board office between July 1 and August 1 following the completion of the 12-month period of patient care. The case lists should not be mailed until the candidate is notified of approval to submit his/her case list. If ruled admissible, the candidate will be allowed to take the oral examination in November, December, or January.

Important Dates in the Certification Process

I. Final Year of Residency (ending on or before the following September 30)

- A. July 1—Commence
- B. September 1 to November 30—Apply for basic written examination
- C. Last Monday in June—Take basic written examination

II. Practice

- A. First year of practice
 - No Board activities necessary
- B. Second year of practice
 - July 1 to June 30—Patient case list
 - November 1 to February 28—Apply for general oral examination
- C. Third year of practice
 - August 1—Deadline for submission of patient list
 - November, December, or January—Take general oral examination

III. Fellowship in Subspecialty

- A. First year (fellowship) (July 1-June 30)
 - No Board activities
- B. Second year (fellowship) (July 1-June 30)
 - No general Board activities
- C. Third year (fellowship) (July 1-June 30)
 - No general Board activities
 - (September 1 to November 30—Apply for subspecialty written examination)
- D. Fourth year—First year of practice (July 1-June 30)
 - July 1-June 30—Patient case list
 - November 1 to February 28—Apply for the November, December, or January general oral examination
- E. Fifth year—Second year of practice (July 1-June 30)
 - August 1—Deadline for submission of patient list
 - November, December, or January—Take general oral examination
 - January 1-April 30—Apply for subspecialty oral examination
 - January 1-December 31—Subspecialty patient case list
- F. Sixth year—Third year of practice (July 1-June 30)
 - January 1—Deadline for submission of thesis
 - January 1-December 31—Deadline for submission of subspecialty patient case list
 - March or April—Take oral subspecialty examination

IV.

Commencing with residents graduating in June 2002, the length of time between successful completion of the written examination and the oral examination will be shortened by 1 year. Specifically, after completion of the written examination on the last Monday in June, the candidate may begin collection of cases on July 1, but must start prior to September 1. This means that an active hospital practice must be established prior to September 1. Individuals who have not completed their residency prior to August 31 will not be allowed to begin case collection until the following July.

The implementation of this new policy will require a transitional phase-in period of at least 3 years. Therefore, for the examinations administered in the winter of years 2003-2004, 2004-2005 and 2005-2006, oral examination sessions will be scheduled for November, December, January, and February, and all candidates will be randomly allocated to one of these four sessions. Unfortunately, it is not likely that all candidates wishing to accelerate their certification process can be accommodated. Therefore, at least 500 residents graduating in the years 2002, 2003, and 2004 will be allowed to enter this accelerated process each year.

All graduating residents from the 2002, 2003, and 2004 resident classes who pass the written examination will be notified by mail prior to August 1 that they have passed the written examination. In this same letter, they will be told that they are eligible to apply for this accelerated process, but they must complete the enclosed application forms and return these with the appropriate fee to the Board office prior to 5:00 PM Central Standard Time on September 16, 2002. If more than 500 completed application forms are received for the 2003-2004 examinations, only 500 candidates will be chosen from the class of 2002, using a computerized random selection process. All applicants will be notified by October 1 if they are among the 500 candidates chosen for this accelerated process.

If a candidate is selected for this accelerated process, they must meet all other requirements that are appropriate for the oral examinations administered in years 2003-2004, 2004-2005, and 2005-2006. No late applications will be accepted, and all deadlines and requirements must be met in order to participate in the transitional program. For those not selected in the randomization process, application fees will be refunded and case collection may be discontinued. For those selected for the process, application fees will not be refunded if the process is cancelled or not successfully completed.

It is important to understand that, if accepted into this transitional program, it is the candidate's responsibility to understand the requirements and to comply with them. The most important of all requirements is to supply the Board with a current, accurate address. Additionally, all such candidates should request a current Bulletin from the Board office or download a Bulletin from the ABOG Web site.

Dates, Fees, and Late Fees for Accelerated Examination

- July 1 of year written exam taken
 - Candidate begins collection of cases for case list
- Prior to August 1, 2002
 - Candidate will be notified of pass/fail on written examination by the Board Office
- August 2, 2002 - September 16, 2002 (5:00 PM CST)
 - Candidate must return automated application for oral examination with application fee of \$650
- September 16, 2002
 - No applications accepted after this date
- October 1, 2002
 - Candidates will be notified of acceptance into accelerated process
- July 2003 - August 1, 2003
 - Candidates will be notified to submit properly formatted case lists and examination fee of \$790
- August 2-22, 2003
 - Candidates notified by the Board in July to submit their properly formatted case lists and examination fee must include a late fee of \$280 (\$790.00 plus \$280 = \$1070)
- August 22, 2003
 - No case lists or examination fees accepted after this date
- November and December 2003, and January and February 2004
 - Oral Examination, ABOG Test Center, 2915 Vine Street, Dallas, TX 75204

Residency Program

1. Candidates are required to complete 4 years of accredited graduate medical education in an obstetrics and gynecology residency program(s) accredited by the Accreditation Council for Graduate Medical Education with not less than 36 months of clinical obstetrics and gynecology.
2. The final year of a resident's program must include the responsibilities of a chief (senior) resident in accordance with the de-

scription of the program as accredited by the Accreditation Council for Graduate Medical Education.

3. When a resident's graduate education and clinical experience has been gained in more than one residency program, the application to take the written examination must be accompanied by verification of the candidate's satisfactory performance in each program. Less than 6 months in a program is not acceptable as a part of an approved clinical experience.
4. Within the 36 months of clinical obstetrics and gynecology, education in the basic sciences should be so integrated with clinical experience as to emphasize the application of such related disciplines to total care of the patient. Assignment to another (either laboratory or clinical) discipline that removes the candidate from daily contact with obstetrics-gynecology is not permitted within the required 36 months of clinical responsibility.
5. Requests to modify training to accommodate research for individuals preparing for academic careers are encouraged by the Board and will be considered individually if a detailed application is received from the individual and the program director *in advance* of initiation of the program. Annual progress reports of activities performed by individuals so approved are required.
6. An exchange of residents between accredited programs of obstetrics-gynecology is acceptable. Exchange into other specialties cannot be permitted within a 3-year residency program designed to fulfill only 36 months minimum of required clinical experience in obstetrics-gynecology.
7. Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local policy. If, within the 4 years of graduate medical education the total of such leaves and vacation, for any reason (eg, vacation, sick leave, maternity or paternity leave, or personal leave) exceeds 8 weeks in any of the first 3 years of graduate training, or 6 weeks during the fourth graduate year, or a total of 20 weeks over the 4 years of residency, the required 4 years of graduate medical education must be extended for the duration of time the individual was absent in excess of either 8 weeks in years 1-3, or 6 weeks in the fourth year, or a total of 20 weeks for the 4 years of graduate medical education.
8. The program director is required to attest to the candidate's satisfactory performance, competence, and completion of the program. The program director is expected to sign on behalf of the program, not as an individual.
9. Each resident is required to keep a record of the number and type of obstetric and gynecologic procedures performed during residency to demonstrate the adequacy of their operative experience.
10. Resident education must include inpatient and ambulatory primary preventive (generalist) care throughout the duration of residency and provide a continuity of care.
11. Concurrent private practice during residency is not permitted. This policy does not preclude supervised ongoing longitudinal care of patients over several years of residency training.
12. Resident education must include the diagnosis and management of breast disease.
13. Resident education must include the diagnosis and management of lower urinary tract dysfunction in women.
14. Resident education must include the performance and interpretation of diagnostic pelvic and transvaginal ultrasound.
15. Residents must have acquired decision-making skills and judgment essential for selection of appropriate treatment, as well as the capability to perform, independently, major gynecologic operations and spontaneous and operative obstetric deliveries, to manage the complications thereof, and to be capable of per-

forming the essential diagnostic procedures required of a consultant in obstetrics and gynecology.

Duration of Certificate Validity

Certificates have a limited valid duration for a maximum of 6 years, after which they are no longer valid. Each diplomate must undergo a Board-approved method of maintenance of certification in order to receive a new certificate.

Maintenance of Certification

Maintenance of certification is achieved by a certificate renewal process. Diplomates certified prior to 1986 may sit for voluntary recertification. Beginning in 1986, 10-year time-limited certificates were issued by the Board, and commencing in 2001, such certificates will be limited to 6 years.

Certificate renewal or voluntary recertification may be achieved in one of three different ways. These methods are:

1. a cognitive 3½-hour written examination; or
2. a 1½-hour oral examination; or
3. Annual Board Certification (ABC), a continuous certificate renewal, achieved by reviews of assigned scientific and/or clinical publications.

More specific information about these methods of certificate renewal/voluntary recertification can be obtained by writing Ms Marsha Markham, Maintenance of Certification Coordinator, at the ABOG address.

The application fees for the written or the oral maintenance of certification examination are due with the application. The application and examination fees for both the written and oral examination are \$780 and \$730, respectively. Both fees are due prior to either the written or the oral examination. The fees for the ABC, a form of continuous certification, will be \$195 per year for general obstetrics and gynecology and \$250 per year for subspecialists (includes general and subspecialty items).

A new application form and application fee are required for each cycle of the written, oral, or ABC examination. *Application fees are not refundable.*

Written Examination

Inquiries, applications, and correspondence must be in English.

All fees must be paid in US currency.

The Written Examination lasts 3 hours and 20 minutes and consists of objective multiple choice questions chosen from each of the following areas:

A. Basic Science

Physiology of pregnancy, fetal physiology, physiology of gynecology and reproductive endocrinology, immunology, microbiology, pharmacology, epidemiology, anatomy, embryology, and genetics

B. Endocrinology, Fertility

Normal reproductive endocrinology, abnormal reproductive endocrinology, menopause, infertility, endometriosis, adenomyosis, ectopic pregnancy, and ethical problems in gynecology

C. Primary/Preventive Medicine

Periodic history, physical examination, and diagnostic studies for various age groups, patient education and counseling including substance abuse, diet, and exercise, sexuality, crisis intervention, cardiovascular risk factors, screening tests, and prevention of disease, including detection of high risk groups, immunizations, and contraception

D. Clinical Gynecology

Anatomic disorders, infections of the genital tract, benign neoplasms of the breast and pelvic organs, pediatric gynecology, geriatric gynecology, diagnostic tests and methods, sexually

transmitted diseases, surgical principles, and pre- and postoperative care

E. Clinical Obstetrics

Preconceptional counseling, prenatal diagnosis, human pregnancy overview, normal labor and delivery, conduct of pregnancy, complications and abnormalities of pregnancy, labor and delivery, operative obstetrics, and abnormalities of the puerperium

F. Medical, Surgical, and Psychiatric Diseases in the Nonpregnant Woman, and Medical, Surgical, and Psychiatric Diseases in Pregnancy and Complications of Pregnancy

Hematologic diseases, cardiovascular diseases, pulmonary diseases, diseases of the urinary tract, endocrine diseases, diseases of the liver and gallbladder, gastrointestinal diseases, connective tissue diseases, diseases of the skin, neurologic diseases, psychiatric diseases, infections during pregnancy, neoplastic disease, gynecologic conditions complicating pregnancy, and ethical problems in obstetrics

G. Oncology and Pathology

Principles of chemotherapy and radiation therapy; intraepithelial neoplasm of cervix, vulva, and vagina; ovarian neoplasms; vulvar malignancies; carcinoma of the breast, cervix, and vagina; trophoblastic disease; endometrial hyperplasia; carcinoma; and uterine sarcomas. Gross and microscopic pathology of the vulva, vagina, cervix, corpus, endometrium, oviduct, ovary, trophoblast, placenta, fetus, cord, and membranes; cytopathology; benign, premalignant, and malignant lesions; and response of the genital organs to infection, trauma, therapy, pregnancy, and aging

The candidate will be expected to demonstrate skills necessary to apply basic knowledge to the management of clinical problems. These skills include:

1. obtaining needed information;
2. interpretation and use of data obtained;
3. selection, instituting, and implementing care;
4. management of complications;
5. following and continuing care.

The areas of information and skills that are examined are described in further detail in the manual "Educational Objectives for Resident Education in Obstetrics and Gynecology," published by the Council on Resident Education in Obstetrics and Gynecology.

Requirements

1. Degree of Doctor of Medicine, or an equivalent degree, and unrestricted license. An educational or institutional license to practice medicine in any of the states or territories of the United States or a province of Canada meets this requirement.

The requirement of unrestricted licensure in all states in which the candidate holds a medical license must have been met prior to the time that the application is submitted. An educational or institutional license meets this requirement.

Candidates with a DO degree must have graduated from a school of osteopathy accredited by the American Osteopathic Association.

2. The candidate will be required to have completed or be near completion (see "Application") of no less than 4 years in clinical obstetrical and gynecological programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or no less than 5 years in clinical obstetrical and gynecological programs accredited by the Council of the Royal College of Physicians and Surgeons of Canada (CRCPSC). Such programs must include at least 36 months of progressive and increasing clinical experience and responsibilities in obstetrics and gynecology, including the usual time as chief (senior) resident in the program. Completion of a year as an intern (PGY-1), plus a 3-year residency program, or a 4-year residency program will fulfill this requirement. A year spent in an ACGME-accredited transitional-

year program (PGY-1) sponsored or cosponsored by an ACGME-accredited obstetrics and gynecology program will meet the requirement for PGY-1 year. Presently, there are 38 such transitional programs cosponsored by obstetrics and gynecology departments. If the program consists of more than 4 years, the entire program must be completed.

Time spent in an osteopathic hospital or in any program not accredited in obstetrics and gynecology by the Accreditation Council for Graduate Medical Education or the Council of the Royal College of Physicians and Surgeons of Canada will *not* fulfill this requirement.

3. A statement signed by the program director certifying that the candidate has:
 - a. followed satisfactorily the course of instruction designed for this program.
 - b. taken leaves of absence and vacation not exceeding those described above.
 - c. completed and submitted to the program director a satisfactory list of obstetrical patients with medical and obstetrical complications, as well as operative obstetrical and gynecological procedures performed during all the years of residency training. This residency experience log may be used to document the adequacy of such technical training.
- The experience log or a copy should be kept by the graduate for possible use in the future if needed to supplement their case list which is required for admission to the oral examination (see "Revocation of Diploma or Certificate").
- d. achieved the appropriate knowledge, ability, and judgment in order to provide competent clinical care in obstetrics, gynecology, and women's health, as documented by ongoing evaluation during the entire resident program.
 - e. demonstrated the necessary technical skills to perform competently:
 1. major abdominal and vaginal surgical procedures upon the female pelvis and related structures;
 2. major surgical procedures for female urinary and fecal incontinence and other forms of pelvic dysfunction (reconstructive pelvic surgery);
 3. spontaneous and operative obstetric deliveries;
 4. surgical exploration of the abdomen;
 5. pelvic and abdominal endoscopic procedures;
 6. diagnostic evaluations including electronic fetal monitoring, ultrasound, colposcopy, amniocentesis, and urodynamic testing; and
 7. the diagnosis and treatment of complications of the above.
 - f. demonstrated good moral and ethical character.

Application for Examination in 2002

A candidate who completes an accredited residency program on or before September 30, 2002, must apply on or before November 15, 2001, to write the examination on June 24, 2002.

The application form to write the written examination on June 24, 2002, may be obtained by writing to the Board office after September 1, 2001. Each applicant must meet the requirements effective in the year of requested admission to the examination. As a part of the application form, endorsement and verification of the resident's experience, competence, *satisfactory performance*, and confirmation of the scheduled date for completion of the candidate's residency are required to be affirmed by the current director of the obstetrics-gynecology residency program.

The Board will make the final decision concerning the applicant's admission to the examination after considering all circumstances affecting the application.

A candidate's application to write the examination on June 24, 2002, completed in all details, together with payment of the

application fee (see "Fees"), must be received in the Board office on or before November 30, 2001. (*Note:* Application fees must accompany the application.) Application fees sent prior to the mailing of an application are subject to late charges. A copy of the candidate's current license showing a current expiration date also is required.

Late fees will be applied to applicants who have not submitted all required materials by November 30, 2001.

The candidate ruled admissible to the examination will be notified by April 12, 2002, that:

1. the examination is scheduled to be written in June,
2. the examination fee is payable and the date the fee must be paid (see "Fees"), and
3. two 2x2 inch photographs should accompany the examination fee.

Note: If a candidate has not been contacted by the Board by April 19, 2002, concerning admissibility for the June 24, 2002, written examination, it is the candidate's responsibility to contact the Board office in writing or by fax no later than April 30, 2002, in order to ascertain why they have not received notification. It also is the candidate's responsibility to inform the Board of a change of address in writing in order to receive notifications in a timely manner.

If a candidate is found to be involved in litigation or investigation regarding ethical or moral issues, the application will be reviewed. Usually, the Board will defer a decision for entry into the examination to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior may result in a deferral of a candidate's application for at least 3 years (see "Revocation of Diploma or Certificate"). The candidate must then meet all eligibility requirements in effect at the end of the deferred period.

When the Board rules an applicant not admissible to the written examination, a new application and application fee must be submitted for the next examination. The candidate must fulfill the requirements in effect the year of the new application.

Admission to the Written Examination

The candidate ruled admissible to the examination will be sent an authorization for admission form, which must be presented to the proctor at the time and place of examination. When a candidate is scheduled to complete residency, after submission of the application (but before October of that year), verification that the candidate is completing residency in a satisfactory manner must be reaffirmed by the signature of the director of the residency program on the authorization for admission form, dated within the month the candidate is scheduled to write the examination.

Results of the Examination

The results of the written examination will be reported confidentially to each candidate within 9 weeks from the date of the examination. A candidate may grant the Board permission to release the results of their examination to the candidate's program director.

A passing grade on the written examination does not ensure a candidate's admissibility to the oral examination for certification, nor does it allow the use of the term "Board eligible." The term "Board eligible" is *not approved* by the Board for any individual seeking Board certification or for those who have only completed residency training. An individual who has completed residency training, but not yet passed the written examination, should be referred to as a "residency graduate." An individual who has passed the written examination should be referred to as an "active candidate" (see "Types of Board Status" and "Requirements").

Requests for Reexamination

A candidate scheduled to write the examination but who does not do so, as well as the candidate who writes but does not pass the examination, must write to the Board office after September 1 to request reapplication materials for the next examination. It is necessary for each applicant to meet the requirements in effect the year of the requested admission to the examination. The reapplicant must have submitted completed reapplication materials, a copy of current license with a current expiration date, and the reapplication fee prior to the November 30 deadline. There is no limit to the number of times a candidate may take the written examination.

The application and examination fees (see "Fees," below) must be paid for each year a candidate is to be scheduled to write an examination.

Written Examination Fees

Fees have been computed to cover the costs of examination and administrative expenses. Application fees will not, therefore, be refunded or credited against a future examination. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

The application fee must be enclosed with each application or reapplication to write the examination. The candidate will be notified by April 12, 2002, of the approval of the application or reapplication, at which time the examination fee will be due. If payment of the examination fee has not been received in the Board office on or before May 10, the candidate will not be scheduled to write the examination in June.

No application fees will be refunded or credited against a future application.

Examination fees may be refunded, provided candidates inform the Board office in writing of their inability to write the examination prior to May 10.

Dates, Deadlines, Fees, and Late Fees for Written Examination

September 1, 2001–November 15, 2001

Candidate must request in writing an application form
November 30, 2001

Application and application fee of \$600 must be received in the Board office

December 1, 2001–January 31, 2002

Application, application fee (\$600), and late fee (\$270) (total \$870) due in the Board office

February 1, 2002–March 29, 2002

Application, application fee (\$600), and late fee (\$650) (total \$1,250) due in the Board office

March 29, 2002

No applications accepted after this date

April 12, 2001–May 10, 2002

Candidates will be notified to submit two 2x2 photographs and examination fee (\$545)

May 10, 2002

No examination fees accepted after this date

June 24, 2002

Written examination at various sites

All correspondence, applications and information directed to the Board must be in English.

All fees must be paid in US currency.

Oral Examination

The oral examination is designed to evaluate the candidate's knowledge and ability to solve clinical problems in obstetrics, gynecology, and women's health. It is emphasized that candidates will be examined in obstetrics, gynecology, and women's health to evaluate actual behavior in independent practice. More than half of the examination will consist of questions concerning patient management problems. The candidate's list of patients will be used by the examiners for this purpose. In addition, other clinical problems will be included in the examination. The remainder of the examination will include basic knowledge in obstetrics, gynecology, and women's health and the interpretation of sonograms, operative videos, and video graphics of various conditions.

The fund of knowledge required for passing the Oral Examination is the same as those categories listed in regard to the Written Examination.

Recording devices, cellular phones, radio-paging devices, and any other electronic communication devices will not be permitted during the oral examination. If such devices are discovered at any time during the examination, this will result in the candidate's immediate dismissal from the examination.

Candidates will be expected to demonstrate that they have acquired the capability to perform, independently, major gynecologic operations and spontaneous and operative obstetric deliveries, to manage the complications thereof, and to perform the essential diagnostic procedures required of a consultant in obstetrics, gynecology, and women's health.

Candidates will be expected to demonstrate a level of competence that allows them to serve as consultants to physicians who are nonobstetrician-gynecologists in their community.

The report of the examining team will be reviewed by the Board of Directors, and each candidate is passed or failed by vote of the Board.

The examination will be completed within 1/2 day.

If, at the completion of the Oral Examination, a candidate believes the examination has not been conducted in a fair and unprejudiced manner, a second examination may be requested.

The request must be made within 1 hour of the completion of the oral examination. To do so, a candidate must telephone the Board office (214 871-1619).

If the request is granted:

- a. a second examination will be provided approximately 1 year later at the next regularly scheduled annual oral examinations at no additional charge;
- b. the repeat examination will be conducted by an entirely different team of examiners, no one of whom shall have previously participated in an examination of the candidate or know that this examination is being conducted as an appeal examination;
- c. neither the questions nor the candidate's answers on the first examination will be known to or taken into account by the second group of examiners; and
- d. the decision of the examiners conducting the second examination will determine the results of the candidate's oral examination.

Requirements

1. Passing grade on the written examination prior to making application for the oral examination.
2. Good moral and ethical character (see "Revocation of Diploma or Certificate").
3. Unrestricted license to practice medicine in any state or territory (United States or province of Canada) in which the candidate has held a medical license since July 1, 2001. *Note:* An educational or institutional license does not meet this requirement.

4. A written explanation must be provided with the application of the circumstances involved if a candidate has ever had his or her medical license restricted or revoked in any territory, province, or state in the United States or Canada. A written explanation also must be provided with the application of the circumstances involved if a candidate has ever had his or her hospital practice terminated or restricted because of personal physical/mental impairments or excessive operative complications or for disciplinary reasons.
5. Actively engaged in unsupervised practice, defined as:
 - a. independent continuous, unsupervised patient care in obstetrics and gynecology for at least the time from July 1, 2001, through June 30, 2002 (time spent in a fellowship does not meet this requirements), and
 - b. unrestricted hospital privileges to practice as an obstetrician-gynecologist in each of the hospitals in which the candidate has been responsible for patient care during this time. If the candidate is under investigation or on probation, the examination will be deferred until the investigation is completed, the probation is lifted, and full and unrestricted privileges are granted.
6. Submission of typewritten case lists (three copies) and summary sheets (seven copies) of all patients dismissed from care in all hospitals during the 12 months ending June 30 prior to the scheduled examination, as well as a list of 60 patients from his/her office practice. This information must be received in the Board office prior to August 1. Longer times for collection of a patient case list may be required, or obstetrical cases may be chosen from the candidate's last year of residency, if necessary.

Note: The candidate is personally responsible for the proper preparation, accuracy, and completeness of the case lists, which will reflect their practice (private or nonprivate) activity.
7. On the day of the examination the candidate will be expected to sign the following statement: "There have been no restrictions in my hospital privileges, or restrictions placed on any license I have to practice medicine in any country, since the date of my application." Candidates who are unable to sign this statement will not be admitted to the examination until and unless they present evidence that full and unrestricted privileges have been restored.
8. Practice that consists of ambulatory care exclusively will not be considered adequate to fulfill these requirements.
9. Candidates practicing in a country other than the United States or Canada must submit, with the application, a letter(s) from a senior responsible officer in the hospital(s) where the candidate practices, verifying the candidate's responsibility for independent, unsupervised care of patients.

Limitations

Duration of Active Candidate status is limited. Candidates must pass the oral examination within 6 years of passing the written examination and may take the oral examination only three times. Time spent in Board-approved fellowship training is excluded from this 6-year limitation. If a candidate fails the oral examination three times, or fails to pass the oral examination within 6 years, the candidate becomes ineligible to repeat the oral examination at that time. The candidate must repeat and pass the written examination to become admissible to the oral examination again. There is no limit to the number of times the written examination and the 6-year cycle to pass the oral examination can be repeated.

Determination of Qualifications

The Board will require, usually by hospital inquiry, documented evidence concerning a candidate's professional reputation, moral and ethical character, and in-hospital practice privileges from

administrative officers of organizations and institutions to whom the candidate and his/her conduct of practice is known.

Time spent as a resident in excess of that necessary to fulfill the requirements to take the written examination is not acceptable. Time spent in a teaching or research appointment, which does not involve appointment to the staff of an approved hospital with unrestricted privileges to practice as an obstetrician and gynecologist, will not be sufficient evidence of responsibility for patient care, ie, acceptable to fulfill the requirement of "independent practice."

Each candidate will be required to furnish the Board with certain prescribed information concerning performance in practice (eg, maternal mortality rate, perinatal mortality rate, cesarean delivery rate, etc).

If a candidate is involved in litigation or investigation regarding ethical or moral issues, the individual will not be scheduled for examination, and the application will be reexamined. The Board usually will defer such a decision for 1 year to gain further information.

Falsification of data (including case lists) or evidence of other egregious ethical, moral, or professional misbehavior (see "Revocation of Diploma or Certificate") may result in deferral of a candidate's application for at least 3 years. The candidate must then meet all requirements in effect at the end of the deferred period.

Note: The completeness and accuracy of submitted case lists are subject to audit by the American Board of Obstetrics and Gynecology. Permission to conduct on-site audits will be required of each candidate prior to final approval to take the oral examination

Patient case lists not (a) providing the information required, (b) prepared in accordance with the format requested, (c) having sufficient numbers of patients, (d) completely and accurately prepared, or (e) including sufficient breadth and depth of clinical problems may disqualify the candidate from admission to the oral examination.

Application for Examination in 2002

The form on which to apply to take the oral examinations administered in November and December 2002 and January 2003 must be obtained by writing to the Board office after November 1, 2001. The application, complete in all details, along with payment of the application fee, a copy of each current medical license with current expiration date, and two passport-sized (2 x 2 inches) photographs with the candidate's signature across the front, must be received in the Board office on or before February 28, 2002.

Note: The application fee must accompany the oral examination application. Application fees sent prior to the mailing of an application are subject to a late charge. The deadline date for receipt of applications in the board office is February 28, 2002.

Late fees will apply for late or incomplete applications.

Admission to the Oral Examination

The Board will make the final decision concerning the applicant's admission to the oral examination after considering all circumstances affecting the individual situation.

A candidate ruled admissible to the oral examination in November or December 2002 or January 2003 will be so notified in July 2002. On or before August 1, 2002, the candidate must submit:

- a. triplicate, typewritten, and verified lists of all patients dismissed from the candidate's care in all hospitals during the 12 months preceding June 30, 2002, and a list of 60 patients (not more and not less) from the candidate's office practice and a minimum of at least 30 obstetrical cases and 30 gynecological cases as defined below. Seven copies of the summary sheet also must be submitted. The candidate's lists of patients will be used as a basis for questions during the oral examination and will not be returned to the candidate.

and

- b. payment of the examination fee and late fee, if applicable, by personal check or money order in US funds.

Note: If, but only if, the list of all patients dismissed from the candidate's care during this 12-month period does not achieve the minimum 30 obstetrical and 30 gynecological hospitalized and/or short-stay patients as defined below, a candidate may choose to submit either an additional list of all patients dismissed from the candidate's care during the 6 months immediately prior to the 12-month period preceding June 30, 2002, or to submit patients from his/her senior year of residency to complete the list of 30 gynecological and/or 30 obstetrical cases. This will require the preparation and submission of separate patient case lists (one of 12 months duration and one of 6 months duration, and/or a case list from the senior year of residency) in triplicate, each with a separate summary sheet, plus seven copies of a combined summary sheet, which includes the cases from all the case lists submitted. The minimum requirement of 30 obstetrical and 30 gynecological patients as defined below must be met.

Patient Lists for the Oral Examination

Each candidate for the oral examination must prepare the following patient case lists for review by the examiners at the time of examination. The candidate's list of patients will be freely used as a basis for questions that will be patient-management oriented. Questions will be developed which test the ability of the candidate to:

- a. develop a diagnosis including the necessary clinical, laboratory, and diagnostic procedures;
- b. select and apply proper treatment under elective and emergency conditions;
- c. prevent, recognize, and manage complications; and
- d. plan and direct follow-up and continuing care.

Carelessly prepared or incomplete case lists may contribute to failure to pass the oral examination.

The candidate should bring a copy of his/her patient list to the oral examination for personal reference. Information should not be included on this duplicate case list that did not appear on the case lists sent to the board office.

All candidates must have an office and a hospital practice. Thus, case lists must consist of office practice plus hospitalized and day (short-stay) surgery patients in obstetrics and gynecology, or obstetrics alone, or gynecology alone. If a candidate practices both obstetrics and gynecology, case lists must be submitted in (1) office practice, (2) obstetrics, and (3) gynecology. Case lists limited to office practice and obstetrics or gynecology can be submitted *only* by those individuals who limit their practice to either gynecology or obstetrics, but if practice is limited to obstetrics and office practice, the appropriate and types of gynecology cases must be obtained from the resident's chief residency year, as explained below. The candidate will be examined in all three areas. The case lists must have sufficient numbers and sufficient breadth and depth of clinical experience. All day surgery and hospitalized patients must be reported. The case list must include 60 office practice patients and a minimum of 30 hospitalized or short-stay gynecological and/or 30 hospitalized or short-stay obstetrical patients with significant problems, as defined below. If, but only if, a minimum of 60 such gynecological and obstetrical patients cannot be obtained during the 12-month period from July 1, 2001, through June 30, 2002, the candidate may submit a complete 18-month case list dating from January 1, 2001, through June 30, 2002, and/or submit a list of patients obtained from his/her senior year of residency. This will require the preparation and submission of separate patient case lists, in triplicate, each with a separate summary sheet, plus seven copies of a combined summary sheet, which includes the cases from the 12-month and 6-month case lists, and/or a case list from his/her senior year of residency. The minimum requirement of 30

gynecological and 30 obstetrical patients will still apply. The clinical problems will vary according to the nature of the candidate's practice. The problems must be of sufficient variety and severity, however, to permit the evaluation of a candidate's ability to function as a consultant.

As mentioned above, a candidate may select gynecological and obstetrical cases from their senior residency experience case log to be added to their case list(s). Obstetrical and gynecological cases should be chosen from the senior residency experience case log, which will meet the requirements listed below and those on the list of appropriate categories. This will require that preparation of a case list in triplicate, with a separate summary sheet, plus seven copies of a combined summary sheet, which includes the cases from the 12-month or 6-month and/or senior residency case lists.

For candidates who have successfully completed a Board-approved fellowship and who are active candidates for certification, case lists may be submitted in a single subspecialty within obstetrics and gynecology. If a qualified candidate chooses to submit a case list limited (ie, a "limited case list") to a single subspecialty, the limited case list must include a minimum of 60 office practice patients and at least 60 cases of hospitalized or ambulatory surgical patients in that subspecialty, but all day surgery and hospitalized patients must be reported. Moreover, the 60 nonoffice practice cases must represent the breadth and depth of that subspecialty. The candidate will be examined in all three areas, and individuals with a practice limited to gynecologic oncology, maternal-fetal medicine, or reproductive endocrinology/infertility have the following choices:

1. hypothetical obstetrical cases can be presented to them by their examiners; or
2. the candidate may select 30 cases in gynecology and/or 30 cases in obstetrics from their senior residency year that meet the criteria listed under "Gynecological and Obstetrical Categories."

For example, if the candidate has only a gynecologic oncology case list, the candidate will be presented hypothetical cases in obstetrics and general gynecology, as well as selected cases from their own case list, or the candidate may produce an obstetrical and gynecological case list obtained from their senior residency year as described above.

The choice of hypothetical cases will be allowed only for the oral examinations administered during the winter of 2002. Beginning in 2003, only the second method of case selection will be allowed. Specifically, cases must be chosen from the senior year of residency to meet the requirements of 30 obstetrical and 30 gynecological patients with significant problems. These cases must consist of hospitalized or short-stay patients.

The patients listed must be only those for whom the candidate has had personal responsibility for professional management and care. Recording such professional responsibility implies that the candidate has personally controlled the medical and/or surgical management of each patient listed. In the case of partnership or group practice, the patients listed should be only those managed by the candidate.

The case list must be received in the Board office on or before August 1 preceding the oral examinations, but only after receipt of approval to submit the case list has been granted by the Board.

Procedure

A patient list should be accurately typed across unbound sheets of white paper 8.5 x 11 inches in size. Type size must be at least 12 point. The headings must conform in all details and provide the information indicated by the format of the forms enclosed with the oral application. Three copies of the complete list must be submitted, as well as seven copies of the summary sheet.

Standard nomenclature should be used. Only approved abbreviations, supplied with the instructions for completion of the patient

list forms, are acceptable. Only the English language will be accepted.

The triplicate lists of patients will not be returned to the candidate after the examination. The candidate should bring a copy of the case list supplied to the Board to the examination.

1. Office Practice Patients

The list of 60 patients (not more and not less) from the candidate's office practice should be prepared using the format accompanying the application. List separately patients who have presented with any of the following problems. List no more than three patients from any one category. Do not include any patients who appear on the hospital lists.

Office Practice Categories

1. Preventive Care and Health Maintenance
2. Counseling for Smoking Cessation and Treatment of Obesity
3. Counseling for Sexual Dysfunction
4. Contraception
5. Psychosomatic Problems
6. Genetic Counseling
7. Primary or Secondary Amenorrhea
8. Hirsutism
9. Infertility
10. Hyperprolactinemia
11. Endometriosis
12. Menopausal Care
13. Office Surgery
14. Abnormal Uterine Bleeding
15. Abnormal Cervical Cytology
16. Pelvic Pain
17. Vaginal Discharge
18. Vulvar Skin Disease
19. Breast Diseases
20. Urinary Incontinence and Pelvic Floor Defects
21. Urinary Tract Infections
22. Sexually Transmitted Diseases
23. Preconceptional Counseling
24. Immunizations
25. Pediatric Gynecology
26. Sexual Assault
27. Spousal Abuse
28. Dysmenorrhea
29. Premenstrual Syndrome
30. Benign Pelvic Masses
31. Abnormal Vaginal Ultrasonography
32. Back Pain
33. Respiratory Tract Diseases
34. Gastrointestinal Diseases
35. Cardiovascular Diseases
36. Endocrine Diseases (Diabetes Mellitus, Thyroid or Adrenal Disease)
37. Hypertension
38. Diagnosis and Management of Hypercholesterolemia and Dyslipidemias
39. Recognition and Counseling for Substance Abuse (Alcohol, Narcotics, etc)
40. Depression
41. Geriatrics

List separately each patient and include the problem (one of the listed categories), diagnostic procedures, treatment, results, and number of office visits during the 12-month period. Group patients together under each separate category.

2. Gynecology Patients

A list of *all* gynecologic patients should be prepared in the format accompanying the application and listed in order as follows:

List all gynecologic patients managed during the same 12-month period (or 18-month period, if an extended time case list is submitted and/or patients chosen from the senior year of residency).

The preoperative diagnosis should appear for all major and minor surgical procedures. The size of ovarian cysts and neoplasms must be recorded. For nonsurgical conditions, the admission diagnosis should be recorded. The treatment recorded should include all surgical procedures, as well as primary nonsurgical therapy. Surgical diagnosis refers to pathology diagnosis. *For hysterectomy specimens, the uterine weight in grams must be recorded.* In cases without tissue for histologic diagnosis, the final clinical diagnosis should be listed.

Days in hospital on this listing of patients, as well as on all other lists, is the arithmetic difference between date of discharge and date of admission.

A minimum of 30 gynecological patients is required, and a candidate cannot count more than three patients from each of the categories listed below. For example, if a candidate has five patients who have had diagnostic laparoscopies, they all must be reported on the case list, but only three of the five will be counted as meeting the minimum requirement of 30 gynecological cases.

Group patients together under each separate category (1-30) then list the remaining patients who do not "fit into" categories 1-30.

Gynecological Categories

1. Abdominal Hysterectomy
2. Laparotomy (other than Tubal Sterilization)
3. Vaginal Hysterectomy (including Laparoscopically Assisted)
4. Diagnostic Laparoscopy
5. Operative Laparoscopy (Other than Tubal Sterilization)
6. Operative Hysterectomy
7. Uterine Myomas
8. Defects in Pelvic Floor
9. Endometriosis
10. Tubal Sterilization
11. Invasive Carcinoma
12. Carcinoma in situ
13. Infertility Evaluation
14. Infertility Treatment
15. Urinary Incontinence
16. Urinary Incontinence (Surgical Treatment)
17. Ectopic Pregnancy
18. Pelvic Pain
19. Congenital Abnormalities of the Reproductive Tract
20. Pelvic Inflammatory Disease
21. Adnexal Problems excluding Ectopic Pregnancy and Pelvic Inflammatory Disease
22. Abnormal Uterine Bleeding
23. Vulvar Masses
24. Vulvar Ulcers
25. Adenomyosis
26. Postoperative Wound Complications
27. Postoperative Thrombophlebitis and/or Embolism
28. Postoperative Fever for Greater than 48 Hours
29. Rectovaginal or Urinary Tract Fistula
30. Culposcopy

If, but only if, a candidate cannot acquire the necessary 30 gynecological cases in the above categories, they may use an 18-month case list and/or select an appropriate number of cases from their senior residency case list.

3. Obstetric Patients

A list of obstetric patients should be prepared in the format accompanying the application. List separately each patient with a complication or abnormality, as well as medical and surgical intervention during pregnancy, labor, delivery, and the puerperium. In addition, a total of the number of normal, uncomplicated obstetric patients managed during the same 12-month period (or 18-month period, if an extended time case list is submitted) should appear at the end of the obstetric list.

Interpretation of "normal obstetric patients" for this listing implies that the:

- a. pregnancy, labor, delivery, and the puerperium were uncomplicated, and labor began spontaneously between the 37th and 42nd week of gestation;
- b. membranes ruptured or were ruptured after labor began;
- c. presentation was vertex, position was occiput anterior or transverse, and labor was less than 24 hours in duration;
- d. delivery was spontaneous or by outlet forceps with or without episiotomy, from an anterior position;
- e. infant had a 5-minute Apgar score of 6 or more and weighed between 2500 and 4500 gms and was healthy; and
- f. placental delivery was uncomplicated and blood loss was less than 500 mL.

All deliveries not fulfilling these criteria must be listed individually. Include gestational age at admission.

A minimum of 30 obstetrical patients is required, and a candidate cannot count more than three patients from each of the categories listed below. For example, if a candidate has five patients with diabetes mellitus, they must all be reported on the case list, but only three of the five will be counted as meeting the minimum requirement of 30 obstetrical cases. Group patients together under each separate category (1-27), then list the remaining patients who do not "fit into" categories 1-27.

Obstetrical Categories

1. Breech and Other Fetal Malpresentations
2. Intrapartum Infection (Amnionitis)
3. Puerperal Infection
4. Third Trimester Bleeding
5. Multifetal Pregnancy
6. Cesarean Hysterectomy
7. Premature Rupture of Fetal Membranes at Term
8. Preterm Premature Rupture of Membranes
9. Preterm Delivery
10. Hypertensive Disorders of Pregnancy (Chronic Hypertension, Preeclampsia, Eclampsia)
11. Second Trimester Spontaneous Abortion
12. Cardiovascular and/or Pulmonary Diseases Complicating Pregnancy
13. Renal Diseases and/or Neurological Diseases Complicating Pregnancy
14. Hematological Disease and/or Endocrine Diseases Complicating Pregnancy
15. Infections Complicating Pregnancy
16. Postterm Pregnancy
17. Abnormal Fetal Growth
18. Vaginal Birth after Cesarean Delivery
19. Any Maternal Complication that Delayed Maternal Hospital Discharge by 48 or More Hours
20. Any Neonatal Complication that Delayed Neonatal Hospital Discharge by 48 Hours or More
21. Pregnancies Complicated by Fetal Anomalies
22. Pregnancies Complicated by Human Immunodeficiency Virus Infection (HIV)
23. Primary Cesarean Delivery

24. Repeat Cesarean Delivery
25. Inductions and/or Augmentations of Labor
26. Puerperal Hemorrhage
27. Readmission for Maternal Complication Up to 6 Weeks Postpartum

If, but only if, a candidate cannot acquire the necessary 30 obstetrical cases in the above categories, they may use an 18-month case list and/or select an appropriate number of cases from their senior residency case list.

The American College of Obstetricians and Gynecologists has a computer software program available to be used for the collection and preparation of these case lists (800 762-2264).

4. Cover Sheets

Each list of patients, (a) gynecological (hospitalized and ambulatory) and (b) obstetrical from each hospital, should be verified on the form accompanying the application. On this form, the record librarian or similar other hospital official must submit a statement attesting that (1) the patients listed were cared for by the candidate, and (2) that all of the hospitalized patients dismissed from the candidate's care have been separately listed or reported in the totals reported for the period indicated. If the candidate is submitting an extended-time case list, separate attestations must be obtained for each case list. For cases chosen from the senior residency year, an attestation sheet must be obtained from the candidate's program director.

5. Summary Sheet

Using the form provided for this purpose, prepare a summary of all cases for all hospitals combined. If an 18-month case list is submitted, this will require the preparation and submission of a summary sheet for each year, as well as seven copies of a combined summary sheet for both years. The same applies if the candidate chooses to submit obstetrical and/or gynecological cases from their senior residency year.

6. Case List Verification and Audit

The list of patients provided by the candidate is subject to independent verification and audit by an agent or employee of the Board. As a condition of candidacy, the candidate agrees to cooperate fully with any audit authorized by the Board, including, but not limited to:

- a. providing full and unrestricted access to the candidate's office records of patients for whom the candidate had personal responsibility for professional management and care during the period for which the lists of patients are required; and
- b. authorizing access to such hospital or other institutional records as the Board deems necessary, in its absolute discretion, to verify the completeness and accuracy of the patient lists submitted by the candidate.

Final Approval and Notification of Admission to the Oral Examination

If the examination fee has been paid and the three copies of lists of patients have been submitted and received by August 1, 2002, and are approved by the Board, the candidate will receive an authorization for admission form and hotel reservation information at least 1 month prior to the examination, indicating the day, time, and place to report for the examination. Candidates are advised to keep the Board office informed of their current mailing address.

Ruling Not Admissible

A candidate not admitted to an oral examination may reapply by submitting a new application, paying the application fee, and meeting the requirements applicable at the time of the reapplication (see "Status").

If the candidate was disqualified because the case lists were judged insufficient for a comprehensive examination, the new case lists should be added to those previously submitted. Thus, the requirement of sufficient numbers, breadth, and depth in the case list makes time in practice the variable and experience the constant.

Reexaminations

A candidate who is disqualified or fails to pass the oral examination must reapply by submitting a written request for a new application form. In order to take the examination in another year, the new application form must be submitted by February 28 with payment of the reapplication fee.

A candidate reapplying for examination will be asked to provide verification of responsibility for patient care and will be notified in July of admissibility to the next examination.

A candidate accepted for reexamination must submit on or before August 1 prior to the examination a new case list for the 12 months (or 18-month period, if an 18-month case list is submitted, and/or cases from his/her senior year of residency) preceding June 30 before the oral examination.

The examination fee is due each time a candidate receives notification of admissibility to take the oral examination. Each reexamination will be conducted by examiners who have no knowledge of the fact or circumstances of a candidate's previous failure.

Postponement of Oral Examination

A candidate failing to take a scheduled oral examination must submit a new application during January or February of the following year. Admissibility to the next examination will be determined on the basis of the candidate's professional activities as reported during the current year. Payment of the reapplication fee must accompany each reapplication.

If notified of admissibility to the next oral examination, the candidate must again submit, on or before August 1, a listing of all patients dismissed from his/her care in all hospitals during the 12 months (or 18-month period, if an 18-month case list is submitted, and/or cases from his/her senior year of residency) ending June 30 prior to the oral examination. The case list must include a minimum of 60 patients from office practice and a minimum of 30 obstetrical and 30 gynecological patients as defined above.

Oral Examination Fees

Fees have been computed to cover the costs of examination and administrative expenses. They will not, therefore, be refunded or credited against a future examination. All fees must be paid in United States currency. The candidate's canceled check is to be considered the receipt.

The application fee must be enclosed with each application to take the oral examination. A candidate notified in July of admissibility to the oral examination in November, December, or January is required to pay the examination fee before being scheduled to take the oral examination. If the examination fee and case list have not been received in the Board office on or before August 1 or if these items, including the late fee, have not been received in the Board office on or before August 23, the candidate will not be scheduled to take the examination in November, December, or January.

No application fees will be credited against a future application or refunded.

Examination fees may be refunded provided candidates inform the Board office in writing of their inability to sit for the examination prior to September 20.

Oral Examination Dates

November 1, 2001

Request application

Deadline for receipt—February 28, 2002

November 1, 2001-February 28, 2002

Application, current medical license, two 2x2 photographs, plus application fee

Deadline for receipt—February 28, 2002

Fee—\$650

February 28-April 30, 2002

Application, current medical license, two 2x2 photographs, application fee plus late fee (\$270)

Deadline for receipt—April 30, 2002

Fee—\$920 (\$650 plus \$270)

April 30-June 14, 2002

Application, current medical license, two 2x2 photographs, application fee plus late fee (\$650)

Deadline for receipt—June 14, 2002

Fee—\$1,300 (\$650 plus \$650)

June 14, 2002

No applications accepted after this date

July 2002

Candidates notified to submit properly formatted case lists and examination fee

Deadline for receipt—August 1, 2002

Fee—\$760

August 2-23, 2002

Candidates notified by the Board in July to submit their properly formatted case lists and examination fee, which must include a late fee (\$270)

Deadline for receipt—August 23, 2002

Fee—\$1030 (\$760 plus \$270)

August 23, 2002

No case lists or examination fees accepted after this date

November and December 2002 and January 2003

Oral Examination, ABOG Test Center, 2915 Vine St, Dallas 75204

Monitoring Oral Examinations

All oral examinations conducted at the ABOG Test Center will be monitored by closed-circuit television and sound in order to improve the oral examination process. Recordings will not be maintained by the Board.

Listings of Certified Diplomates

Each year the Board office notifies the American College of Obstetricians and Gynecologists of the names and addresses of the diplomates certified in that year. A list of the names of the most recently certified diplomates also is sent to the American Board of Medical Specialties with the request that they be included in the next issue of the *Directory of Certified Obstetrician-Gynecologists*.

After this effort to assure initial listings of the newly certified diplomates, the Board assumes no responsibility for a diplomate's listing in subsequent issues of any *Directory*.

Revocation of Diploma or Certificate

Each candidate, when making application, signs an agreement regarding disqualification or revocation of his/her diploma, certificate, or other evidence of qualification for cause. Revocation may occur whenever:

- the physician shall not in fact have been eligible to receive the diploma or certificate, irrespective of whether or not the facts constituting such ineligibility were known to or could have been ascertained by this Board, its members, directors, examiners, officers, or agents at or before the time of issuance of such diploma or certificate;
- any rule governing examination for a diploma or certificate shall have been violated by the physician but the fact of such violation

shall not have been ascertained until after the issuance of his/her diploma or certificate;

- the physician shall have violated the moral or ethical standards of the practice of medicine then accepted by organized medicine in the locality where the diplomate is practicing and, without limitation of the foregoing, the forfeiture, revocation, or suspension of their license to practice medicine, or the expulsion from or suspension from the rights and privileges of membership in a local, regional, or national organization of their professional peers shall be evidence of a violation of such standards of the ethical practice of medicine;
- the physician shall fail to comply with the rules and regulations of this Board;
- the issuance of or receipt of such diploma, certificate, or other evidence of qualification shall have been contrary to or in violation of the Certificate of Incorporation or the By-laws of this Board; or
- the physician shall have violated any of "The Ethical Considerations in the Practice of Obstetrics and Gynecology" currently published by The American College of Obstetricians and Gynecologists and adhered to by the Board.

Upon revocation of any diploma or certificate by this Board as aforesaid, the holder shall return their diploma or certificate and other evidence of qualification to the executive director of the Board and his/her name shall be removed from the list of certified specialists.

Appeals

Appeals from any action of the Board may be initiated by writing to the executive director within 90 days of notification of the action which is being appealed.

Other Considerations

Governmental Services

1. Residency Experience

An applicant, under orders in a hospital conducted by governmental authority, may be credited with time in residency only if that hospital is conducting a residency program in obstetrics-gynecology accredited by the Accreditation Council for Graduate Medical Education or by the Council of the Royal College of Physicians and Surgeons of Canada.

2. Time-In-Practice Requirement

A candidate for the oral examination may receive time-in-practice credit for time in government service:

- with verification of the duration of active duty.
- when practice has involved chiefly the care of obstetric and gynecologic patients.
- when the Board has received favorable reports of the candidate's professional activities while in service.

If a candidate for the oral examination has fulfilled a portion of the required obstetrical and gynecological practice as a civilian before entering governmental service, the remainder of the time needed to fulfill the requirement may be made in governmental service.

Emergency Care and Limitation of Practice

Physicians who assume responsibility for the health of male patients for operative or other care will not be regarded as specialists in obstetrics, gynecology, and women's health, except as this practice is related to governmental services, the investigation and management of an infertility problem, or care in an emergency. Candidates for certification may, when necessary, participate in general emergency care. What constitutes a satisfactory limitation of practice to the specialty necessarily depends upon the qualifications and experience of the

individual, the availability and capabilities of other physicians in the community, and, to some extent, what is customary in local practices. As a rule, the privileges granted physicians in the practice of obstetrics, gynecology, and women's health in any hospital are the prerogative of that hospital, not of this Board.

Certification in Critical Care

On September 18, 1985, The American Board of Obstetrics and Gynecology, Inc, was authorized to issue certificates in obstetrics and gynecology with added qualification in critical care. The purpose of certifying in critical care is to recognize those obstetricians/gynecologists who through added education and examination have demonstrated added knowledge and skill in the care of critically ill patients.

An individual who meets the requirements will be issued a certificate in obstetrics and gynecology with added qualification in critical care by the American Board of Obstetrics and Gynecology, Inc. Certificates will bear a date limiting their initial validity to 6 years. A program for renewal certificates will be established.

Requirements

The following qualifications are required for applicants for certification.

1. Certified diplomate of The American Board of Obstetrics and Gynecology, Inc.
2. Each candidate must be in good standing with the Board.
3. Satisfactory completion of education in critical care of no less than 12 months' full-time duration. This education must be in a program fulfilling the requirements of the American Board of Surgery for surgical critical care or the requirements of the American Board of Anesthesiology for critical care medicine. These requirements also must be acceptable to the American Board of Obstetrics and Gynecology, Inc.
4. The credentials and training of the candidate must be approved by the American Board of Obstetrics and Gynecology, Inc, prior to admission to the examinations in surgical critical care or critical care medicine. Applications must be received at least 6 months prior to the date of the examination.
5. Successful completion of the examination in surgical critical care administered by the American Board of Surgery or the examination in critical care medicine administered by the American Board of Anesthesiology.

Application Procedure

1. A candidate intending to make application for certification of added qualification in critical care must notify the Board Office at least 6 months prior to the anticipated start of education in critical care. This letter of intent must be accompanied by a nonrefundable registration fee of \$400.
2. The Board office of the American Board of Obstetrics and Gynecology must receive an affidavit from the program director of the critical care program attesting to the candidate's satisfactory completion of the program.
3. Application for certification in critical care must be made at least 6 months prior to the date of examination. The application fee is \$600 and must accompany the application.
4. The examination may be taken at the conclusion of the education in critical care contingent upon availability of examination by either the American Board of Surgery or the American Board of Anesthesiology, but the examination must be from the Board that approved the fellowship program where the candidate received education.
5. The Surgery or Anesthesia Board must submit a statement on behalf of the candidate indicating that the candidate is in good standing with the Board.

6. Time spent in a critical care fellowship cannot be used to meet the practice requirements for eligibility to take the principal oral examination in obstetrics and gynecology.
7. All respondents should make application to the executive director of the American Board of Obstetrics and Gynecology, Inc.

A Word of Caution

All correspondence should be sent with a "return receipt requested," or by a courier service that has tracking ability. This is for candidates to be able to track and verify receipt of correspondence, applications, and fees sent to ABOG.

Please note that deadlines set by the ABOG are based upon receipt of the information in the Board office. This is too important for candidates not to have a tracking mechanism!

2001 Board of Directors

John G Clarkon, MD, Chairman, Miami, Florida
Lee R Duffner, MD, Vice Chairman, Hollywood, Florida
Denis M O'Day, MD, Executive Director, Nashville, Tennessee
Richard L Abbott, MD, San Francisco, California
Daniel M Albert, Madison, Wisconsin
George B Bartley, MD, Rochester, Minnesota
Edward G Buckley, MD, Durham, North Carolina
Susan H Day, MD, San Francisco, California
Mark J Mannis, MD, Sacramento, California
William F Mieler, MD, Houston, Texas
Richard P Mills, MD, Lexington, Kentucky
Donald S Minckler, MD, Los Angeles, California
M Bruce Shields, MD, New Haven, Connecticut
William T Shults, MD, Portland, Oregon
Gregory L Skuta, MD, Oklahoma City, Oklahoma
James S Tiedeman, MD, Charlottesville, Virginia
Charles P Wilkinson, MD, Baltimore, Maryland

Governing Rules and Regulations

The Board's Rules and Regulations, which are subject to change from time to time without notice, contain specific provisions concerning eligibility for the examinations administered by the Board; an admission appeals process, which is available under certain circumstances; the application process; the examination processes (initial and renewal); a description of the circumstances under which candidates will be required to reactivate an existing application, or submit a new application, or repeat an examination; a list of occurrences that could lead the Board to revoke a certificate previously issued by it to a Diplomate or to place the Diplomate on probation; and other matters relating to the Board's examination and certification/maintenance of certification processes. Many, but not all, of those provisions are summarized or described in this document. In the event of any inconsistency between the Board's Rules and Regulations and this document, or any omission from this document of any provision of the Rules and Regulations, the Rules and Regulations shall govern. Copies of the Rules and Regulations are available upon request from the Board's Executive Office.

Certification Requirements

Many physicians write to the Board outlining their training and asking for an estimate of their qualifications and whether further training is required. The Board's requirements, as published herewith, provide this information, and any potential candidate should be able to determine his/her status after studying these requirements. Individual officers or directors of the Board cannot and will not make such determinations. All evaluations of an applicant's status will be made by the Committee on Admissions in accordance with the rules and regulations of the Board, after submission of an application for examination and payment of the registration fee, which must accompany the application. Personal interviews with officers and directors of the Board should not be requested at any time.

It is the responsibility of the candidate to seek information concerning the current requirements for certification as an ophthalmologist.

The Board does not assume responsibility for notifying a candidate of changing requirements or the impending loss of his/her eligibility to take an examination.

Educational

All applicants must have graduated from an allopathic or osteopathic medical school.

All applicants, both graduates of allopathic or osteopathic medical schools, entering ophthalmology training programs must have completed a postgraduate clinical year (PG-1) in a program in the United States accredited by the Accreditation Council for Graduate Medical Education (ACGME) or a program in Canada approved by the appropriate accrediting body in Canada. The PG-1 year must be composed of training in which the resident has primary responsibility for patient care in fields such as internal medicine, neurology, pediatrics, surgery, family practice, or emergency medicine. As a minimum, 6 months of this year must consist of a broad experience in direct patient care. It is a requirement of the Board that the program chair ascertain that an individual has completed an accredited PG-1 year in the United States or in Canada prior to the start of the ophthalmology residency.

In addition to a PG-1 year, all applicants must have satisfactorily completed an entire formal graduated residency training program in ophthalmology of at least 36 months duration (PG-4 or better) in either the United States accredited by the Accreditation Council for Graduate Medical Education, or in Canada accredited by the Royal College of Physicians and Surgeons of Canada. No other training, including any form of fellowship, is acceptable.

The applicant's Chair is required to verify satisfactory completion of an entire formal graduated ophthalmology residency training program of at least 36 months' duration. When a resident's graduate education and clinical experience have been gained in more than one residency program, each chair will be required to complete a satisfactory completion form. Less than 6 months' service in an accredited program is not acceptable as a part of the required training in ophthalmology. The chair's verification form(s) cannot be submitted to the Board until the applicant has completed the entire residency training program.

If a program is disapproved or withdrawn during the course of a resident's training, he/she must complete the remaining required number of months of training in another accredited program.

Only those applicants who have completed their PGY-1 and entire ophthalmology training program, PGY-4 or beyond, by August 1 are eligible to apply for the Written Qualifying Examination given in the spring of the following year.

Licensure

Graduates of United States and Canadian Medical Schools

A person shall be eligible to apply for and to take any examination administered by the Board only if, as of the date of application and at all times thereafter through and including the date of administration of each examination of the Board taken by the person, the person has a valid and unrestricted license to practice medicine in the United States, its territories, or Canadian province in which the person's practice of medicine is regularly conducted and in each other place in which the person practices or has practiced medicine and has an unexpired license. Individuals in the military will meet the valid and unrestricted licensing condition if they are on full time active duty as a physician at a military installation in any branch of the United States Armed Services and submit a valid and unrestricted military medical license. Accompanying this military license must be a signed document from the individual's commanding officer stating that he/she solely provides medical care and treatment on the military installation to members of the United States Armed Services and their dependents. Information

concerning the Board's Rules and Regulations with respect to definitions of an invalid or restricted license is available upon request from the Board's Executive Office.

Other Medical Graduates

An applicant may have graduated from a medical school of a country other than the United States or Canada. Graduates of international medical schools must have a valid and unrestricted license to practice medicine (as defined above and in the Rules and Regulations of the Board); they are also required to have a certificate from the Educational Commission for Foreign Medical Graduates (ECFMG).

Applications

An applicant who wishes to be examined by the Board shall complete, sign, and file with the executive director an application on the official form then in use by the Board. The application shall be considered complete only when all supporting data required by the application, including the chair's verification form, are also filed with the executive director. Applications can be obtained from the chairs of accredited residency programs or from the office of the Board and from the ABO web site at www.abop.org.

Written Examination Deadline

If an applicant wishes to be considered for a Written Qualifying Examination to be conducted in a particular year, his/her application and all supporting data, including supporting data furnished directly by others with respect to the applicant, must be postmarked between March 1 and August 1, except for the chair's verification form which must be postmarked on or before October 1 of the calendar year immediately preceding the calendar year in which the Written Qualifying Examination is to be conducted. By paying a late fee the deadline for postmarking the completed application may be extended from August 1 to September 1. No other exceptions to, or extensions of, these requirements will be made for any reason. The dates of future examinations can be found on the Internet at www.abop.org.

An applicant who does not receive notification from the Board of office by January 15 of the acceptance or rejection of his/her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in writing by February 15 will result in such applicant's removal from the examination roster.

If a completed application and all required supporting data are not timely postmarked the application will not be valid and the application fee shall be returned. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. *Caution:* If there is a discrepancy between a metered postmark and an official U.S. Postal Service postmark, the latter will be considered official.

The application shall be accompanied by a check payable to the Board for the application fee. In addition to checks, the Board accepts Visa and MasterCard as payment for all Board fees. No application will be considered to be complete until the fee and all required supporting data, including a copy of your current registration to practice medicine and two recent photographs for identification at the Written Qualifying Examination and the Oral Examination, have been received by the executive director.

The application form contains a pledge that explains the prohibitions regarding improper conduct before, during and after examinations. Candidates must certify that the information they provide in their applications is true and accurate. If (1) any misrepresentation is discovered in the application, in any other information submitted to the Board, or in the identity of a person applying to take or taking the examinations, (2) any financial or other benefit is offered by

a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates, or (3) any irregular behavior during the examination such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis of answer sheets, or otherwise, the candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the procedures set forth in the Rules and Regulations of the Board. If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of prior examinations taken by the person(s), withhold or revoke the certificate of the person(s), or take other appropriate action. If sanctions are imposed pursuant to the Rules and Regulations of the Board, the Board may notify legitimately interested third parties of its action.

When the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. Nevertheless, in some instances the evidence of irregularity, though sufficiently strong to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination booklets used in the Written Qualifying Examination and the illustrative materials and questions asked in the Oral Examination are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction, in whole or in part, of the Written test booklet or Oral Examination materials and questions is a federal offense and also may subject the candidate to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or recording devices may be taken into either the Written or the Oral Examinations.

Written Qualifying Examination

In order to qualify for an Oral Examination, each candidate must pass a Written Qualifying Examination. The Written Qualifying Examination consists of 250 multiple-choice questions. The purpose of the Written Qualifying Examination is to evaluate the breadth and depth of the basic science and clinical knowledge of candidates who have satisfactorily completed an accredited program of education in ophthalmology. Candidates who successfully complete the Written Qualifying Examination will be further evaluated in an Oral Examination.

Aspects of the Candidate's Ability that are Tested:

- recall of information
- understanding and application of basic knowledge
- relation of pathogenesis to disease process
- evaluation of clinical data
- utilization of diagnostic and therapeutic procedures
- anticipation and recognition of complications
- ethics of ophthalmic practice

Topics Covered Include:

1. optics, visual physiology, and correction of refractive errors
2. retina, vitreous, and uvea
3. neuro-ophthalmology
4. pediatric ophthalmology
5. external disease and cornea

6. glaucoma, cataract, and anterior segment
7. plastic surgery and orbital diseases
8. ophthalmic pathology

The Written Qualifying Examination is given simultaneously in designated cities in the United States in the spring of each year.

Oral Examination

Upon successful completion of the Written Qualifying Examination candidates will be sent specific instructions for registration for the Oral Examination. A check payable to the Board for the amount then in effect for the Oral Examination must accompany the completed registration form and be forwarded to the Board office within the appropriate time frame. In addition to checks, the Board accepts Visa and MasterCard as payment for all Board fees.

Oral Examination Schedule

It has been the custom of the Board to hold two oral examinations a year with candidates who have passed the Spring Written Qualifying Examination. These candidates are assigned either to a group taking the Oral Examinations in the fall of that year or to a group taking the Oral Examinations in the spring of the following year.

Candidates who pass the April 2002 Written Qualifying Examination will be assigned to either the Fall 2002 oral or the Spring 2003 oral. The Board reserves the right to limit the number of candidates admitted to any scheduled examination and to designate the candidates to be examined.

Oral Examination Subjects

The Oral Examination will cover the subjects listed and described in the following paragraphs. All examinations are given by appointment within a half-day period utilizing a panel system. Information about the examination procedures and scheduling is sent to all candidates after they have been registered for the Oral Examination. The Oral Examination emphasis will be placed upon the following:

I. Data Acquisition

Recognition by the candidate of depicted abnormalities and diseases that affect the eye, ocular adnexa, and the visual pathways. Candidates will be asked for historical information and examination data that might be obtained on a patient with a particular condition depicted or described.

II. Diagnosis

The ability of candidates to synthesize historical and physical evaluation information, along with the appropriate laboratory data, to arrive at correct diagnoses and differential diagnoses.

III. Treatment

Candidates will be expected to provide a reasonable and appropriate plan for medical and/or surgical management of patients with the conditions depicted or described and be able to discuss the prognosis and/or therapeutic complications for the particular condition.

The examination will include developmental, dystrophic, degenerative, inflammatory, infectious, toxic, traumatic, neoplastic, and vascular diseases affecting the eye and its surrounding structures, including but not limited to the following information:

Candidates should be familiar with the basic principles of physical and geometrical optics and the operation of standard optical instruments. They should understand the essentials of visual physiology including visual acuity, light and dark adaptation, accommodation, and color vision. They should know the various forms of ametropia, principles and techniques of refraction, principles of lens design, and methods of correction of ametropia including spectacles, contact lenses, intraocular lenses, and keratorefractive surgery.

Candidates should be familiar with the methods for prescribing protective lenses, absorptive lenses, and aids for low vision.

Candidates should be familiar with diseases affecting the eye of infants and children and associated systemic abnormalities. Candidates should understand the anatomy, pathology and physiology of the neuro-muscular mechanisms subserving ocular motility and binocular vision.

Candidates should be familiar with the methods of examination for detection and assessment of sensory and ocular motor disorders. They should also know the clinical features, differential diagnosis, natural course and management of the various types of comitant and noncomitant deviations. They should be familiar with the principles and complications of surgery upon the extraocular muscles.

Candidates should know the anatomy of the orbit and the neuro-anatomy of the afferent and efferent visual systems. They should understand the principles and techniques of various diagnostic procedures and be able to interpret visual field testing, visually evoked responses, ultrasonography, conventional X-ray imaging, CT scanning, and magnetic resonance imaging.

Candidates should be familiar with the clinical features, pathology, differential diagnosis, and management of disorders of the orbit, visual pathways, oculomotor system, and pupillomotor pathways, including the indications for, principles of, and complications of orbital surgery.

Candidates should understand the anatomy, embryology, physiology, and pathology of the structures comprising the lacrimal system, lids, cornea, conjunctiva, and sclera. They will be expected to discuss conditions affecting these structures and provide an appropriate differential diagnosis.

Candidates should also be able to describe and discuss medical and surgical treatment for diseases and abnormalities involving these tissues, including indications for and complications of surgery.

Candidates should know the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the cornea, anterior chamber angle, iris, ciliary body, and lens.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Candidates should know the anatomy, embryology, physiology, and pathology of abnormalities and diseases of the vitreous, retina, choroid, and posterior sclera.

Candidates are expected to discuss conditions affecting these structures and those to be considered in their differential diagnosis. They should also be able to describe and provide indications for medical and surgical therapy directed toward alleviating or curing these conditions.

Reactivation

Written Qualifying Examination

A candidate shall be required to reactivate his/her application for approval and submit an additional application fee under the following circumstances that relate to the Written Qualifying Examination:

1. if a candidate fails to take the Written Qualifying Examination within 24 months after notice has been sent to him/her that his/her application has been accepted;
2. if a candidate does not repeat the Written Qualifying Examination within 24 months after failing;
3. if a candidate receives two consecutive failures on a Written Qualifying Examination on the same application;

4. if a candidate has failed to complete the entire examination process, both written and oral, within the required 6-year time limit.

Oral Examination

The grading process of the oral examination is an overall pass/fail grade. The Board requires that each candidate be examined in six separate subsections of the oral examination. A percent correct is calculated for each subsection and these six scores are averaged to arrive at a total score. Failure to achieve the necessary overall passing score requires that an individual repeat the entire six subsections of the oral examination. Additional information on grading is specified in the "Rules for Grading" which are sent to all candidates at the time of their Oral Examination registration.

A candidate shall be required to reactivate his/her application for approval, submit an additional application fee, and pass another Written Qualifying Examination before being admitted to the Oral Examination under the following circumstances:

1. if a candidate does not take the Oral Examination within 24 months after notice has been sent to the candidate that he/she has passed the Written Qualifying Examination;
2. if a candidate who is eligible to do so fails to repeat the Oral Examination within 24 months after failing such examination;
3. if the candidate does not pass the entire examination in three attempts;
4. if a candidate has failed to complete the entire examination process, both written and oral, within the required 6-year time limit.

Reactivation Procedure

In order to reactivate an application the following actions must be completed by the postmarked August 1 registration deadline:

- file a new application
- remit the current fee
- submit a copy of a current valid and unrestricted license to practice medicine in the United States, its territories, or a Canadian province
- provide letters of endorsement from two American Board of Ophthalmology-certified ophthalmologists in the community in which the applicant practices

Certification

A candidate who successfully passes both the Written Qualifying and Oral Examinations within the required time limitations herein above set forth, as determined by the Board in its sole discretion, shall be entitled to receive a certificate without further consideration of his/her qualifications by the Board. Physicians who have received the certificate are Diplomates of the Board.

Duration of Certification

Certificates issued by the Board after July 1, 1992, are valid for a period of 10 years. Thereafter, a diplomate will be required to satisfactorily complete a designated renewal program every 10 years in order to extend the validity of his/her certificate. Certificates issued prior to July 1, 1992, are valid during the diplomate's lifetime.

Time Limit

On January 23, 1993, the American Board of Ophthalmology instituted a 6-year time interval in which to complete the certification process. Applicants must successfully complete the Written Qualifying Examination and the entire Oral Examination by December 31 of the sixth year following completion of accredited training in ophthalmology. If applicants do not complete the certification process by December 31 of the sixth year following completion of accredited training in ophthalmology, they must reenter the process for additional 6-year intervals by way of a Re-Entry process, as described below.

Re-Entry Process

Candidates failing to achieve certification within the initial 6-year interval may reenter the certification process for additional 6-year periods by completing the following requirements:

1. A waiting period that encompasses at least one Written Qualifying Examination date is required after completion of each 6-year period.
2. All Re-Entry applicants must file a timely application with the Board. The filing period is the same as the initial application process (March to August 1) of the year preceding the Written Qualifying Examination.
3. An individual must provide a copy of a valid and unrestricted license to practice medicine.
4. An individual must attain 100 Category 1 Continuing Medical Education credits relevant to ophthalmology, accredited by the Accreditation Council for Continuing Medical Education during a 1-year period prior to reentry.

Maintenance of Certification

The American Board of Ophthalmology plans to expand its current recertification process to include elements that promote a more continual commitment to lifelong learning. The recertification process remains unchanged for 2001; however, it is now referred to as Maintenance of Certification.

Background

Maintenance of Certification is meant to assure that members of the profession continue their education, keep current in information and skills, and practice in a contemporary manner. It expects that the continuing educational experience has been assimilated and it documents the assimilation by testing. It expects the updated knowledge to be applied in practice. It may also assess whether or not the practice reflects a caring attitude toward patients and ethical behavior appropriate to a profession. The result should be a higher level for the profession as a whole than might have occurred without time-limited certificates and the maintenance of certification process.

Guiding Principles

Primary Purpose. The primary purpose of the American Board of Ophthalmology's certificate renewal process is to promote optimum delivery of competent care by Board-certified members of the ophthalmic profession. It does this by determining that Diplomates are current in information, skills and practice, through satisfactory completion of continuing medical education requirements, knowledge assessment examinations, and a practice assessment.

The process is designed to act as an incentive to all in the profession. The intent is that all who are willing and able will achieve certificate renewal. Opportunity for remediation, rather than exclusion from certification, is the mechanism for elevating those who have slipped below the standard of their peers.

1. **Flexibility by practice.** The process is designed to acknowledge that individual practitioners differ in the types of patients they serve, the diagnostic problems that present to them, and the therapeutic methods required by the population they serve. The process offers some flexibility to suit the nature of individual practices.
2. **Flexibility by individual preference.** Alternate pathways or components are provided to permit some selection according to individual preference. For example, individuals may have a preference with regard to how they might like to have their continued abilities evaluated.
3. **Sequential process.** The process of maintaining intellectual and professional qualities is continual. The educational and the assessment requirements can be satisfied over a period of time

with completed items accumulated until the requirement is satisfied, with opportunity to repeat and strive for improvement in any element that is not accomplished satisfactorily at first.

4. *Time for remediation.* Standards need to be sufficiently high that they are meaningful, and thus satisfactory completion might not be achieved on first attempt. Opportunities for reevaluation must be available after sufficient time for remediation.

Requirements

A certificate issued on or after July 1, 1992, will expire 10 years after the date of its issuance. During that period, the applicant must satisfactorily complete the renewal process in order to obtain certificate renewal, which shall be similarly time-limited in its validity. All evaluations of an applicant's status will be made by the Committee on Admissions in accordance with the Rules and Regulations of the Board, after submission of an application for examination and payment of the renewal fee, which must accompany the application. Personal interviews with officers and Directors of the Board should not be requested at any time.

Additionally, it is the responsibility of the applicant to seek information concerning the current requirements for certificate renewal. The Board does not assume responsibility for notifying an applicant of changing requirements or the impending loss of his/her eligibility to take an examination. The application filing period runs from January through June 1 of each year. The requirements for maintaining certification are as follows:

Eligibility

Certification. The individual must hold a time-limited certificate issued by the American Board of Ophthalmology in 1992 or thereafter. Requirements for maintaining certification can be achieved before or after the expiration date of the time-limited certificate. Renewal is for 10 years from the expiration of the previous certificate or 10 years from the date of completion of the requirements, whichever is later.

Requests for entering the renewal process from ophthalmologists who hold lifetime certificates issued before 1992 are considered on a case-by-case basis. The duration of the maintenance of certification process for lifetime certificate holders is identical to that offered to holders of time-limited certificates. Lifetime certificate holders who pass the renewal process are entitled to retain their lifetime certificates. Lifetime certificate holders who fail to pass the renewal process are also entitled to retain their lifetime certificates.

Licensure. The American Board of Ophthalmology's general requirement regarding licensure states that as of the date of application and at all times throughout the renewal process the applicant must hold a valid and unrestricted license(s) to practice medicine in the United States, its territories, or Canadian province in which the applicant's practice of medicine is regularly conducted. The applicant's license(s) to practice medicine is not and ceases to be "valid and unrestricted" if the applicant's license to practice medicine, or the conduct of the applicant's practice of medicine, is in any manner and to any extent whatsoever revoked, conditioned, suspended, limited, qualified, subjected to the terms of probation, or restricted by, or surrendered by the applicant during the pendency of or in order to terminate any investigation or proceeding regarding the applicant's licensure or practice of medicine before a court, department, board, or administrative agency.

Individuals in the Military

Individuals in the military will meet the valid and unrestricted licensing condition if they are on full-time active duty as a physician at an installation of the United States Armed Services and submit a valid and unrestricted military medical license. Accompanying this military license must be a signed document from the individual's

commanding officer stating that he/she solely provides medical care and treatment on the military installation to members of the United States Armed Services and their dependents.

Individuals Practicing Outside the United States, Its Territories, or a Canadian Province

The American Board of Ophthalmology's general requirement regarding licensure for ophthalmologists practicing outside of the United States, its territories, or Canadian province and who wish to undergo maintenance of certification when it is due states that applicants must:

- maintain a current valid and unrestricted license to practice medicine in the United States, its territories, or Canadian province as of the date of application and at all times throughout the renewal process; and
- submit to the Board, at the time of application, a current valid medical license in the jurisdiction in which they currently practice.

Renewed certificates will expire 10 years from the date of completion of the renewal process or 10 years from the expiration date of the previous certificate, whichever is later.

Agreement for Recertification. During the recertification process, the candidate must sign a statement affirming commitment to practice in an ethical manner. This can be found on the application's "Agreement for Recertification."

Application Information

An applicant who wishes to renew his/her certificate by the Board shall complete, sign, and file with the executive director an application on the official form then in use by the Board. All applications shall be accompanied by a check payable to the Board for the application fee then in effect. In addition to checks, the Board accepts Visa and MasterCard as payment for all Board fees. No application will be considered to be complete until the fee and all required supporting data have been received by the executive director. Applications can be obtained from the Board office and from the ABO Web site at www.abop.org.

Application Deadlines

The application filing period runs from January through June 1 each year. Since the Knowledge and Practice Assessment components for the maintenance of certification process can be accomplished within 2 years (this includes time for remediation, if necessary), all eligible certificate holders will be notified 3 years prior to expiration of their certificates that they may make application. Ultimately, it is the applicant's responsibility to obtain an application. The renewal process is designed to be completed in 3 years, to include the initial application filing year, followed by 2 years to complete the Knowledge Assessment and the Practice Assessment.

If a completed application and all required supporting data are not timely postmarked, the application will not be valid and the application fee shall be returned. However, by paying a late fee the deadline for postmarking the completed application may be extended from June 1 to July 1. No other exceptions to, or extensions of, these requirements will be made for any reason. It is best not to mail application materials just before the postmark deadline because packets are sometimes postmarked a day or two after mailing. *Caution:* If there is a discrepancy between a metered postmark and an official US Postal Service postmark, the latter will be considered official.

The dates of future examinations can be found on the ABO web site at www.abop.org.

An applicant who does not receive notification from the Board of office by December 15 of the acceptance or rejection of his/her application must contact the Board office in writing to inquire about the status of the application. Failure to contact the Board office in

writing by January 15 in such a case will result in a 1-year delay in considering a Diplomate's application.

Educational Requirements

A Diplomate must obtain 300 Category 1 Continuing Medical Education (CME) credits from an Accreditation Council for Continuing Medical Education (ACCME)-approved institution since the date of time-limited certification. At least 150 of the required CME credits must be obtained within 5 years prior to certificate renewal. It is recommended that a Diplomate obtain at least 30 CME hours per year. The CME requirement for time-limited certificate holders who do not successfully complete the process within the 10-year period will increase by 30 credits per year until renewal is successfully completed.

At least 80% of the Category 1 CME credits must be relevant to the practice of ophthalmology; three CME credits must be in ethics; and the remainder of the CME credit hours can be in general medicine. A CME tracking form will be enclosed with applications in order for a Diplomate to itemize and submit the following information: name, sponsor, and location and dates of the CME courses completed. While a list of CME credits to date is required for application, it is not necessary to complete your CME requirements at the time you make application. CME credits will be counted up until the date of successful completion of the renewal process. It will not be necessary to submit original certificates of CME attendance to the Board, however, the Board does reserve the right to request this documentation as proof of CME completion.

Knowledge Assessment

The maintenance of certification written examination is currently a take-home test; however, the renewal process is subject to change consistent with a principle of continual improvement of both process and content. The Board will publish all changes to the process in its semi-annual newsletter.

As an encouragement to utilize continuing education resources of quality, as an encouragement for self study, and as a verification of the effectiveness of these educational endeavors, an evaluation of knowledge is required. This requirement can be satisfied by either of the following:

Certificate Renewal Examination, Written: The examination concentrates on, but is not limited to, clinically relevant new information disseminated in clinical journals and educational media during the preceding decade. The examination consists of two parts: a general examination required of all examinees and a spectrum of practice-specific modules from which the examinee selects one. This annually administered general and modular test is currently an "open book," multiple choice question test mailed to candidates to be taken during the 2-month time period of February 1 through March 31. The applicant must take and pass both the general and modular components of the Certificate Renewal Examination, Written (CREW). CREW may be taken annually as often as needed, until passed. If an applicant wishes to be considered for the CREW to be conducted in a particular year, his/her application and all supporting data must be approved on or before June 1 to be eligible for the following year's CREW Examination. Or,

Oral Examination: This consists of Patient Management Problems (PMPs) dealing with common general ophthalmologic topics. This is the oral examination given to candidates applying for initial certification.

To satisfy this knowledge assessment requirement, the applicant must satisfactorily pass one of these two examination options before achieving certificate renewal. If an applicant fails in any one of the examinations, the examination may be repeated as often as required, or a different option may be selected.

Practice Assessment

The Practice Assessment requirement for maintaining certification is the Office Record Review (ORR). The purpose of the ORR is to sample patient records of maintenance of certification applicants to assess their conformance to certain standards of practice and to contribute to the enhanced quality of ophthalmic practice. The ORR consists of 26 ophthalmic diagnoses, which include standards of care and practice patterns related to each diagnosis. Each applicant will have a total of 15 patient records reviewed for the ORR through corresponding answer sheets. Diplomates can review the ORR modules in their entirety at www.abop.org.

The applicant will have 1 month to complete and return all Office Record Review answer sheets. The Office Record Review is offered twice yearly during the months of January and July. If an applicant wishes to be considered for the January Office Record Review, a registration form with all supporting data must be received in the Board office postmarked on or before November 1 of the calendar year immediately preceding the January Review. Likewise, if an applicant wishes to be considered for the July Office Record Review, a registration form with all supporting data must be received in the Board office postmarked on or before May 1 immediately preceding the July Review. The Board reserves the right to make site visits to the office of applicants to verify the validity of the patient records utilized in the ORR.

The renewal certificate for all successful applicants is identical, and the characterization of practice in the application is only for the purpose of guiding the mechanism for certificate renewal.

Time Frame

Time-limited certificate holders must successfully complete the maintenance of certification process prior to the expiration date listed on his/her original certificate in order to maintain Board Certification. Applicants who fail to renew his/her time-limited certificate prior to the expiration date listed on his/her certificate will lose his/her Board-certified status until the process is successfully completed. The process is designed to be completed in 3 years, to include the initial application filing year, followed by 2 years to complete a Knowledge Assessment Examination and the Practice Assessment. (This allows time for remediation, if necessary.) Thus, all approved applications are valid for 3 years. An applicant may take the Knowledge Assessment Examinations annually, and an applicant may take the Practice Assessment twice a year in January and July. An applicant may change the Knowledge Assessment Examination pathway he/she chooses annually. If an applicant fails either the Knowledge Assessment Examination or the Practice Assessment, he/she is subject to a re-registration fee for each. If an applicant fails to become recertified during the 3 years his/her application is valid, that applicant must reapply and any Knowledge Assessment Examination or Practice Assessment successfully completed during that time will become null and void.

Synopsis of Recertification

Along with eligibility requirements, completion of requirements in each of these four areas is necessary:

1. *Licensure:* The American Board of Ophthalmology's general requirement regarding licensure states that as of the date of application and at all times throughout the renewal process the applicant must hold a valid and unrestricted license(s) to practice medicine in the United States, its territories, or Canadian province in which the applicant's practice of medicine is regularly conducted.
2. *Continuing Medical Education:* An applicant must obtain 300 Category 1 ACCME-approved credit hours. It is recommended that an applicant obtain at least 30 CME hours per year. At least 150 of all CME credits must be obtained within 5 years prior to

certificate renewal. At least 80% of the Category 1 CME credits must be relevant to the practice of ophthalmology; three CME credits must be in ethics; and the remainder of the CME credit hours can be in general medicine.

3. *Knowledge Assessment:* Either one of the following two methods satisfies this requirement: certificate renewal examination, written; or certifying oral examination.
4. *Practice Assessment:* An Office Record Review is required.

Board Policies

Applicant Disclosure Obligations

At the time a person submits an application to the Board and at all times thereafter, the person shall have a continuing obligation to disclose promptly to the Board the existence or occurrence of any circumstances causing the person to fail to satisfy the foregoing condition of eligibility to apply for and take any examination administered by the Board. A person submitting an application to the Board shall inform the Board on, or in a written submission accompanying, the person's application or in a written submission to the Board before taking any examination administered by the Board, as the case may be, if the person's license to practice medicine in the United States, its territories, or Canadian province has previously been surrendered or not renewed upon its expiration or if the person's practice of medicine or license to practice medicine in the United States, its territories, or Canadian province has previously been revoked, restricted, conditioned, suspended, limited, qualified, or subject to the terms of probation.

Disabilities

The American Board of Ophthalmology complies with the Americans with Disabilities Act (ADA) to mitigate the effects of the disability on the testing activity. To accommodate individuals with disabilities the Board will make reasonable modifications to its examinations that do not fundamentally alter the requirements of the examination or the measurement of the skills or knowledge the Board examinations are intended to test.

A candidate for Board certification/maintenance of certification who believes that he or she is disabled within the meaning of the Americans with Disabilities Act, and who requests an examination under nonstandard conditions, shall specify on (or in a supplement submitted with) the application form the existence, the specific nature, and the extent of his/her disability and the specific modification requested. The candidate shall also submit either with the timely filed application, or no later than 30 days after the deadline for applying for a particular examination, all independent documentary evidence substantiating the individual's disabilities.

Documentation includes, but is not limited to:

- Name, address, telephone number, and qualifications of each expert who provides a report documenting the individual's disabilities.
- Dates and locations of all assessments performed and included in the documentation.
- Copies of evaluation reports with scores or ratings for each standard instrument or assessment method used. The Board requires that this documentation be no more than 3 years old.
- A full description of any nonstandard instruments and assessment methods used to determine the disabilities and diagnoses.
- Any diagnoses of the individual's disabilities using standard nomenclature, ie, International Classification of Diseases (ICD), American Psychiatric Association Diagnostic and Statistical Manual (DSM).
- A description of the individual's functional limitations due to any disabilities.

- Reports of any past accommodations on examinations the individual received because of the disabilities.

The ABO will verify the documentation of the disability and reserves the right to have the individual independently evaluated at its own expense.

Examination Fees

Applications shall be accompanied by a check payable to the Board for the application fee then in effect. The ABO also accepts Visa and MasterCard as payment for all Board fees.

The fees for examinations shall be established annually by the Board of Directors on the basis of the actual and anticipated costs of the Board in the examination of candidates and the administration of its business. The directors of the Board serve without compensation except for reimbursement of expenses.

If you would like to find out the current fees for the Board examinations, contact the Board office or visit the Board Web site at www.abop.org.

Refund Policy

When a candidate registers for an examination, significant costs are incurred by the American Board of Ophthalmology. Therefore, to keep costs down for all candidates, fees for examinations are nonrefundable, regardless of the reason. However, in case of cancellation, 50% of the examination fee will be applied to the subsequent examination, if taken within the 2-year time limit for an active application.

Cancellation of Examination

If the American Board of Ophthalmology is unable to administer or complete the administration of a Written or Oral Examination at the scheduled date, time, and location due to circumstances beyond the Board's control, the examination may be cancelled in the sole discretion of the Board, and if the examination is cancelled, the Board is not responsible for any expense an affected candidate may have incurred in connection with the cancelled examination or for any expense the candidate may incur in connection with any substitute examination.

Results of Examinations

Within a reasonable time after completion of the Written, Oral, and/or Maintenance of Certification Examinations, the candidate shall be notified by the executive director as to the results thereof. The decision of the Board as to these results shall be final and conclusive. Grades are not subject to appeal. Because such is the case, individual directors of the Board or associate examiners should not be contacted about specific examination results. To preserve confidentiality, results of an examination will not be given over the telephone, facsimile or computer.

AMA Physician's Recognition Award

The American Medical Association (AMA) allows 25 hours to be claimed toward an AMA Physician's Recognition Award (PRA) for specialty board certification and recertification. PRA applications may be obtained from the AMA via telephone at 312 464-4669; fax 312 464-4567; or on the Internet at www.ama-assn.org/go/cme.

Disciplinary Sanctions

The Board shall have the authority to impose disciplinary sanctions upon a candidate or a Diplomate for any of the following reasons:

1. violation of rules and regulations of the Board relating to the Written Qualifying, Oral, and Recertification Examinations and applications to take the examinations;
2. substantial misstatement or omission of a material fact to the Board in an application or in any other information submitted to the Board;

3. presenting or distributing, or aiding or assisting another person(s) to present or distribute, a forged document or other written instrument purporting to have been issued by or under the authority of the Board to evidence that a candidate, Diplomate, or any other person(s) is currently or was previously certified by the Board when that is not the case, or claiming orally or in writing, or assisting another person(s) to claim, that a candidate, Diplomate, or any other person(s) is currently or was previously certified by the Board, when that is not the case;
4. any license of the person to practice medicine is not, or ceases to be, a valid and unrestricted license to practice medicine within the meaning set forth in the Rules and Regulations of the Board;
5. issuance of a certificate contrary to or in violation of the rules and regulations of the Board;
6. ineligibility of the person to whom the certificate was issued to receive the certificate.

Statements of Eligibility

The Board does not issue statements of "eligibility" for its examinations. The only information the Board will divulge is whether a physician is or is not certified. Inquiries to the Board by outside agencies about the certification status of physicians who have inactive applications or who hold lapsed certificates will be answered by stating that said physician is not Board certified.

The American Board of Ophthalmology charges a \$35 fee for each formal verification of a physician's certification.

American Board of Medical Specialties

The American Board of Medical Specialties (ABMS) was established in 1933 to serve in an advisory capacity to the American specialty boards and to cooperate with organizations that seek its advice concerning the certification of medical specialists. The American Board of Ophthalmology is officially recognized by the ABMS, and contributes an annual fee of \$2,000 in addition to a per capita fee for each new Diplomate certified, as do all other medical specialty boards, to the American Board of Medical Specialties in support of the activities of ABMS.

The American Board of Ophthalmology provides an annual listing of new Diplomates for inclusion in the *Official ABMS Directory of Board Certified Medical Specialists* and the *ABMS Medical Specialists Plus* CD-ROM, published by Elsevier Science and the American Board of Medical Specialties, which are used by credentialing organizations. Each Diplomate will be contacted directly by Elsevier Science (Reed Elsevier Publishing) to update biographical information each year. This listing is cost free.

Associates

All Board directors and associates, whether examiners or members of special committees, are informed by the Board that they shall not promote, or permit others to promote, his/her participation in commercial or educational activities (domestic or foreign) under circumstances that exploit, or might be perceived to exploit, his/her familiarity with examinations administered by the American Board of Ophthalmology or otherwise might be perceived to compromise the integrity of those examinations. In addition, Board directors and associates may not exploit their association with the ABO through communications to the public or through self-promotional items. It is, however, acceptable to include a factual reference on a curriculum vitae.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Orthopaedic Surgery [ABOS] to ascertain whether the information below is current.)

I. Introduction

A. Definition

Orthopaedic surgery is the medical specialty that includes the preservation, investigation, and restoration of the form and function of the extremities, spine, and associated structures by medical, surgical, and physical methods.

B. Purpose

The ABOS was founded in 1934 as a private, voluntary, nonprofit, autonomous organization. It exists to serve the best interest of the public and of the medical profession by establishing educational standards for orthopaedic residents and by evaluating the initial and continuing qualifications and competence of orthopaedic surgeons. For this purpose, the Board reviews the credentials and practices of voluntary candidates and issues certificates as appropriate. It defines minimum educational requirements in the specialty, stimulates graduate medical education and continuing medical education, and aids in the evaluation of educational facilities and programs.

The Board does not confer any rights on its diplomates, nor does it purport to direct licensed physicians in any way in the conduct of their professional duties or lives. It is neither the intent nor the purpose of the Board to define requirements for membership in any organization or for staff privileges at any hospital.

C. Directors

The directors of the ABOS are elected from diplomates of the Board who are nominated by the American Orthopaedic Association, the American Medical Association, and the American Academy of Orthopaedic Surgeons. They serve without salary.

D. Organization

Directors of the Board elect a president, president-elect, secretary, and treasurer annually. An executive director, who is a diplomate, serves as an ex officio director of the Board. The president appoints directors to serve on standing committees on credentials, examinations, finance, graduate education, and research. Other committees may be formed as deemed necessary. The Board holds regularly scheduled meetings yearly.

E. Directory

A current directory of certified orthopaedic surgeons is maintained and published by the Board. The names of diplomates also appear in the *Official ABMS Directory of Board Certified Medical Specialists*.

II. Educational Goal for Orthopaedic Surgery

The goal of orthopaedic education is to prepare orthopaedic residents to be competent and ethical practitioners of orthopaedic surgery. In fulfillment of this goal, applicants for certification must have received through orthopaedic residency

- A. education in the entire field of orthopaedic surgery, including inpatient and outpatient diagnosis and care as well as operative and nonoperative management and rehabilitation;
- B. the opportunity to develop, through experience, the necessary cognitive, technical, interpersonal, teaching, and research skills;
- C. the opportunity to create new knowledge and to become skilled in the critical evaluation of information;
- D. education in the recognition and management of basic medical and surgical problems;
- E. an evaluation of ethical performance.

III. Minimum Educational Requirements for Board Certification

The Board has established the following minimum educational requirements for certification. These requirements should not be interpreted as restricting programs to minimum standards.

Throughout these rules, the term "accredited" denotes approval by the Accreditation Council for Graduate Medical Education (ACGME).

A. Time Requirements

1. Five years (60 months) of accredited postdoctoral residency are required.
2. Prior to July 1, 2000, 4 of these years (48 months) must be served in a program whose curriculum is determined by the director of an accredited orthopaedic surgery residency.
 - a. Three of these years (36 months) must be served in an accredited orthopaedic surgery residency program.
 - b. One year (12 months) may be served in an accredited graduate medical program whose educational content is determined by the director of an accredited orthopaedic surgery residency program.

Beginning on July 1, 2000, 1 year (12 months) must be served in an accredited graduate medical education program whose curriculum fulfills the content requirements for the graduate year 1 (PGY-1) (see B.1, below) and is determined or approved by the director of an accredited orthopaedic surgery residency program. An additional 4 years (48 months) must be served in an accredited orthopaedic surgery residency program whose curriculum is

determined by the director of the accredited orthopaedic surgery residency.

3. Each program may provide individual sick and vacation times for the resident in accordance with overall institutional policy. However, 1 year of credit must include at least 46 weeks of full-time orthopaedic education. Vacation or leave time may not be accumulated to reduce the 5-year requirement.
4. Program directors may retain a resident for as long as needed beyond the minimum required time to ensure the necessary degree of competence in orthopaedic surgery. According to the current Program Requirements for Residency Education in Orthopaedic Surgery, the committee must be notified of such retention. This information must also be provided to the Board on the Record of Residency Assignment form.

B. Content Requirements**1. Requirements for PGY-1**

Prior to July 1, 2000, a minimum of 9 months during the PGY-1 must be based in clinical services other than orthopaedics. This requirement may be fulfilled by a year of accredited residency in any broad-based program involving patient care.

Beginning on July 1, 2000, the residency program director should be responsible for the design, implementation, and oversight of the PGY-1. The PGY-1 must include

- a. a minimum of 6 months of structured education in surgery to include multisystem trauma, plastic surgery/burn care, intensive care, and vascular surgery;
 - b. a minimum of 1 month of structured education in at least three of the following—emergency medicine, medical/cardiac intensive care, internal medicine, neurology, neurological surgery, rheumatology, anesthesiology, musculoskeletal imaging, and rehabilitation;
 - c. a maximum of 3 months of orthopaedic surgery.
- 2. Orthopaedic requirements beyond the PGY-1**
- a. Minimum distribution. Orthopaedic education must be broadly representative of the entire field of orthopaedic surgery. The minimum distribution of educational experience must include
 1. 12 months of adult orthopaedics;
 2. 12 months of fractures/trauma;
 3. 6 months of children's orthopaedics;
 4. 6 months of basic science and/or clinical specialties.

Experience may be received in two or more subject areas concurrently. Concurrent or integrated programs must allocate time by proportion of experience.

- b. Scope. Orthopaedic education must provide experience with all of the following:
 1. Children's orthopaedics. The educational experience in children's orthopaedics must be obtained either in an accredited position in the specific residency program in which the resident is enrolled or in a children's hospital in an assigned accredited residency position.
 2. Anatomic areas. All aspects of diagnosis and care of disorders affecting the bones, joints, and soft tissues of the upper and lower extremities, including the hand and foot; the entire spine, including intervertebral discs; and the bony pelvis.
 3. Acute and chronic care. Diagnosis and care, both operative and nonoperative, of acute trauma (including athletic injuries), infectious disease, neurovascular impairment, and chronic orthopaedic problems including reconstructive surgery, neuromuscular disease, metabolic bone disease, benign and malignant tumors, and rehabilitation.
 4. Related clinical subjects. Musculoskeletal imaging procedures, use and interpretation of clinical laboratory tests,

prosthetics, orthotics, physical modalities and exercises, and neurological and rheumatological disorders.

5. Research. Exposure to clinical and/or laboratory research.
 6. Basic science. Instruction in anatomy, biochemistry, biomaterials, biomechanics, microbiology, pathology, pharmacology, physiology, and other basic sciences related to orthopaedic surgery. The resident must have the opportunity to apply these basic sciences to all phases of orthopaedic surgery.
- c. Options. Twelve months of the 4 required years under the direction of the orthopaedic surgery residency program director may be spent on services consisting partially or entirely of:
1. additional experience in general adult or children's orthopaedics or fractures/trauma;
 2. an orthopaedic clinical specialty;
 3. orthopaedics-related research;
 4. experience in an accredited graduate medical education program whose educational content is preapproved by the director of the orthopaedic surgery residency program.

C. Accreditation Requirements

1. The educational experience in orthopaedic surgery obtained in the United States must be in an approved position in programs accredited by the RRC for Orthopaedic Surgery and by the ACGME.
All other clinical education obtained in the United States must be in programs accredited by the ACGME and the appropriate RRC. The *Graduate Medical Education Directory*, published annually by the American Medical Association, 515 N State St, Chicago, IL 60610, lists accredited rotations of 6 months or longer.
2. During the 5 years of accredited residency, a total period of no more than 6 months may be served in unaccredited institutions.
3. Credit for time spent in residency education will be granted only for the period during which the residency program is accredited, and only for time served in an approved position within an accredited program.
4. If an orthopaedic residency program has its accreditation withdrawn by the RRC for Orthopaedic Surgery and the ACGME, no educational credit will be granted past the effective date of withdrawal of accreditation.
5. Educational experience obtained in Canada must be on services approved by the Royal College of Physicians and Surgeons of Canada (RCPSC) and must extend over a minimum of 5 years. The content requirements outlined in III.B must be met.
6. The Board does not grant credit for foreign educational experience, other than as permitted in 2 and 5, above.
7. The term "fellow" is not synonymous with the term "resident" for the purpose of obtaining Board credit for educational experience. A resident is an individual enrolled in an approved position in an accredited educational program.

D. Achievement Requirements

1. The director of the program providing general graduate medical education must certify the satisfactory completion of that segment of education.
2. In orthopaedic surgery residency programs, the program director must certify the satisfactory completion of each rotation for which credit is awarded. (See III.F, below.)
3. The program director responsible for the final year of the resident's education must certify that the resident has achieved a satisfactory level of competence and is qualified for the certifying process.
4. The certification referred to in 2 and 3, above, must be made on the appropriate Record of Residency Assignment form.

5. Medical practice activity outside of residency duties must not be allowed to interfere with the educational experience. Residents may not engage in such activities without the specific prior approval of the program director. Approval must be based on the judgment that rotations are being completed without compromise and that the circumstances of the resident warrant such activity.

E. Continuity Requirements

The resident should have progressively increasing patient care responsibility. A part-time or piecemeal approach to residency requirements is discouraged. The final 24 months of orthopaedic residency education must be obtained in a single orthopaedic residency program unless prior approval of the Credentials Committee is obtained.

F. Documentation Requirements

1. For orthopaedic education obtained in the United States, the program director must provide the Board with yearly documentation during the residency. Each May, directors will receive Record of Residency Assignment forms on which the required information will be recorded. The appropriate forms are to be signed by the program director and the resident. The original, signed forms are to be returned to the Board office within 30 days of the end of the academic year (August 1).
2. The Record of Residency Assignment forms are to be completed for each resident as follows:
 - a. Form 1 will be submitted the year the resident enters the program.
 - b. Form 1-A must be submitted at the end of the academic year for each PGY-1 resident.
 - c. Form 2-A must be submitted at the end of the academic year for each PGY-2 through PGY-5 resident.
 - d. Form 3 must be submitted on each resident who graduates or leaves the program prematurely.
3. The original, signed forms are due in the Board office within 30 days of completion of the academic year. Part I examination results for candidates who take the examination in the same year they complete their residencies will not be mailed either to the candidates or to the program directors until the forms have been received in the Board office.
4. When a resident leaves a program prematurely, the program director must notify the Board office in writing within 30 days. The letter must record the reasons for leaving and confirm credit granted for rotations during the academic year in which the resident left. At the end of the academic year, Form 2-A and Form 3 must be completed.
5. Before a resident enters a new program, the new program director must obtain copies of the resident's Record of Residency Assignment forms from the Board office and review them thoroughly in order to develop an appropriate individual program that will meet the minimum educational requirements and include progressively increasing responsibility.

IV. Requirements for Taking the Certifying Examinations

The certifying examination is divided into two parts. Part I is a written examination, which may be taken at any time after the completion of the educational requirements. Part II is an oral examination, which may be taken after passing Part I, completion of the 22-month practice requirement, evaluation of the applicant's practice, and admission to the examination. A candidate must pass both parts of the certifying examination to be certified.

After taking and passing the written examination, candidates have 5 years to take or retake the oral examination. Candidates who

do not pass the oral examination within those 5 years must retake and re-pass the written examination before applying to take the oral examination. Time spent in fellowship education after passing Part I will not count as a part of the 5-year time limit.

An applicant seeking certification by the ABOS must satisfy the educational requirements that were in effect when he/she first enrolled in an accredited orthopaedic residency. For all other requirements, an applicant must meet the specifications in effect at the time of application.

A. Educational Requirements

1. An applicant must satisfactorily complete and document the minimum educational requirements in effect when he/she first enrolled in an accredited orthopaedic residency.
2. Upon successful completion of 54 of the 60 months of required education and on the recommendation of the program director, a candidate may apply to take Part I of the examination.
3. In order to be admitted to the examination, the candidate must complete the full 60 months of required education.
4. An applicant who has received orthopaedic surgery residency education in Canada must have fulfilled the requirements of the ABOS and must have passed the qualifying examination in orthopaedic surgery of the RCPSC before applying for either part of the Board's certifying examination.

B. License Requirement

Applicants who are in practice at the time they apply for Part I and all applicants for Part II must either possess a full and unrestricted license to practice medicine in the United States or Canada or be engaged in full-time practice in the US federal government, for which licensure is not required. An applicant will be rendered ineligible for any part of the certifying examination by limitation, suspension, or termination of any right associated with the practice of medicine in any state, province, or country due to a violation of a medical practice act or other statute or governmental regulation; to disciplinary action by any medical licensing authority; by entry into a consent order; or by voluntary surrender while under investigation or suspension of license.

C. Board Eligible Status

Effective July 1, 1996, the Board will recognize those candidates who have successfully completed Part I and are awaiting to take Part II as being "Board eligible." The limit of Board eligibility is the 5 years candidates have to take or retake the oral examination (Part II) after passing Part I. Candidates who do not pass the oral examination (Part II) within those 5 years will lose their Board-eligible status. (See "IV. Requirements for Taking the Certifying Examinations," above.)

D. Practice Requirements

1. The applicant must be continuously and actively engaged in the practice of operative orthopaedic surgery other than as a resident or fellow (or equivalent) for at least 22 full months immediately prior to the Part II examination. An applicant must have started practice on or before September 1, 1999, in order to qualify for the 2001 Part II Examination. An applicant who interrupts the 22 months of practice with a fellowship can count the months of practice that preceded the fellowship as part of the 22-month requirement.
2. The applicant must be in one practice location for a minimum of 12 consecutive months during the required 22-month period. A change in location, type of hospital practice, or practice association may result in deferral. The practice must be located in the United States or its territories, Canada, or a US service installation.

3. The practice must include hospital admitting and surgical privileges (temporary privileges acceptable) in effect at the time of application and at the time of examination. The practice must allow independent decision making in matters of patient care.
4. The applicant must demonstrate professional competence and adherence to acceptable ethical and professional standards. It is the responsibility of the applicant to provide documentation that he/she is an ethical and competent practitioner.
5. A reduction, restriction, suspension, termination, or resignation at the request of a hospital of all or any portion of an applicant's surgical staff privileges, or pending action to do so, will normally result in a deferral until such action is finally resolved and the applicant's practice has stabilized sufficiently for it to be evaluated.
6. An applicant in the US uniformed services may satisfy the practice requirement if assigned as an orthopaedic surgeon for at least 22 full months prior to the date of the Part II examination, meaning that the applicant must have started practice on or before September 1, 1998. The applicant must submit a letter from his/her immediate supervisor evaluating his/her capability in the practice of orthopaedic surgery, as well as any other documentation the Credentials Committee may require to demonstrate professional competence and adherence to acceptable ethical and professional standards.
7. Evaluation of Applicant
 - a. Individuals who do not engage in active orthopaedic surgery cannot be adequately evaluated for the Part II examination and will not be certified.
 - b. Qualifications for taking the Part II examination will be determined by the Credentials Committee after review of the application, letters of recommendation, and other relevant information.
 - c. It is the responsibility of the applicant to provide the information on which the Credentials Committee bases its evaluation of the qualifications of the applicant. This responsibility extends to information that the Credentials Committee requests from other persons. If the Credentials Committee does not receive requested information from the applicant, a program director, a reference, a hospital representative, or another source, the Board will notify the applicant and defer the decision on admission to the examination until the information has been received. The applicant may be required to authorize release of peer review information to the Board.
 - d. Representatives of the Board may visit the site of an applicant's practice if the Credentials Committee believes that this is necessary for adequate evaluation of the applicant's work.

V. Impaired Physicians

A. Chemical Dependency

Applicants for either part of the certifying examination who, within 3 years of their application, have been diagnosed as chemically dependent and/or have been treated for drug or other substance abuse will be required, as part of their demonstration that they meet the practice requirements in IV.D., to present evidence from the appropriate agencies, hospitals, and physicians demonstrating to the satisfaction of the Board that they have both (1) satisfactorily completed the program of treatment prescribed for their condition and (2) been free of chemical dependency for a period sufficient to establish that they are not currently using illegal drugs and/or that the use of illegal drugs or other substance abuse is not an ongoing problem. This documentation must accompany the completed application form. The maintenance of any such applicant's certification may be conditional upon periodic drug testing.

B. Mental and Physical Condition

Applicants for either part of the certifying examination who have a mental or physical condition that could affect their ability to practice orthopaedic surgery will be required, as part of their demonstration that they meet the practice requirements in IV.D., to present medical evidence from the appropriate physicians, treatment centers, and hospitals demonstrating to the Board that the impairment does not compromise their ability to render safe and effective care to their patients. This documentation must accompany the completed application form.

VI. Procedure for Application for Part I and Part II of the Certifying Examinations

A. Application Dates and Requests

1. The dates, locations, and application deadlines for Part I and Part II of the certifying examination are announced in the *Journal of Bone and Joint Surgery*. They are also listed on the Board's Web site: www.abos.org. Examination dates may be changed at the discretion of the Board. Confirmation of published examination dates can be obtained from the Board's office.
2. All applications must be requested in writing.

B. Application Deadlines

1. Part I. A completed application on an original form provided by the Board for Part I must be postmarked by registered mail on or before March 1 of the year of the examination. The application must be accompanied by a nonrefundable examination fee of \$770.
2. Part II. A completed application on an original form provided by the Board for Part II must be postmarked by registered mail on or before October 31 of the year preceding the examination. The application must be accompanied by a nonrefundable application and credentialing fee of \$700.
3. Late or incomplete applications. Applications postmarked after the deadlines for Part I or Part II of the certifying examination and applications received incomplete will be returned to the applicant together with the fee check.
 - a. If a Part I applicant wishes to resubmit the Part I application by registered mail postmarked on or before March 31, the nonrefundable examination fee of \$770 and a nonrefundable late fee of \$250 must be enclosed.
 - b. If a Part II applicant wishes to resubmit the Part II application by registered mail postmarked on or before November 30, the nonrefundable application and credentialing fee of \$700 and a nonrefundable late fee of \$250 must be enclosed.
 - c. No applications will be accepted after the late deadlines.

C. Notifying the Board of Application Changes

1. It is the responsibility of all applicants to notify the Board office of any change of address, practice association, or hospital affiliation.
2. If a Part II applicant changes practice location or practice association or acquires new hospital staff affiliations, new references will be solicited by the Board.
3. An applicant is also required to notify the Board of the denial of any request for hospital privileges; of any action to restrict, suspend, or terminate all or any portion of surgical staff privileges; of any request by a hospital to resign all or any portion of surgical staff privileges; and of any action by a governmental agency that would result in the restriction, suspension, or probation of the applicant's license or any right associated with the practice of medicine.

D. Notifying the Applicant of Examination Admission

1. For Part I, the applicant will receive examination information, an assigned examination number, and an admission card not later than 30 days prior to the examination date.
2. For Part II, the decision of the Credentials Committee is mailed to the applicant not later than 60 days prior to the examination date.

E. Fees

1. For Part I, the nonrefundable examination fee of \$770 must be submitted with the application form.
2. For Part II:
 - a. The nonrefundable application and credentialing fee of \$700 must be submitted with the application form.
 - b. The candidate must also submit an examination fee of \$770 on or before the date specified in the letter of notification of admission to the examination. This fee will be forfeited if the candidate fails to appear for the examination or cancels after being scheduled.
3. There will be a \$50 charge levied for any application or examination fee check that is returned not paid by the Board's bank.
4. The fees paid to the ABOS are not tax deductible as a charitable contribution, but may be deductible under some other provision of the Internal Revenue Service code.

Fees

Part I examination fee	\$770
Part II application and credentialing fee	\$700
Part II examination fee	\$770
Late fee	\$250
Returned check service charge	\$50

F. Practice-Based Oral Examination

The Part II examination is practice based. The purpose of the practice-based examination is to evaluate a candidate's own practice as broadly as possible. This exercise will be conducted much as rounds or conferences are during residency, with the candidate presenting his/her cases and responding to the examiner's questions and comments. Applicants are urged to attend to details and follow procedures carefully and exactly to ensure admission to the examination.

1. Case collection: Cases are collected in a program accessible through the ABOS Web site using the applicant's unique password and user ID. Each applicant will receive his/her password and user ID either in the application packet that they have requested or after returning the request form included with the application when it is downloaded from the ABOS Web site. This case collection program must be used to compile the case list that is submitted to the Board.

The applicant is to collect all operative cases, including same-day surgery, for which he/she was the responsible operating surgeon for 6 consecutive months beginning July 1 of the year before the Part II examination. If time is taken off during those 6 months, the starting point for the collection period must be backed up by the amount of time missed. For example, case collection for an applicant who took a 2-week vacation in August would begin in mid June.

All cases must be collected from each hospital or surgery center at which the applicant has operated during the 6-month period. If the applicant did no cases during the case collection period, this fact must be verified by a letter from the hospital and/or surgery center. The letter(s) must be sent to the Board of office along with the case lists. It is understood, as stated in the Practice Requirements (IV.D), that the applicant during this period has been actively engaged in the practice of operative, orthopaedic surgery with independent decision making in matters of patient care. The case list must reflect this and must demon-

strate ample cases to allow selection of material for the oral examination.

Once all cases have been entered into the case collection program, the applicant will print out his/her complete case list(s) by hospital. No changes can be made to the case list(s) after this is done. Each complete hospital list must then be certified by the director of medical records. The director of medical records signature must then be notarized.

2. Case submission: By January 31 of the year of the Part II examination, the applicant must submit to the Board:
 - a. The complete printed case list(s) for the required 6-month period. Each hospital list must be stapled separately and have the required signatures and notarization. Before mailing, the applicant should make three copies of the complete case list(s), as the copies the applicant must bring to the examination must be of these printed and certified lists.
 - b. For each hospital or surgery center where no cases were performed, a letter stating that no cases were performed there during the 6-month period.

This information must be sent to the Board office by registered mail or courier of applicant's choice (ie, Federal Express, Express Mail, certified mail, etc) to ABOS, Part II Exam, 400 Silver Cedar Ct, Chapel Hill, NC 27514. Case lists must be postmarked by January 31 of the year of the examination. The Board office will not verify receipt of case lists.
3. Case Selection: The Board will select 12 cases from the applicant's 6-month case list(s). The list of 12 cases selected by the Board will be sent to the candidate in mid May. From the list of 12, the applicant will then select ten cases to bring to the examination for detailed presentation.
4. Examination Materials/Preparation: Once the candidate has received the list of the 12 cases selected by the Board, he/she must gather all of the following to bring to the examination:
 - a. Three copies of the list of 12 selected cases.
 - a. Three copies of the case list summary sheet.
 - c. Three copies of the applicant's complete case list that was submitted to the Board in January.
 - d. Images (including x-rays) for the 10 cases selected by the candidate—the pertinent pre-, intra-, or immediate postoperative and most recent follow-up x-rays for each case selected by the candidate for presentation. Before the examination begins, x-rays should be arranged in order of presentation and clearly marked in terms of date, pre- and postoperative. Pertinent images in CT and MRI panels must also be marked.
 - e. Two copies of notes for the 10 cases selected by the applicant—this includes admission and discharge notes, operative notes, office notes, and any other patient chart material that will aid in case presentation.
 - f. Video prints or photographic prints for arthroscopy cases selected that show the initial lesion(s) and the lesion(s) after treatment. (Do not bring videotapes.)
 - g. For cases with complications, images (including x-rays) pertinent to the complication and its treatment and two copies of any consultation report(s).

Please note: Because the examination is to be anonymous, the candidate should obliterate his/her name wherever it appears on any material brought to the examination, including the 6-month case list(s), the Board's list of 12 selected cases, and the case list summary sheet. All materials for the examination must be in English.

Although the examiners will concentrate on cases brought for presentation, they may also ask questions pertaining to a candidate's case lists or practice. The candidate should not be concerned if all material brought to the examination is not covered. Discussion

may focus on one area, or candidate and examiners may become involved in a few cases in such detail that time will not allow presentation of all patients. The candidate will not be penalized for this during the grading.

Applicants who have questions about materials and procedures for the practice-based oral Part II examination should call or write the Board office well before the examination. Failure to comply with the steps outlined may invalidate an examination.

VII. Falsified Information and Irregular Behavior

- A. If it is determined that an applicant has falsified information on the application form or failed to provide material information, the applicant will not be considered for either part of the examination not already passed and must wait 3 years before being allowed to file a new application.
- B. Examination applicants should understand that the following may be sufficient cause to bar them from future examinations, terminate participation in the examination, invalidate the results of an examination, withhold or revoke scores or certificates, or take other appropriate action:
 1. The giving or receiving of aid in the examination, as evidenced either by observation or by statistical analysis of answers of one or more participants in the examination
 2. The unauthorized possession, reproduction, or disclosure of any materials, including, but not limited to, examination questions or answers, before, during, or after the examination
 3. The offering of any benefit to any agent of the Board in return for any right, privilege, or benefit that is not usually granted by the Board to other similarly situated candidates or persons
 4. The engaging in irregular behavior in connection with the administration of the examination
- C. The following are examples of behavior considered to be irregular and that may be cause for invalidation of the examination or imposition of a penalty:
 1. Referring to books, notes, or other devices at any time during the examination. This prohibited material includes written information or information transferred by electronic, acoustical, or other means.
 2. Any transfer of information or signals between candidates during the test. This prohibition includes any transfer of information between the candidate and any other person at any time during the testing period, including bathroom breaks.
 3. Any appearance of looking at the answer sheet or the examination booklet of another candidate during the examination.
 4. Allowing another candidate to view one's answer sheet or examination booklet or otherwise assisting another candidate in the examination.
 5. Taking any examination material outside the examination room. All examination materials are the property of the Board and must be left in the room at the end of the examination.
 6. Breaking of the seal on the examination booklet before being told to do so and/or recording answers on the answer sheet after being told to stop.
- D. Applicants should also understand that the Board may or may not require a candidate to retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of a candidate's personal involvement in such activities.

VIII. Credentials Decisions

A. Determining Admission to Examinations

1. The Credentials Committee meets at least once each year to consider applications for the examinations. At this meeting, a

decision about each applicant will be made either to approve admission to the next examination, to deny admission, or to defer decision pending further evaluation.

2. A decision approving admission to an examination applies only until the next available examination and does not carry over from one examination until the next. A new application is required for each examination.

B. Deferral of Admission Decision

A decision on an applicant's admission to either Part I or Part II of the examination may be deferred if information received by the Credentials Committee is insufficient for the Committee to make a judgment and/or warrants further investigation. Typically, the committee will defer such a decision for 1 year to gain further information. If information is still insufficient, the decision will be deferred for a second year to enable representatives of the Board to conduct a site visit as described in IV.D.7.d. A deferral of not more than 2 consecutive years is not viewed by the Board as an adverse action; thus, no appeal of a decision of the Credentials Committee is permitted unless an applicant has been denied admission or has been deferred for more than 2 consecutive years.

C. Appeal of Admission Decision

An applicant denied admission to the examination or deferred for more than 2 years will be informed of the basis for such action and may request a hearing by an appeals committee of the ABOS (see Appeals Procedure).

IX. Certificates and Certificate Renewal

A. Awarding Certificates

The ABOS awards a certificate to a candidate who specializes in orthopaedic surgery, has met the educational requirements of the Board, has demonstrated competence in orthopaedic surgery and adherence to ethical and professional standards, and has passed both parts of the certifying examination. Certificates awarded after 1985 are valid for 10 years. This portion of the Board's responsibility is discharged by issuance of a certificate to an individual found qualified as of the date of certification.

B. Certificate Revocation

At its discretion, the Board may revoke a certificate for due causes, including, but not limited to the following:

1. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the Board or any committee thereof prior to examination or at the time of issuance of the certificate, as the case may be.
2. The diplomate made an intentional and material misrepresentation or withheld information in the application to either part of the examination or in any other representation to the Board or any committee thereof.
3. The diplomate made a misrepresentation to the Board or any third party as to his/her status as a diplomate of the Board or his/her receipt of or eligibility for certification by the Board.
4. The diplomate engaged in irregular behavior in connection with an examination of the Board (as described in VII.C), whether or not such practice had an effect on the performance of the candidate on an examination.
5. The diplomate was convicted by a court of competent jurisdiction of a felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine.
6. There has been a limitation, suspension, or termination of any right of the diplomate associated with the practice of medicine in any state, province, or country, including the imposition of any

requirement of surveillance, supervision, or review due to a violation of a medical practice act, or other statute or governmental regulation, disciplinary action by any medical licensing authority, entry into a consent order, or voluntary surrender of license.

A diplomate may appeal the revocation of his/her certificates pursuant to the procedures set forth in Section XII.

C. Certificate Reinstatement

Should the circumstances that justified revocation or surrender of the diplomate's certificate be corrected, the Board may reinstate the certificate after appropriate review of the individual's qualifications and performance, using the same standard applied to other applicants for certification.

D. Certificate Renewal

Diplomates are encouraged to renew their credentials periodically through the Board's recertification process. Information about recertification options can be obtained from the Board office.

X. Unsuccessful Candidates

Unsuccessful Part I candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.1.)

Unsuccessful Part II candidates may repeat the examination by submitting a new application form for the examination and again being found admissible. (See VI.B.2 and VIII.) Candidates who do not pass Part II within 5 years (as measured in Section IV) of passing Part I must retake and repass Part I before applying to take Part II.

XI. Program Accreditation

Institutions offering orthopaedic education must meet the Institutional and Program Requirements of the ACGME and the RRC for Orthopaedic Surgery as stated in the *Graduate Medical Education Directory*. (See III.C.)

A. RRC for Orthopaedic Surgery

Program accreditation is issued by the RRC for Orthopaedic Surgery, an autonomous committee composed of three representatives from each of the three sponsoring organizations: the ABOS, the Council on Medical Education of the American Medical Association, and the American Academy of Orthopaedic Surgeons. In evaluating orthopaedic residency programs, the RRC considers the number of residents, training period, program organization, educational experience, and institutional responsibility. The committee meets twice yearly.

B. Changes in Accreditation

Programs seeking changes in accredited positions or institutional affiliations can obtain information and application forms from the secretary of the RRC for Orthopaedic Surgery at the ACGME, 515 N State St, Chicago, IL 60610. Completed forms are to be returned to the secretary at the above address.

C. Program Surveys

Programs applying for accreditation or changes in accreditation will be surveyed at the earliest feasible date by a specialist site visitor or by a field representative for the ACGME. A report of the survey is submitted to the RRC for Orthopaedic Surgery for evaluation and official action. The RRC makes a determination regarding the accreditation of the program under authority delegated by the ACGME, and it notifies the program director and the sponsoring institutions.

D. Number of Residents

The total number of residents assigned to any orthopaedic residency program and the number at each level of education must have prior approval by the RRC for Orthopaedic Surgery.

XII. Appeals Procedure

- A. An individual who has received an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the ABOS within 60 days of the date such ruling was mailed to him or her. Exception: The decisions by the Examinations Committee that a candidate has failed either part of the certifying examination may be appealed only in the manner and to the extent provided in G and H, below.
- B. Upon receipt of a notice of appeal, the concerned Board committee shall consider any information submitted therewith by the individual in support of his/her appeal and make such further investigation as it deems appropriate. If the committee then decides in a manner favorable to the individual, it shall so notify the individual. If the committee does not so determine, it shall notify the individual and the president of the ABOS.
- C. The individual shall then have the right to an appeals hearing to decide whether the determination of the concerned Board committee shall be confirmed, modified, or overruled in accordance with the hearing process described in this appeals procedure.
1. The president of the ABOS shall appoint an ad hoc appeals committee consisting of three directors of the Board who did not participate in making the determination being appealed, one of whom shall be designated by the president as chairman of the appeals committee.
 2. In the event that the subject matter of the appeal involves complex issues of fact or issues not solely dependent upon medical, surgical, or professional standards, the president of the ABOS, at his/her sole discretion, may appoint a hearing officer to conduct the appeals hearing and to submit a full written report and a recommended decision to the ad hoc appeals committee. The hearing officer appointed at the discretion of the president shall be an impartial physician, lawyer, or other professional.
 3. The chairman of the appeals committee shall convene a hearing before the appeals committee or the hearing officer, if one is appointed, within a reasonable time after their respective appointments, but not less than 60 days after the appointment of the appeals committee and the hearing officer, whichever is later.
- D. Prior to the hearing
1. The concerned Board committee shall provide the executive director with such written information concerning its decision as it deems appropriate; a list of witnesses, if any, whom it expects to call to testify; copies of any written material that it considered in making the determination appealed (but only if it intends to present such material at the hearing); and a list of information and documents the individual is required to produce at the hearing. This material, together with written notice stating the time and place of the hearing, shall be sent to the individual by the executive director not less than 30 days prior to the hearing. Not less than 7 days prior to the hearing, the concerned Board committee shall provide the executive director and the individual with copies of any written reports, affidavits, or statements of experts that the concerned Board committee intends to present at the hearing.
 2. Not less than 7 days prior to the hearing, the individual shall provide the executive director and the concerned Board committee with such written information concerning his/her position as he/she deems appropriate; a list of witnesses, if any, whom he/she expects to call to testify; and copies of any written reports, affidavits, or statements of experts that he/she intends to present at the hearing.
3. The executive director shall submit the written material referred to in this section D to the members of the appeals committee or to the hearing officer, if one has been appointed, prior to the hearing. Copies of this material must also be submitted to the individual and to the concerned Board committee no later than the time when submitted to the appeals committee or the hearing officer.
- E. The hearing, whether conducted before the appeals committee or a hearing officer, shall be a hearing de novo. The concerned Board committee and the individual shall have the right to present all relevant information and evidence in support of their respective positions, and neither the concerned Board committee nor the individual shall be limited to the information and evidence considered by the concerned Board committee in making its original determination or its reconsideration of the original decision.
1. The concerned Board committee shall have the burden of proving at the hearing that the determination being appealed should be confirmed. The standard of proof to be applied by the appeals committee and the hearing officer in deciding whether the information and evidence presented at the hearing is sufficient to warrant confirmation of the determination being appealed is by the preponderance or greater weight of the evidence.
 2. At the hearing, the concerned Board committee and its legal or other representatives shall present such relevant information and evidence as it deems appropriate to support its previously made determination. However, the committee shall not have the right to present any information or evidence not previously provided as required in D.1. The committee may call, examine, and cross-examine witnesses.
 3. The individual shall have the right to be represented at the hearing by legal counsel or any person of his/her choice. He/she may present such relevant information and evidence as he/she deems appropriate in support of his/her position. However, the individual shall not have the right to present any information or evidence if not previously provided as required in D.2. The failure of the individual to produce information or documents requested by the concerned Board committee as required in D.2 shall be grounds for upholding and confirming the determinations of the concerned Board committee. The individual may call, examine, and cross-examine witnesses.
 4. The individual and the concerned Board committee may submit written statements at the close of the hearing. A written record of the hearing shall be made available to the individual at one half the cost of its preparation.
- F. After the conclusion of the hearing
1. If the hearing has been conducted before a hearing officer, the hearing officer shall prepare a written report based on the information and evidence presented, including the findings of fact determined by the hearing officer and a recommended decision as to whether the determination being appealed should be confirmed, modified, or overruled. The hearing officer shall submit the written report to the appeals committee and send copies to the individual and the concerned Board committee. The individual and/or the concerned Board committee may file objections to the report and recommendations of the hearing officer with the appeals committee within 10 days after receipt of the report. The opposing party shall then have 10 days to file its response to such objections with the appeals committee.

2. The appeals committee shall make its decisions following the hearing. If the hearing has been conducted before a hearing officer, the appeals committee will first receive the written report and recommendations of the hearing officer and the objections and responses filed thereto by the parties. If a majority of the members of the appeals committee determine, on the basis of the information and evidence presented, including, when applicable, the report and recommendations of the hearing officer, that the determination of the concerned Board committee should be confirmed or modified, the appeals committee shall so declare. If a majority determines that the concerned Board committee's determination should be overruled, the appeals committee shall so declare. The appeals committee shall inform the individual and the concerned Board committee of its decision in writing within a reasonable time following the hearing, explaining the basis for its judgment. The decision of the appeals committee shall be final and binding.

G. A candidate who believes that the Part II examination was administered in an unfair or inaccurate manner or that one or more of his/her oral examiners was acquainted with him or her or was not impartial may immediately, upon completion of the examination, request that he/she be reexamined. The request shall be made to the chairman of the Oral Examinations Committee and reviewed by the president and the secretary. If, after discussing the matter with the candidate and making such other investigation as they may deem appropriate, a majority of the president, the secretary, and the chairman of the Oral Examinations Committee determine that reasonable grounds exist for the candidate's request, he/she shall be immediately reexamined by another panel of oral examiners. In such event, the first oral examination will be disregarded and only the candidate's performance on the reexamination shall be considered in determining his/her score on the examination.

H. A candidate who fails the Part I examination may request in writing that his/her examination be rescored by hand to verify the accuracy of the results as reported to him or her. Such a request is to be made within 60 days of his/her being notified of the results of the examination. The request must be accompanied by a check for \$100 payable to the ABOS to cover the cost of hand scoring. There shall be no further appeal of a failure on the Part I examination.

Important Dates

September 4, 2001	Operative Experience Report Program available online to all residents
March 2, 2002	Otolaryngology Training Examination
April 10, 2002	Applications for 2002 Written Examination become available
April 26, 2002	2001 Written Exam (postponed from September 24, 2001)
April 27-28, 2002	Oral Examinations for qualifying candidates from 2001 Written Exam
June 1, 2002	Resident Registry forms due from program directors
July 10, 2002	Written Examination applications due. To avoid late fees, the envelope must be postmarked July 10 or before, and all required items must be enclosed with the application, including the \$2,500 fee Operative Experience data uploaded to ABOto Web site and printouts due from all residents and new applicants

July 11-20, 2002	Written Examination applications postmarked between these dates (inclusive) accepted with \$200 late fee
July 20, 2002	Written Examination applications postmarked after this date not accepted
August 11, 2002	Applicants notified of acceptance for Written Examination
September 30, 2002	Written Examination

History

The American Board of Otolaryngology (ABOto) was founded and incorporated in 1924 and is the second oldest of the 24 American certifying boards. The Board is a nonprofit corporation, and the directors and examiners, with the exception of the executive vice president and the examination chairman, receive no compensation. (Note: In this document, "Board" refers to the American Board of Otolaryngology, Inc.)

Founding members included two representatives from each of the following specialty organizations: the American Laryngological Association, American Otological Society, American Laryngological, Rhinological and Otological Society, American Academy of Ophthalmology and Otolaryngology, and Section on Laryngology, Otology and Rhinology of the American Medical Association. This group of ten founding members, delegated authority by the above organizations, was established as the ABOto.

Since then, several other organizations have become sponsoring organizations: the American Broncho-Esophagological Association (1947), American Society for Head and Neck Surgery (1947), American Academy of Facial Plastic and Reconstructive Surgery (1971), American Society of Ophthalmologic and Otolaryngologic Allergy (1974), American Society of Pediatric Otolaryngology (1989), American Neurotology Society (1991), American Rhinologic Society (1994), Association of Academic Departments of Otolaryngology-Head and Neck Surgery (1995), and Society of University Otolaryngologists-Head and Neck Surgeons (1995).

The ABOto office is located in Houston, Texas, and is separate and distinct from the American Academy of Otolaryngology-Head and Neck Surgery (AAO-HNS) in Alexandria, Virginia, which is the specialty's largest membership organization.

Definition of a Certified Specialist in this Field of Medicine

An otolaryngologist-head and neck surgeon is a physician who has been prepared by an accredited residency program to provide comprehensive medical and surgical care of patients with diseases and disorders that affect the ears, the respiratory and upper alimentary systems, and related structures of the head and neck. The required 5 years of postgraduate specialty training must include 1 year of general surgery and 4 years of otolaryngology-head and neck surgery in an approved residency program.

The otolaryngologist-head and neck surgeon has a command of the core of knowledge, skills, and understanding of:

- The basic medical sciences relevant to the head and neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses and allergy/immunology, endocrinology and neurology as they relate to the head and neck;
- The clinical aspects of diagnosis and the medical and/or surgical therapy or prevention of diseases, neoplasms, deformities, disorders and/or injuries of the ears, the respiratory and upper alimentary systems, the face, jaws, and the other head and neck systems. Head and neck oncology and facial plastic and reconstructive surgery are fundamental areas of expertise.

(As printed in *Which Medical Specialist For You*, a publication of the American Board of Medical Specialties.)

Objectives

The objectives of the ABOto are:

1. To establish standards of qualification for otolaryngologist-head and neck surgeons who desire and request Board certification.
2. To determine which candidates fulfill these standards of qualification.
3. To examine such candidates and issue certificates upon satisfactory completion of requirements.
4. To encourage development and maintenance of the highest standards in the teaching and training of otolaryngologist-head and neck surgeons.

The ABOto certificate carries with it no legal qualification or license to practice medicine. There is no intention by the Board to interfere with or limit the professional activities of any licensed physician, whether certified or not. It is neither the intent nor the purpose of the Board to define requirements for membership on the staffs of hospitals or similar institutions or to confer special privileges upon its diplomates.

Board Eligibility and Status Inquiries

The ABOto does not recognize or use the term "Board eligible." The Board states whether an individual is certified, is not certified, or is in the process of being examined (ie, between written and oral examinations).

Examination

The ABOto certification process consists of two phases: a written qualifying examination and an oral certifying examination.

All candidates must take a written examination, which is offered in the fall of each year. Candidates who do not achieve the qualifying score fail the exam and are not eligible to take the oral examination. They may retake the written exam in a subsequent year.

Candidates who meet or exceed the qualifying score must then successfully complete an oral examination, which is offered in the spring of each year, in order to become certified. Qualified candidates are given three consecutive opportunities to take the oral exam. If a passing score is not achieved after three exam cycles, the candidate must reapply to take the written exam and must again achieve a qualifying score in order to be permitted to retake the oral exam.

Written and oral examination scores are *not* combined. An individual must successfully complete both the written and the oral exam in order to be certified. A certificate is granted by the ABOto to a candidate who has met all the requirements and has satisfactorily passed its exams.

Requests for an appeal regarding a certification decision must be received within 40 days of the date exam results are postmarked at the ABOto office. A copy of the Appeals Policy as related to the certification process is available upon request.

Prerequisite Requirements

1. Resident Registry

All residents must be registered with the ABOto during the first year of otolaryngology training in order to subsequently apply to take the certification examination.

A New Resident Form must be filed for each new resident by the program director by June 1 of the first year of otolaryngology-head and neck surgery training. The form must be signed by both the program director and the resident.

New residents then receive instructions on the procedure and deadline for submitting an official medical school transcript and verification of previous training.

The program director subsequently submits a Resident Evaluation Form for each returning resident by June 1 of each year. It must be noted whether the previous year was successfully completed, and the form must be signed by both the program director and the resident.

Resident Evaluation Forms become part of the individual's ABOto file and are a prerequisite for application for the certification examination.

Credit may not be granted by the ABOto for any year of training for which an Evaluation Form is not received.

Programs not meeting the June 1 deadline will be assessed a \$200 late fee.

2. Transcript and Surgical Verification

Residents must request from their medical school an official transcript, to be sent directly to the ABOto by October 1 of the first year of otolaryngology training. The transcript must show the date the degree was conferred. If the transcript is in a language other than English, a translation must also be submitted. The resident must be a graduate of an approved school of medicine or osteopathy.

Residents must also submit a Verification of Surgery/Verification of Additional Residencies Form to the ABOto by October 1 of the first year of otolaryngology training.

Residents not meeting the October 1st deadline for submission of transcripts and surgery forms will be assessed a \$200 late fee.

3. Operative Experience Report (OER)

All residents maintain a log of their surgical procedures on the ABOto Web site during otolaryngology-head and neck surgery training.

A record is created at the ABOto office for each new resident, and a password is sent to the resident in early September.

Throughout the year, each resident maintains a record of his or her surgical procedures using the OER Program.

All residents upload data to the ABOto by July 10 of each year. A print-out, signed by the resident and the program director, is also submitted by July 10.

Residents who complete a full year of research between years of otolaryngology training and who perform no surgical cases during that year need not submit data for that year. However, a letter must be submitted by July 10 explaining this.

Data from individual reports is transferred to a master database for review by the Credentials Committee.

A fee of \$200 is charged for data and/or print-outs not received by the July 10 deadline.

Completion and return of OER data annually is a prerequisite for application for the certification examination.

Credit may not be granted by the ABOto for any year of training for which OER data is not recorded.

4. Transfers

A resident wishing to transfer from one residency program to another must notify the ABOto in writing at least 6 weeks prior to the date of transfer and must explain the circumstances of the proposed transfer.

Letters from the current and prospective directors of training must also be submitted:

The letter from the current program director must verify the exact amount of training successfully completed in the program.

The letter from the prospective program director must verify that sufficient residency positions, accredited by the Residency Review Committee for Otolaryngology of the Accreditation Council for

Graduate Medical Education (ACGME), exist in the program to provide the transferring resident with the training necessary to meet the requirements of the ABOto for certification.

Failure to comply may result in loss of eligibility to participate in the ABOto certification process.

Leaves of Absence

Leaves of absence and vacation may be granted to residents at the discretion of the program director in accordance with local rules. The total of such leaves and vacation may not exceed 6 weeks in any 1 year. If a longer leave of absence is granted in any year, the required period of graduate medical education may be extended accordingly.

Training Requirements

Training programs in otolaryngology-head and neck surgery in the United States are evaluated by the Residency Review Committee for Otolaryngology (RRC), which consists of representatives from the American Medical Association (AMA), American College of Surgeons (ACS), and ABOto, and are accredited by the Accreditation Council for Graduate Medical Education (ACGME). Information concerning approved educational programs can be found in the *Graduate Medical Education Directory* published by the AMA.

Individuals who enter otolaryngology-head and neck surgery training July 1, 2000, or thereafter must satisfactorily complete a minimum of 5 years of training, as specified below, in an ACGME-approved program(s):

At least 1 year of general surgical training. It is preferred that the general surgical residency be taken prior to otolaryngologic training, but it may not be taken after otolaryngologic training.

At least 4 years of residency training in otolaryngology-head and neck surgery. This training must involve increasing responsibility each year and must include a final year of senior experience. This final year must be spent within the accredited program in which the previous year of training was spent, unless prior approval is obtained from the ABOto.

All residency training must be completed in a manner acceptable to the director of that residency program.

Foreign Training

An applicant who entered otolaryngologic training in the United Kingdom or the Republic of Ireland prior to July 1, 2000, in a program accredited by the Specialist Advisory Committee, and who received a certificate of accreditation in otolaryngology from the Joint Committee on Higher Surgical Training in the United Kingdom and the Republic of Ireland may be considered for examination.

An applicant who entered otolaryngologic training under the New Zealand program after January 1, 1984, but before July 1, 2000, and who passed the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

An applicant who entered otolaryngologic training under the Australian program after January 1, 1986, but before July 1, 2000, and who passed the examination leading to Fellowship in the Royal Australasian College of Surgeons may be considered for examination.

Application for Examination

There is no required time interval between completion of the residency program and making application for examination. However, *all residency training must be successfully completed before the date of the examination* in any given year.

Application materials for the written examination in any given year become available April 10 on the ABOto Web site at

www.aboto.org and must be completed and returned (postmarked) by July 10 of that year. The application consists of the following:

1. Resident Registry Evaluations, submitted annually by the program director.
2. Medical school transcript, submitted directly to the ABOto by the institution, by October 1 of the first year of otolaryngology training. The applicant must be a graduate of an approved school of medicine or osteopathy, and the transcript must show the date the degree was conferred. If the transcript is in a language other than English, a translation must also be submitted.
3. Verification of surgery training and additional residencies, if applicable, submitted by October 1 of the first year of otolaryngology training.
4. Application Form, signed by the program director and another ABOto diplomate.
5. If more than one otolaryngology program was attended, a Verification of Otolaryngology Residency Form must be signed by the previous program director, attesting to satisfactory completion of training in that program.
6. Verification of *all* licenses to practice medicine, showing nonrestricted status and date of expiration. All applicants must submit evidence of medical licensure, with the following exceptions
 - a. Individuals who have completed residency training but who will enter a fellowship program utilizing an institutional license must submit a statement from the program director as evidence of this fact.
 - b. Individuals who have completed residency training but who will go on to practice medicine in a foreign country not requiring licensure must make a written request to be accepted for the examination without medical license. Such requests must be submitted with the application.
7. Operative Experience Report (data and print-out), which lists procedures assisted in and performed by the applicant during otolaryngology residency.
8. The applicant must possess high moral, ethical, and professional qualifications as determined by, and in the sole discretion of, the Board. Additional information may be requested by the Board from the following: local medical society, board certified otolaryngologists from the geographical area in which the applicant practices, the director of the applicant's training program, hospital chiefs of staff, and/or other individuals and entities who may have knowledge of the applicant's moral and ethical standing, qualifications, or abilities.

Applications are approved by the Credentials Committee in August, and applicants are then notified if they have been approved for examination. The Board reserves the right to reject any application.

Applications are valid for one written exam and three oral exams. At the conclusion of this period, or upon failure of the written exam, the application expires, and the individual is required to submit new forms.

Applicants with Disabilities

The ABOto fully supports the intent of the Americans with Disabilities Act (ADA). Upon request, the ABOto will make reasonable accommodations in its examination procedures for candidates with documented disabilities. An applicant who believes that he or she is disabled within the meaning of the ADA law should request detailed information concerning ABOto's policy regarding accommodation so that his/her special needs can be met in a timely manner. Current documentation of the disability must accompany the application.

Fees

1. General Information

- a. Fees are not refundable, nor can they be "held over" to a subsequent exam.
- b. All fees must be paid in US funds, drawn on a US bank. Applicants residing outside the United States must submit payment by International Money Order.
- c. Fees must be paid in full by the stated deadlines. Applications without payment will not be processed.
- d. A fee of \$200 will be charged for any application or portion thereof postmarked between July 11 and July 20 (inclusive). Applications postmarked after July 20 are not accepted.
- e. A fee of \$25 will be charged for any check returned by the bank for insufficient funds.
- f. A fee of \$200 will be charged for cancellation of participation in an oral exam after March 15 of any given year.
- g. Fees are subject to change at the discretion of the Board.

2. New Applicants

- a. The examination fee of \$2,500 is due with the application by July 10.
- b. Individuals who become candidates for the oral examination (by achieving the qualifying score on the written examination) take their first oral examination at no additional cost.
- c. Candidates are given three consecutive opportunities to take the oral examination. A fee of \$1,600 will be charged for the second and/or third oral examination.

3. Reapplicants

- a. If an individual fails the written examination, or if a passing score is not achieved after three oral exams, the individual must reapply to take the written examination, and the examination fee of \$2,500 must accompany the reapplication form.
- b. Individuals who again become oral candidates follow the same procedure and pay the same fees as outlined in paragraphs 2b and c of the "New Applicants" section above.

Purpose of Examination

The purpose of the examination is to determine the candidate's knowledge, skill, and understanding in the following categories:

1. Morphology, physiology, pharmacology, pathology, microbiology, biochemistry, genetics, and immunology relevant to the head and neck; the respiratory and upper alimentary systems; the communication sciences, including knowledge of audiology and speech-language pathology; the chemical senses and allergy/immunology, endocrinology, and neurology as they relate to the head and neck.
2. Diagnosis and diagnostic methods including audiologic and vestibular assessments, electrophysiologic techniques, and other related laboratory procedures for diseases and disorders of the ears, the respiratory and upper alimentary systems, and the head and neck.
3. Therapeutic and diagnostic radiology, including the interpretation of medical imaging techniques relevant to the head, neck, and thorax, including the temporal bone, skull, nose, paranasal sinuses, salivary and thyroid glands, larynx, neck, lungs, and esophagus.
4. Diagnostic evaluation and management of congenital anomalies, allergy, trauma, and other diseases in the regions and systems mentioned above.
5. The cognitive management, including operative intervention with its preoperative and postoperative care, of congenital, inflammatory, endocrine, neoplastic, degenerative, and traumatic states, including:

- a. temporal bone surgery
 - b. paranasal sinus and nasal surgery
 - c. skull-base surgery
 - d. maxillofacial surgery including the orbits, jaws, and facial skeleton
 - e. aesthetic, plastic and reconstructive surgery of the face, head, and neck
 - f. surgery of the thyroid, parathyroid, pituitary, and salivary glands
 - g. head and neck reconstructive surgery relating to the restoration of form and function in congenital anomalies and head and neck trauma and neoplasms
 - h. endoscopy, both diagnostic and therapeutic
 - i. surgery of the lymphatic tissues of the head and neck.
6. The habilitation and rehabilitation techniques and procedures pertaining to respiration, deglutition, chemoreception, balance, speech, and hearing.
 7. The current literature, especially pertaining to the areas listed above.
 8. Research methodology.

In order to assist otolaryngology program directors in evaluating their programs, the Board reports each applicant's examination results to the director of the program in which the applicant completed his/her senior resident year.

Otolaryngology Training Examination

1. Statement of Purpose

The Otolaryngology Training Exam (OTE) was designed, and is intended to be used, as an educational instrument to assist individuals in evaluating their educational progress as compared with others of the same level of expertise or training.

As such, it is inappropriate for program directors to use this measure of resident performance as the sole form of assessment when evaluating residents for advancement. Rather, it is appropriate for program directors to use the aggregate performance of their residents when evaluating the strengths and weaknesses of their educational program.

2. Examination

The OTE is a closed-book, proctored, timed examination offered once a year to all interested practitioners and residents in the specialty.

More than 100 test centers administer the exam annually throughout the US, Canada, and limited locations outside North America.

Any resident, practicing otolaryngologist-head and neck surgeon, or other interested physician may register for the OTE.

Test scores are confidential for practitioners; resident scores are reported to training programs.

3. Applications

The OTE application form is mailed to all ACGME programs. Others who wish participate may download a copy of the application from the ABOTO Web site at www.aboto.org. The application becomes available October 1 of each year.

4. Deadlines and Fees

The completed application and registration fee (\$225) must be submitted by November 1.

A fee of \$275 will be charged for any application postmarked between November 2 and November 11 (inclusive).

Applications postmarked after November 11 are not accepted.

All fees must be paid in US funds, drawn on a US bank. Applicants residing outside the United States must submit payment by International Money Order.

Maintenance of Certification

In 1996, the American Board of Otolaryngology approved the issuance of 10-year time-limited certificates, beginning in 2002. Since that time, a Maintenance of Certification (MOC) process has been under development.

The primary purpose of MOC is to promote optimal delivery of quality care by certified otolaryngologist-head and neck surgeons. The process is intended to guide all members of the profession to keep current in knowledge and skill and to conduct their practice so as to meet current standards of care.

Diplomates certified in 2002 or thereafter will be contacted during their seventh year of certification to initiate the maintenance process. Individuals certified prior to 2002 are not required to be recertified to maintain their certification with the ABOTO.

Examination Procedure

The Board vigorously enforces the highest standards of honesty and integrity in its examination processes. Accordingly, the following are considered a breach of ABOTO policy and are forbidden, and may be sufficient cause for the ABOTO to terminate an applicant's participation in the examination, to invalidate the results of the examination, to withhold an applicant's score or certificate, to bar an applicant permanently from all future examinations, to revoke a certificate, or to take other appropriate action:

1. Falsification of the application or the submission of any falsified documents to the ABOTO;
2. The giving or receiving of aid in the examination, including but not limited to copying answers from another candidate or permitting one's answers to be copied, as evidenced by observation at the time of the examination or by statistical analysis afterward;
3. The offer of any financial or other benefit to any director, officer, employee, proctor, or other agent or representative of the ABOTO in return for any right, privilege, or benefit which is not usually granted by the ABOTO to other similarly situated candidates or persons;
4. The unauthorized possession, reproduction, recording, discussion, or disclosure of any material, including but not limited to written, oral, or OTE examination questions or answers before, during, or after the examination.

Proctors are required to report any suspected irregularity during an examination. A candidate may be moved to a more isolated area or his/her participation in the examination may be terminated. Additionally, the ABOTO may undertake statistical studies of a candidate's answers compared with the answers of other participants in the examination to provide evidence that would support or fail to support a suspected irregularity. If, in the opinion of the ABOTO, there exists a probability that an irregularity occurred, the ABOTO will afford the suspected individual(s) procedural due process in order to assure fairness in the determination as to whether an irregularity occurred.

The ABOTO will not report scores or grant certification on the basis of scores which it determines to be invalid, and reserves the right to take whatever legal action is indicated with regard to violation of ABOTO copyright or examination violations.

Certification, Rejection, and Revocation (from The Bylaws, Article VI)

The Board shall issue an appropriate certificate of qualification in otolaryngology (or in a subdivision thereof) to those who show themselves worthy of such certification according to the requirements of training, experience, and demonstrated competence as stated in the current Booklet of Information of the Board.

All certificates issued by this Board are the property of the Board, and they are issued pursuant to the rules and regulations as

outlined in the current Booklet of Information of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation of the certificate if the Board shall determine that the person involved:

1. did not possess the required qualifications and other requirements or is not eligible for examination, whether or not such deficiency was known to the Board or any director thereof, or could have been ascertained by the Board prior to examination or at the time of the issuance of a certificate, as the case may be.
2. made a material misstatement or withheld information in his/her application or any other representation to the Board or any committee thereof, whether intentional or unintentional.
3. has been convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine.
4. had a license to practice medicine revoked, or shall have been disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine.
5. has neglected to maintain the degree of competency in the practice of the specialty of otolaryngology, as established by the Board, and shall refuse to submit to reexamination by the Board.

If the Board determines to withhold or revoke any certificate for any reason set forth in Section 1 and Section 2 above, the person affected thereby shall be given written notice of the reasons therefor. If circumstances warrant, the Board may require any physician so certified to appear before the Board of Directors, before any one or more of them, or before an individual designated by the Board upon not less than 20 days written notice, and to show cause at that time and place specified in the notice why the certificate may not be revoked on any one of the grounds specified in such notice. If such a hearing is convened, the physician may bring to this hearing persons or documents in defense of any action. Failure of any physician so notified to appear as required in such notice, without due excuse deemed sufficient to the Board of Directors, shall constitute cause for revocation of the certificate. The Board of Directors of the American Board of Otolaryngology shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the grounds for withholding or revocation of any certificate issued by the Board. Any such action or determination by the Board shall be regarded as final.

(Some information regarding ABP certification has changed since publication of this directory. Please visit the ABP Web site at www.abpath.org for current information.)

Qualification Requirements for Examination

All applications for certification are evaluated by the Credentials Committee of the ABP. The evaluation process includes the consideration of the following requirements:

- I. Professional Education
- II. Medical Licensure
- III. Pathology Training Requirements
- IV. The Credentialing Year
- V. Examination

I. Professional Education

A candidate must have graduated from a medical school in the United States or Canada accredited by the Liaison Committee on Medical Education, graduated from an osteopathic college of medicine accredited by the Bureau of Professional Education of the American Osteopathic Association, or graduated from a medical school outside the United States or Canada acceptable to the ABP.

A graduate of a medical school outside the United States or Canada must submit with the application a notarized copy of the medical school diploma, along with an English translation, showing the medical degree and the date that it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

II. Medical Licensure

The candidate must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy issued by one of the licensing agencies of the United States or Canada. A candidate or diplomate must notify the ABP in writing within 30 days of any revocation, suspension, or limitation of his or her license or right to practice by any licensing agency in the United States or Canada, or the voluntary surrender of such a license or right in connection with any disciplinary action or consent decree, and provide the ABP all relevant documentation relating to such action, including any administrative complaints or decisions, consent decrees, or settlement agreements. Failure to report such an action is grounds for revocation of any and all certificates issued by the ABP when discovered. (See "Revocation of Certificate.")

III. Pathology Training Requirements

To acknowledge the diverse activities in the practice of pathology and to accommodate the interests of individuals wanting to enter the field, the ABP offers primary certification through one of the following three routes: combined anatomic pathology and clinical pathology, anatomic pathology only, and clinical pathology only. A variety of specialty certificates is offered. Under certain circumstances, primary certification in anatomic pathology or clinical pathology can be combined with one of the subspecialty certifications.

Only pathology training taken in the United States or, in certain circumstances, in Canada is acceptable toward meeting the ABP requirements. The training must be in programs that have been inspected and accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPSC) or specifically approved by the ABP.

Verification of the candidate's qualifications by the pathology training program director is required. The program director has the opportunity to observe the candidate's performance over the course of training and the responsibility to evaluate the candidate's overall educational advancement. Therefore, the pathology training program director is asked to verify to the ABP that the training has been appropriate and successfully completed and that the candidate is ready to take the certifying examinations. The ABP solicits written evaluations of the candidate's performance from the pathology training program director(s) and from other persons acceptable to the ABP for such evaluation. This evaluation is a critical factor considered by the ABP in determining the candidate's qualification for examination and certification.

A. Primary Certification

In addition to accredited pathology training, all applicants for primary certification must meet the 1-full-year credentialing requirement as defined under Section IV, "The Credentialing Year."

1. *Training.* The candidate must satisfactorily complete pathology training in a program accredited by the ACGME or the RCPSC as follows:

a. Combined Anatomic Pathology and Clinical Pathology (AP/CP) Certification

Four full years of full-time, approved training in an accredited AP/CP-4 program that includes at least 18 months of structured training in anatomic pathology and 18 months of structured training in clinical pathology, and either an additional 12 months of full-time, continued training in anatomic pathology and/or clinical pathology or 12 months of full-time, approved training in other areas of pathology as part of the defined 4-year accredited AP/CP training program.

b. Anatomic Pathology (AP) Certification

1. Three full years of full-time, approved training in anatomic pathology in an accredited AP/CP-4 or AP-3 program that includes at least 24 months of structured training in anatomic pathology, and either an additional 12 months of full-time, continued training in anatomic pathology or 12 months of full-time, approved training in other areas of pathology as part of the defined accredited training program.
2. Primary certification in clinical pathology and 2 full years of full-time, approved training in anatomic pathology in an accredited AP/CP-4 or AP-3 program, with at least 18 months of structured training in anatomic pathology. Six months may be full-time, approved training in a subspecialty area of pathology as part of the defined accredited training program.

c. Clinical Pathology (CP) Certification

1. Three full years of full-time, approved training in clinical pathology in an accredited AP/CP-4 program that includes

at least 24 months of structured training in clinical pathology, and either an additional 12 months of full-time, continued training in clinical pathology or 12 months of full-time, approved training in other areas of pathology as part of the defined accredited training program.

2. Primary certification in anatomic pathology and 2 full years of full-time, approved training in clinical pathology in an accredited AP/CP-4 program, with at least 18 months of structured training in clinical pathology. Six months may be full-time, approved training in a subspecialty area of pathology as part of the defined accredited training program.

2. *Advanced Pathology Training Credit Mechanisms.* Under special circumstances, advanced credit may be given by the mechanisms described hereafter. Advanced credit is any medically relevant, postbaccalaureate, 12-month experience that is not approved by the ACGME for training in pathology and is relevant to the education of pathologists as determined by the ABP and can be applied to satisfy the flexible year in pathology. The acceptance of advanced credits as substitutes for accredited pathology training toward primary certification is not automatic and is evaluated on an individual basis. Advanced credit is given only for activities that have occurred in either the United States or Canada. The total combined period of advanced pathology training credit allowed for in paragraphs a and b in this section (III.A.2) will not exceed 12 months and can be applied only to the flexible year of required pathology training necessary for certification in AP/CP, AP, or CP.

Advanced credit cannot be applied to combined primary and subspecialty certification requirements (see Section III.C, "Combined Primary and Subspecialty Certification"). To avoid any misunderstanding, potential applicants should communicate with the ABP early in the training period to ascertain whether credit may be acceptable. The pathology training program director will be asked to assess the proposal and to provide a recommendation as to the amount of credit that the director believes the candidate should receive. The recommendation should be made only after the pathology training program director has observed the performance of the applicant.

The Advanced Credit/Credentialing Requirement Evaluation form should not be submitted if the applicant will be applying for primary certification within 12 months. In addition, if the training or research experience clearly satisfies the requirements listed in Section III.A.2, Advanced Pathology Training Credit Mechanisms, or in Section IV, The Credentialing Year, this form should not be submitted. The information requested on this form is also requested on the application for primary certification.

The ABP will notify the director of the pathology training program of such potential credit. Prior to the candidate's admission to the certifying examination, the director of the final year of training must certify that the candidate is fully qualified to sit for the examination.

- a. Candidates holding a PhD degree in a special discipline of pathology or a basic science related to pathology may, under certain circumstances, obtain pathology training credit. The evaluation and granting of the amount of training credit will depend on an assessment by the ABP regarding relevance of the field of study to anatomic pathology or clinical pathology.
- b. Research with a direct application to the practice of anatomic pathology or clinical pathology and not leading to an advanced degree may be considered for credit not to exceed 12 months in combination with other advanced credits. The research must be full time, and the applicant must be able to demonstrate active participation in the generation of the hypothesis and development of the protocol. No credit is given for re-

search employment as a technician or technologist. The ABP encourages research and believes that candidates should carry on investigation, teaching, and the publication of scientific papers during primary training.

3. *Postpathology-course Fellowship and Student Fellowship Training During Medical School—Criteria for Acceptance.* Under certain circumstances, candidates may receive advanced pathology training credit toward the primary certification requirements for postpathology-course fellowship training or research in pathology. Such credit is *not* given toward the requirements for subspecialty or combined primary/subspecialty certification. The credit is assessed on an individual basis. Granted credit will be assigned only to the flexible year of required primary training. Credit will not be given toward the required 18 months of structured anatomic pathology training or the required 18 months of structured clinical pathology training necessary to qualify for combined anatomic pathology and clinical pathology certification. If the ABP has approved the fellowship program and has been informed of the candidate's successful completion, an application for advanced credit should not be submitted.

Advanced credit toward single certification in anatomic pathology or single certification in clinical pathology will be given toward only the flexible year of required pathology training and not toward the 24 months of required structured training.

The guidelines for acceptable postpathology-course fellowship training for credit are:

- The fellow must have fully and satisfactorily completed the medical school year in which the pathology course is given.
 - The fellow must not receive credit for fellowship activities toward the requirements for graduation from medical school.
 - Training must be full time in a department of pathology that has a fully accredited pathology training program.
 - Training must be validated by the director of the student fellowship program and be approved as an acceptable experience by the director of the accredited pathology training program in which the candidate is registered.
 - No credit is given for electives or for courses that are part of the medical school curriculum.
 - Training must be under the direction of the director of the pathology training program or the chair of the department of pathology.
 - A description of proposed activities, responsibilities, and assignments for anatomic pathology, clinical pathology, and research must be available and on file prior to the beginning of the fellowship. If a formal institutional program exists, a copy should be filed with the ABP.
 - A validation and evaluation report must be submitted on completion of the fellowship by the pathology training program director or chair of the department of pathology if the fellow is seeking credit toward certification requirements.
4. *Interval of Training.* A candidate for primary certification who completed the required qualifying pathology training 5 or more years prior to the date of submission of an application for primary certification must have successfully completed 1 year of additional pathology training (ie, 1 year in AP and 1 year in CP for AP/CP certification) in a program accredited for such training by the ACGME or RCPSC.
- A candidate for subspecialty certification who completed the required qualifying training 5 or more years prior to the date of submission of an application must have successfully completed 1 additional year of subspecialty training in a program accredited for such training by the ACGME.

Any additional training must have occurred during the 5-year period immediately preceding the date of submission of the application.

B. Subspecialty Certification

Candidates may seek certification in only one subspecialty at a time.

All candidates applying for subspecialty certification must hold a primary certificate from the ABP or, where indicated, from another member medical specialty board of the American Board of Medical Specialties (ABMS).

Credit is not given for pathology training taken outside of the United States, nor is credit given for training in a subspecialty area that was part of the training program for the primary examination in AP and/or CP.

No advanced credit will be given toward the requirements for subspecialty certification by the mechanisms described in Section III.A.2, "Advanced Pathology Training Credit Mechanisms."

1. *Blood Banking/Transfusion Medicine (BB/TM)*

- For applicants who hold a certificate in anatomic pathology and clinical pathology, clinical pathology only, or a primary certificate plus a subspecialty certificate in hematology from another member medical specialty board of the ABMS: 1 full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
- For diplomates of the American Board of Anesthesiology: 1 full year of additional training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
- For applicants, other than those described in 1.a or 1.b, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in blood banking/transfusion medicine in a program accredited for such training by the ACGME.
- For applicants seeking combined certification in clinical pathology and blood banking/transfusion medicine, see Section III.C, "Combined Primary and Subspecialty Certification."

2. *Chemical Pathology (Chem P)*

- For applicants who hold a certificate in anatomic pathology and clinical pathology or clinical pathology only: 1 full year of additional training in chemical pathology in a program accredited for such training by the ACGME.
- For applicants, other than those described in 2.a, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in chemical pathology in a program accredited for such training by the ACGME.
- For applicants seeking combined certification in clinical pathology and chemical pathology, see Section III.C, "Combined Primary and Subspecialty Certification."

3. *Cytopathology (CYP)*

- For applicants who hold a certificate in anatomic pathology or combined anatomic and clinical pathology: 1 full year of full-time supervised training in cytopathology in a program accredited for such training by the ACGME.
- For applicants seeking combined certification in anatomic pathology and cytopathology, see Section III.C, "Combined Primary and Subspecialty Certification."

4. *Dermatopathology (DP)*

Certification in dermatopathology is a joint and equal function of the ABP and the American Board of Dermatology (ABD). Such function relates to qualifications of candidates, standards of examinations, and the form of the certificate.

All candidates applying for examination must hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the United States or Canada.

a. Prerequisites

The ABP and the ABD will admit candidates to examination for subspecialty certificates in dermatopathology who are otherwise qualified and who

1. are diplomates of the ABP and the ABD;
2. hold a primary certificate from the ABP (anatomic pathology or combined anatomic pathology and clinical pathology) or the ABD and have completed at least 1 year of training in dermatopathology in a program accredited for such training by the ACGME. This additional training must be taken after the candidate has met the full training requirements for certification in pathology or dermatology.

b. Training

Training programs in dermatopathology are a joint and equal function of the departments of pathology and dermatology. The pathologist applicant must spend half of the required training time in clinical dermatology.

Committee for Dermatopathology

David B Troxel, MD, Chairperson (ABP)
 Ronald P Rapini, MD, Vice Chairperson (ABD)
 Evan R Farmer, MD (ABD)
 Robert McKenna, MD (ABP)
 Dwight K Oxley, MD (ABP)
 Clifford R White, Jr, MD (ABD)

Candidates may obtain an application as follows:

Pathologists

William H Hartmann, MD
 Executive Vice President
 American Board of Pathology
 PO Box 25915
 Tampa, FL 33622-5915

Dermatologists

Harry J Hurley, MD
 Executive Director
 American Board of Dermatology
 Henry Ford Hospital
 One Ford Place
 Detroit, MI 48202-3450

5. *Forensic Pathology (FP)*

- a. For applicants who hold a certificate in anatomic pathology and clinical pathology or anatomic pathology only: 1 full year of additional supervised training in forensic pathology in a program accredited for such training by the ACGME.
- b. For applicants seeking combined certification in anatomic pathology and forensic pathology, see Section III.C, "Combined Primary and Subspecialty Certification."

6. *Hematology (HEM)*

- a. For applicants who hold a certificate in anatomic pathology and clinical pathology, anatomic pathology only, clinical pathology only, or a primary certificate plus a subspecialty certificate in hematology from another member medical specialty board of the ABMS: 1 full year of additional supervised training in hematology (pathology) in a program accredited for such training by the ACGME.
- b. For applicants, other than those described in 6.a, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in hematology (pathology) in a program accredited for such training by the ACGME.

- c. For applicants seeking combined certification in clinical pathology or anatomic pathology and hematology, see Section III.C, "Combined Primary and Subspecialty Certification."

7. *Medical Microbiology (MMB)*

- a. For applicants who hold any primary certificate in pathology or a primary certificate plus a subspecialty certificate in infectious disease from another member medical specialty board of the ABMS: 1 full year of additional training in medical microbiology in a program accredited for such training by the ACGME.
- b. For applicants, other than those described in 7.a, who hold a primary certificate from a member medical specialty board of the ABMS: 2 full years of full-time training in medical microbiology in a program accredited for such training by the ACGME.
- c. For applicants seeking combined certification in clinical pathology and medical microbiology, see Section III.C, "Combined Primary and Subspecialty Certification."

8. *Molecular Genetic Pathology (MGP)*

Certification in molecular genetic pathology is a joint and equal function of the ABMG and the ABP. Such function relates to qualifications of candidates, standards of examination, and the form of the certificate.

All candidates applying for certification must be physicians and hold a currently valid, full, and unrestricted license to practice medicine or osteopathy in the United States or Canada.

The ABMG and the ABP will qualify candidates for examination for certification in MGP who:

- a. Are diplomates of the ABMG or the ABP and
 - b. Document MGP practice of at least 25% full-time experience within each of the immediately preceding 5 years or 100% experience over the immediately preceding 2 years to the satisfaction of the ABMG and the ABP.
- and
- c. Submit a completed application that includes a logbook of 150 cases from the time period in b and a completed supplemental information form.

The by-experience pathway will end 5 years after ACGME begins accreditation of MGP training programs. At present there are no ACGME-accredited training programs. Any other training in MGP will count as experience.

Committee for Molecular Genetic Pathology

James L Madara, MD, Chairperson (ABP)
 Maximilian Muenke, MD, Vice Chairperson (ABMG)
 Stephen D Allen, MD (ABP)
 Frederick R Bieber, PhD (ABMG)
 Robert W McKenna, MD (ABP)
 Stuart Schwartz, PhD (ABMG)

9. *Neuropathology (NP)*

- a. For applicants who hold a certificate in anatomic pathology and clinical pathology or anatomic pathology only: 2 full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME.
- b. For applicants who hold a certificate in clinical pathology or a primary certificate from another member medical specialty board of the ABMS:
 1. One full year of approved training in anatomic pathology in a program accredited for such training by the ACGME and
 2. Two full years of additional supervised training in neuropathology in a program accredited for such training by the ACGME.

- c. For applicants seeking combined certification in anatomic pathology and neuropathology, see Section III.C, "Combined Primary and Subspecialty Certification."

10. Pediatric Pathology (PP)

- a. For applicants who hold a certificate in anatomic pathology and clinical pathology or anatomic pathology only from the ABP or anatomic pathology or general pathology from the RCPSC: 1 full year of additional supervised training in pediatric pathology in a program accredited for such training by the ACGME.
- b. The pediatric pathology training or experience should occur after the completion of the full training requirements necessary to qualify for certification in AP/CP or AP.

C. Combined Primary and Subspecialty Certification

Under certain circumstances, subspecialty training may be arranged in conjunction with the primary training requirements, permitting a candidate to qualify for a combined certificate. All applicants for combined certification must also meet the additional credentialing year requirement. (See Section IV, "The Credentialing Year.")

Advanced credit will *not* be given toward the requirements for combined certification (involving primary training and subspecialty training) by the mechanisms described in Section III.A.2, "Advanced Pathology Training Credit Mechanisms."

The acceptable combinations of certification and required training are:

1. Anatomic Pathology and Cytopathology—3 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 1 full year of approved training in cytopathology in a program accredited for such training by the ACGME.
2. Anatomic Pathology and Forensic Pathology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME, 1 full year of approved training in forensic pathology in a program accredited for such training by the ACGME, and 1 additional year of approved training in another area of pathology such as neuropathology, toxicology, or chemical pathology.
3. Anatomic Pathology and Hematology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in hematology in a program accredited for such training by the ACGME.
4. Anatomic Pathology and Medical Microbiology—2 full years of approved training in anatomic pathology in a program accredited for such training by the ACGME and 2 full years of approved training in medical microbiology in a program accredited for such training by the ACGME.
5. Anatomic Pathology and Neuropathology—2 full years of approved training in anatomic pathology and 2 full years of approved training in neuropathology in a program accredited for such training by the ACGME with adequate experience in diagnostic neuropathology.
6. Clinical Pathology and Subspecialty Certification—3 full years of approved training in clinical pathology in a program accredited for such training by the ACGME and 1 full year of approved subspecialty training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME, as defined in Section III.B, "Subspecialty Certification," or 2 full years of approved training in clinical pathology and 2 full years of approved subspecialty training in blood banking/transfusion medicine, chemical pathology, hematology, or medical microbiology in a program accredited for such training by the ACGME, as defined in Section III.B, "Subspecialty Certification"

IV. The Credentialing Year

The 12-month credentialing year requirement is in addition to the required pathology training and can be satisfied only after the candidate has obtained the medical degree (see IV.B.1).

The Advanced Credit/Credentialing Requirement Evaluation form should not be submitted if the applicant will be applying for primary certification within 12 months. In addition, if the training or research experience clearly satisfies the requirements listed in Section III A 2, Advanced Pathology Training Credit Mechanisms, or in Section IV, The Credentialing Year, this form should not be submitted. The information requested on this form is also requested on the application for primary certification.

The requirement can be met by

- A. One full year of full-time, approved graduate medical education in a transitional year training program or in a clinical area of medicine such as internal medicine, surgery, obstetrics and gynecology, pediatrics, emergency medicine, or family practice, or
- B. One full year of full-time research in pathology or in another clinical discipline, provided that the research was done in the United States or Canada and has clearly defined clinical implications.

The guidelines for acceptance of research activity are:

1. The research activity must have taken place (a) as part of a combined degree program in which the candidate obtains both a recognized medical degree and a doctoral degree in medical sciences without reference to sequence, or (b) after the candidate has obtained a recognized medical degree.
2. The candidate must have had a clearly defined investigator role in the research program.
3. The research must have directly involved patients, or materials obtained from patients, or techniques that can be applied directly to the diagnosis of human disease or to the understanding of the basic mechanisms of disease.
4. Credit for research activity completed prior to entering a pathology training program must be approved by the director of the pathology training program and the ABP. Such research must have occurred in an institution in the United States or Canada; or
- C. One year of training in one of the recognized subspecialty fields of pathology that includes clinical correlation and patient contact. (This year cannot be used to meet the requirements for both the credentialing year and subspecialty certification.) Or
- D. The satisfactory completion of 1 full year of a combination of clinical training, clinical research, or subspecialty pathology training in addition to the required pathology training necessary to qualify for certification in anatomic pathology and clinical pathology, anatomic pathology, or clinical pathology. The pathology training program director is responsible for defining and justifying this year to the ABP. The ABP recommends that for applicants meeting the credentialing year requirement by combinations of pathways A, B, and C (shown above), the periods of activity be at least 4 months in duration wherever possible.
- E. Under certain circumstances, clinical training taken outside the United States and Canada may be acceptable toward meeting the ABP credentialing year requirement of clinical training, provided that the following criteria are fully met and validated:
 1. Clinical training taken after the candidate obtained a medical degree acceptable to the ABP
 2. Satisfactory completion of 1 full year of full-time training in clinical medicine in a multidisciplinary training program (internship) or in a training program in internal medicine, pediatric medicine, general surgery, or obstetrics and gynecology

3. Documentation from the training institution that the program in question has been inspected and approved for graduate medical education
4. Indication from the director of the clinical training program that the candidate was registered in the program, completed the training satisfactorily, and was the physician of record in the diagnosis and treatment of patients throughout the full 12 months
5. Recommendation from the pathology training program director in regard to the person's request

The acceptability of clinical training toward meeting the ABP requirements is assessed on an individual basis, and it is imperative that an opinion be obtained from the ABP well in advance of the submission of an application for certification. The amount of advanced credit for clinical training outside the United States and Canada toward the ABP requirements for certification cannot exceed a total of 12 months.

It is the responsibility of the person seeking credit to ensure that all validating items for these criteria are submitted to the ABP for consideration. No assessment of possible credit will be given until all validating and reference information has been received.

V. Examination

The final step is passing an objective written and practical examination designed to evaluate the candidate's factual knowledge of pathology and to assess practical problem solving skills, interpretive skills, and diagnostic abilities.

Application for Examination

Requests for application forms must be made in writing to the ABP. Completed original application forms should be returned with the required credentials and the application-examination fee. An application cannot be given consideration unless it is accompanied by the application-examination fee.

Reporting of Results

Coinciding with the accreditation visit from the ACGME, each pathology training program director will receive a report of the examination performance of graduates of that training program. Cumulative information will be made available to the RRC.

Fees

The application-examination fee schedule for 2002 is as follows:

Anatomic pathology only	\$1,200
Clinical pathology only	\$1,200
Anatomic pathology portion of combined AP/CP	\$1,200
Clinical pathology portion of combined AP/CP	\$1,200
Anatomic pathology portion of combined AP/subspecialty	\$1,200
Clinical pathology portion of combined CP/subspecialty	\$1,200
Combined anatomic pathology and clinical pathology	\$1,400
Subspecialty only	\$1,400
Subspecialty portion of combined AP/subspecialty	\$1,400
Subspecialty portion of combined CP/subspecialty	\$1,400
Anatomic pathology or clinical pathology combined with subspecialty	\$1,600

(For this fee to apply, the application must be for the combined examination as explained in "Combined Primary and Subspecialty Certification." In addition, the examinations must be taken in sequence as offered, AP or CP examination first and the subspecialty examination the next time offered.)

The application-examination fee includes a nonrefundable processing fee of \$100. If the different divisions of the AP/CP and the combined primary and subspecialty examinations are taken at separate sittings, there is a separate examination fee for each sitting. If the candidate fails in the examination, admission to a repeat

examination is permitted, but any reexamination must occur within the period of qualification described under "Qualification Period for Examination." The applicant must pay the examination fee according to the current fee schedule before another examination can be taken. If, after having applied for a specific examination, the candidate requests, in writing, a transfer to a future examination prior to the final filing date, there is a transfer fee of \$100.

In the event of the candidate's illness at the time of the examination, validated by the candidate's attending physician, a major portion of the application-examination fee will be either transferred to the next examination or refunded. It is the candidate's responsibility to notify the ABP of any change that may affect a scheduled examination.

Vacation, Maternity, and Other Leave

Each institution sponsoring a pathology training program should develop individual sick, vacation, and other leave policies for the resident. However, 1 year of approved training credit toward ABP certification requirements must be 52 weeks in duration and must include at least 48 weeks of full-time pathology training. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of training.

Irregular Behavior

In the interest of protecting the integrity of the ABP and its certification examinations, the following irregular behaviors may be sufficient to bar a person from future examinations, terminate participation in an examination, invalidate the results of a candidate's examination, cause the withholding or revocation of scores or certificates, or merit other appropriate action by the ABP:

1. The giving or receiving of aid in the examination as evidenced either by observation or by statistical analysis of candidates' answers
2. The unauthorized possession, reproduction, or disclosure of any ABP examination-related materials, including, but not limited to, examination questions or answers, before, during, or after the examination
3. The offering of any benefit to any agent of the ABP in return for any right, privilege, or benefit that is not usually granted by the ABP to other similarly situated candidates or persons
4. Possession of notes, books, or any other examination aid in the vicinity of the examination room
5. The engaging in irregular behavior in connection with the administration of the examination, including but not limited to:
 - a) referring to notes, books, or any other examination aid at any time during the examination, including breaks,
 - b) transferring or receiving information relating to the contents or answers of the examination to or from another candidate or a third party before, during, or after the examination. This prohibition includes any transfer of information between a candidate and another person at any time during the examination, including breaks, and any reconstruction of examination questions and answers and the transfer of information concerning the same after the examination.

In addition, the ABP may withhold a candidate's scores and require that the candidate retake one or more portions of the examination if presented with sufficient evidence that the security of the examination has been compromised, notwithstanding the absence of any evidence of the candidate's personal involvement in such activities.

Qualification Period for Examination

The ABP does not recognize or use the term "board eligible" and does not issue statements concerning "board eligibility." An

applicant is declared qualified for examination only after an application has been received and approved by the Credentials Committee.

The ABP will permit a candidate who has qualified for a primary examination on the basis of approved training to sit for the examination during a period not to exceed 3 years after a candidate has been declared qualified to take the examination. A candidate who has qualified for a subspecialty examination will be permitted to sit for the examination for a period not to exceed 3 years. For candidates who have been unsuccessful in the subspecialty examinations given biennially, the period of qualification will be extended to include three administrations of the subspecialty examination.

At any time after declaring a candidate qualified for examination, the Credentials Committee, at its discretion, may withdraw such qualification or, as a condition, may require satisfaction by the candidate of specified conditions. In the exercise of its discretion under this regulation, the Credentials Committee shall be entitled to act without reason assigned.

If it is determined that an applicant has falsified information or has withheld material information in connection with his or her application or in any other correspondence with the ABP, the applicant will not be approved for the certifying examination and must wait a period of 3 years before being permitted to file a new application. The applicant will not be considered qualified to sit for the certifying examination during the 3-year interim. If an applicant, previous or new, has misrepresented to any third party his or her status as a diplomate of the ABP, appropriate review and action will be taken.

Unsuccessful Candidates

Once the initial period of qualification has terminated, candidates who have been unsuccessful in any of the certification examinations may apply for one additional period of qualification based on satisfactory experience in the field of pathology in question. This will be granted on the submission of appropriate and acceptable documentation of 2 years of full-time experience in the discipline of requested certification, or candidates may apply for one additional period of qualification based on satisfactory completion of 1 additional year of training in an ACGME-accredited training program in the discipline of the application.

Candidates who continue to be unsuccessful in the certification examination may apply for an additional period of qualification, which may be granted only to those who submit evidence of satisfactory completion of 1 additional year of training in an ACGME-accredited training program in the discipline of the application.

Examination Dates

All examinations are computer based. Spring primary examinations will be administered at four computer examination sites. Fall primary examinations and all subspecialty examinations will be administered at the ABP Examination Center in Tampa, Florida. The following is the schedule for forthcoming examinations:

Anatomic Pathology and Clinical Pathology Examinations

The Spring 2002 primary examinations will begin on Monday, June 3, 2002, and will continue on a Monday, Tuesday, and Wednesday weekly cycle until all qualified candidates have been examined.

Candidates applying for the primary certification examinations must complete their training by July 1 of the year of application.

The Fall 2002 primary examinations will begin on Monday, September 30, 2002, and will continue on a Monday, Tuesday, and Wednesday weekly cycle through the week of October 21-23, 2002.

The Fall primary examination will be available only to qualified candidates who were unsuccessful in previous examinations. This

examination is not and will not be available to candidates seeking qualification for the first time.

Subspecialty Examinations

The subspecialty examinations in chemical pathology, medical microbiology, neuropathology, molecular genetic pathology, and pediatric pathology are given every 2 years. The scheduled dates for the subspecialty examinations are as follows:

Hematology—October 28, 2002

Blood Banking/Transfusion Medicine—October 31, 2002

Forensic Pathology—November 4, 2002

Dermatopathology—November 8, 2002

Cytopathology—November 11, 2002

Depending on the number of candidates, it may be necessary to give certain subspecialty examinations on multiple days. In that case, each candidate will be notified of his/her examination date at least 6 weeks prior to the examination date listed above.

Final Filing and Cutoff Dates

The final filing dates for receipt of applications or registrations are as follows:

- January 15 for Spring primary examinations
- August 1 for Fall primary examinations (previously unsuccessful candidates only)
- June 1 for the molecular genetic pathology examination
- July 1 for other subspecialty examinations

If the candidate cancels an appearance for the examination after these dates or does not appear for the examination, the entire application-examination fee is forfeited.

Examination Date and Location Assignments

Candidates for the primary certification examination will have 4 weeks from notification of their assignment to accept. Candidates may request a transfer to a future examination period, in which case the entire examination fee will be applied to that examination. There will be a \$100 fee assessed for any additional transfer of examination dates. There is no opportunity to change the assignment within a given examination period. If the ABP is not notified within the 4-week period, the assignment will stand.

Issuance of Certificate

On passing the appropriate examination(s), a candidate will be issued a certificate by the ABP in those fields of pathology for which the ABP accepted the credentials. Thus, a candidate who is qualified for the combined examination in anatomic pathology and clinical pathology, having fulfilled the minimum pathology requirement of 48 months and the credentialing year requirement of 12 months, will receive a certificate only after both parts (anatomic pathology and clinical pathology) of the examination have been passed.

Candidates qualified for examination in anatomic pathology or clinical pathology and a subspecialty area of pathology on the basis of the required training in each area will receive a certificate only after each of the examinations has been passed.

A candidate who has fulfilled all the prerequisites, including the minimum requirement of 36 months of approved training in anatomic pathology only or clinical pathology only, and the credentialing year activity will receive a certificate after passing the examination in anatomic pathology or clinical pathology.

Candidates qualified for combined AP/CP who pass only the AP portion or the CP portion of the examination may request an application for consideration of awarding a single certificate. Consideration will be given only to candidates who meet the requirements for the single certificate. For additional information on the awarding of single certificates, please contact the ABP.

The ABP does not issue duplicate certificates unless a certificate is lost or destroyed. In that case, the diplomate must request the

duplicate certificate in writing, stating the reason for replacement of the original certificate. A fee of \$50 must accompany the written request.

Revocation of Certificate

At its discretion, the ABP may revoke a certificate for due cause, including, but not limited to:

- a. The diplomate did not possess the required qualifications and requirements for examination, whether or not such deficiency was known to the ABP or any committee thereof prior to examination or at the time of the issuance of the certificate, as the case may be.
- b. The diplomate made a material misstatement or withheld information in the application or in any other representation to the ABP or any committee thereof, whether intentional or unintentional.
- c. The diplomate engaged in irregular behavior in connection with an examination of the ABP (as described under "Irregular Behavior"), whether or not such practice had an effect on the performance of the candidate on an examination.
- d. The diplomate was convicted by a court of competent jurisdiction of a felony or misdemeanor involving moral turpitude and, in the opinion of the ABP, having a material relationship to the practice of medicine.

Or

- e. The ABP receives information that an adverse licensure action has been taken against a candidate or diplomate. For purposes of this policy, "adverse licensure action" shall mean a final action by one of the licensing agencies of the United States or Canada which revokes, suspends, or limits (including the imposition of any requirement of probation, surveillance, supervision, or review) any license or right associated with the practice of medicine issued by one of the licensing agencies of the United States or Canada and which resulted from or is based on misconduct involving patient care and/or ethical practice; or the voluntary surrender of a license or associated right in connection with or in lieu of any disciplinary action by, or consent decree or settlement agreement with, one of the licensing agencies of the United States or Canada.

Revocation of certificates will be governed by procedures set forth in the ABP bylaws as amended from time to time.

Update of the ABP Certificate

The ABP will permit its diplomates to retake the examination in the area of pathology in which they are already certified for the purpose of updating their certificate(s). The application-examination fee and the passing requirements are the same as for initial candidates. Successful candidates will be issued new, currently dated certificates.

Time-Limited Certificates

Certificates issued by the ABP after January 1, 2006 will be valid for 10 years. Diplomates can enter a maintenance of certification (MOC) process January 1 of the year following certification. If a diplomate is successful in the MOC process, a new certificate will be issued. If a diplomate is not successful or does not complete the MOC process, certification status will be lost when the time-limited certificate expires and he or she will not be listed as a diplomate.

Voluntary Recertification

To enable diplomates to demonstrate maintenance of competence in the practice of pathology, the ABP offers a voluntary process of maintenance of certification. For additional information on this process, please request the ABP booklet on recertification (maintenance of certification).

Maintenance of Certification

This process is under active discussion by the ABP and the Cooperating Societies of the ABP and, although the details are incomplete at this time, the program will be based on four components.

1. Evidence of professional standing and
2. Evidence of commitment for lifelong learning and involvement in periodic self-assessment (self-learning) and
3. Evidence of cognitive expertise and
4. Evidence of successful evaluation of performance in practice.

Verification of Certification

Requests for written verification of a pathologist's certification should be made in writing and must include enough information to identify the pathologist in question. Requests must include a check for \$25 made payable to The American Board of Pathology.

Information may also be obtained from the American Board of Medical Specialties.

Limitation of Subspecialty Certificates

As a condition of admission to an examination for subspecialty certification, an individual holding two or more subspecialty certificates (formerly special competence, special qualification, and/or added qualification) must surrender a sufficient number of certificates to reduce their number to one. If the individual fails the examination and the period of board qualification terminates, the surrendered certificate(s) will be restored.

Candidates with Disabilities

1. **Policy.** The ABP will provide qualified candidates with documented disabilities reasonable accommodations in the administration of its examinations, including auxiliary aids and services, where appropriate, that do not fundamentally alter the measurement of the skills or knowledge the examination is intended to test or result in an undue burden.
2. **Documentation of Disability.** Candidates requesting accommodation due to a disability must provide documentation of the disability and the appropriateness of the requested accommodation for the documented disability. Such documentation should include a specific diagnosis of the disability and include medical records or other documentation of the diagnosis of the disability by an appropriate medical professional. The ABP reserves the right to verify the disability and to request additional documentation as necessary. All required documentation acceptable to the ABP must be received no later than the application deadline.
3. **Type of Accommodation.** Candidates requesting accommodation must identify the type of accommodation requested. The ABP, however, will determine the type of accommodation to be made for a candidate with a verified disability. Accommodations that fundamentally alter the measurement of skills or knowledge the examination is intended to test will not be offered.
4. **Application Deadline.** Candidates requesting accommodations are urged to contact the ABP as far in advance of the examination as possible. Requests for accommodation and documentation of disability must be received no later than the application deadline.

Appeals Procedure

1. An individual who has received an unfavorable ruling from a Committee of the Board may initiate an appeal of such determination by mailing a request of reconsideration to the office of the ABP within 90 days of the date such ruling was mailed to him/her; except that a decision that a candidate has failed a certifying examination may be appealed only in the manner and to the extent provided in paragraph 6.

2. Upon receipt of a request for reconsideration, the concerned Board Committee shall invite the candidate to submit in writing such information as the candidate feels appropriate in support of the appeal. The Committee may make such further investigation as it deems appropriate and may request the candidate to submit such further information as the Committee deems appropriate. If the Committee then decides in a manner favorable to the individual, it shall so notify the individual. If the Committee does not so determine, it shall notify the individual and the president of the ABP. Any notice of unfavorable action shall specify the grounds for the action and inform the candidate that he/she may request a hearing before an Appeals Committee of the ABP by doing so in writing within 30 days of the date such notice to the candidate was mailed.
3. Upon receipt of a request for a hearing, the executive vice president shall inform the president of the ABP who shall appoint an Ad Hoc Appeals Committee consisting of three trustees who are not members of the Committee whose determination is being appealed. The chairperson of the Ad Hoc Committee shall convene a meeting of the Committee within 90 days of the date of its appointment to conduct a hearing at which the individual may appear in person with legal and/or other representative to present such information deemed appropriate in support of the applicant's position. The Board Committee concerned, and its legal or other representative, shall present such information as it deems appropriate to support its previously made determinations. The secretary shall, at the request of either the individual concerned or the Committee concerned, submit written material provided by the individual or the Committee to the members of the Appeals Committee prior to the hearing, provided a copy of such material is submitted to the individual or to the Committee at the same time it is submitted to the Appeals Committee.
4. A written notice shall be sent to the individual not less than 30 days prior to the hearing of the Appeals Committee stating the time and place of the hearing.
5. If a majority of the members of the Appeals Committee present at the hearing determines, on the basis of the information presented or circulated to them, that the Committee determination should not be overruled, it shall so declare, and if a majority determines the Committee's determination should be overruled, it shall so declare. The Appeals Committee shall inform the candidate and the concerned Committee in writing of its decision within 30 days of the hearing. The decision of the Appeals Committee with respect to the matter being appealed shall be final and binding.
6. A candidate who fails a certifying examination may request that the examination be rescored to verify the accuracy of the results as reported. Such request must be made in writing within 90 days of the date of mailing of the results of the examination to the candidate and must be accompanied by a fee of \$50 per certifying examination or part thereof. There shall be no further appeal from failure of an examination.

(The following information is subject to change. All applicants are advised to consult the American Board of Pediatrics to ascertain whether any changes have been made, especially before undertaking any variations in training.)

Purpose of Certification

The purpose of certification by the American Board of Pediatrics (ABP) is to provide assurance to the public and the medical profession that a certified pediatrician has successfully completed an accredited educational program and an evaluation, including an examination, and possesses the knowledge, skills and experience requisite to the provision of high quality care in pediatrics.

Definition of Pediatrics and a Pediatrician

The ABP, in conjunction with the American Academy of Pediatrics, has developed the following definition of pediatrics and a pediatrician:

Pediatrics is the specialty of medical science concerned with the physical, emotional and social health of children from birth to young adulthood. Pediatric care encompasses a broad spectrum of health services ranging from preventive health care to the diagnosis and treatment of acute and chronic diseases.

Pediatrics is a discipline that deals with biological, social, and environmental influences on the developing child and with the impact of disease and dysfunction on development. Children differ from adults anatomically, physiologically, immunologically, psychologically, developmentally, and metabolically.

The pediatrician understands this constantly changing functional status of his or her patients incident to growth and development and the consequent changing standards of "normal" for age. A pediatrician is a medical specialist who is primarily concerned with the health, welfare, and development of children and is uniquely qualified for these endeavors by virtue of interest and initial training.

Maintenance of these competencies is achieved by experience, training, continuous education, self assessment and practice improvement.

A pediatrician is able to define accurately the child's health status as well as to serve as a consultant and to make use of other specialists as consultants. Because the child's welfare is heavily dependent on the home and family, the pediatrician supports efforts to create a nurturing environment. Such support includes education about healthful living and anticipatory guidance for both patients and parents.

A pediatrician participates at the community level in preventing or solving problems in child health care and publicly advocates the causes of children.

Certification in General Pediatrics

Examination Admission Requirements

An applicant (throughout the document the term candidate will be synonymous with applicant) for examination for certification must meet the following general requirements:

The applicant must be a graduate of an accredited medical school in the United States or Canada or of a foreign medical school that is listed by the World Health Organization (WHO).

A valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada is a requirement for admission to the examination, but it may be submitted separately from the initial application. A candidate who is reregistering for the examination must submit a copy of his/her license in addition to the re-registration material.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied.

The applicant must complete 3 years of pediatric training in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) on the advice of the Residency Review Committee for Pediatrics (RRC) (hereafter, accreditation will refer to accreditation by the RRC) or in programs in Canada accredited by the Royal College of Physicians and Surgeons of Canada (RCPSC).

The ABP requires program directors to verify satisfactory completion of training and to evaluate the acceptability of the applicant as a practitioner of pediatrics.

Graduation from Medical School

The applicant must be a graduate of a medical school that has been accredited by the Liaison Committee on Medical Education (LCME) in the United States, by the RCPSC in Canada or by the American Osteopathic Association (AOA) in the United States. An applicant who is a graduate of a medical school outside the United States or Canada that cannot be accredited by the LCME, RCPSC, or AOA but is listed by WHO may apply for the examination if he or she has a standard certificate either from the Educational Commission for Foreign Medical Graduates (ECFMG) or the Medical Council of Canada.

The graduate of a foreign medical school must submit a photocopy of the medical school diploma showing the medical degree and the date it was awarded. A certificate showing that the applicant has passed a final examination is not acceptable.

License Requirement

The applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States Armed Forces. A temporary license will not meet the licensure requirement. A copy of the valid license must be received by October 1, 2002. A candidate who is re-registering for the examination must submit a copy of his/her license in addition to the re-registration material.

Foreign nationals practicing abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which they reside. This proof must be received by October 1, 2002. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

The license requirement may be waived if, during the academic year 2002-2003, the applicant is in pediatric subspecialty training or nonpediatric specialty training or is serving as a chief resident (PL-4) in a state, province, or district in which the medical licensing board does not require an unrestricted license. In order to obtain a waiver, the director of that training program must submit written confirmation of the applicant's training to the ABP by October 1, 2002.

An applicant who takes the certifying examination but who does not meet the October 1, 2002, deadline for licensure will have the examination invalidated, will be disapproved, and will not receive a refund of the examination fee.

Training Requirements

An applicant must complete 3 years of postgraduate pediatric training in programs accredited by the RRC or, in Canada, by the RCPSC. (The training requirements for individuals who graduated from medical school before July 1, 1978, are different from these requirements. Such applicants should contact the ABP for details.)

The training curriculum must be compatible with the Program Requirements for Residency Education in Pediatrics, which are published annually in the *Graduate Medical Education Directory*.

During this period of training, the applicant is expected to assume progressive responsibility for the care of patients. Credit will not be given for training completed before the medical degree is awarded.

Supervisory experience must be an integral part of the total 3-year program; the last 24 months of training must include 5 months of direct supervisory responsibility in general pediatrics.

The ABP recognizes three levels of pediatric training (PL-1 through PL-3) and defines these levels as follows:

PL-1

The first postgraduate year in general comprehensive pediatric training in an accredited program.

PL-2

The second postgraduate year in general comprehensive pediatric training in an accredited program following PL-1, but with increased responsibility for patient care and for the supervision of junior house staff and medical students.

PL-3

The third postgraduate year in general comprehensive pediatric training in an accredited program, but with increasing responsibility for patient care and supervision of junior house staff and medical students.

Credit for Training in Accredited Programs Other Than Pediatrics

A physician transferring to pediatric residency training from another accredited residency (eg, family practice, internal medicine, transitional year) must correspond with the ABP to determine whether partial credit may be awarded for this training. Requests for credit must be submitted either by the candidate or the pediatric residency program director before the candidate enters pediatric residency training.

Credit for Pediatric Training in Nonaccredited Programs

The ABP has established requirements for physicians who have had at least 3 years of general comprehensive pediatric training in programs not accredited by the RRC or RCPSC (ie, international training or training in accredited osteopathic programs in the United States) who wish to apply for training credit.

The interested physician, department chair, or program director must write to the ABP before training begins to receive approval for credit for this training.

Pediatric Research Pathway

The Pediatric Research Pathway (PRP) was designed to accommodate MD/PhD graduates who would benefit by having the ability to continue ongoing research during their pediatric residency. During the 3 years of general pediatric residency, a maximum of 11 months may be spent in research, with at least 5 months in the PL-3 year and no more than 1 month in the PL-1 year. Individuals must apply for this program either before entering an accredited pediatric residency program or during the first 9 months of the PL-1 year. The curricular components of the minimum of 22 months of core clinical pediatric residency must be fulfilled.

A supervisory/review committee must be established by the residency program to ensure that each trainee is meeting the requirements of training and is successfully completing each experience in order to continue in the pathway.

To meet the eligibility requirements for certification in general pediatrics, the resident must satisfactorily complete the 36 months of the Pediatric Research pathway and an additional 12 months of pediatric clinical experiences in an accredited specialty residency or subspecialty fellowship approved by the ABP.

Special Alternative Pathway

The ABP recognizes that occasionally there will be an exceptional candidate who should be given special consideration to begin pediatric subspecialty or related training after the completion of the PL-2 year of general comprehensive pediatrics. Before the start of the PL-2 year, the department chair or program director must petition that a resident be considered for the Special Alternative Pathway (SAP), indicating that the candidate has superior overall competence.

The subspecialty program director must also provide a letter outlining the clinical and research training proposed, including special requirements to be met during the PL-2 and PL-3 years. In addition, such candidates will be required to take a screening examination. The application material and the score on the screening examination will be reviewed by the Credentials Committee.

A SAP trainee may apply for the certifying examination in general pediatrics in the fifth year of training provided that he/she has successfully completed the required 2 years of general pediatrics residency and at least 12 months of clinical rotations in the pediatric subspecialty. Guidelines for the SAP are available on the ABP Web site.

Combined Programs

Medicine/Pediatrics Program

A special agreement exists with the American Board of Internal Medicine (ABIM) whereby an applicant may fulfill the training requirements of both the ABP and the ABIM by completing 2 years of accredited training in general comprehensive pediatrics and 2 years of accredited training in general comprehensive internal medicine in an integrated program, reviewed by both boards. The 4 years must be completed in the same combined training program;

any deviation must be approved prospectively by both the ABP and the ABIM. Continuity clinics in each specialty must be provided throughout the 4 years.

Guidelines for combined training have been approved by both the ABP and the ABIM and are available by contacting either board. A list of institutions offering combined programs is published in the *Graduate Medical Education Directory*. An applicant may not take the certifying examination of the ABP until all 4 years of training have been successfully completed.

Pediatrics/Emergency Medicine Program

A special agreement exists with the American Board of Emergency Medicine (ABEM) whereby an applicant may fulfill the training requirements of both the ABP and the ABEM by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABEM. The training in programs must also be approved prospectively by both the ABP and the ABEM. Guidelines for combined training have been approved by both the ABP and the ABEM and are available by contacting either board. An applicant may not take the certifying examination of the ABP until all training in both programs has been successfully completed.

Pediatrics/Medical Genetics Program

A special agreement exists with the American Board of Medical Genetics (ABMG) whereby an applicant may fulfill the training requirements of both the ABP and the ABMG by completing joint training in 5 years. All 5 years should be completed in the same combined training program; any deviation must be approved prospectively by both the ABP and the ABMG. The training in programs must also be approved prospectively by both the ABP and the ABMG.

Guidelines for combined training have been approved by both the ABP and the ABMG and are available by contacting either board. An applicant may take the certifying examination of the ABP in the fifth year of training provided that 30 months of required pediatric residency training has been successfully completed.

Pediatrics/Neurology Program

A special agreement exists with the American Board of Psychiatry and Neurology (ABPN) whereby an applicant who completes at least 2 years of accredited training in general comprehensive pediatrics and the neurology training necessary to meet the requirements for certification in neurology with special qualifications in child neurology fulfills the training requirements of both the ABP and the ABPN.

An applicant may not take the certifying examination of the ABP until all training in both programs has been successfully completed.

Pediatrics/Physical Medicine and Rehabilitation Program

A special agreement exists with the American Board of Physical Medicine and Rehabilitation (ABPMR) whereby a physician interested in pediatric rehabilitation can qualify for admission to the certifying examinations of both the ABP and the ABPMR. The integrated residency training can be completed in 5 years in programs accredited by the Residency Review Committees for Pediatrics and for Physical Medicine and Rehabilitation. The proposed training in combined programs must be submitted to the ABP and the ABPMR for approval before a candidate can be accepted into the joint training program. All training should be completed at one academic institution; any deviation must be approved prospectively by both the ABP and the ABPMR. Guidelines for combined training have been approved by both the ABP and the ABPMR and are available by contacting either board.

An applicant may take the certifying examination of the ABP in the fifth year of training provided that 30 months of required pediatric residency training has been successfully completed.

Pediatrics/Psychiatry/Child and Adolescent Psychiatry Program

A special agreement exists with the American Board of Psychiatry and Neurology (ABPN), whereby an applicant may fulfill the training requirements for certification in pediatrics and psychiatry and special qualifications in child and adolescent psychiatry by completing joint training in 5 years. Training includes 24 months of general comprehensive pediatrics, 18 months of child and adolescent psychiatry, and 18 months of adult psychiatry. Physicians pursuing training in these programs may take the certifying examination of the ABP in the fall of the fifth year of training, provided that all pediatric training (except continuity clinics) is completed by the date of the examination.

Credit for training via this route may be obtained only by training in one of the programs reviewed by both boards.

Guidelines for combined training have been approved by the ABP and the ABPN. Further information concerning these combined training programs may be obtained by contacting the ABPN.

Training Programs

The ABP approves applicants for admission to its certifying process. The ABP does not accredit training programs. Requests for information regarding accreditation should be addressed to the Executive Secretary, Residency Review Committee for Pediatrics, 515 North State Street, Chicago, IL 60610, 312 464-4947.

Program requirements for residency education in pediatrics may be found in the *Graduate Medical Education Directory* or on the Accreditation Council for Medical Education Web site at www.acgme.org.

Nonaccredited Training Experience

A fundamental concept of the ABP is that a residency training program should provide for properly organized, progressive responsibility for the care of children. The ABP believes that this can be accomplished through continuity of clinical experience under the supervision of attending physicians who are responsible for the care of these children.

The substitution of a formal graduate or postgraduate school course that does not carry the essential ingredient of responsibility for patient care is inconsistent with this principle. Accordingly, the ABP will not accept such courses in fulfillment of its training requirements.

No more than a total of 3 months of the required 3 years of residency training may be taken outside of an accredited pediatrics residency program. These experiences must be approved by the program director, must have goals and objectives for training, and must provide an evaluation of the resident's performance.

Military Service

Military service, unless as a resident in a military hospital that is accredited by the RRC, cannot be substituted for training requirements.

Special Situations

The ABP recognizes that situations may arise that are not explained by the preceding information. The physician should contact the ABP for further information.

Tracking and Evaluation

The ABP regards the evaluation of trainee competency as a continuum that begins during training and concludes with the certifying

examination following formal training. The ABP believes that the program director(s) and faculty play significant roles in the certification process and are the keys to a responsible system of determining which applicants should be admitted to the certifying examination. The program director is able to provide a meaningful overview of the resident's professional competence, especially in skills such as patient care (including medical interviewing, physical examination, developmental assessment, clinical judgment, developing and carrying out management plans, medical procedures, and counseling), professionalism, interpersonal skills and communication, practice-based learning and improvement, medical knowledge, and systems-based practice.

The ABP tracking and evaluation program is part of the certifying process of the ABP. The program director is required to indicate annually whether each resident's performance is satisfactory, marginal, or unsatisfactory in two areas, overall clinical competence and professionalism.

As illustrated in the following table, all residents must receive a satisfactory rating of overall clinical competence and professionalism in each year of training.

In addition, residents must receive a satisfactory rating in each of the components of clinical competence during the final year of required training.

It is the resident's responsibility to arrange for any additional training required.

Program Ratings of Clinical Competence		
Components And Rating	PL - 1 and PL - 2	PL - 3
Overall Clinical Competence*		
Satisfactory	Full credit	Full credit
Marginal	Full credit for one marginal year. Repeat 1 year if both PL-1 and PL-2 year are marginal.	Not applicable
Unsatisfactory	No credit / repeat year	No credit / repeat year
Professionalism		
Satisfactory	Full credit	Full credit
Unsatisfactory	Repeat year, or, at the ABP's discretion, a period of observation will be required.	Repeat year, or, at the ABP's discretion, a period of observation will be required.
*Includes patient care, medical knowledge, interpersonal and communication, practice-based learning and improvement, and systems-based practice skills.		

The tracking system also identifies residents who transfer from one program to another or to a new specialty and assures that the new program director recognizes those residents who need remediation.

Verification of Training by Directors of Pediatric Training Programs

Program directors will be sent Verification of Clinical Competence (VOCC) forms for residents in their last year of training. (The form will be sent to the program directors of pediatrics/psychiatry/child and adolescent psychiatry for residents who apply in their fourth year of training.)

The ABP requires the program director to verify the dates and completion of training and to attest: "I certify that the evaluations on the reverse side of this form are an accurate reflection of this

physician's competence as a pediatrician upon completion of residency training."

In completing the evaluations, a program director should keep in mind the definition of a qualified applicant as determined by the ABP:

An applicant shall demonstrate the following abilities as they pertain to infants, children, and adolescents:

1. assessment of the clinical issues and formulation of a management plan for any medical or health maintenance problem;
2. execution of the management plan with the patient and family, without further medical consultation, for all common problems of disease and health maintenance and for all medically life-threatening situations;
3. consultation, when appropriate, with physicians and other professionals regarding common problems and life-threatening situations; and
4. arrangement for help for the patient and knowledge of what to anticipate from the consultant, being prepared personally to guide further management with assistance, when appropriate, for unusual problems requiring subspecialty, surgical, or other specialized skills.

Each applicant must have verification of training and a VOCC form on file with the ABP to be admitted to the certifying examination. The applicant is responsible for ensuring that the program director submits all the required documents by the appropriate deadline.

Possession of certificates of satisfactory completion of training will not automatically admit the person to the ABP's certification process. Most training certificates attest to the achievement of a minimal level of competence or to the fulfillment of an employment contract.

Therefore, the program director's final evaluations on the VOCC form will take precedence over the certificate from the hospital. The ABP must have the program director's assurance that an applicant meets the standards expected of a certified pediatrician. Program directors are urged not to issue certificates of successful completion of training when the resident is deemed not to have met those standards.

The duration of training is 36 months. Absences from training in excess of 3 months in the 36 months of training (eg, vacation, sick leave, parental leave) must be made up. However, if a program director believes that absences in excess of 3 months are justified, the program director may petition the ABP for an exception to the policy.

A physician who does not receive a satisfactory rating in any of the eight areas of evaluation will be disapproved for the certifying examination. The eight areas are:

Patient Care

1. Gathers essential and accurate information. Performs a complete history and physical examination. Orders appropriate diagnostic studies.
2. Makes informed diagnostic and treatment decisions. Analyzes and synthesizes information. Knows limits of knowledge and expertise.
3. Develops and carries out patient care management plans. Prescribes and performs procedures competently. Effectively counsels patients and families and allays fears and provides comfort.

Medical Knowledge

4. Knows, critically evaluates, and uses current medical information and scientific evidence for patient care.

Interpersonal Skills and Communication

5. Demonstrates interpersonal and communication skills that result in effective information exchange and teaming with patients, their families, and professional associates.

Professionalism

6. Demonstrates a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to diversity.

Practice-Based Learning and Improvement

7. Investigates and evaluates patient care practices, appraises and assimilates scientific evidence, and uses these to improve patient management. Demonstrates a willingness to learn from errors.

Systems-Based Practice

8. Practices quality health care that is cost-effective and advocates for patients within the health care system.

An applicant who receives an unsatisfactory rating in overall clinical competence and is disapproved for the examination will be required to complete an additional period of training in general comprehensive pediatrics in an accredited program in the United States or Canada before reapplying to the ABP.

The program director and the applicant must submit a plan for remediation to be reviewed and approved by the ABP. The director of the program where the additional training occurred must complete a separate VOCC form.

An applicant who receives an unsatisfactory evaluation in professionalism or interpersonal skills and communication either may complete an additional period of training in general comprehensive pediatrics in an accredited program or will be required to complete a period of observation before reapplying to the ABP. A plan for remediation must be submitted for review and approval by the ABP.

Program directors are encouraged to have all residents in their programs take the In-training Examination (ITE). The results of the ITE can provide valuable information for both the resident and the program.

To be compliant with the Program Requirements for Residency Education in Pediatrics established by the ACGME, the program director and the faculty must develop evaluation procedures for assessment of physician performance. Examples include medical record review, checklist evaluation of a resident's interaction with a patient, either live or recorded, standardized patients, objective structured clinical examinations, simulations and models, 360 global rating evaluations, patient/parent survey questionnaires, and oral examinations, among other methods.

Appeals Process

Applicants who wish to appeal evaluations or final recommendations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual's performance.

Certifying Examinations

An applicant must satisfactorily complete all training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

After an application has been accepted, the candidate is expected to take the next examination offered. A candidate who withdraws from the examination by the published withdrawal deadline will be issued a refund of the examination fee. A candidate who

withdraws after the published withdrawal deadline will forfeit all fees paid. To register for a future examination, payment of the re-registration fee will be required.

The names of certified pediatricians, but not their scores, will be sent to appropriate organizations, directories, and journals. The certificate will reflect the candidate's medical degree awarded at the time of graduation from medical school (eg, MD, MBBS, DO).

Degrees awarded either before or after graduation from medical school will not be included on the certificate.

The ABP does not sponsor or maintain records about any courses that claim to be review courses in preparation for its certifying examinations, nor does the ABP track continuing medical education credits.

The validity of the performance of candidates on the certifying examination of the ABP is secured by every means available. The ABP should be contacted in the event of irregular behavior such as giving or obtaining unauthorized information or aid before, during or after the examination or offering financial or other benefit to a proctor, employee or agent of the ABP.

The ABP reserves the right to withhold permission for applicants to take its examinations and/or certification in the event of circumstances demonstrating that an applicant is not capable of performing the role of physician and advocate for infants, children, and adolescents. In such instances, the applicant will be notified; the applicant may appeal the decision to the Credentials Committee of the ABP.

For failing candidates who are concerned that their answer sheets were not scored correctly, hand scoring is available for a fee of \$60. However, candidates are not encouraged to request this service since neither mechanical nor computer errors have ever been found.

Requests should be made in writing accompanied by check or money order. Hand scoring is available for 11 months following the date of the examination.

General Pediatrics Certifying Examination

The certifying examination is given once a year in the fall in a number of locations throughout the United States. The dates of examinations and other information may be found on the ABP Web site.

The examination lasts 2 days. Each day there are two sessions, each of 3 hours' duration, with a luncheon break between sessions. The 2002 certifying examination will be administered October 14-15, 2002. Applicants for the certifying examination must complete all their training by the first day of the month of the examination.

The content of the examination for certification is appropriate for the practice of general comprehensive pediatrics. Emphasis is placed on practical aspects; however, good practice is founded on sound scientific knowledge, and the candidate should be prepared to demonstrate an understanding of basic science. The examination consists of multiple-choice questions.

Examples of the types of questions to be used are mailed to registered candidates before the administration of the examination. Some questions are included in the examination for experimental purposes only. These questions will not contribute to the score.

Each candidate's examination score will be reported to his or her general pediatric program director. Periodically, the ABP conducts research utilizing data it has compiled; the candidate's anonymity is guaranteed in all such cases.

Application, Registration and Fees

Application material for admission to the certifying examination of the ABP may be obtained by contacting the ABP. First-time applicants may complete applications online during the registration

period for new applicants. Information may be found on the ABP Web site: www.abp.org. Residents in their last year of training will be sent an application through their residency programs in early December 2001; residents should contact the ABP office if the application is not received by December 20. (Note: Residents in pediatrics/psychiatry/child and adolescent psychiatry programs will be sent the material in December of the fourth year of training.) It is the applicant's responsibility to be aware of and to meet registration deadlines.

For new applicants, the regular registration period begins December 1, 2001, and extends through February 28, 2002. An application postmarked by February 28 must be accompanied by the application fee of \$1,200. Late registration for new applicants begins March 1 and extends through April 30, 2002. It is the applicant's responsibility to be aware of and to meet registration deadlines.

A nonrefundable penalty fee of \$235 is required for an application postmarked March 1 through April 30; thus, the late registration fee is \$1,435. New applications that are postmarked after April 30, 2002, will not be accepted.

Regular re-registration begins February 15 and extends through April 30, 2002. Re-registration material postmarked by April 30 must be accompanied by the re-registration fee of \$1,100. Late re-registration begins May 1 and extends through May 31, 2002. A nonrefundable penalty fee of \$235 is required for all re-registration material postmarked May 1 through May 31, 2002; thus, the late registration fee is \$1,335.

Re-registration material that is postmarked after May 31, 2002, will not be accepted. A copy of a valid (current), unrestricted license to practice medicine must be included in this material.

Many deadlines set by the ABP are postmark deadlines. If there is a discrepancy between a metered postmark and an official United States Postal Service postmark, the latter will be considered official.

Acknowledgment of receipt of the application will be sent promptly. The ABP should be contacted if acknowledgment of receipt is not received within 30 days of submission of the application. Applications received by the deadlines will be processed and evaluated, and the ABP will request directors of general pediatric training programs to verify successful completion of training.

Applicants who meet the training requirements of the ABP, who receive satisfactory evaluations in all eight areas of competence by their program director(s), and who meet the license requirement will be accepted and registered for the certifying examination.

An applicant who does not receive notification of the acceptance or rejection of his or her application by August 10 should contact the ABP to inquire about the status of the application.

The cost of certification includes the following fees, payable only in United States (US) dollars:

Fees for New Applicants

Processing and Evaluation Examination	\$340
Examination	\$860
Total New Candidate Fees	\$1,200
Late Registration Fee (nonrefundable)	\$235
<i>Late Registration</i>	<i>\$1,435</i>

Fees for Reregistrants

Processing and Evaluation Examination	\$240
Examination	\$860
Total Reregistrant Fees	\$1,100
Late Registration Fee (nonrefundable)	\$235
<i>Late Registration</i>	<i>\$1,335</i>

A nonrefundable penalty fee of \$235 is required for late registration. Applications will not be accepted after the appropriate postmarked date.

Applicants can pay the total application fee by credit card, using either Visa or MasterCard, or by check. For applicants not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier's check, or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank.

The ABP cannot accept electronic transfer of funds from any organization, eg., US military, Western Union.

Applicants should retain their acknowledgment letters, canceled checks, or credit card statements as proof of payment. No other receipts will be issued.

If an applicant is not accepted to take the ABP certifying examination, the examination fee will be refunded. Neither the processing and evaluation fee nor the penalty fee is refundable. If the applicant wishes to pursue certification in the future, he or she will be required to complete a new application and submit the full fee again.

After the ABP has accepted an application, the applicant is expected to take the next certifying examination offered.

However, an applicant may withdraw by submitting a written notice received no later than August 15, 2002. The applicant will be issued a refund of the examination fee (\$860). An applicant whose withdrawal letter is not received by August 15 or who does not appear for the examination will forfeit all fees paid and will be required to submit a re-registration fee before being admitted to a future examination. Re-registration material for the next year's examination will be sent to the last address on file for the applicants who have previously been accepted to take the examination.

Certification in the Pediatric Subspecialties

Subspecialty Certificates

The ABP issues a certificate of special qualifications in the following subspecialties:

- adolescent medicine
- diatric cardiologyped
- iatric critical care medicine
- diatric emergency medicine
- diatric endocrinologypedi
- atric gastroenterology
- pediatric hematology-oncology
- pediatric infectious diseases
- neonatal-perinatal medicine
- diatric nephrology
- pediatric pulmonology
- pediatric rheumatology

A certificate in developmental-behavioral disabilities pediatrics will be offered for the first time in 2002.

The ABP, in conjunction with the ABIM and their Conjoint Board, the American Board of Allergy and Immunology (ABAI), offers a certificate of added qualifications in clinical and laboratory immunology.

Further information may be obtained by contacting the ABAI, 510 Walnut St/Ste 1701, Philadelphia, PA 19106-3619, or at 215 592-9466.

A certificate of added qualifications in sports medicine is offered by the American Board of Family Practice (ABFP), the ABEM, the ABIM, and the ABP. Further information may be obtained by contacting the ABP.

A certificate of added qualifications in medical toxicology is offered by the ABEM, the ABP, and the American Board of Preventive Medicine. Further information may be obtained by contacting the ABP.

A certificate of added qualifications in neurodevelopmental disabilities is offered by the ABP and the American Board of

Psychiatry and Neurology. Further information may be obtained by contacting the ABP.

Examination Admission Requirements

- The applicant must be currently certified in pediatrics by the ABP. Applicants whose time-limited certification will expire before the examination must attain recertification at least 4 months before the examination date.
- For candidates for certificates of special qualifications who began subspecialty training after January 1, 1995, 3 years of training is required. (*Note:* The training requirements for candidates who began subspecialty training before January 1, 1995, may differ. Such individuals should contact the ABP for further information.) The program director(s) will be required to verify completion of training and sign a statement indicating whether the candidate is recommended to take the certifying examination. In addition, the program director(s) must verify clinical competence and meaningful accomplishment in research by completing the Verification of Competence form.
- An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered.

An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

- The applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada or unrestricted privileges to practice medicine in the United States Armed Forces.

A copy of the license may be submitted separately from the initial application, but it must be submitted by the deadline stated in the application packet.

A candidate who is re-registering for the examination must submit the license with the re-registration material.

If an applicant has any action pending regarding the right to have an unrestricted license to practice medicine, admission to the examination may be denied. An applicant who is practicing the subspecialty abroad must provide proof of licensure equivalency in the country in which he or she resides. This information must be submitted by the deadline stated in the application packet.

Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

A subspecialty fellow who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training requirement waived. Evidence of such accomplishment might include a PhD degree or sustained research achievement culminating in the first-authored publication of a research paper in a peer-reviewed journal. The subspecialty program director may ask the subboard to waive the research requirements and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training. A candidate for this pathway must have completed 3 core years of general pediatrics in an accredited program in the United States or Canada. An individual who enters subspecialty training via the SAP would not be eligible for subspecialty fast-tracking.

Furthermore, a subspecialty fellow who receives a waiver by the subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. The training period requirement may be shortened for a candidate with extensive clinical experience by as much as 1 year by approval of the Credentials Committee. The candidate must meet the research requirements.

No credit toward subspecialty qualification will be granted for elective time spent in the subspecialty during the years of general pediatric training.

The RRC currently reviews and accredits pediatric subspecialty programs in most of the certified subspecialties. A list of accredited programs is published in the *Graduate Medical Education Directory*, or may be found at www.acgme.org.

General Criteria for Certification in the Pediatric Subspecialties

In addition to the training requirements, which are specific to each of the pediatric subspecialties, the following are required of candidates seeking certification in the pediatric subspecialties of adolescent medicine, cardiology, critical care medicine, developmental-behavioral pediatrics, emergency medicine, endocrinology, gastroenterology, hematology-oncology, infectious diseases, neonatal-perinatal medicine, nephrology, pulmonology, and rheumatology. Each candidate must be familiar with specific subspecialty training requirements as well as the policies stated in the current Booklet of Information.

A. Certification by the American Board of Pediatrics (ABP)

An applicant must be currently certified in general pediatrics to be eligible to apply for a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must attain recertification at least 4 months before the examination date.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in one of the states, districts, or territories of the United States or a province of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. An applicant who is practicing the subspecialty abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which he or she resides. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

C. Verification of Training

An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. (*Note:* For new subspecialties, alternatives to the usual training requirements, such as practice experience, will be acceptable for a limited period as criteria for admission to the examination. Candidates should refer to the specific subspecialty eligibility criteria for details.) The role of the program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric subspecialist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the pediatric subspecialty examination. If an applicant has not attained the appropriate knowledge and skills, the program director should sign Statements B1 or B2 on the Verification of Competence form. By signing either statement, the program director is recommending that the applicant not be admitted to the certifying examination. Statement B1 is as follows: "I

certify that the above-named physician has NOT satisfactorily demonstrated one or more of the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, or interpersonal skills and is NOT judged to be fully prepared for independent responsibility in the subspecialty area indicated above. The applicant is NOT recommended for examination." Statement B2 is as follows: "I certify that in my opinion the above-named applicant lacks moral and ethical integrity and is NOT recommended for the examination at this time."

If an applicant's training is not verified or if the applicant receives a B1 recommendation, the applicant will be required to complete an additional period of subspecialty fellowship training before reapplying. The director of the program where the additional training occurred must complete a separate Verification of Competence form. If an applicant receives a B2 recommendation, the applicant will be required to complete an additional period of subspecialty fellowship training or will be required to complete a period of observation before reapplying to the ABP.

Appeals Process: Applicants who wish to appeal evaluations or final recommendations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual's performance.

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during the general pediatric residency years (PL-1, 2, 3) or as a chief resident (PL-4).

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (eg, allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.

D. Principles Regarding the Assessment of Meaningful Accomplishment in Research

1. Research experience is an essential part of the training of subspecialists. The general requirements for research in pediatric subspecialties approved by the ACGME for program accreditation must be met as evidence of research experience. These are as follows: "Within the institution, the subspecialty trainee must be exposed to, and take part in, research projects that are conducive to a questioning attitude, to protocol development, and to critical analysis of new therapies and of medical literature. Research experience should begin in the first year and continue for the entire period of training in order to allow adequate time for the development of research skills and to bring a project to completion. The trainees must help design, conduct, evaluate, and prepare for publication a clinical or laboratory research project in the subspecialty area. They should also be required to conduct research seminars and prepare a written report of their research activities. Instruction in related basic sciences and associated disciplines, such as research design, biostatistics, and epidemiology, must be offered through courses, workshops, and seminars."
2. Additional evidence of meaningful accomplishment in research must be submitted, including one or more of the following:
 - a. First author of a hypothesis-driven research paper accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A reprint of the paper, or a copy of the letter of acceptance by the journal and a copy of the manuscript, must be submitted.

- b. A PhD degree in a field of science. A copy of the degree certificate must be provided.
- c. A thesis accepted as partial fulfillment of the requirements for a postgraduate degree in a field relevant to the subspecialty. The thesis or a research progress report as described in 2(f) must be submitted for review.
- d. First author of a hypothesis-driven research paper that has been submitted but not yet accepted for publication in a peer-reviewed journal deemed acceptable by the Subboard. A letter from the journal confirming the receipt of the manuscript must be included as well as a copy of the submitted manuscript.
- e. Submission of a research grant proposal that has been approved by an extramural organization with a critical review process acceptable to the Subboard. A copy of the grant proposal and approval letter must be included. A grant proposal will no longer meet the research requirement for fellows entering subspecialty training on or after January 1, 1998.
- f. A research progress report (signed by both the applicant and mentor) no more than five pages in length that must include (a) a statement of hypothesis, (b) delineation of methodology, (c) results and analysis, and (d) significance of the research. A research progress report may not be used to meet the requirement if an applicant is more than 2 years beyond completion of fellowship training unless there are extenuating circumstances that may have prevented submission of a manuscript.

The Credentials Committee of each subspecialty will review submitted research accomplishment materials and decide whether the requirement has been met.

3. The program director is responsible for notifying all residents of the research requirements necessary for certification upon entry to the subspecialty training program. Furthermore, in the description of the candidate's research performance on the Verification of Competence Form, the program director must provide a description of the experiences on which the acceptable evidence of meaningful research is based.
4. Research should be performed in a laboratory that best suits the candidate's interests. For example, the ABP is strongly supportive of the Pediatric Scientist Development Program that has been initiated by the Association of Medical School Pediatric Department Chairs.

Program Requirements for Residency Education in the Subspecialties of Pediatrics

Program Requirements for Residency Education in the following subspecialties have been approved by the ACGME or by the RCPSC:

- adolescent medicine
- pediatric cardiology
- pediatric critical care medicine
- pediatric emergency medicine
- pediatric endocrinology
- pediatric gastroenterology
- pediatric hematology-oncology
- pediatric infectious diseases
- medical toxicology
- neonatal-perinatal medicine
- pediatric nephrology
- pediatric pulmonology
- pediatric rheumatology
- sports medicine

Copies of the Program Requirements and lists of accredited programs are available from the office of the Residency Review Committee for Pediatrics, 515 N State St, Chicago, IL 60610, or on the ACGME Web site: www.acgme.org, or the Office of Training and

Evaluation, the Royal College of Physicians and Surgeons of Canada, 74 Stanley, Ottawa, Ontario, K1M 1P4. This information is published in the *Graduate Medical Education Directory* or in the RCPSC booklets of general information.

Training Leading to Dual Pediatric Subspecialty Certification

If an individual is certified in one subspecialty, he/she can become eligible to take another subspecialty examination after 2 years of additional training, of which at least 1 year must be broad-based clinical training.

An individual or program director(s) may petition the Credentials Committees of two pediatric subspecialties with a proposal for a 4-year integrated training program that would meet the eligibility requirements for certification in both subspecialties. This petition must be approved before subspecialty training begins or early in the first year of subspecialty training. Guidelines for dual subspecialty training may be obtained from the ABP or can be found on the ABP Web site: www.abp.org.

Training Leading to Eligibility for Combined Subspecialty Certification

An individual who has completed internal medicine/pediatrics training should contact the American Board of Internal Medicine and the American Board of Pediatrics regarding opportunities for combined training opportunities (ie, training in both the adult and pediatric subspecialties). Combined training must be prospectively approved by both boards.

Subspecialty "Fast-Tracking"

A subspecialty fellow who is believed to have demonstrated meaningful accomplishment in research, either before or during residency, may have a part of the training requirement waived. Evidence of such accomplishment might include a PhD degree or sustained research achievement culminating in the first-authored publication of a research paper in a peer-reviewed journal. The subspecialty program director may ask the Subboard to waive the research requirements and to reduce the time of subspecialty training by as much as 1 year. This petition must be made either before the beginning of training or during the first year of training. A candidate for this pathway must have completed 3 core years of pediatrics in an accredited program in the United States or Canada. An individual who enters subspecialty training via the Special Alternative Pathway would not be eligible for subspecialty fast-tracking. Furthermore, a subspecialty fellow who receives a waiver by the Subboard must complete at least 2 years of training in the subspecialty with at least 1 year of broad-based clinical training. The training period requirement may be shortened for a candidate with extensive clinical experience by as much as 1 year by approval of the Credentials Committee. The candidate must meet the research requirements.

Eligibility Criteria for Certification in Adolescent Medicine

Admission Requirements

Physicians who enter training in adolescent medicine on or after July 1, 2000, are required to complete their training in a program accredited for training in adolescent medicine by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow entering adolescent medicine training before January 1, 1995, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in adolescent medicine.

Three years of full-time, broad-based fellowship training in adolescent medicine is required for fellows entering training on or

after January 1, 1995. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning adolescent medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those adolescent medicine training programs that are operated in association with general comprehensive residency programs in pediatrics or internal medicine accredited by the ACGME or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Pediatric Cardiology

Admission Requirements

Physicians who entered training in pediatric cardiology on or after January 1, 1965, are required to complete their training in a program accredited for training in pediatric cardiology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric cardiology training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric cardiology.

Three years of full-time, broad-based subspecialty fellowship training in pediatric cardiology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric cardiology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric cardiology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or

Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Pediatric Critical Care Medicine

Admission Requirements

Physicians who entered training in pediatric critical care medicine on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric critical care medicine by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric critical care medicine training before January 1, 1988, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric critical care medicine. A subspecialty fellow who is certified in anesthesiology by the American Board of Anesthesiology may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric critical care medicine.

Three years of full-time, broad-based subspecialty fellowship training in pediatric critical care medicine is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric critical care medicine training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric critical care medicine training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Developmental-Behavioral Pediatrics

Admission Requirements

To qualify for admission to the examination, an applicant must have completed one of the following:

1. Training

A subspecialty fellow entering developmental-behavioral pediatrics training before **January 1, 2002**, may apply for admission on the

basis of completion of 2 years of subspecialty fellowship training in developmental-behavioral pediatrics in a program under the supervision of a director who is certified in developmental-behavioral pediatrics or, lacking such certification, possesses appropriate educational qualifications. Only those developmental-behavioral pediatrics training programs that are operated in association with general comprehensive residency programs accredited by the Residency Review Committee for Pediatrics (RRC) will be considered. The Subboard requires that the period of training be at least 22 months, excluding leave, for those subspecialty residents.

Three years of full-time, broad-based fellowship training in developmental-behavioral pediatrics is required for fellows entering training on or after **January 1, 2002**. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning developmental-behavioral pediatrics training on or after **January 1, 2002**, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment of research; the fellow must meet the criteria as stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment of research will not be required for individuals who began training before **January 1, 2002**.

A fellow beginning part-time training after **January 1, 2002**, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

For an individual using the developmental-behavioral pediatrics fellowship training route (A), a Verification of Competence Form(s) will be required from the director(s) of the fellow's developmental-behavioral pediatrics program(s).

2. Practice Experience

Five years of broad-based practice experience in developmental-behavioral pediatrics is required. A minimum of 50% of full-time, focused professional activity (and a minimum of 20 hours a week) must have been spent in the practice of developmental-behavioral pediatrics to receive credit. It is assumed that night and weekend time would be distributed in the same manner as regular time. These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty fellowship training. All developmental-behavioral pediatrics experience must be accrued before **December 31, 2006**. No foreign developmental-behavioral pediatrics experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an individual utilizing the developmental-behavioral pediatrics experience route (B), an Evaluation Form(s) will be required from the developmental-behavioral pediatrics program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing developmental-behavioral pediatrics.

3. Partial Subspecialty Training and Practice

A combination of subspecialty fellowship training and practice experience equal to 5 years as outlined below may be utilized. These 5 years must be accrued before **December 31, 2006**. No credit for

partial training will be given for fellowship training that began on or after **January 1, 2002**.

1. A fellow completing less than 12 months of fellowship training in developmental-behavioral pediatrics may receive practice credit on a month-for-month basis. For example, a 9-month subspecialty fellowship would be credited for 9 months of experience; this, added to 4 years and 3 months of developmental-behavioral pediatrics experience, would total 60 months or 5 years.
2. A fellow completing 12 to 23 months of subspecialty fellowship training in developmental-behavioral pediatrics may receive credit on a two-for-one basis. For example, an 18-month subspecialty fellowship would be credited for 36 months of experience; this, added to 24 months of developmental-behavioral pediatrics experience, would total 60 months or 5 years.

For an individual utilizing the combination training and practice experience route (C), a Verification Form(s) will be required from the director(s) of the applicant's developmental-behavioral pediatrics training program(s), and an Evaluation Form(s) will be required from the developmental-behavioral pediatrics program director (if there is a subspecialty training program) or the pediatric department chair or the chief of pediatrics in the hospital(s) where the applicant is now or has been practicing developmental-behavioral pediatrics.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

Accredited Training

At the present time, the RRC has not begun the process of accrediting training programs in developmental-behavioral pediatrics. A fellow entering subspecialty training in developmental-behavioral pediatrics before completion of the accreditation process by the RRC is advised to enter those programs in which the director or senior faculty of the program is certified in developmental-behavioral pediatrics or possesses appropriate educational qualifications. Only those developmental-behavioral pediatrics training programs that are operated in association with general comprehensive pediatric programs accredited by the RRC or RCPSC will be considered.

Eligibility Criteria for Certification in Pediatric Emergency Medicine

Admission Requirements

To qualify for admission to the examination, an applicant must have completed one of the following:

A. Training

A subspecialty fellow entering pediatric emergency medicine training before **January 1, 1995**, may apply for admission on the basis of completion of 2 years of subspecialty fellowship training in pediatric emergency medicine. The program and the training must conform to the Program Requirements for Residency Education in Pediatric Emergency Medicine.

1. Requirements for candidates applying to the ABP for certification are as follows:

Three years of full-time, broad-based fellowship training in pediatric emergency medicine is required for fellows entering training on or after **January 1, 1995**. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

Physicians who enter training in pediatric emergency medicine on or after **July 1, 2001**, are required to complete their training in a program accredited for training in pediatric emergency

medicine by the RRC for Pediatrics or the RRC for Emergency Medicine in the United States.

For a fellow beginning pediatric emergency medicine training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A fellow beginning training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

2. Candidates whose primary certificate is in emergency medicine should contact the ABEM for certification requirements.

Only those pediatric emergency medicine training programs that are operated in association with general comprehensive pediatric or emergency medicine residency programs accredited by the ACGME or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP or the ABEM.

No credit will be given for subspecialty training during the core residency.

B. Dual Certification

A candidate who is certified by the ABP and the ABEM may apply via this pathway. A candidate who has completed training to meet the certification requirements of the ABP and the ABEM before January 1, 1999, may apply via this pathway.

Verification of Training

1. For a candidate utilizing the subspecialty fellowship training route, a Verification of Competence Form(s) from the director(s) of the applicant's pediatric emergency medicine training program(s) is required.
2. For a candidate utilizing the dual certification pathway, the certificate number and year of certification for each board must be provided.

Certification shall be time-limited for the number of years that the primary board currently grants certification (7 years for ABP and 10 years for ABEM).

Description of the Institution/Emergency Department

The individual(s) responsible for completion of the Verification of Competence Form(s) or the Evaluation Form(s) must provide a description of the institution and the ED.

Eligibility Criteria for Certification in Pediatric Endocrinology

Admission Requirements

Physicians who entered training in pediatric endocrinology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric endocrinology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric endocrinology before January 1, 1988, may apply for admission on the basis of completion

of 2 years of subspecialty fellowship training in pediatric endocrinology.

Three years of full-time, broad-based fellowship training in pediatric endocrinology is required for fellows entering training on or after January 1, 1988. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric endocrinology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric endocrinology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Pediatric Gastroenterology

Admission Requirements

Physicians who entered training in pediatric gastroenterology on or after January 1, 1996, are required to complete their training in a program accredited for training in pediatric gastroenterology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric gastroenterology training before January 1, 1990, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric gastroenterology.

Three years of full-time, broad-based fellowship training in pediatric gastroenterology is required for fellows entering training on or after January 1, 1990. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric gastroenterology training on or after January 1, 1990, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1990, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric gastroenterology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Pediatric Hematology-Oncology

Admission Requirements

Physicians who entered training in pediatric hematology-oncology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric hematology-oncology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric hematology-oncology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric hematology-oncology.

Three years of full-time, broad-based fellowship training in pediatric hematology-oncology is required for fellows entering training on or after January 1, 1986. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric hematology-oncology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric hematology-oncology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Pediatric Infectious Diseases

Admission Requirements

Physicians who enter training in pediatric infectious diseases on or after January 1, 2000, are required to complete their training in a

program accredited for training in pediatric infectious diseases by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow entering pediatric infectious diseases training before January 1, 1995, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric infectious diseases.

Three years of full-time, broad-based fellowship training in pediatric infectious diseases is required for fellows entering training on or after January 1, 1995. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow beginning pediatric infectious diseases training on or after January 1, 1995, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination. Verification of meaningful accomplishment in research will not be required for individuals who began training before January 1, 1995.

A fellow beginning part-time training after January 1, 1995, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric infectious diseases training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Medical Toxicology

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics and must maintain a valid (current) certificate before being permitted to take a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must attain recertification at least 4 months before the examination date.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application material.

An applicant who is practicing the subspecialty abroad may be exempted from this licensure requirement upon presentation of proof of licensure equivalency in the country in which he/she resides. Candidates who practice or plan to practice abroad must

submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

C. Medical Toxicology Subspecialty Training

An applicant must complete a fellowship in medical toxicology of 24 months' duration. The training program should be sponsored by and be based within a reasonable geographical proximity of an accredited residency program in emergency medicine, pediatrics, preventive medicine, or any combination of these programs. An institution is discouraged from sponsoring more than one accredited medical toxicology program.

Physicians who enter training in medical toxicology on or after July 1, 2000, are required to complete their training in a program accredited for training in medical toxicology by the RRC for Emergency Medicine or Preventive Medicine.

The applicant must satisfactorily complete the subspecialty training by the first day of the month of the examination.

Applicants seeking certification in more than one subspecialty on the basis of training may not apply the same training period toward fulfillment of requirements of more than one specialty or subspecialty.

The ABP will request verification of subspecialty training directly from the program director.

Eligibility Criteria for Certification in Neonatal-Perinatal Medicine

Admission Requirements

Physicians who entered training in neonatal-perinatal medicine on or after January 1, 1986, are required to complete their training in a program accredited for training in neonatal-perinatal medicine by the RRC for Pediatrics in the United States or the RCPSC in Canada. Only those programs that are a part of an institution that offers residency or fellowship training in obstetrics and gynecology and include experience in fetal-maternal-perinatal medicine will be considered.

A subspecialty fellow who entered neonatal-perinatal medicine training before January 1, 1989, may apply for admission on the basis of completion of 2 years of fellowship training in neonatal-perinatal medicine.

Three years of full-time, broad-based fellowship training in neonatal-perinatal medicine is required for fellows entering training on or after January 1, 1989. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceed 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began neonatal-perinatal medicine training on or after January 1, 1989, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1989, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those neonatal-perinatal medicine training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United

States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Pediatric Nephrology

Admission Requirements

Physicians who entered training in pediatric nephrology on or after January 1, 1987, are required to complete their training in a program accredited for training in pediatric nephrology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric nephrology training before January 1, 1987, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric nephrology.

Three years of full-time, broad-based fellowship training in pediatric nephrology is required for fellows entering training on or after January 1, 1987. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric nephrology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric nephrology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Eligibility Criteria for Certification in Neurodevelopmental Disabilities

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics and must maintain a valid (current) certificate before being permitted to take a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must attain recertification at least 4 months before the examination date. Once training in an accredited neurodevelopmental disabilities program is required, the applicant must maintain certification by both the ABP, in general pediatrics, and the ABPN, in neurology with special qualifications in child neurology. All applications will then be made through ABPN.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application material.

An applicant who is practicing the subspecialty abroad may be exempted from this policy upon presentation of proof of licensure equivalency in the country in which he or she resides. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

C. Pathways

To qualify for admission to the examination, an applicant must have completed one of the following:

1. Training Pathway

For a period of 4 years following the date of the initial administration of the examination in neurodevelopmental disabilities (2001), the satisfactory completion of at least 24 months of formal training in neurodevelopmental disabilities acceptable for subspecialization in neurodevelopmental disabilities is required. After 2005, the applicant must have completed full training in neurodevelopmental disabilities in an ACGME-accredited neurodevelopmental disabilities program.

For an applicant using the neurodevelopmental disabilities fellowship training pathway, a Verification of Competence Form(s) will be required from the director(s) of the fellow's neurodevelopmental disabilities program(s).

2. Practice Experience Pathway

For a period of 4 years following the first date of administration of the examination in neurodevelopmental disabilities (2001), a minimum of 50% of practice time devoted to neurodevelopmental disabilities for the previous 5 years is required. The experience in neurodevelopmental disabilities must consist of broad-based and focused professional activity (a minimum of 20 hours a week). These 5 years should be of such type and quality that they substitute for the clinical exposure one might have encountered during subspecialty fellowship training. No foreign neurodevelopmental disabilities experience will be accepted by the Credentials Committee in fulfillment of the requirements.

For an applicant utilizing the neurodevelopmental disabilities practice experience pathway, an Evaluation Form(s) will be required from the neurodevelopmental disabilities program director (if there is a subspecialty training program) or the pediatric department chair or chief of pediatrics in the hospital(s) where the applicant is now or has been practicing in neurodevelopmental disabilities.

3. Partial Subspecialty Training and Practice Pathway

For a period of 4 years following the first date of administration of the examination in neurodevelopmental disabilities (2001), the satisfactory completion of 12 months of formal training in neurodevelopmental disabilities acceptable for subspecialization in neurodevelopmental disabilities and 50 percent of practice time devoted to neurodevelopmental disabilities for the previous 2.5 years is required.

For an individual utilizing the combination of subspecialty training and practice experience, a Verification Form(s) will be required from the director(s) of the applicant's neurodevelopmental disabilities training program(s), and an Evaluation Form(s) will be required from the neurodevelopmental disabilities program director (if there is a subspecialty training program) or the pediatric chair or chief of pediatrics in the

hospital(s) where the applicant is now or has been practicing in neurodevelopmental disabilities.

The completed Verification and Evaluation Form(s) should be sent directly to the ABP.

An applicant entering the examination via neurodevelopmental disabilities nonaccredited training, practice experience, or the combination of subspecialty training and practice experience must be approved for the examination and achieve certification by 2005. After 2005, all applicants must complete the accredited training pathway to subcertification in neurodevelopmental disabilities.

D. Verification of Training

An applicant will be asked to list the program(s) where fellowship training occurred as well as the name(s) of the program director(s). The ABP will send a Verification of Competence Form to the program director(s) for completion. (*Note:* For new subspecialties, alternatives to the usual training requirements, such as practice experience, will be acceptable for a limited period as criteria for admission to the examination.) The role of the program director in the certification process is to verify completion of training and to sign the following statement on the Verification of Competence Form:

"I certify that the above-named applicant has demonstrated the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, and interpersonal skills and is judged to be fully prepared for independent responsibility as a pediatric subspecialist; to my knowledge, he/she has moral and ethical integrity. The applicant is recommended for examination."

An applicant must have the Verification Form(s) on file at the ABP in order to be admitted to the pediatric subspecialty examination. If an applicant has not attained the appropriate knowledge and skills, the program director should sign Statements B1 or B2 on the Verification of Competence form. By signing either statement, the program director is recommending that the applicant not be admitted to the certifying examination. Statement B1 is as follows: "I certify that the above-named physician has NOT satisfactorily demonstrated one or more of the necessary attitudes, knowledge, clinical judgment, research abilities, technical skills, or interpersonal skills and is NOT judged to be fully prepared for independent responsibility in the subspecialty area indicated above. The applicant is NOT recommended for examination." Statement B2 is as follows: "I certify that in my opinion the above-named applicant lacks moral and ethical integrity and is NOT recommended for the examination at this time."

If an applicant's training is not verified or if the applicant receives a B1 recommendation, the applicant will be required to complete additional subspecialty fellowship training before reapplying. The director of the program where the additional training occurred must complete a separate Verification of Competence form. If an applicant receives a B2 recommendation, the applicant will be required to complete an additional period of subspecialty fellowship training or will be required to complete a period of observation before reapplying to the ABP.

Appeals Process: Applicants who wish to appeal evaluations or final recommendations must proceed through institutional due process mechanisms. The ABP is not in a position to reexamine the facts and circumstances of an individual's performance.

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

No credit toward subspecialty qualification will be allowed for elective time spent in subspecialty areas during general pediatric residency years (PL-1, 2, 3) or as chief resident (PL-4).

An applicant seeking certification in another pediatric subspecialty or a non-ABP specialty (eg, allergy/immunology) on the basis of practice and/or training may not apply the same period of time toward fulfillment of these requirements.

Eligibility Criteria for Certification in Pediatric Pulmonology

Admission Requirements

Physicians who entered training in pediatric pulmonology on or after January 1, 1992, are required to complete their training in a program accredited for training in pediatric pulmonology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric pulmonology training before January 1, 1986, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric pulmonology.

Three years of full-time, broad-based fellowship training in pediatric pulmonology is required for fellows entering training on or after January 1, 1986. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric pulmonology training on or after January 1, 1988, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1988, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

Only those pediatric pulmonology training programs that are operated in association with general comprehensive pediatric residency programs accredited by the RRC or by the RCPSC are acceptable. All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Subcertification in Pediatric Pulmonology and Allergy/Immunology

The intent of this route is to outline a mechanism whereby residents already certified in pediatrics may qualify for subcertification in both pediatric pulmonology and allergy/immunology in a shorter total period of time than that presently required (3 years pediatric pulmonology plus 2 years allergy/immunology). This can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical pulmonology training and 1 year in clinical training for allergy/immunology. The minimum

research requirement is 12 months in an environment and project relevant to both pulmonology and allergy/immunology. The fourth year would be spent in training acceptable to the Subboard of Pediatric Pulmonology and may be in clinical training or relevant additional research training.

1. Training in pediatric pulmonology may precede or follow training in allergy/immunology.
2. The candidate must train in pediatric pulmonology and allergy/immunology programs accredited by the RRC; the two programs do not necessarily have to be at the same institution. The research project selected by the trainee must be discussed with and approved by both training program directors.
3. The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Pulmonology and the Conjoint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability of the research project. This early approval is no guarantee of acceptance of the final research product.
4. The trainee is required to satisfy both the General Eligibility Requirements for Certification in Pediatric Subspecialties and the Eligibility Criteria specific to the Subboard and Conjoint Board as listed in the *Graduate Medical Education Directory*. Final admission to either certification examination is granted by the Credentials Committees after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate.

Eligibility Criteria for Certification in Pediatric Rheumatology

Admission Requirements

Physicians who enter training in pediatric rheumatology on or after January 1, 1999, are required to complete their training in a program accredited for training in pediatric rheumatology by the RRC for Pediatrics in the United States or the RCPSC in Canada.

A subspecialty fellow who entered pediatric rheumatology training before January 1, 1992, may apply for admission on the basis of completion of 2 years of fellowship training in pediatric rheumatology.

Three years of full-time, broad-based fellowship training in pediatric rheumatology is required for fellows entering training on or after January 1, 1992. Combined absences/leave in excess of 3 months during the 3 years of training, whether for vacation, parental leave, illness, etc, must be made up. If the program director believes that combined absences/leave that exceeds 3 months is justified, a letter of explanation should be sent by the director for review by the Credentials Committee.

For a fellow who began pediatric rheumatology training on or after January 1, 1992, the following must be accomplished in order to become certified in the subspecialty: A Verification of Competence Form must be completed by the program director(s) stating satisfactory completion of the required training as well as verification of clinical competence and meaningful accomplishment in research; the fellow must meet the criteria stated in the "Principles Regarding the Assessment of Meaningful Accomplishment in Research"; and he/she must pass the subspecialty certifying examination.

A fellow beginning part-time training after January 1, 1992, may complete the required training on a part-time basis not to exceed 6 years. No continuous absence of more than 1 year will be permitted.

All subspecialty training must be completed in the United States or Canada unless the Credentials Committee of the Subboard has

given approval for foreign subspecialty training to an applicant before he/she enrolls in such a program. An applicant wishing to obtain such approval should contact the ABP.

No credit will be given for subspecialty training during the core residency.

Subcertification in Pediatric Rheumatology and Allergy/Immunology

A candidate who is certified in pediatrics may qualify for subcertification in both pediatric rheumatology and allergy/immunology in a shorter total period of training than that presently required (3 years of pediatric rheumatology plus 2 years of allergy/immunology). This compression of training by 1 year can be accomplished by successfully completing research training relating to the requirements of both the Subboard of Pediatric Rheumatology and the Conjoint Board of Allergy/Immunology.

The total training program would require no less than 4 years (48 months) with at least 1 year spent in clinical rheumatology training and 1 year in clinical training for allergy/immunology. The clinical rheumatology training should also include at least another 2 years of at least 1/2 day/week of an outpatient rheumatology experience plus 1 month/year of inpatient rheumatology service to assure longitudinal exposure to rheumatologic problems in children. The minimum research requirement is 24 months in an environment and project relevant to both rheumatology and allergy/immunology, particularly immunologically related research.

1. Although training in clinical pediatric rheumatology may precede or follow training in allergy/immunology, such training should occur at latest in the second year of this combined fellowship. An integrated training program may be developed that must be prospectively approved by both boards.
2. The candidate must train in pediatric rheumatology and allergy/immunology programs accredited by the RRC. The two programs should preferably be in the same institution, but programs in the same city may be acceptable.
3. The research project selected by the trainee must be discussed with and approved by both training program directors. The trainee must supply written details of any research project for which he/she plans to seek joint approval of both the Subboard of Pediatric Rheumatology and the Conjoint Board of Allergy/Immunology before or early in the course of his/her first year in a subspecialty program. The Subboard and Conjoint Board, in turn, will provide a preliminary written opinion to the trainee concerning the acceptability of the research project. This early approval is no guarantee of the acceptance of the final research product.
4. The trainee is required to satisfy both the General Eligibility Requirements for Certification in Pediatric Subspecialties and the Eligibility Criteria specific to the Subboard and Conjoint Board as listed in the *Graduate Medical Education Directory*. Final admission to either certification examination is granted by the Credentials Committees after completion of training, fulfillment of the research competence requirements, and review of all application materials submitted by the candidate.

Eligibility Criteria for Certification in Sports Medicine

Admission Requirements

A. Certification by the American Board of Pediatrics (ABP)

An applicant must take and pass the certifying examination in general pediatrics and must maintain a valid (current) certificate before being permitted to take a pediatric subspecialty certifying examination. Applicants whose time-limited certification will expire before the examination must attain recertification at least 4 months before the examination date.

B. Licensure

An applicant must have a valid (current), unrestricted license to practice medicine in any of the states, districts, or territories of the United States or provinces of Canada in which he/she practices or have unrestricted privileges to practice medicine in the US Armed Forces. A copy of the unrestricted license must accompany the application material.

An applicant who is practicing the subspecialty abroad may be exempted from this licensure requirement upon presentation of proof of licensure equivalency in the country in which he/she resides. Candidates who practice or plan to practice abroad must submit a letter, in addition to the licensure equivalency, stating that they will not practice in the United States or Canada.

C. Training or Practice Experience

To qualify for admission to the examination, an applicant must have completed one of the following:

1. Training

An applicant must have completed a minimum of 1 year in a sports medicine training program that is associated with an accredited residency program in family practice, emergency medicine, internal medicine, or pediatrics.

Physicians who enter training in sports medicine on or after January 1, 2001, are required to complete their training in a program accredited by the RRC for either Family Practice, Emergency Medicine, Internal Medicine, or Pediatrics.

An applicant must satisfactorily complete all subspecialty training before the first day of the month in which the examination is administered. An applicant whose contracted training period does not expire before the first day of the month of the examination will not be eligible for that examination, even if all formal training has been completed earlier and the remaining time is used only for leave.

A Verification of Competence Form must be completed by the program director stating satisfactory completion of the required training as well as verification of clinical competence. The ABP will send this form to the program director for completion.

2. Practice Experience

Five years of practice experience, as a physician and postresidency, in sports medicine is required. This experience must consist of at least 20% of total professional time devoted to sports medicine. The activities that qualify a candidate are one or more of the following:

- Field supervision of athletes
- Emergency assessment and care of acutely injured athletes
- Diagnosis, treatment, management, and disposition of common sports injuries and illnesses
- Management of medical problems in the athlete
- Rehabilitation of the ill or injured athlete
- Exercise as treatment

Partial training in sports medicine (ie, less than 12 months) will be credited on a month-by-month basis as practice experience.

An Evaluation Form must be completed by an individual to verify that at least 20% of professional time is devoted to sports medicine in one or more of the six activities cited above. The form must be completed by a physician who is knowledgeable about the applicant's practice, such as the pediatric department chair, the chief of pediatrics, chief of staff, or the medical director of a hospital where the applicant has admitting privileges. A partner or practice associate is not acceptable.

Practice experience accrued before 1987 will not be considered. All sports medicine experience must be accrued by June 30, 1999.

2002 Subspecialty Certifying Examinations

Each subspecialty certifying examination in those subspecialties offering certificates of special qualifications is administered every 2 years. Dates of the examinations and other information may be found on the ABP Web site. Application material for admission to a subspecialty examination may be obtained by contacting the ABP. Application forms are available only during the registration period for that examination.

The examinations last a half-day with a time limit of 4½ hours and consist of multiple-choice questions. Examples of the types of questions to be used are mailed to registered candidates before the administration of each examination. A content outline is available on the ABP Web site.

Each candidate's examination score will be reported to the subspecialty program director where training was completed. The names of those certified are sent to the American Board of Medical Specialties (ABMS) for publication in the *Directory of Certified Pediatricians* and to various pediatric journals. Periodically, the ABP conducts research utilizing data it has compiled; the candidate's anonymity is guaranteed in all such cases.

Pediatric subspecialty examinations will be administered on August 19, 2002, in cardiology, critical care medicine, and pulmonology and on November 18, 2002, in developmental-behavioral pediatrics, emergency medicine, hematology-oncology, and rheumatology. The certifying examination in neurodevelopmental disabilities will be administered on April 9, 2002, in sports medicine on April 12, 2002, and in medical toxicology on October 26, 2002. The fees (in US dollars) for all subspecialty examinations are:

Fees for New Subspecialty Applicants

Processing and evaluation	\$380
Examination	\$1,015
Regular Registration	\$1,395
Late registration fee	\$235
Late registration	\$1,630

Fees for Subspecialty Reregistrants

Processing and evaluation	\$280
Examination	\$1,015
Regular Registration	\$1,295
Late registration fee	\$235
Late registration	\$1,530

A nonrefundable penalty fee of \$235 is required for late registration.

Applicants can pay the total application fee by credit card, using either Visa or MasterCard, or by check.

For applicants not using US banks, the fee must be paid in US dollars using one of the following vehicles: (1) money order, (2) cashier's check or (3) certified check. To be accepted for payment, these vehicles must be payable through a US bank.

The ABP cannot accept electronic transfer of funds from any organization, eg., US military, Western Union.

Registration Dates for Subspecialty Examinations

For subspecialty examinations given on August 19, 2002:

New applicants

Regular	September 14—November 15, 2001
Late	November 16—December 15, 2001

Reregistrants

Regular	December 15, 2001—February 15, 2002
Late	February 16—March 15, 2002

Applications will not be accepted after the appropriate post-marked date.

For subspecialty examinations given on November 18, 2002:

New applicants

Regular	February 1—March 31, 2002
Late	April 1—April 30, 2002

Reregistrants

Regular	March 15—May 15, 2002
Late	May 16—June 15, 2002

Applications will not be accepted after the appropriate post-marked date.

Recertification

In November 1985, the ABP established a policy of time-limited certification. This policy became effective for those individuals certified in general pediatrics and in the pediatric subspecialties after May 1, 1988. Initial certificates expire after 7 years.

Diplomates certified before May 1, 1988, were not affected by the policy of time-limited certification; however, those choosing to achieve certification renewal on a voluntary basis may do so. Their permanent certification is not affected by this change.

The current recertification program, Program for Renewal of Certification in Pediatrics (PRCP), will soon be replaced with a new recertification program. PRCP will be active through the year 2002 for participants who registered prior to September 30, 2001.

General Pediatric Recertification

Beginning in 2003, diplomates who wish to renew an ABP certificate in general pediatrics must successfully engage in the Program for Maintenance of Certification in Pediatrics (PMCP-G). PMCP-G requirements are contingent upon the expiration date listed on a certificate. If a certificate has an expiration date prior to 2010, only the licensure and examination activities are required in order to renew the certificate for another 7 years. If a certificate has an expiration date of 2010 and beyond, all PMCP-G requirements must be completed prior to the expiration date in order to renew the certificate for another 7 years. For a complete listing of PMCP-G requirements, please refer to the ABP Web site www.abp.org.

Once PMCP-G is completely phased-in, it will require continuous involvement throughout the 7-year lifespan of certificates. PMCP-G will utilize some aspects of the existing PRCP program, eg, assessment of knowledge, but it will be enhanced to help diplomates with professional development and quality improvement in practice. All PMCP-G activities will be available on the Internet or in local computer testing centers so they can be completed with as much flexibility as possible.

The American Board of Pediatrics is currently developing the various components of PMCP-G. Details of PMCP-G can be found at the ABP Web site www.abp.org.

Subspecialty Recertification

Beginning in 2003, recertification in the subspecialties will occur through the Program for Maintenance of Certification in Pediatric Subspecialties (PMCP-S). The details will vary from PMCP-G but the basic components will be similar. Diplomates are not required to maintain their general pediatric certificate in order to maintain certification in a subspecialty; however, diplomates desiring to maintain both certificates will be charged reduced fees for each certificate.

Policies

Board Status

The ABP follows the long-standing recommendations of the American Board of Medical Specialties to its member boards not to use the term "board eligible" because of continuing confusion about the term.

If an inquiry is made to the ABP regarding the status of an individual, the response will be only whether the individual has or has not been certified. Upon receipt of a signed release form, provided by the ABP, information will be released regarding whether an individual's application to take a general or subspecialty certifying examination was accepted and when.

The allegation by an applicant that he or she has completed the required training and, therefore, is board eligible, without review and approval by the ABP, is not acceptable.

Time Limit to Certification

Candidates who have met the training requirements and whose applications to take the certifying examinations have been accepted by the ABP have unlimited time to become certified, subject to their continued compliance with ABP policies and requirements, which are subject to change.

Special Testing Accommodations

An applicant who wishes to request special accommodations to take a certifying examination due to a disability is urged to notify the ABP in writing of the need for accommodations as early as possible during the application period. The ABP policy on disabilities will be sent to the applicant. The deadline for notifying the ABP is the registration deadline (postmarked).

Maintenance of an Active License

A diplomate's certificate will remain valid and effective only so long as the diplomate maintains an active license to practice medicine from the state in which the diplomate practices or lives. This requirement will be waived only under the following two circumstances:

Fellowship:

This requirement will be waived only during the pendency of fellowship, for fellows for whom the licensure requirement was waived at the time of certification;

Practice Abroad:

This requirement will be waived for diplomates who are practicing abroad, but only during the actual period when they are practicing abroad.

Revocation of Certificates

All certificates issued by the ABP are subject to the provisions of the articles of incorporation and the bylaws of the ABP. Each certificate is subject to possible revocation in the event that:

1. the issuance of such certificate or its receipt by the physician so certified shall have been contrary to or in violation of any of the provisions of the ABP's articles of incorporation or bylaws; or
2. the physician so certified shall not have been eligible to receive such certificate, irrespective of whether the facts constituting him or her so ineligible were known to any or all of the members of the ABP at the time of the issuance of such certificate; or the physician so certified shall have made any misstatement of fact in his or her application for such certificate or in any other statement or representation to the ABP, its members, representatives or agents.

If the ABP obtains probable cause to believe that a certificate should be revoked for any of the reasons set forth above, it may institute proceedings for revocation thereof by mailing written notice to the holder of such certificate that a hearing will be held to determine whether the certificate should be revoked. The steps to be taken are outlined in the Rules of Appellate Procedure of the ABP, which may be obtained by writing to the ABP.

Reinstatement of Certificates

When a certificate issued by the ABP has been revoked, the certificate may be restored once the physician has submitted a request

for reinstatement and the Credentials Committee's recommendation for reinstatement is approved by the Board of Directors.

Additional Information and Inquiries

Please address all inquiries concerning examination applications to:

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Physical Medicine and Rehabilitation [ABPMR] to ascertain whether the information below is current. It is the applicant's responsibility to seek information concerning the current requirements for certification in PM&R. The most current requirements supersede any prior requirements and are applicable to each candidate for certification.)

General Requirements

- A. Requirements for graduates of educational institutions within the United States or Canada
 1. Prior to entry in a residency training program: graduation from a United States or Canadian medical school approved by the Liaison Committee on Medical Education (LCME) or graduation from an osteopathic medical school approved by the American Osteopathic Association (AOA);
 2. Possession of a current, valid, unrestricted license to practice medicine or osteopathy in a United States licensing jurisdiction or Puerto Rico, or licensure in Canada, will be required prior to issuance of the certificate. Evidence of unrestricted licensure in all states where a license is held will be required prior to issuance of the certificate;
 3. Satisfactory completion of the requirements of the Board for graduate education and experience in PM&R as set forth below. A resident is expected to complete training in PM&R in a single accredited program except when significant extenuating circumstances make a change advisable; and
 4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and payment of required fees.
- B. Requirements for graduates of educational institutions outside the United States or Canada
 1. Possession of a valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) prior to entry into a PM&R residency training program;

2. Possession of a current, valid, unrestricted license to practice medicine or osteopathy in a United States licensing jurisdiction or Puerto Rico, or licensure in Canada, will be required prior to issuance of the certificate. Evidence of unrestricted licensure in all states where a license is held will be required prior to issuance of the certificate;
3. Satisfactory completion of the Board's requirements for graduate education and experience in PM&R as set forth below. A resident is expected to complete training in a single accredited program except when significant extenuating circumstances make a change advisable; and
4. Satisfactory compliance with rules and regulations of the Board pertaining to the completion and filing of the application for examination and the payment of required fees.

Residency Training Requirements

Applicants for the certification examinations must have satisfactorily completed 48 months (4 years) of training in a PM&R residency accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPSC). The 48 months of training must be completed after the completion of medical school.

Twelve of the 48 months must consist of a coordinated program of experience in fundamental clinical skills such as an accredited transitional year, or include 6 months or more in accredited training in family practice, internal medicine, pediatrics, or surgery, or any combination of these patient care experiences. The remaining months of this year may include any combination of accredited specialties or subspecialties.

Accredited training in any of the specialties or subspecialties must be for a period of at least 4 weeks. No more than 8 weeks may be in nondirect patient care experiences. Training in fundamental clinical skills must be completed within the first 2 years of the 4-year training program.

The program director and the Credentials Committee of the Board, at the beginning of the residency, will make the decision regarding the acceptability for credit of the 12 months of training in fundamental clinical skills approved by the ACGME, the RCPSC, or the AOA.

The program must include 36 months in PM&R in a training program accredited by the ACGME or the RCPSC. This format is mandatory for all residents who entered training in 1985 or subsequently. A resident is expected to complete training in a single accredited program except when significant extenuating circumstances make a change advisable. In the event of a transfer, the resident is expected to complete all of the PM&R program requirements as outlined by the RRC. *All required training and experience as stated above must be taken in the United States, Puerto Rico, or Canada.*

The training program must include a significant amount of time spent in primary responsibility for the direct patient care management of hospitalized patients on the PM&R service. Residents must devote at least one third of their residency experience to the care of these hospitalized PM&R patients. They must spend at least one third of the training in the care of outpatients, including a significant experience in the care of musculoskeletal problems.

During PM&R training, the resident must develop comprehensive basic and clinical knowledge, skills, experience and measurable competencies in areas such as:

- history and physical examination pertinent to PM&R;
- assessment of neurological, musculoskeletal, and cardiovascular-pulmonary systems;
- determining impairment and disability; data gathering and interpreting of psychosocial and vocational factors;

- achievement of basic qualifications in the performance and interpretation of electrodiagnostic evaluations;
- psychiatric therapeutic and diagnostic injection techniques;
- prescriptions for orthotics, prosthetics, wheelchair and ambulatory devices, special beds, and other assistive devices;
- prescriptions with specific details appropriate to the patient for therapeutic modalities and therapeutic exercises;
- understanding of coordinated psychologic and vocational interventions and tests;
- familiarity with the safety, maintenance, and actual use of medical equipment common to the various therapy areas and laboratories;
- formal experience in evaluation and application of cardiac and pulmonary rehabilitation as related to psychiatric responsibilities;
- inpatient and outpatient pediatric rehabilitation;
- collaboration with other medical professionals and members of the allied health team, including management techniques consistent with the resident's team leadership role, and the treatment program management role of the psychiatrist;
- geriatric rehabilitation;
- sports medicine rehabilitation; and
- injury, illness, and disability prevention.

Also, the resident must achieve the ability to accept progressive responsibility in diagnosing, assessing and managing the conditions commonly encountered by the psychiatrist in the rehabilitative management of conditions, such as:

- acute musculoskeletal pain syndromes;
- chronic pain management;
- congenital or acquired myopathies, peripheral neuropathies, and motor neuron and motor system diseases;
- neurorehabilitative care of traumatic brain injury, cerebrovascular accident, and other brain disorders;
- hereditary, developmental, and acquired central nervous system disorders;
- rehabilitative care of spinal cord trauma and diseases;
- rehabilitative care of patients with amputations for both congenital and acquired conditions in patients of all ages;
- sexual dysfunction common to the patient with physical impairment;
- post-fracture care and rehabilitation of post-operative joint arthroplasty;
- pulmonary, cardiac, oncologic, and other common medical conditions seen in persons with physical disabilities;
- geriatric diseases, impairments, and functional limitations;
- rheumatologic disorders treated by the psychiatrist;
- medical conditions or complications commonly seen and managed in the psychiatric patient;
- medical conditioning, reconditioning, and fitness; and
- soft tissue disorders.

The Program Requirements for Residency Education in PM&R in the current *Graduate Medical Education Directory* provides additional details of PM&R residencies. This book, published annually by the AMA, cites specific programming by the individual residency and its institutional base.

Credit for Other Specialty Training

Physicians who have had 1 or more years of training (up to and including certification) in a program accredited by the ACGME, the RCPSC, or the AOA in related relevant specialties may receive up to a maximum of 12 months of non-PM&R training credit on recommendation of the program director and at the discretion of the Board.

These relevant specialties include internal medicine, neurology, orthopedics, pediatrics, family practice, and surgery. Completion of

36 months of training in an ACGME-accredited PM&R residency is still mandatory.

The Board will consider approval for non-PM&R training credit only upon recommendation of the residency training program director. Alternatively, upon the recommendation of the program director, the Board may accept a noncoordinated ACGME-approved "transitional" year or an ACGME-accredited year of training. This alternative training may be in family practice, internal medicine, pediatrics, neurology, orthopedics, or surgery.

No credit will be given toward shortening the basic required 4-year program for non-ACGME-accredited residencies, fellowships, or internships, for Fifth Pathway in a United States AMA-designated training institution, or for hospital house physician experience. No credit will be allowed for fellowships prior to or during residency training.

All of the required training and experience as stated above must have been taken in the United States, Puerto Rico, or Canada. If a candidate wishes to complete an elective rotation at an international site or at any other location not accredited by the ACGME, the RCPSC, or the AOA, this must be accomplished during the 6 weeks of leave time allowed for each resident.

Absence from Training

A resident should not be absent from the residency training for more than 6 weeks (30 working days) yearly. Regardless of institutional policies regarding absences, any leave time beyond 6 weeks would need to be made up by arrangement with the program director.

"Leave time" is defined as sick leave, vacation, maternity leave, leave for locum tenens, or work in another program that is not ACGME-accredited. A candidate may not accumulate leave time or vacation to reduce the overall duration of training.

Clinical Investigator Pathway

The ABPMR provides an opportunity for interested residents to participate in a Clinical Investigator Pathway (CIP) during their training. The ABPMR's criteria for certification as a clinical investigator require that a resident complete a 5-year residency program that integrates training in PM&R and clinical research.

The purpose of the CIP is to increase both quality and capacity of psychiatric research nationally by enabling a select group of clinically and research-minded residents to become well trained in psychiatric practice and research. The CIP is intended for PM&R residents in PM&R programs that have a strong emphasis on psychiatric research.

Planning

Trainees interested in a research career should work with their residency program director and research mentor to design an appropriate training plan that will provide an adequate clinical experience and meet the Board's requirements. Ideally, planning for their pathway should occur during PGY-1, and the Board must be notified of and approve a trainee's intention to pursue such training by the end of PGY-2.

Training

The first year of the 5-year program is devoted to fundamental clinical skills as required for a PM&R training program. The following 4 years of residency training combine clinical and investigative training. Training should preferably occur at one institution.

PM&R Training

All trainees in the CIP must satisfactorily complete 2 years of accredited PM&R training.

Research Training

Two years of research training at 80% commitment is required. The Board defines research as scholarly activities intended to develop scientific knowledge.

The research experience of trainees should be mentored and reviewed; training should include completion of work leading to a graduate degree (if not already acquired). The last year of research training may be undertaken in a full-time faculty position if the level of commitment to mentored research is maintained at 80%.

Clinical Experience during Research Years

During PM&R research training, 20% of each year must be spent in clinical experiences. Ratings of satisfactory clinical performance must be maintained annually for each trainee in the CIP.

Certification Examination in PM&R

Trainees in the PM&R clinical investigator pathway may apply for the written (Part I) certification examination in PM&R after successful completion of 4 years of training, which must include 24 months of accredited training in PM&R and 12 months of research training. Trainees may apply for the oral (Part II) examination after successful completion of 5 years of residency training.

The ABPMR certification examinations and the Board certificate are the same for all Board candidates whether they pursue the clinical investigator pathway or standard PM&R training. A table illustrating the requirements for the ABPMR Clinical Investigator Pathway follows.

PM&R Clinical Investigator Pathway Requirements

Fundamental skills training	12 months
PM&R training	24 months
Research training (80%)	24 months
Clinical training during research (20%)	1 day/week
Total training	5 years

Dual Specialty Certification

Residents may elect to pursue integrated training in PM&R and another specialty by enrolling in a combined training program. The ABPMR currently approves three types of combined training: pediatrics and PM&R, internal medicine and PM&R, or neurology and PM&R. All three programs require completion of at least 36 months of accredited training in general comprehensive PM&R.

The proposed program agreed to by the respective residency training program directors should be submitted by the program directors to both Boards for approval. Admissibility to Part I of the PM&R certification examination may be sought during the last year of training.

A full year of clinical practice, fellowship, research, or a combination of these activities, consisting of at least 6 months of clinical practice in PM&R, is required for admissibility to the Part II certification examination in PM&R. Guidelines for program directors interested in developing such a program are available through the ABPMR office.

Combined Training in Pediatrics and PM&R

A special agreement exists between the American Board of Pediatrics (ABP) and the ABPMR whereby a physician interested in dual specialty certification in pediatrics and PM&R can qualify for admission to the certification examinations of both Boards. The individual resident must be registered in an approved combined Peds/PM&R residency training program no later than the end of the R-2 year of the combined program.

The programs are designed to be completed in a minimum of 60 months. Vacation is shared pro rata between the training time spent in pediatrics and that spent in PM&R. The non-PM&R

12-month segment of the 4-year PM&R residency will be credited based on satisfactory completion of the regular first year of pediatric residency.

The ABP requires a minimum of 36 months of general comprehensive pediatric training with 6 months' credit for pediatric rehabilitation within the PM&R training. The ABPMR requires a minimum of 36 months of an accredited PM&R residency with 6 months' credit for related rotations during the pediatric training. These rotations could include developmental pediatrics, neonatology, pediatric neurology, pediatric neurosurgery, or pediatric orthopedics.

Six months' full-time equivalent (FTE) of pediatric rehabilitation is required. Twenty-four months of the 36 months PM&R training must be in adult PM&R.

It is recommended that all training be completed at one academic institution; any deviation will require prospective approval by both Boards. When two separate institutions are involved, there should be evidence of adequate coordination to provide an appropriate educational experience.

Combined Training in Internal Medicine and PM&R

A special agreement exists between the American Board of Internal Medicine (ABIM) and the ABPMR whereby a prospective resident interested in dual specialty certification in internal medicine and PM&R can qualify to apply for admission to the certification examination of each Board. Admissibility is determined by satisfactory completion of a preplanned, combined, and integrated program that could be designed to be completed in a minimum of 60 months. Before the end of the R-2 level of training in either specialty, the ABPMR prospectively requires approval of a detailed curricular plan for a given resident approved by both Boards and signed by both program directors.

The non-PM&R 12-month segment of the 48 months of PM&R residency concerned with basic fundamental clinical skills will be credited on the basis of satisfactory completion of the regular first year of internal medicine residency.

In addition, the ABPMR requires a minimum of 36 months of accredited PM&R residency with 6 months' credit for internal medicine rotations. These rotations may be in such areas as rheumatology, endocrinology, cardiovascular, or pulmonary subspecialties of internal medicine.

During the 30 months in PM&R, the resident must satisfactorily complete 24 months of hospital and outpatient clinical management of patients receiving PM&R services. Physical medicine and rehabilitation training includes basic and advanced knowledge of musculoskeletal and neuromuscular anatomy and physiology as related to kinesiology, exercise, and functional activities as well as to immobilization and inactivity. Applications and prescription of therapeutic exercise, orthotics, prosthetics, assistive and supportive devices for ambulation and mobility are essential.

The following segments of training in PM&R are also required:

- experience with inpatient or outpatient pediatric rehabilitation,
- adequate training to achieve basic qualifications in electromyography and electrodiagnosis, and
- opportunities to achieve understanding of special aspects of rehabilitation of patients in geriatric age groups.

The 3-year internal medicine residency requirements are met in part by the ABIM recognizing 6 months' credit for PM&R residency training involving PM&R management of patients with problems related to internal medicine. Such problems include those occurring in patients with rheumatologic, cardiovascular, pulmonary, stroke, and oncologic conditions.

It is recommended that all training be completed at one academic institution. If two separate institutions are involved, there should be evidence of adequate coordination to provide an

appropriate educational experience. Any deviation requires prospective approval by both Boards. After the program is approved, the resident's registration form is submitted. Vacation is shared pro rata between the two training programs.

Combined Training in Neurology and PM&R

The American Board of Psychiatry and Neurology (ABPN) and the ABPMR have approved the proposal that residents interested in dual certification in neurology and PM&R can qualify to apply for admission to the certification examinations of each Board. This is accomplished by satisfactory completion of an integrated program planned and approved by both Boards before the end of the R-2 year, designed to be completed in a minimum of 72 months.

For purposes of this dual certification, both specialty Boards require a 12-month basic clinical skills segment in internal medicine. The ABPMR requires a minimum of 36 months of accredited PM&R residency, and the ABPN requires 36 months of accredited neurology residency.

In order to decrease the total training time to 72 months (a reduction of 1 year), 12 months of training in areas that satisfy the special requirements in neurology and in PM&R must consist of 6 months of training in PM&R acceptable to the program director in neurology and 6 months of training in neurology acceptable to the program director in PM&R.

It is recommended that all training be completed at one academic institution. If two institutions are involved, adequate coordination should provide an appropriate educational experience that meets the requirements and approval of each Board. Before the end of the R-2 year of training in either specialty, both program directors sign and submit a training plan for a given resident to the ABPMR for approval. After the program is approved, the resident's registration form is submitted. Vacation is shared pro rata between the two training programs.

Examination Admissibility Requirements

Part I

Part I of the ABPMR's certification examination is administered as computer-based testing (CBT). To be admissible to Part I of the Board certification examination, candidates are required to satisfactorily complete at least 48 months of postgraduate residency training, of which at least 36 months should be spent in supervised education and clinical practice in PM&R as part of an ACGME-accredited training program.

Satisfactory completion of the educational and training requirements in force at the beginning of the resident's training in an accredited program will be considered acceptable for application for admissibility to the certification examinations.

Final admissibility is contingent upon receipt of the final-year evaluation by the program director, due May 1 in the examination year. If a resident is placed on probationary status during the final year of the residency program, this status must be rescinded by the program director before May 1 for the resident to be admissible.

In order to have the application considered for examination, the applicant must be scheduled to complete the graduate medical education requirements on or before August 31 following the scheduled examination date for which he or she has applied.

Residents in approved PM&R programs in Canada, upon satisfactory completion of all the requirements for certification in that country, may apply for admissibility to Part I of the certification examination.

Part II

At least 1 full-time or equivalent year of PM&R clinical practice, PM&R-related clinical fellowship, PM&R-related research

fellowship, or a combination of these activities is required after satisfactory completion of an accredited PM&R residency training program.

The clinical practice must provide evidence of acceptable professional, ethical, and humanistic conduct attested to by two Board-certified psychiatrists in the candidate's local or regional area. In rare instances in which a psychiatrist is not geographically available, two licensed physicians in the area may support the candidate's application for Part II.

Alternatively, a candidate may take Part I and Part II in the same year if all residency training and practice time requirements have been completed. However, if the candidate does not pass Part I, the results of Part II will not count or be recognized in any way.

Also required is the candidate's possession of a current, valid, unrestricted license to practice medicine or osteopathy in a United States licensing jurisdiction or Puerto Rico, or licensure in Canada. Evidence of this unrestricted licensure in all states where a license is held must be submitted with the application for certification examinations.

In order to have the application considered for examination, the applicant must be scheduled to complete the clinical practice requirements on or before August 31 following the scheduled examination date for which he or she has applied.

Application Requirements and Fees

Application Documentation — Part I

The application form for Part I (computer-based testing) that must be submitted by an applicant for the examination leading to certification can be obtained only by writing to the Board. The completed application must contain:

- a copy of the medical degree diploma or certificate,
- the program director's statement that the applicant has or is anticipated to have satisfactorily completed an approved graduate program, and
- the names of three or more psychiatrists or other physicians to whom the Board can write for professional and character references.

The applicant must submit a form, received from the Board, to the residency training program director; this form requests the rating of the professional ability of the applicant. The program director should promptly return the completed form to the Board office.

No decision regarding an applicant's admissibility to the examinations will be made until the physicians from whom references are requested have replied. All information submitted to the Board by a physician from whom a reference has been requested will remain confidential and will not be disclosed to the applicant without the permission of the said physician. Strict confidentiality of references submitted is required to ensure that the Board will receive complete and accurate evaluations of all applicants.

Application Documentation — Part II

An applicant applying for Part II must complete a form provided by the Board which describes the professional time spent during his/her 1 full-time or equivalent year of PM&R clinical practice, PM&R-related fellowship, PM&R-related research, or combination of these.

The applicant must also submit statements from two physicians (from the applicant's local or regional area), preferably Board-certified psychiatrists, verifying the applicant's 1 year in clinical practice, fellowship, research, or combination of these according to acceptable professional, ethical, and humanistic standards. Acceptable verification statements and/or references will be from individuals unrelated to the candidate, whether family member, spouse, or significant other.

The applicant is required to submit copies of all current, valid, unrestricted licenses to practice medicine or osteopathy in a United States licensing jurisdiction or Puerto Rico, or licensure in Canada. Evidence of unrestricted licensure in all states where a license is held will be required.

Accommodations for Persons with Disabilities

The ABPMR supports the Americans with Disabilities Act (ADA) and makes reasonable accommodations in examination procedures for individuals with documented disabilities. Applicants with disabilities may request modifications in the administration of the examination. The Board will grant such requests unless the modifications would place undue burden on the ABPMR or would fundamentally alter the measurement of the knowledge or skills that the examination is intended to test.

Applicants considering the need for modifications are urged to obtain from the Board a copy of Procedures for Requesting Accommodations under the ADA. This publication outlines the documentation required of applicants with disabilities who request examination modifications.

All required documentation must be submitted to the Board office by January 1 of the year of the scheduled examination. Applicants anticipating the need for accommodations should contact the Board office well in advance of January 1 to allow sufficient time to submit any required documentation by the January 1 deadline.

Deadline

The appropriate fees and the completed application materials for admissibility must be postmarked and mailed by November 15 preceding the scheduled examination. This applies to initial applications or reapplications for Part I only, Part II only, or Parts I and II in the same year.

An additional \$250 penalty fee will be required for consideration of applications postmarked after November 15 and before December 15. The postmark applied by the United States Postal Service (or the appropriate national postal service for non-US citizens) is the date of mailing and takes precedence over postmarks applied by in-house mailing equipment.

Fees

All fees must accompany the application for examination.

Part I

An applicant who plans to take Part I only must submit a fee of \$1,100. Of this amount, \$250 covers an application-processing fee and is not refundable.

Part II

An applicant who plans to take Part II only must submit a fee of \$1,100 along with the required documentation for Part II application. Of this amount, \$250 is an application-processing fee and is not refundable.

Parts I and II

An applicant who plans to take both Part I and Part II in the same year must submit a fee of \$2,200 with the application. Of this amount, \$500 is an application-processing fee and is not refundable.

Late Fee

An additional \$250 is required after the November 15 deadline.

Reapplication

Physicians who have failed Part I or Part II can apply for admissibility for reexamination during any subsequent examination period.

The same requirements will be in effect for reapplication as for initial admissibility.

As indicated in the earlier fee schedule, fees for reapplication are \$1,100 for Part I or \$1,100 for Part II. If both Parts I and II are retaken the same year, the fee is \$2,200. A \$250 nonrefundable processing fee, which is required for each Part I or Part II application for reexamination, is included in these fees. Currently, there is no limit to the number of times a physician may apply for repeat examinations.

Refunds and Forfeiture of Fees

Except as hereafter provided, no fees paid will be refunded. The Board will return the refundable portion of the fee only in the event that

- an applicant withdraws the application prior to the meeting of the Board to act thereon, or
- an applicant is declared not admissible to the examination.

Once an applicant has been declared admissible and is a candidate, the fees will be forfeited if the candidate withdraws for any reason, or does not appear for the scheduled examination for which he/she applied.

The ABPMR does not assume responsibility for notifying an applicant of the impending loss of admissibility due to an incomplete application or incomplete qualifications.

The Board is a nonprofit organization, and the candidates' fees are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. The Board reserves the right to change the fees when necessary.

Examination Policies and Procedures

Designation of Admissibility

"Board admissible" is a term used by the Board to define the status of an applicant who has been accepted by the Board as a candidate to take the examination for which he/she has applied. Designation of "Board admissible" does not continue beyond the date such an examination is given, regardless of results. The Board does not accept any use of the term "Board eligible" in lieu of documented admissibility.

A. For applicants who have not previously applied, or who have previously applied and have withdrawn their application, or who have previously applied and have been declared not admissible

The procedures required for these applicants toward becoming admissible to Board examination are as follows:

1. On-time filing of the completed application form, license, and educational credentials;
2. Payment of the fees for the examination (see earlier fee structure);
3. Submittal of requested references;
4. Confirmation from the Board office verifying Board action regarding the applicant's admissibility status.

B. For applicants who are reapplying for Part I, having failed Part I, or having applied but not having taken Part I of the examination

The procedures required for these applicants toward becoming admissible to Board examination are as follows:

1. Submission of a letter from the applicant to the Board requesting admissibility for reexamination;
2. Payment of the fees for the examination (see earlier fee structure);
3. Confirmation from the Board office verifying Board action regarding the applicant's admissibility status.

C. For applicants who are applying for Part II, having successfully completed Part I; or who are reapplying for Part II, having failed Part II but having successfully completed Part I

The procedures required for these applicants toward being designated as admissible to Board examination are as follows:

1. Submittal by the applicant to the Board of a letter of application for the examination, or, if required, the resubmittal of an application form. The completed form describes the required PM&R clinical practice, PM&R-related fellowship, PM&R-related research, or a combination of these;
2. Payment of the fees for the examination (see earlier fee structure);
3. Provision by applicant to the Board of a copy of a current, valid, unrestricted licenses from all states where a license is required;
4. On-time filing of completed forms from two physicians (preferably Board-certified physiatrists) verifying 1 year of clinical practice, fellowship, research, or a combination of these;
5. Board office verification of Board action regarding the applicant's admissibility status.

D. Following the establishment of Board admissibility, the candidate will be notified of the time and place for the examination.

Note: Due to the large volume of documentation that the Board office will be receiving and processing on or before November 15, we ask that applicants do not call to verify receipt of their mailing. Applicants should check with their training director to see if documentation was sent to the Board office. An applicant who does not receive any notification from the Board regarding his/her application by December 15 should then contact the Board office.

The Examination

As part of the requirements for certification by the ABPMR, candidates must demonstrate satisfactory performance in an examination conducted by the Board covering the field of PM&R. The examination for certification is given in two parts, computer-based (Part I) and oral (Part II).

Part I and Part II of the Board examination are given once each year, usually in May at such times and places as the Board designates. While Part I of the examination is administered the same day and time at selected Prometric testing centers, Part II is administered only at the Rochester test site.

Candidates should not bring cellular telephones, pagers, laptop computers, recording devices, computer disks, books, or study materials into the examination room for either type of examination. The candidate may not leave the examination room with notes he or she has taken, whether during the computer-based or oral examination. Any materials produced during the session are to remain with the proctor or examiner.

Additional information provided in several brochures, including the revised and retitled *Preparing for the Computer-Based ABPMR Examination*, the new *Computer-Based Testing Fact Sheet*, and *Preparing for the ABPMR Oral Examination*, may be of interest to applicants. Copies of all are available from the Board office.

Part I

The computer-based examination is divided into morning and afternoon periods, each allowing approximately 4 hours. An on-screen tutorial is available at the beginning of either session, allowing examinees to become familiar with both the computer and the format of the examination.

The examination questions are designed to test the candidate's knowledge of basic sciences and clinical management as related to PM&R and will be in the form of objective testing.

Part II

The directors of the Board give the oral examinations, with the assistance of selected guest examiners. Three examiners examine the candidate, each examiner conducting a 40-minute segment of the

total 120-minute examination. Two 5-minute breaks divide the three portions of the oral examination.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that come within the field of PM&R. During the oral examination, the examiner will ask questions about diagnostic procedures, therapeutic procedures, and patient management.

Candidates will be expected to present in a concise, orderly fashion evidence of their proficiency in the management of various clinical conditions that come within the field of PM&R. During the oral examination, the examiner will ask questions about diagnostic procedures, therapeutic procedures, and patient management. The candidate should be prepared to demonstrate familiarity with the literature of basic and clinical research, giving evidence of application of the literature to evidence-based medicine. Conciseness and clarity of statements are expected. Evidence of the professional maturity of the candidate in clinical procedures and of factual knowledge will be sought.

In the event a candidate taking both Parts I and II examinations in the same year fails Part I of the examination, results of Part II will not count or be recognized in any way. Both Parts I and II would need to be retaken for certification.

In addition to clinical PM&R, the oral portion of the examination may cover certain aspects of the basic sciences. The basic science components of the examinations may include anatomy, physics, physiology, pathology, and other fundamental clinical sciences and competencies as listed under Residency Training Requirements, above.

The Certificate

Upon approval of the application and the candidate's successful completion of the examinations, the Board will grant a certificate to the effect that the candidate has met the requirements of the Board. The recipient of a certificate will be known as a diplomate, or a certificate, of the American Board of Physical Medicine and Rehabilitation.

The Board began issuing 10-year, time-limited diplomate certificates in 1993. The expiration date for these certificates is June 30 of the given year. Recertification procedures and requirements are described briefly in a following section, and in depth in a separate *Booklet of Information* available upon request from the Board office. Certificates issued prior to 1993 have no time-limited stipulations; however, holders of these pre-1993 certificates may voluntarily participate in recertification.

Residents entering a training program are hereby informed and must be aware that time-limited certification for PM&R began in 1993 for all diplomates certified thereafter.

A certificate granted by this Board does not of itself confer or purport to confer any degree or legal qualifications, privileges, or license to practice PM&R. The Board does not limit or interfere with the professional activity of any duly licensed physician who is not certified by this Board. Privileges granted physicians in the practice of PM&R in any hospital or clinic are the prerogatives of that hospital or clinic, not of this Board.

Revocation of Certification

Any certificate issued by the Board remains the property of the Board. Any certificate issued by the Board shall be subject to revocation at any time if the Board determines, in its sole judgment, that the diplomate holding the certificate was in some respect not properly qualified to receive or retain it. The Board may at its discretion revoke a certificate for due cause, including, but not limited to, the following:

1. The diplomate made any material misstatement or omission to the Board;

2. The diplomate did not possess the necessary qualifications and requirements to receive the certificate at the time it was issued, whether or not the Board knew of such a deficiency;
3. The diplomate engaged in irregular behavior in connection with an examination of the ABPMR, whether or not such practice had an effect on the performance of the candidate on that examination.

Examples of irregular behavior may include, but are not limited to, copying answers from or knowingly giving answers to another individual, using notes during an examination, copying or distributing examination questions, or failing to return an examination booklet in the prescribed manner to the ABPMR or its representatives;

4. The diplomate misrepresented his/her status with regard to Board certification, including any misstatement of fact about being Board certified in any specialty or subspecialty;
5. The diplomate engaged in conduct that violated the moral or ethical standards of medical practice accepted by organized medicine in the locality where the diplomate is practicing, resulting in a revocation, suspension, qualification or other limitation of his/her license to practice medicine, or the expulsion, suspension, disqualification, or other limitation from membership in a local, regional, national, or other organization of his/her professional peers; or
6. The diplomate's license to practice medicine has been revoked, suspended, qualified, or limited in any jurisdiction.

If the Board determines to revoke any certificate for any reason, the person affected thereby shall be given written notice of the reasons for the proposed revocation. Such actions by the Board shall be regarded as final, unless the person affected requests an appeal pursuant to the Board's Appeal Procedure, and, in that event, the Board action will be considered final on the conclusion of the appeal. (Contact the ABPMR office for the Board's Appeal Procedure.)

Upon revocation of certification, the holder shall return the ABPMR certificate and other evidence of certification to the Board, and his/her name shall be removed from the list of certified physiatrists.

Certificate Reinstatement

Should the circumstances that justified revocation of the certificate be corrected, the Board may, at its discretion, reinstate the certificate after appropriate review of the individual's licensure and performance, using the same standards and requirements applied to the applicants for certification.

Communication

Diplomate Listings

The names of consenting diplomates of the Board appear in *The Official ABMS Directory of Board Certified Medical Specialists*, published by Elsevier Science, New York, NY, and other authorized ABMS publications.

A listing of newly certified ABPMR diplomates appears annually in the July issue of the *Diplomate News*.

Reporting Changes in Information

Once certified, diplomates are asked to notify the ABPMR office of any changes in address, place of employment, telephone or fax number, or personal name. Such information must be submitted in writing by fax or mail. For name changes, a copy of the official documentation is required. Diplomates are responsible to notify the Board office regarding any licensure changes.

Special Policies and Procedures

Unethical or Irregular Behavior

Candidates who apply to take an examination must certify that the information they provide in their applications is true and accurate. Examples of unethical or irregular behavior include, but are not limited to, situations where:

1. any misrepresentation is discovered in the candidate's application, in any other information submitted to the Board, or in the identity of a person applying to take or sitting for the examination;
2. any financial or other benefit is offered by a candidate to any director, officer, employee, proctor, or other agent or representative of the Board in order to obtain a right, privilege, or benefit not usually granted by the Board to similarly situated candidates;
3. any irregular behavior during the examination, such as copying answers, sharing information, using notes, or otherwise giving or receiving aid is discovered by observation, statistical analysis, or answer sheets (score sheets), or otherwise; or
4. the chief proctor of the written examination or the oral examiner deems any portion of the candidate's absence from the designated examination room for whatever reason and any duration as unexcused or otherwise impermissible.

The candidate in question shall be given written notice of the charges and an opportunity to respond in accordance with the Appeal Procedure set forth in the rules and regulations of the Board.

If the Board determines that a violation has occurred, the Board may permanently bar the person(s) involved in the violation from all future examinations, invalidate the results of, or refuse to score, prior examinations taken by the person(s), withhold or revoke the certificate(s) of the person(s), and/or take other appropriate action. If sanctions are imposed pursuant to the rules and regulations of the Board, the Board may notify legitimately interested third parties of its action.

If the Board determines that irregular behavior has occurred during an examination, the Board will make every effort to withhold the scores of only those candidates directly implicated in the irregularity. In some instances, the evidence of irregularity, though sufficiently strong enough to cast doubt on the validity of scores, may not enable the Board to identify the specific candidates involved in the irregularity. In such circumstances, the Board may withhold the scores of candidates not directly implicated in the irregularity and, if necessary, may require those candidates to take an additional examination at a later date to ensure the validity of all scores.

The examination booklets are copyrighted as the sole property of the Board and must not be removed by the candidate from the test area or reproduced in any way. Any reproduction of the test booklet or collection of administered test items, in whole or in part, is a federal offense and also may subject the candidate to the sanctions listed above. No notes, textbooks, other reference materials, scratch paper, or electronic devices may be taken into either the written or oral certification examination.

Misrepresentation

Misrepresentation or alleged misrepresentation of a person as a diplomate of the American Board of Physical Medicine and Rehabilitation, or as having obtained a status of eligibility to take the certification examination, will be investigated and acted upon by the ABPMR. The Board will seek verifiable evidence of such misrepresentation from the individual in question and other sources. Once sufficient evidence for reasonable verification of such misrepresentation has been obtained, the Board will notify the individual and each related licensing agency of the evidence it has been able to obtain.

Such misrepresentation may include, but is not limited to, inclusion of an uncertified physician's name in a listing of other certified physicians, whether in newspapers, telephone yellow pages, or other means of soliciting patients, with the implication that all so listed are certified in PM&R.

Substance Abuse

If a history of substance abuse exists, candidates must provide documentation that they can safely and effectively perform the duties and responsibilities of a Board diplomate. The Board treats this information as confidential. Such documentation may consist of

1. evidence of a successful completion of a supervised treatment program,
2. evidence of a documented period of abstinence, or
3. evidence of current participation in a supervised rehabilitation program combined with evidence that the candidate is no longer engaged in the abuse of drugs and/or alcohol.

Appeals

The Board has adopted appeal procedures and an appellate review process. The procedures are available to individuals who disagree with the Board's decisions regarding applications for certification and admissibility to examinations, requests for accommodations due to disabilities, written examination, oral examination process and procedures, oral examination results, and other matters.

A copy of the Appeal Procedure and appellate review process is available upon request from the Board office. Failure to comply with the Appeal Procedure, including the requirement that appeals be instituted within 30 days after notice was given of the decision or action to be appealed, results in a waiver of appeal rights.

Recertification

Beginning in 1993, the Board issued time-limited certificates that are valid for 10 years. To maintain certification beyond the 10-year period, diplomates certified since 1993 must participate in the recertification program.

The guiding principle of the recertification program of the ABPMR is to foster the continuing development of excellence in patient care and all aspects of the practice of PM&R by its diplomates. Through its recertification program, the ABPMR seeks to encourage, stimulate, and support its diplomates in a program of self-directed, life-long learning through the pursuit of continuing medical education.

The recertification process permits diplomates to demonstrate that they continue to meet the requirements of the ABPMR. Recertification also provides patients and their families, funding agencies, and the public in general with assurance of the continuing up-to-date knowledge of PM&R diplomates.

To participate in the recertification program, an ABPMR diplomate must:

- hold a current, valid, unrestricted license to practice medicine or osteopathy in a United States licensing jurisdiction or Puerto Rico, or licensure in Canada. Evidence of unrestricted licensure in all states where a license is held will be required;
- pay an annual \$75 fee;
- provide evidence of an average of 50 continuing medical education (CME) credits annually, for a total of 500 CME hours over the 10-year period (with all such CME credits being recognized by the AMA or AOA); and
- successfully complete a written or computer-based examination. Beginning in 2005, this will be a proctored examination.

Diplomates are automatically enrolled in the recertification program upon issuance of their time-limited certificates. Those who do not pay their fees or do not report CME credits for 4 or more years are considered nonparticipants. The Board office will notify

nonparticipants when their certificates have expired. Delayed participation in the recertification process may require completion of the requirements for initial certification, so diplomates are advised to monitor their participation carefully.

The recertification examination is an open-book, take-home test consisting of 200 multiple-choice questions. Diplomates have 10 weeks to complete the examination and return it to the ABPMR. The examination content is organized into modules. All participants complete a core module. The participants then select two additional modules from specific subspecialty areas in PM&R.

For complete information on the recertification process and requirements, refer to the current Recertification Booklet of Information from the Board office.

Subspecialty Certification

Spinal Cord Injury (SCI) Medicine

The authority to grant subspecialty certification in SCI medicine was granted to the ABPMR by the ABMS in March 1995, with the first examination given in October 1998. The application and information on the examination process for subspecialization in spinal cord injury medicine are available to all diplomates of ABMS Member Boards.

The examination administered in October 2002 will be the final paper-and-pencil examination for this subspecialty. Effective 2003, this examination will be a computer-based test (CBT) that is administered at selected Prometric Testing Centers throughout the US and Canada. Applications are available after April 1, with completed applications due by July 1 each year. The *Subspecialty Certification in Spinal Cord Injury Medicine Booklet of Information*, which summarizes the training and/or practice requirements and the application process, including deadlines and fees, is available from the ABPMR office or via the ABPMR Web site. A brochure, *Preparing for the ABPMR Examination for Subspecialty Certification in Spinal Cord Injury Medicine*, is provided to all applicants and is available to others upon request.

Pain Management

In March 1998, the ABPMR and the American Board of Psychiatry and Neurology (ABPN) joined the American Board of Anesthesiology (ABA) in recognition of pain management as an interdisciplinary subspecialty with a single standard of certification. The ABA administers a single examination covering the various content areas of pain management. Examinations are administered annually in September. Contact the Board office for specific dates.

The *Subspecialty Certification in Pain Management Booklet of Information*, which summarizes the training and/or practice requirements and the application process, including deadlines and fees, is available from the ABPMR office and via the ABPMR Web site. Applications are available from the ABPMR in January, with a due date of February 15. The fellowship or practice requirement must be completed by August 31.

Pediatric Rehabilitation Medicine (PRM)

The authority to grant subspecialty certification in pediatric rehabilitation medicine (PRM) was granted to the ABPMR by the ABMS in March 1999. The application and information on the examination process for subspecialization in PRM will be made available to all ABPMR Diplomates.

The *Subspecialty Certification in Pediatric Rehabilitation Medicine Booklet of Information*, which summarizes the training and/or practice requirements and the application process, including deadlines and fees, is being developed. A fact sheet is available from the Board office. Interested individuals may contact the Board office to be placed on a mailing list.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Plastic Surgery, Inc [ABPS], to ascertain whether the information below is correct.)

Introduction

The ABPS, which was organized in June 1937 by representatives of various groups interested in this type of surgery, received recognition as a subsidiary of the American Board of Surgery (ABS) in May 1938. The ABPS was given the status of a major specialty board in May 1941 by action of the Advisory Board for Medical Specialties as approved by the Council on Medical Education of the American Medical Association (AMA), which has designated certain specialty fields as being suitable to be represented by specialty boards.

The Board is organized under the laws of the State of Illinois for charitable, scientific, and educational purposes. No part of its net earnings shall inure to the benefit of any private member, director, officer, or other individual, nor shall the Board ever declare or make to any such persons any dividend or other distribution. Nothing herein, however, shall prevent the payment of reasonable compensation for services rendered or the reimbursement of reasonable expenses incurred in connection with the Board's affairs.

Plastic surgeons certified by the Board are listed in the *Official ABMS Directory of Board Certified Medical Specialists*, published by Elsevier Science in cooperation with the American Board of Medical Specialties (ABMS).

Mission Statement

The mission of the ABPS is to promote safe, ethical, efficacious plastic surgery to the public by maintaining high standards for the examination and certification of plastic surgeons as specialists and subspecialists.

Description of Plastic Surgery

Plastic surgery deals with the repair, reconstruction, or replacement of physical defects of form or function involving the skin, musculoskeletal system, cranio-maxillofacial structures, hand, extremities, breast and trunk, and external genitalia. It uses aesthetic surgical principles not only to improve undesirable qualities of normal structures but also in all reconstructive procedures as well.

Special knowledge and skill in the design and surgery of grafts, flaps, free tissue transfer, and replantation is necessary. Competence in the management of complex wounds, in the use of implantable materials, and in tumor surgery is required. Plastic surgery has been prominent in the development of innovative techniques such as microvascular and cranio-maxillofacial surgery, liposuction, and tissue transfer. The foundation of surgical anatomy, physiology, pathology, and other basic sciences is fundamental to this specialty.

Competency in plastic surgery implies a special combination of basic knowledge, surgical judgment, technical expertise, ethics, and interpersonal skills in order to achieve satisfactory patient relationships and problem resolution.

Sponsoring Organizations

The ABPS consists of at least 20 directors who manage the affairs of the organization. The Board elects one Director from names submitted by the American Board of Surgery. Public member(s) are elected from nominations submitted by the Directors. The Board elects at least 19 directors from names submitted by the following 21 sponsoring organizations:

- The Aesthetic Surgery Education & Research Foundation, Inc
- American Association for Accreditation of Ambulatory Surgical Facilities, Inc
- Association of Academic Chairmen of Plastic Surgery
- The American Association for Hand Surgery
- The American Association of Plastic Surgeons
- The American Association of Pediatric Plastic Surgeons
- The American Burn Association

- The American Head and Neck Society
- American Society Cleft-Palate Craniofacial Association
- American Association for the Peripheral Nerve
- The American Society for Reconstructive Microsurgery
- The American College of Surgeons
- The American Society for Aesthetic Plastic Surgery, Inc
- The American Society for Surgery of the Hand
- The American Society of Maxillofacial Surgeons
- The American Society of Plastic and Reconstructive Surgeons
- The American Surgical Association
- The Canadian Society of Plastic Surgeons
- The Council of Regional Societies of Plastic and Reconstructive Surgery
- The Plastic Surgery Research Council
- Plastic Surgery Education Foundation

Once elected to the Board, that person's obligation will be primarily to the Board and not to the sponsoring organization.

In addition, one director is elected by the Board from names submitted by the ABS.

These individuals are the directors of the Board. Surgeons who fulfill the requirements of the Board and who are granted certification by the Board are known as diplomates of the ABPS.

Purposes

The essential purposes of the Board are

1. to establish requirements for the qualifications of applicants who request a certificate of their ability in the field of plastic surgery in its broadest sense;
2. to conduct examinations of approved candidates who seek certification by the Board;
3. to issue certificates to those who meet the Board's requirements and pass the respective examinations;
4. to do and engage in any and all lawful activities that may be incidental or reasonably related to any of the foregoing purposes.

The Board is not an educational institution, and certificates issued by the Board are not to be considered degrees. The certificate does not confer on any person legal qualifications, privileges, or license to practice medicine or the specialty of plastic surgery.

Standards of certification are clearly distinct from those of licensure; possession of a Board certificate does not indicate total qualification for practice privileges, nor does it imply exclusion of others not so certified. The Board does not purport in any way to interfere with or limit the professional activities of any licensed physician, nor does it desire to interfere with practitioners of medicine or any of their regular or legitimate activities.

It is not the intent nor has it been the function of the Board to define requirements for membership on the staff of hospitals or to define who shall or shall not perform plastic surgical operations. The Board is not a primary source of censure or primary review of ethical problems.

Policies

It is the Board's prerogative to determine the professional, ethical, moral, physical, and mental fitness of any candidate for its certificate.

The Board will consider opinions expressed concerning an individual's credentials only if they are in writing and signed.

It is the policy of the Board to maintain its autonomy and independence from political and economical considerations that might affect plastic surgery.

Advertising Requirements

The Board recognizes the role of legitimate advertising in the changing medical scene, but it does not approve of advertising that

arouses unrealistic expectations, is false or misleading, minimizes the magnitude and possible risks of surgery, or solicits patients for operations that they might not otherwise consider.

Such advertising is improper and inconsistent with the high standards of professional and ethical behavior implied by certification by the ABPS. Misstatements regarding Board status are also inconsistent with the minimum ethical standards of the certified physician. The Board may penalize individuals misstating their status.

Although in the examination process, candidates may not advertise any status with the Board until certified after passing the Oral Examination. This includes, but is not limited to, statements, forms, or images that express or imply that one is a candidate, admissible, eligible, qualified, or affiliated with the Board prior to achieving certification.

Candidates also may not represent themselves as members of the American Society of Plastic Surgeons (ASPS) by statements or use of the Society symbol as this can be regarded by the public as evidence of certification by the Board. The Board recommends that candidates and senior partners contact the marketing department of ASPS to determine adherence to the Society's policies before placing practice advertisements in print.

A candidate will be deferred from the examination process for at least 1 year if the Board receives written documentation of such advertising.

General Requirements

The following requirements for admissibility are in agreement with those promulgated by the ABMS:

1. The Board will accept only those persons whose major professional activity is limited to the field of plastic surgery.
2. The person must maintain an ethical standing in the profession and moral status in the community acceptable to the ABPS in conformity with the Code of Ethics of the ASPS. Moral and ethical practices that do not conform with the ASPS Code of Ethics may result in rejection of an application or in deferral of examination until such matters have been resolved satisfactorily.

The Board may deny a candidate the privilege of sitting for an examination, or may refuse issuance of a certificate, if it is found by additional disclosures or a recent change in status that the candidate no longer meets the general or professional requirements.

Professional Requirements

The Board considers the requirements detailed in the sections on prerequisite training and training requirements to be minimal. Candidates are encouraged to take advantage of broadening experiences in other fields.

The Board reserves the right to

1. request lists of operations performed solely by the candidate for 1 or more years;
2. request special and extra examinations: written, oral, or practical;
3. request any specific data concerning the candidate that may be deemed necessary before making a final decision for certification;
4. consider evidence that a candidate's practice after completion of training is not in accord with generally accepted medical or ethical standards, which may result in rejection of the application or deferral of the examination until such time as the matter has been satisfactorily resolved.

Undergraduate Medical or Osteopathic Education

Before prerequisite training, candidates must have graduated from a medical school in a state or jurisdiction of the United States that is accredited at the date of graduation by the Liaison Committee for

Medical Education (LCME), a Canadian medical school accredited by the Committee on Accreditation of Canadian Medical Schools (CACMS), or a US osteopathic school accredited by the American Osteopathic Association (AOA).

Graduates of medical schools located outside the jurisdiction of the United States and Canada must possess a currently valid standard certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) or have completed a Fifth Pathway program in an accredited school of medicine in the United States.

Official Evaluation of Prerequisite Training

Official evaluation of prerequisite training by the Board is required prior to the initiation of residency training in plastic surgery for residents in independent programs and after the first year of residency for those in integrated plastic surgery programs. This simple preliminary step will prevent later disappointment. It is the responsibility of all residents in plastic surgery to obtain this evaluation. The Request for Evaluation of Training Forms are mailed upon request throughout the year. There is no deadline for submission of material to the Board Office. Each prospective candidate must obtain a Request for Evaluation of Training Form from the Board office prior to completion of prerequisite training. The completed Request for Evaluation of Training Form, a \$150 nonrefundable processing fee (made payable to The American Board of Plastic Surgery, Inc, in US Funds), and a copy of the prospective candidate's medical school diploma is required upon submission.

A Confirmation Letter will be sent directly to the resident upon review and approval of the prerequisite training. The Plastic Surgery Matching Program does require the Board's Confirmation Letter for the Match Application. Prospective candidates should be aware of the Match Application deadline, usually in the fall. Please allow 6 weeks for the processing of the Request for Evaluation of Training Forms and mailing of the Confirmation Letter from the Board office.

Directors of accredited residency training programs in plastic surgery must require all prospective trainees to have an official evaluation and approval of their prerequisite training by the Board before they begin plastic surgery training.

Approval for residency training in plastic surgery will be provided to those individuals who clearly meet the Board's established training requirements. Further information for detailed credential review will be obtained on all other individuals where training was in other than accredited programs.

Official evaluations will be made by the Credentials and Requirements Committee. Individual officers or members of the Board cannot and will not make such estimates or rulings. It should be emphasized that the answers to many questions require a decision by one or more of the committees of the Board. This applies particularly to evaluation of training and questions of admissibility. Decisions are referred to the entire Board at the next scheduled Board meeting.

The process of reaching a final decision may require several months, since the full Board meets only twice annually. March 1 and September 1 are the deadline dates for receipt of written submission of special requests, documentation, and required fee for consideration by the Credentials and Requirements Committee.

The Board will issue neither a letter verifying prerequisite training nor an Application for Examination and Certification Form until the Request for Evaluation of Training Form has been received and approved.

Training Requirements

There are two major pathways toward obtaining acceptable graduate level training in plastic surgery: the independent model and the integrated model.

In an independent model, the candidate must complete both (1) prerequisite training and (2) requisite training (plastic surgery). In an integrated model, no such distinction exists.

Residents may transfer, prior to the last 2 years, from an independent type of program to another independent program and from an integrated type of program to another integrated program, but they may not exchange accredited years of training between the two different models without specific prior approval by the Residency Review Committee for Plastic Surgery. The candidate must also provide written notification to the Board of anticipated transfers and obtain prior approval by the Board.

The minimum acceptable residency year, for both prerequisite and requisite training, must include at least 48 weeks of full-time training experience per year.

Independent Model

This consists of at least 3 years of clinical general surgery residency training or complete training in one of the surgical disciplines listed below, followed by 2 or 3 years of plastic surgery residency training.

Prerequisite Training

For United States or Canadian doctors of medicine or osteopathy with their medical degree or osteopathic degree granted in the United States or Canada, and international medical graduates, one of the following pathways must be taken:

1. A minimum of 3 years of clinical training in general surgery with progressive responsibility in the same program is required. Programs must be accredited by the Accreditation Council for Graduate Medical Education (ACGME) or the Royal College of Physicians and Surgeons of Canada (RCPSC). Rotating internships will not be accepted in lieu of a clinical year in general surgery. Broad surgical training experience is required.

A total of 36 months of general surgery is required. A minimum of 18 months must be devoted to rotations in the primary and secondary in the primary and secondary components of general surgery as listed in Categories 1 through 13 below:

1. General surgery
2. Alimentary tract surgery
3. Abdominal surgery
4. Breast surgery
5. Head and neck surgery
6. Vascular surgery
7. Endocrine surgery
8. Surgical oncology
9. Trauma
10. Critical care
11. Pediatric surgery
12. Cardiothoracic surgery
13. Transplant

No more than a total of 12 months in the other areas of prerequisite surgical training such as:

1. Gynecology
2. Neurologic surgery
3. Ophthalmology
4. Orthopedic surgery
5. Otolaryngology
6. Urology
7. Anesthesia
8. Burns
9. Surgical Pathology

10. Surgical Dermatology

11. Oral and Maxillofacial Surgery

No more than 1 month can be spent on each of the latter three rotations (pathology, dermatology, or oral surgery).

During this 12-month period, no more than 3 months may be spent on a single rotation. No more than 6 months may be assigned on the combination of plastic surgery and hand surgery rotations during the 3-year period of progressive responsibility. This program must be approved by the Residency Review Committee (RRC) for Surgery and accredited in the United States by the Accreditation Council for Graduate Medical Education (ACGME) or in Canada by the Royal College of Physicians and Surgeons (RCPSC) for full training. The minimum of 3 years of clinical training with progressive responsibility in the same program in general surgery must be completed before the candidate enters a plastic surgery residency. The satisfactory completion of this requirement must be verified in writing by the general surgery program director (see "Verification of Prerequisite Training," below). *Or*

2. An accredited residency training program in neurological surgery, orthopedic surgery, otolaryngology, or urology. Prospective candidates may initiate residency training in plastic surgery following satisfactory completion of the entire course of training in the United States or Canada, as prescribed for certification by the American Board of Neurological Surgery, the American Board of Orthopaedic Surgery, the American Board of Otolaryngology, or the American Board of Urology. They must meet and comply with the most current requirements in these specialties. Satisfactory completion of training must be verified in writing by the training program director (see "Verification of Prerequisite Training," below) and evidence of current admissibility to the respective specialty board's examination process in the United States is required.

For prospective candidates with an MD degree obtained in the United States or Canada combined with a DMD or DDS degree

Satisfactory completion of a residency program in oral and maxillofacial surgery approved by the American Dental Association (ADA) is an alternate pathway for prerequisite training prior to plastic surgery residency. The satisfactory completion of this training must be verified in writing by the oral and maxillofacial surgery program director. This program may include the integration of a medical school component resulting in a doctor of medicine (MD) degree or the Medical Degree may be obtained before or after residency training in oral and maxillofacial surgery.

This combined training must also include a minimum of 2 years of clinical general surgery training progressive responsibility under the direction of the general surgery program director after receipt of the MD degree. The general surgery program director must verify in writing the completion of 24 months of general surgery training, the level of responsibility held, inclusive dates, and specific content of rotation. Rotations in general surgery during medical school, prior to the MD degree, will not be considered as fulfilling any part of the 24-month minimum requirement. If the general surgery component is completed at an institution other than the sponsoring institution of the oral and maxillofacial surgery residency, then this training must be completed consecutively, with all 24 months spent in the same general surgery program that has been reviewed by the RRC for Surgery and is accredited by the ACGME in the United States.

Verification of Prerequisite Training

To obtain written verification from the program director under whom the candidate completed prerequisite training, the Board office will mail a verification form to the program director for completion and return by the program director. It is the candidate's

responsibility to determine that the form has been completed and returned to the Board office.

Requisite Training

Graduate Education in Plastic Surgery

Two years of plastic surgery training is required, and the final year must be at the senior level. Residents entering a plastic surgery residency accredited for 3 years of training must complete the entire 3 years, including 1 year of senior responsibility.

Prospective candidates are required to complete both years of a 2-year program in the same institution or the last 2 years of a 3-year program in the same institution. In either instance, the final year must be at the senior level.

Training in plastic surgery must be obtained in either the United States or Canada. The Board recognizes training in those programs in the United States that have been approved by the Residency Review Committee (RRC) for Plastic Surgery and accredited by the ACGME or those programs approved by the RCPSC.

Content of Training

Candidates must hold positions of increasing responsibility for the care of patients during these years of training. For this reason, major operative experience and senior responsibility are essential to surgical education and training.

An important factor in the development of a surgeon is an opportunity to grow, under guidance and supervision, by progressive and succeeding stages to eventually assume complete responsibility for the surgical care of the patient.

It is imperative that a resident hold positions of increasing responsibility when obtaining training in more than one institution, and 1 full year of experience must be at the senior level. The normal training year for the program must be completed. No credit is granted for part of a year of training.

The Board considers a residency in plastic surgery to be a full-time endeavor and looks with disfavor upon any other arrangement. The minimum acceptable training year is 48 weeks. Should absence exceed 4 weeks per annum for any reason, the circumstances and possible makeup time of this irregular training arrangement must be approved by the RRC for Plastic Surgery, and documentation of this approval must be provided to the Board by the program director.

Training in plastic surgery must cover the entire spectrum of plastic surgery. It should include experience in both the functional and aesthetic (cosmetic) management of congenital and acquired defects of the head and neck, trunk, and extremities. Sufficient material of a diversified nature should be available to prepare the trainee to pass the examination(s) of the Board after the prescribed period of training.

This period of specialized training should emphasize the relationship of basic science—anatomy, pathology, physiology, biochemistry, and microbiology—to surgical principles fundamental to all branches of surgery and especially to plastic surgery. In addition, the training program must provide in-depth exposure to the following subjects: the care of emergencies, shock, wound healing, blood replacement, fluid and electrolyte balance, pharmacology, anesthetics, and chemotherapy.

Accredited Residency Programs

Information concerning accredited training programs for the independent model may be found in the *Graduate Medical Education Directory* (the "Green Book") published by the American Medical Association (AMA) under the aegis of the ACGME. Copies of this directory are available at many medical schools and libraries, or candidates may order the directory directly from the AMA by calling toll-free 800 621-8335, or by writing to Order Department OP416702, American Medical Association (AMA), PO Box 930876, Atlanta, GA

31193-0876; www.ama-assn.org. The Board does not inspect or approve residencies. The RRC for Plastic Surgery inspects and makes recommendations for or against approval of a residency training program in plastic surgery only after the director of the residency has filed an application for approval by the Residency Review Committee (RRC) for Plastic Surgery. For information contact the office of Doris A Stoll, PhD, 515 N State St, Chicago, Illinois 60610; 312 464-5505; www.acgme.org.

The RRC consists of nine members, three representatives from each of the following: the ABPS, the ACS, and the AMA.

Neither the Board nor its individual members can be responsible for the placement of applicants for training. The Board does not maintain a list of available openings in programs. Prospective candidates seeking accredited training in plastic surgery should correspond directly with the directors of those training programs in which they are interested.

Most plastic surgery residencies participate in a special Plastic Surgery Matching Program. For information, contact Plastic Surgery Matching Program, PO Box 7584, San Francisco, California 94120-7584; 415 447-0350; www.sfmatch.org.

Nonapproved Residencies

No other residencies in the United States, Canada, or other countries are acceptable in lieu of those specified above. This in no way implies that quality training cannot be acquired elsewhere, but the Board has no method of evaluating the quality of such programs and must be consistent in its requirements.

The Board grants no credit for training, residency, and/or experience in disciplines other than those named.

Integrated Model

United States Program

Candidates must have a medical or osteopathic degree granted in the United States or Canada by an institution accredited by the LCME or the AOA.

Graduates of allopathic medical schools in the United States or its territories not accredited by the Liaison Committee for Medical Education (LCME) who have successfully completed the licensure requirements in a US jurisdiction are deemed to have appropriate undergraduate medical credentials.

Graduates of schools of medicine from countries other than the US or Canada must present evidence of final certification by the Educational Commission for Foreign Medical Graduates (ECFMG). Information on this certification can be obtained by writing to ECFMG, 3624 Market St/4th Fl, Philadelphia, PA 19104-2688; 215 386-5900; www.ecfm.org.

Accreditation by the ACGME is required for all years of the training program.

Training of no less than 5 years of clinical residency under the authority and direction of the plastic surgery program director is required. No less than 24 months of this program must be concentrated plastic surgery training, and the final 12 months must entail senior clinical plastic surgery responsibility. The last 2 years of training must be completed in the same program.

Canadian Combined Program

This requirement will pertain to all those applying for admission to the ABPS examination process beginning in the year 2000, but candidates may begin such a course of training before then if they so desire.

The third year of training in the Canadian 5-year combined program must consist of varied rotations of a general surgery nature demonstrating progressive responsibility at a third-year level. This program must be approved by the RCPSC for full training.

Rotations may include the alimentary tract; the abdomen and its contents; the breast, skin, and soft tissue; the head and neck, including trauma, vascular, endocrine, congenital, and oncologic disorders, particularly tumors of the skin, salivary glands, thyroid, parathyroid, and oral cavity; the vascular system, excluding the intracranial vessels, the heart, and those vessels intrinsic and immediately adjacent thereto; the endocrine system; surgical oncology, including coordinated multimodality management of the cancer patient by screening surveillance, surgical adjunctive therapy, rehabilitation, and follow-up; comprehensive management of trauma, including musculoskeletal, hand, and head injuries (responsibility for all phases of care of the injured patient is an essential component of general surgery); and complete care of critically ill patients with underlying surgical conditions in the emergency room, intensive care unit, and trauma/burn units. No more than 6 months of this training may be spent on any single *subspecialty* surgical service, such as a burn unit, *during the 3 years*.

A Request for Evaluation of Training Form must be completed and returned by the candidate to the Board office along with a \$150 nonrefundable processing fee in US funds (made payable to The American Board of Plastic Surgery, Inc).

A Verification Form must be completed and signed by both the director of postgraduate education for the university's department of surgery and the director of the university's training program in plastic surgery. After completion of plastic surgery training, the director of postgraduate surgical education and the plastic surgery program director will be required to complete and sign the last page of the Application for Examination and Certification Form.

Applying for Examination and Certification

The prime purpose of the Board is to evaluate the education, training, and knowledge of broadly competent and responsible plastic surgeons. The Board can not issue letters attesting to admissibility to the examination process to any person, institution, or organization until this formal application, along with the required supporting documents, have been received and approved.

The Application Process

In order to be admitted to the examination process leading to Board certification, prospective candidates should write to the Board office requesting application materials no later than December 30 of the final year of their plastic surgery residency by one of the following methods:

- submitting the Senior Resident Form provided by the Board to each plastic surgery program director
- writing, faxing, or sending an email to the Board Office requesting Application Materials
- submitting a Web site application request at www.abplsurg.org

A Senior Resident Form may be obtained from the residency program director, who will receive these post cards in December. Upon this written request, an Application for Examination and Certification Form will be provided and should be completed and submitted to the Board office by the deadline indicated in the application cover letter.

Prospective candidates must submit a completed Application for Examination and Certification Form to the Board office within 2 years after completion of their residency in plastic surgery in order to be considered for admission to the examinations leading to Board certification. Prospective candidates with disabilities requesting special accommodations for the examination process must do so in writing and provide documentation of the disability when submitting the Application for Examination and Certification Form (refer to "Examination of Candidates with Disabilities").

Deadline for Submission of Application Material

Applications for admission to the written examination must be received in the Board office by the deadlines listed in the *Booklet of Information*.

Licensure

All candidates must have a current, valid, registered, full, and unrestricted license to practice medicine in a state, territory, or possession of the United States or in a Canadian province, and they must continue to be licensed throughout the certification process. A temporary limited license, such as an educational, institutional, or house permit, will be acceptable for the first year of admissibility to the Written Examination until full licensure is achieved. Candidates must submit a photocopy of an active registration certificate bearing a date that will be valid at the time of examination(s), with each Reply Form submitted.

Commissioned officers of the medical service of the armed forces of the United States or Canada on active duty need not present evidence of current registration of licensure but must provide appropriate information regarding their status.

Restrictions to Medical Licensure

It is the candidate's responsibility to report, in a timely manner, all disciplinary actions to medical licenses from any and all state medical boards. The following sanctions by any and all state medical licensing boards where the candidate holds a license are considered a restricted license and will delay a candidate's admissibility to the Written or Oral Examination:

1. Limitation on practice or parts of practice
2. Probation
3. Probation with monitoring
4. Probation with supervision
5. Suspension

Other sanctions to a candidate's medical license such as reprimands, fines, community service, or a stayed suspension must be reported to the Board and will be considered by the Ethics Committee before a candidate is admissible to the Written or Oral Examination.

Hospital Privileges

Candidates must provide evidence of active operating privileges in plastic surgery in a hospital throughout the examination process. Exceptions may be made for Written Examination candidates at the initiation of practice in plastic surgery or those pursuing additional fellowship training. Privileges held exclusively in outpatient facilities are not acceptable.

Letters of Recommendation

If a candidate has completed training in more than one program in plastic surgery, the program director of the first year of training must verify to the Board, in writing, the satisfactory completion of that year of training. Additionally, the Board may require favorable evaluations and verification from other surgeons.

Residency Graduation Form (US Programs)

A Residency Graduation Form will be mailed by the Board office directly to the plastic surgery program director for completion at the end of the resident's training in plastic surgery. A single form will be sent for each resident and will require signatures in two places. The first signature, by the program director, will attest that the resident has completed a residency training program in plastic surgery accredited by the RRC for Plastic Surgery or by the RCPSC under his/her direction and that the accredited number of years included a year of senior responsibility. The second signature will signify that the program director recommends the resident for admission to the examination process of the Board.

The Board requires each program director to complete a Residency Graduation Form for each graduating resident by July 15 of the year of residency completion.

If the program director elects not to sign either statement, the director is required to provide a full written explanation of the reason the required signature(s) is not provided. The individual's application cannot be processed, nor will the individual be admitted to the examination process of the Board, without both required signatures.

The program director must record any deficiencies that were responsible for the lack of signature(s) and discuss these with the individual. This written communication must be given to the individual and a copy must be forwarded to the Board office. If further educational training or experience is completed, the program director should request, within 30 days, that another Residency Graduation Form be sent for the required signature(s). If the individual is still felt to be deficient and not recommended for admission to the examination process of the Board, the program director again must communicate the cause for the lack of signature(s) to the Board office.

Failure on the part of the program director to complete the Residency Graduation Form within the stipulated framework will be considered an abrogation of the responsibility of the program director, and the Residency Review Committee for Plastic Surgery or the Royal College of Physicians and Surgeons of Canada (RCPSC) shall be so notified.

Notification of Admissibility

A candidate whose Application for Examination and Certification Form is approved will be notified in writing. An Information Form and Identification Form will be sent with this notification. They are to be completed and returned to the Board office within 30 days of notification. Failure to complete and return these forms will prevent the candidate from receiving further information pertaining to the Written Examination.

If it appears that the stated requirements have not been met, further details may be requested. This information will be reviewed by the Credentials and Requirements Committee. The committee meets twice yearly (spring and fall), and decisions are not rendered at any other time.

Until the application has been received and approved, the Board will not inform any person, institution, or organization that a candidate is admissible to the examination process.

Admissibility to the Examination Process

Each approved candidate shall be entitled to take an examination(s) as required by the Board.

Candidates have unlimited opportunities to successfully complete the Written and Oral Examinations. Candidates must reapply every 5 years to remain admissible to the examination process.

Advertising

Although in the examination process, candidates may not advertise any status with the Board until certified after passing the Oral Examination. This includes, but is not limited to, statements, forms, or images that express or imply that one is a candidate, admissible, eligible, qualified, or affiliated with the Board prior to achieving certification.

Candidates are required to submit photocopies of all advertising materials to the Board. Examples of practice advertisements include, but are not limited to, business cards, letterhead, brochures, Web site content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers, magazine, and newspaper advertisements, and articles.

Candidates also may not represent themselves as members of the American Society of Plastic Surgeons (ASPS) by statements or use of the Society symbol as this can be regarded by the public as evidence of certification by the Board. The Board recommends that candidates and/or their senior partners contact the marketing department of ASPS to determine adherence to the Society's policies before placing practice advertisements in print.

Candidates are required to submit photocopies of all advertising materials at the time of the case collection submission for the Oral Examination. This should include all advertising materials in effect during the time of the case collection period. The Board advises candidates to document and maintain records of any changes or revisions to advertisement materials during the year preceding case collection.

All candidates must comply with the current regulations in effect for the year in which the examination is taken, regardless of the time the original application was approved. It is the responsibility of candidates to seek information concerning the current requirements for certification by the Board. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination. A new *Booklet of Information* is published annually in July. The Board does not assume responsibility for notifying candidates of changing requirements or the impending loss of admissibility to take an examination.

The Board recommends that prospective candidates contact the Board annually to obtain a *Booklet of Information* for the current requirements and deadline dates. A request form is available on the ABPS Web site.

All candidates taking an examination of the ABPS must complete the entire examination.

Certification by any other specialty Board does not exempt candidates from any part of the examination process.

Written Examination: October 18, 2002

The Written Examination will be conducted in the fall each year or at any other time deemed suitable by the Board. The examination will be given on the dates specified and at the time specified. No exceptions will be made, and special examinations will be given only under unusual circumstances (see "Examination of Candidates with Disabilities" under "Special Situations"). The 2002 Written Examination is a Computer Based Test (CBT) offered at Prometric testing centers across the country. The Board cannot guarantee scheduling for specific test centers.

Test Centers for CBT

Prometric Inc[®], a subsidiary of Thompson Learning[®], provides CBT services for professional licensure, academic assessment, and certification and for various other professional and academic needs. Through more than 500 test centers in 80 countries around the world, Prometric administers testing programs for educational institutions, corporations, professional associations, and other organizations.

The Written Examination will be administered in Prometric test centers (PTCs) within the United States. All PTCs are set up similarly. This not only helps enhance security, but also provides the same standards of comfort and uniformity for all candidates. Locations of PTCs available for the Written Examination can be found at the Prometric Web site, www.prometric.com.

Admissibility to the Written Examination

Candidates admissible to the examination process may take the Written Examination in the spring of the year following successful completion of residency in plastic surgery, provided the Application for Examination and Certification Form is approved.

The Board discontinued the time limit of admissibility to the Written and Oral Examinations in 1999. Candidates will have unlimited opportunities to successfully complete the examination process. Candidates must reapply every 5 years to remain admissible to the Examination process. In addition, Candidates deferred from the examination process before 1999 may contact the Board and reapply for admissibility to the Written or Oral Examination. The Board reserves the right to defer a candidate to the Examination process for consideration of ethical or other issues.

Announcement Information

Candidates who are admissible to the Written Examination will be sent annually, throughout their period of admissibility, an Announcement Packet including an Announcement Letter, *Booklet of Information*, Reply Form (green), hotel and airline information, and Computer Based Test (CBT) Center scheduling information. Candidates are responsible for scheduling all test center appointments directly with Prometric Inc. When the reply form (green) is received, candidates must signify their intent to take the examination by completing and returning the reply card and examination fee of \$1,250, with a photocopy of a valid unrestricted medical license and verification of all hospital privileges to the Board office by the deadline date indicated in the Announcement Letter.

Both sides of the reply form (green) must be completed. Candidates will not be scheduled for examination without a complete listing of hospital or academic appointments. Please note on the *Reply Form* if these privileges are pending with a full explanation of details. Candidates are responsible for their own travel and expenses to test center sites.

Admission to Examination

The candidate will not be accepted for admission to the Written CBT Examination if the Reply Form (green), medical license, verification of hospital privileges in plastic surgery, and Examination Fee for the Written Examination are not received by the date indicated in the Announcement Letter.

Reply Card and Examination Fee Deadline

Two groups of candidates will be taking the examination in 2002. These include those who completed residency before 2002 and have an approved Application for Examination and Certification and those who complete residency on June 30, 2002. The instructions and deadlines below pertain to these two groups.

An Announcement Mailing will be sent in January for candidates approved for the examination process on or before December 31, 2001. The Reply Form (green) deadline for the Written Examination is the close of the business day on March 1, 2002. The examination fee of \$1,250, a photocopy of a valid, unrestricted medical license, and verification of all hospital privileges must accompany the Reply Form (green) in order to be scheduled for the Written Examination. A late penalty fee of \$500 must accompany the Reply Form and examination fee if received by the Board office from March 2, 2002, up to and including the close of the business day on March 15, 2002. Reply Forms, examination fees, a photocopy of the medical license, and verification of all hospital privileges received March 2 up to March 15 will be considered only on a space available basis.

Senior Resident Candidates

An Approval Letter and Announcement Packet will be sent in July 2002 for candidates approved for the process after December 31, 2001. The Reply Form deadline for the Written Examination is the close of the business day on August 2, 2002. The examination fee of \$1,250, and a photocopy of a valid and unrestricted license must accompany the Reply Form in order to be scheduled for the Written Examination. The August 2, 2002, deadline for candidates

completing residency on June 30, 2002, is absolute. No late Reply Cards will be accepted.

Reply Cards, examination fees, and photocopies of valid unrestricted licenses received in the Board office after the close of the business day on March 15 or August 3, as noted above, will not be accepted for admission to the October 18, 2002 Written Examination. **A guaranteed delivery service is recommended to insure receipt of materials by the deadline dates.**

Admission Cards

After receipt and processing of all materials, if all are complete, the candidate is cleared to be scheduled for the examination. Candidates must contact Prometric directly to schedule an appointment at the test center of their choice from a list provided in the Announcement Packet as well as on the Prometric Web site. A confirmation notice will be sent to candidates. Candidates are advised to call the assigned Prometric test center directly for directions.

Scheduling a Test Date

After receipt and processing of all materials, a Scheduling Permit will be mailed to candidates. The Scheduling Permit will list the date of the examination and instructions for making a testing appointment at a PTC. Candidates who have not received a Scheduling Permit by 4 weeks prior to the examination date should contact the Board Office immediately.

Candidates should contact Prometric *as soon as possible after receiving the Scheduling Permit*. The Scheduling Permit includes a toll-free telephone number to schedule a testing appointment at the center of one's choice. Candidates must have their Scheduling Permits before contacting Prometric. Appointments are assigned on a first-come, first-served basis. (Candidates who delay scheduling an appointment may not receive their preferred location.)

When candidates call, a Prometric representative will ask for information from the Scheduling Permit and provide details regarding the test centers and location specified. If the preferred test center is not available, the candidate will be advised of other nearby test centers where a testing appointment is available.

After being scheduled for the Written Examination, candidates will be mailed an Admission Form (white) approximately 3 to 4 weeks before the Examination date. The Admission Form lists the examination date as well as the candidate's name, current address, candidate number, and the "Result Mailing Date." Candidates must use their candidate numbers, which are printed on the forms, throughout the examination. The Admission Form must be presented at Registration as well as two forms of current, valid identification, one with a photograph and signature and one with a signature. A passport or drivers license can serve as the photograph identification.

Advise the Board Office *immediately* by telephone if the Admission Form (white) is lost prior to the examination.

Withdrawal from Examination

The Board Office must receive a letter from the candidates indicating the intent to withdraw from the examination at least 30 calendar days before the date of the examination. Candidates will be refunded \$550, the examination fee, less a processing charge of \$700. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire fee.

Registration and Administration of the Examination

All candidates must take the entire examination on the same day and at the scheduled time.

Candidates must register at the Prometric test center for examination on the date, time, and location specified in the announcement letter. If for any reason candidates are delayed or cannot

arrive on time, they must notify the the Board office immediately and the Board will contact the Prometric test center staff at the examination location. If candidates are unable to attend the examination, they must notify the Board office either by letter or by telephone prior to the time of registration. Any candidate who is more than 30 minutes late will not be admitted to the examination.

Candidates are not permitted to bring any notes, textbooks, clipboards, pocketbooks, personal digital assistants (palm pilots, etc), electronic devices, or other reference materials into the Prometric test center. Cell phones must be turned off. Scratch paper is not permitted..

Examination questions are prepared by and/or at the direction of The American Board of Plastic Surgery, Inc. (hereinafter "Board"), are the sole and exclusive property of the ABPS, and said examination items are protected under the copyright laws of the United States and other countries. The examination items may only be used for such purposes as are designated from time to time by the ABPS, and other than such designated purposes. The Board reserves all other rights.

Copying, by any means, of all or any part of such examination items or unauthorized use in any way whatsoever of said Question Books are strictly prohibited.

Change of Address

If a candidate's address, as it appears on the admission form (white), is incorrect or will change before the "Result Mailing Date," please make corrections on the form and fax to the Board Office immediately after the examination.

Examination Schedule

Candidates are advised to read the Announcement Letter for possible changes in the Written Examination format. Total test time for the Written Examination is 5 hours. The examination schedule is:

- Candidate Registration
- Optional 30 minute On-Line Tutorial
- Written Examination-CBT
- 1st Test Block Section -150 minutes
- Optional 30 minute Break
- 2nd Test Block Section- 150 minutes

Each form of the ABPS Written Examination consists of an optional 30-minute tutorial and 400 multiple-choice questions administered in two blocks of 200 questions each. Candidates will have 150 minutes to complete each block, for a total of 300 minutes, or 5 hours of total examination time. All candidates will have the same number of questions and the same time allotment. Within each block, candidates may answer questions in any order and review and/or change their answers. When candidates exit a block, or when time expires, no further review of questions or changing of answers within that block is possible.

Candidates will have 30 minutes of total break time, which may be used to make the transition between blocks and for a break. A break may only be taken between each block of questions.

The Examination consists of multiple choice (one best answer) questions. In general, each test item consists of a question, a case history, or a situation, followed by a list of possible answers. Instructions for completion of questions are provided in the computer program, which candidates will receive at the start of the examination. A tutorial is provided which reviews each screen and 10 to 20 inactive items for practice. This is provided to relieve anxiety about the mechanics of computer-based testing. The tutorial also reviews the process of marking items for review at the completion of each section or block of the examination. Once a section has been completed, candidates may not access questions from the previous section or block of items.

Content of the Examination

The subjects covered in the examination are listed below and will cover the entire field of plastic surgery:

1. Gross and functional anatomy and embryology.
2. Basic knowledge of pathology, eg, the biologic behavior of neoplasms, inflammation, and repair.
3. Basic techniques, wound healing, microsurgery, transplantation.
4. Burns, sepsis, metabolism, trauma, resuscitation, nutrition, endocrinology, shock, hematology.
5. Pre- and postoperative care, anesthesia, cardiorespiratory care, complications, and clinical pharmacology.
6. Cosmetic and breast surgery
7. Tumors of the head and neck, skin, and breast, including treatment by radiation therapy, immunotherapy, chemotherapy, and surgery.
8. Trunk, lower extremity, musculoskeletal system, pressure ulcers, rehabilitation.
9. Hand, peripheral nerves, rehabilitation.
10. Maxillofacial and craniofacial surgery and microsurgery.
11. Congenital anomalies, genetics, teratology, facial deformity, speech pathology, gynecology, and genitourinary problems.
12. Psychiatry and legal medicine.

The questions for the examination cover subjects considered to be of fundamental importance to competent performance in the field of plastic surgery. Every effort is made to avoid "trick" questions, ambiguity, and questions involving irrelevant facts. All questions are analyzed by psychometric techniques to ensure their quality.

Candidates will pass or fail on the strength of their performance on the entire CBT format Written Examination.

Results

Letters of notification of the results (pass or fail) of the Written Examination will be mailed on the date indicated on the admission form (white). The time period between administration of the examination and notification is necessary to allow for extensive analysis and to ensure that individual results are reliable and accurate.

Results of the examination will be divulged to no one until after the Board result letter has had time to reach candidates. If a week has elapsed after the "Result Mailing Date" and candidates still have not received the letter from the Board, they may then call for information. Information will be given to no one but a candidate personally. The Board staff will verify candidates' identity prior to releasing results to them.

Each candidate will receive a single final grade (pass or fail) for the entire examination. To complete the Written Examination successfully, candidates must achieve a passing grade for the entire examination.

The score (pass or fail) on the examination will be determined by the total number of alternatives answered correctly. Therefore, candidates are encouraged to answer all items.

Pass

If a candidate passes the Written Examination, he/she will be informed of this fact.

Fail

If a candidate fails the Written Examination, he/she will be informed of this fact.

In case of failure, the candidate must repeat the entire Written Examination.

Score Validation (\$200)

Score Validation of the Written Examination is available upon written request. To request score validation, candidates **must** write to the Board Office within 30 days of the date on the result letter. Candidates will be responsible for a charge of \$200 for score validation.

The Written Examination is scored and analyzed by a data processing organization that has extensive experience in the field of medical examinations. The optical scanning process is very accurate. The Board has found no discrepancies between hand scoring results and the original reported scores. Historically, score validation of Computer Based Examinations has also not altered examination results.

Cancellation of Examination

Should the ABPS, in its sole discretion, cancel the Written Examination, or as a result of events beyond its control be unable to administer the Written Examination at the appointed date, time, and location, or should ABPS fail to conclude a candidate's Written Examination, the ABPS is not responsible for any expenses the candidate may have incurred in connection with the cancelled Written Examination, nor for any expenses the candidate may incur for any substitute Written Examination.

Oral Examination: September 12, 13, and 14, 2002

Case Collection Instructions: Requirements and Information

Prior to becoming admissible to the Oral Examination, candidates must have passed the Written Examination.

Candidates admissible to the Oral Examination will be sent an Information Letter annually, including an individual user name, password, and requirements for the case list compilation. The case list compilation format is a Web-based application hosted by DataHarbor.com. The program provides a standardized case list that facilitates the Board's review. Candidates must have Internet access to complete the case list compilation. It is strongly recommended that candidates dedicate at least 30 minutes to thoroughly review all requirements for case list compilation and case report preparation before beginning the case collection process.

Admissibility to the September 2002 Oral Examination

Candidates who submit a 7-month case list collected during the period beginning July 1, 2001, through January 31, 2002, along with the \$540 nonrefundable Case List Review Fee and advertising materials by the March 1, 2002, deadline will be sent an Announcement Packet for the September 2002 Oral Examination. The Board discontinued the time limits for admissibility to the Written and Oral Examinations in 1999. Candidates have unlimited opportunities to successfully complete the Examination process. Candidates must reapply every 5 years to remain admissible to the Examination process. In addition, candidates deferred from the Examination process may contact the Board and request Reapplication Materials for admissibility to the Written or Oral Examination. The Board reserves the right to defer a candidate from the Examination process for consideration of ethical or other issues.

Advertising

Although in the examination process, candidates may not advertise any status with the Board until certified after passing the Oral Examination. This includes, but is not limited to, statements, forms, or images that express or imply that one is a candidate, admissible, eligible, qualified, or affiliated of or with the Board prior to achieving certification.

Candidates are required to submit photocopies of all advertising materials to the Board. Examples of practice advertisements include, but are not limited to, business cards, letterhead, brochures, Web site content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers and magazine and newspaper advertisements and articles.

Candidates also may not represent themselves as members of the American Society of Plastic Surgeons (ASPS), by statements or use

of the Society symbol, as this can be regarded by the public as evidence of certification by the Board. The Board recommends that candidates and/or their senior partners contact the marketing department of ASPS to determine adherence to the Society's policies before placing practice advertisements in print.

Candidates are required to submit photocopies of all advertising materials at the time of the case collection submission. This should include all advertising materials in effect during the time of the case collection period. The Board advises candidates to document and maintain records of any changes or revisions to advertisement materials and during the year preceding case collection.

A candidate will be deferred from the examination process for at least 1 year if the Board receives written documentation of such advertising.

Practice Requirement

1. Candidates approved for admission to the examination process before July 1, 1986, and *after* July 1, 1997, no longer have a 2-year practice requirement.
2. A fellowship is not considered independent practice. Case collection may not occur during fellowship.
3. Candidates must be actively engaged primarily in the practice of plastic surgery before, during, and after the case collection period.
4. Candidates must hold medical staff privileges in plastic surgery in a United States, Canadian or foreign hospital throughout the case collection and examination process. Verification of current plastic surgery privileges must be provided to the Board from the medical staff office(s) of each institution(s).
5. Candidates must have a valid, unrestricted license to practice medicine. Restrictions or sanctions to any medical license must be reported to the Board within 60 days of the restriction. Details of license restrictions are listed earlier in this booklet. Restrictions will delay the candidate's progress through the examination process.

Case List Compilation

Candidates for the September 2002 Oral Examination are required to provide the Board with a compilation of all operative cases and hospitalized patients during all or part of the 7-month period beginning July 1, 2001, and ending January 31, 2002. Case lists are due in the Board Office before the close of the business day on March 1, 2002. The Board utilizes the data provided to become familiar with the candidate's practice and to select five cases for the case report session of the examination.

Note: Candidates should make address corrections on the Data Harbor Web site. An address correction will generate an e-mail notification to the Board Office of any address changes. Notification can also be made by e-mail to oral@abplsurg.org. Candidates should not assume that the address entered in the other candidate data fields would automatically alert the Board Office to address changes.

- The printed case list will be in chronological order for each institution (hospital, office-based surgery, etc) and will include: patient's initials, hospital (or other) identifying number, age in years and date of birth, gender, date of operation, case classification, diagnosis, procedure(s) performed (if any), CPT codes plus modifiers (identical to those used for billing on that case), outcome including complications, site of operation (ie, inpatient vs. outpatient facility), and duration of procedure. Affidavits for each institution are automatically printed out on the last page of each institution's list of cases. The Candidate Affidavit, the last page of the case list printout, attests that the case list contains all cases performed during the 7-month period. The Affidavit also attests that the CPT codes listed are an exact representation of those submitted, or would have been submitted (eg, CPT codes

listed for cosmetic cases, Veterans, Military, Kaiser Permanente, or foreign practice environments), for billing purposes.

Data entry and editing must be completed by February 28, 2002, to meet the submission deadline. The Clinical Log application will not allow changes in the case list data after this date, although the case list may be viewed and printed at later dates.

The case list is prepared, selected, and printed from the menu options. After generation of the case list and preparation of the additional material, the original case list and a copy of the list and the candidate case summary sheet must be submitted to the Board office by the deadline date of March 1, 2002.

Instructions for Data Compilation

The Board recommends that candidates begin compiling the case list on a weekly or monthly basis, rather than waiting until the last month of the case list collection period to begin data compilation on the Clinical Log application. The "edit incomplete cases" screen will assist in reviewing entered data including CPT codes. A trial printing well in advance of the deadline will also help in troubleshooting problems. Do not underestimate the magnitude of the data collection task.

1. Enter patient initials (first, middle (if available), last).
2. Enter date of procedure. Multiple procedures on the same patient, on the same date, should be entered as one case.
3. Enter patient date of birth. Age or birth year will be calculated and displayed.
4. Providing complete diagnosis and procedure information is essential. From the operative notes, give an accurate written description of the diagnosis and the operative procedure(s). Do not use ICD-9 and CPT codes in place of the written description of the diagnosis and procedure(s). If the case was nonoperative, include a discharge summary diagnosis.
5. Include all CPT codes plus modifiers used for insurance billing purposes, as well as for all cases that were not billed to insurance (eg, aesthetic/cosmetic cases). CPT cases starting with 99 (evaluation and monitoring codes for office visits, consultations, etc.) should not be included. To provide an equitable examination for all candidates, no candidate will be exempt from CPT coding. Unlike previous years, candidates practicing in managed care relationships; the military; Veterans Administration, Kaiser Permanente, and Shriners Hospitals; Canada; and foreign countries must also include CPT codes for all cases. The automatic CPT code descriptors, which print when a CPT code is entered, are the copyright of the American Medical Association. A CPT code frequency field is included so that a CPT code may be entered once with the number of times the procedure was performed (X2, X3 etc, eg, for multiple skin grafting procedures).
6. Do not list assistant cases, namely cases billed by the candidate as an assistant surgeon. Cases performed by a resident and attended by the candidate, or cases billed as co-surgeon, should be included on the case list.
7. Do not list voluntary surgical activity in developing countries. Cases performed during such service are not to be included in case compilation because of the lack of continuum of care.
8. Providing "outcome" information is essential. A short statement with respect to the outcome is required. Not all cases "heal without complications." Examples include "necrosis of tip of flap" or "normal sensation returned, but index finger stiff after tendon repair." The web-based program allows outcome recording by number selection. Complication numbers 2, 3, 4, and 5 require written explanation. The outcome categories are:
 - #1 No Complications: No complication or complication so trivial that no intervention is required
 - #2 Minor Complications: Can be managed in the office but requires an increase in the number of visits, dressing changes

less than 2 months in duration, seroma aspiration, oral antibiotics, bedside debridement

- #3 Complication Requiring Treatment: Intravenous antibiotics, dressing changes greater than 2 months in duration, re-operation without need for intravenous sedation or anesthesiologist, unplanned cardiac workup or other specialist consultants (eg, occupational or physical therapy, medical specialist)
 - #4 Severe Complication: ICU stay, unplanned return to operating room (involving anesthesiologist), prolonged hospital stay due to complication, chronic or long-term medication (eg, coumadin)
 - #5 Death of patient
 - #6 Lost to follow-up
9. The list must include multiple operative procedures performed on the same patient. This inclusion allows automatic cross-referencing by the computer program. However, hospital number (or other) identifying numbers and patient initials must be consistent for the patient with multiple procedures (eg, if a patient is listed at more than one institution, the same identifying number must be used to identify the patient). Do not use the full Social Security Number (SSN) as an identifier, to protect patient confidentiality. For the purposes of the case list, candidates should use only the last four digits, which should allow the medical record administrator to verify and identify the cases with the patient initials.
 10. All operative procedures must be included whether inpatient, outpatient, or office-based surgery. All patients hospitalized by the candidate as the admitting physician must also be included, even if the patient is managed nonoperatively. Office-based surgery that does not require a dictated note (eg, nevi) does not need to be included. However, the Board suggests that the candidate err in the direction of inclusion of cases rather than exclusion. Do not include inpatient consultations on patients admitted by physicians on other services that did not culminate in a surgical procedure.
 11. All emergency room patients who required an operative note must be included.
 12. Case classification is a two-part item in order to reduce the category overlap. The Category relates to the nature or origin of the defect. The Anatomy relates to the anatomical location of the procedure. One selection from each column is required:

Category	Anatomy
Aesthetic	Head & Neck
Burn	Breast
Cancer (non-skin)	Hand
Congenital	Upper Extremity
Skin (including skin cancer)	Trunk
Trauma	Lower Extremity
Other	Genitalia

The are no quotas with respect to these assignments. The Board Office staff cannot advise the candidate on how to classify a case. Make the most reasonable assignment for each case. When more than one category applies to a case, use your professional judgement. If the case involves microsurgery, be sure to indicate this in the procedure description. A few examples are:

 - Reduction Mamoplasty: Other; Breast
 - Breast Reconstruction: Cancer; Breast
 - Abdominoplasty: Aesthetic; Trunk
 - Abdominoplasty with
 - Abdominal Hernia Repair: Other; Trunk
 13. Approximate duration of the surgical procedure should be entered in hours to one decimal point, for example 1.5 hours. This is a new data field for the 2001 Examination.

14. Admission status of the patient should be entered as inpatient or outpatient. An inpatient admission is defined as an overnight stay of 1 or more nights. An outpatient admission is defined as 23 hours or less. This is a new data field for the 2001 Examination.
15. The completed lists must be signed by the medical record librarian/administrator of each institution (hospital, ambulatory surgery center, etc) and properly notarized as a complete list of the candidate's operative experience. The notarized affidavit attests that the cases listed for the institution represent all cases performed by the candidate at the facility. Operations done by the candidate in the office must also be listed and notarized by the appropriate office personnel who can attest to the completeness of the cases listed. The institution's affidavit sheet prints out in sequence as the last page of each institution's case list. The Board recommends that the candidates contact the medical records department well in advance of the case list submission date to schedule the review and notarized signature process. Clearly, prompt completion of the case list in early February will be necessary to accomplish the tasks required for submission.
16. Two Candidate Case Summary Reports (original and copy) must be submitted. This report facilitates the Board's review. The Clinical Log generates the form directly by menu selection.

Preparation for Submission of Data

1. The "Finalize Case list" button is used to print your 7-month Case list. This is the only copy that is accepted. Use the "View Case list" button to view a list of all cases. Carefully proofread for accuracy. Handwritten information is not accepted. Once the case list is finalized it is not possible to add, delete, or modify any data. Printing must be done no later than February 28, 2002, to meet the March 1, 2002 deadline.

Note: The Clinical Log program displays a prompt to complete missing data elements before allowing you to proceed with the "Finalize Case list."
2. Obtain notarized affidavits from the medical record librarian/administrator of each institution (see Instructions for Data Compilation, #15, above). Only the "Finalize Case list" printout may be used to obtain the notarized affidavits.
3. It is the candidate's responsibility to ensure that all materials have been proofread, placed in numerical order, and properly collated. Candidates should then copy the entire case list including notarized affidavits. The Candidate Affidavit should be the first page and the Statistical Summary Report as the last page. Candidates often use this list for application to the American College of Surgeons. Candidates should retain an additional copy of the case list. The Board Office does not supply copies.
4. Staple the "Candidate Affidavit Sheet" to the top left-hand corner of the first institution's section of your case list. Follow the same procedure for the copy. The Candidate Affidavit Sheet prints as the last page of the "Finalize Case list" Report. It should accurately note the total number of pages in the case list, eg, "these are all the cases from pages 1 to 151."
5. Arrange the original 7-month case list, including the signed and notarized affidavits for each institution in numerical order with the pages for each institution stapled together at the top left-hand corner. An exact copy, in numerical order and stapled by institution, must be included. The end of each institution's case list is noted by the Candidate's Institution Affidavit Sheet, which includes the six digit candidate number, name, address, telephone number(s), and notarized affidavit signed by the candidate. Follow these instructions carefully. Improperly stapled case lists delay processing and review of the submissions.
6. Prepare the stapled original 7-month case list together, including the signed and notarized affidavits. Place the Statistical

Summary Report on the bottom. Candidates should bind the entire 7-month case list using a clip or a rubber band. Follow the same procedure for your stapled copy. Do not place this material in binders, folders, notebooks, or sheet protectors.

- Candidates are required to submit photocopies of all advertising materials to the Board. Examples of practice advertisements include, but are not limited to, business cards, letterhead, brochures, Web site content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers and magazine and newspaper advertisements and articles. The candidate is instructed to refer to information on advertising in the Admissibility section of the Booklet.

Candidates also may not represent themselves as members of the American Society of Plastic Surgeons (ASPS), by statements or use of the Society symbol, as this can be regarded by the public as evidence of certification by the Board. The Board recommends that candidates and/or their senior partners contact the marketing department of ASPS to determine adherence to the Society's policies before placing practice advertisements in print.

Reminder: Candidates who do not provide the required items in the manner outlined will not be considered for admission to the Oral Examination.

Incorrectly submitted items will be returned to the candidate with the Review Fee. No exceptions will be made regarding late, incomplete, incorrect, or missing data from the case lists.

No lists or other material will be accepted after the March 1, 2002, deadline date.

Photographic Documentation

Particular emphasis should be placed on the necessity of photographic documentation. Preoperative and postoperative photographs are mandatory for all cases selected for case reports, and intraoperative photographs may aid in further illustration of the clinical problem. The candidate must provide a signed, notarized affidavit attesting that all submitted photographs are the original and unaltered documentation of the five selected patient cases presented for the Oral Examination. The Board provides this form in the case report packet sent after the Reply Card (green) is received. Digital photographs are acceptable.

The Board advises candidates who have not acquired the habit of routine photographic documentation of all patients to do so immediately. Any cases from the collection period may be selected and all must have photographic documentation, including all hand cases (ie, carpal tunnel cases, etc). Transparencies are not acceptable. No alternate cases will be selected because of a candidate's lack of photographic documentation for a selected case.

It is the candidate's responsibility to maintain patient confidentiality. For all cases, the candidate must obtain a signed consent/release form for use of illustrations, photographs, or imaging records for examination, testing, credentialing, and/or certification purposes by The American Board of Plastic Surgery, Inc. Standard office or hospital patient consent forms will be accepted if the consent includes the patient's permission for use of photographs and records. Suggested wording for the optimal consent a candidate would provide to the patient would be:

"I hereby grant permission for the use of any record, illustration, photograph, or other imaging record created in my case, for use in examination, testing, credentialing, and/or certifying purposes by The American Board of Plastic Surgery, Inc."

Patient Signature

Witness Signature

Date

Board Review and Selection Process

The Board reviews the Candidate's 7-month Case List and the Candidate Case Summary Sheet to determine if the candidate's operative list reflects sufficient diversity, complexity, and volume to demonstrate adequate maturity of practice of plastic surgery to permit examination of the candidate for certification as an expert in the specialty. In the event that the case list submitted is not adequate to allow selection of cases, the candidate will not be admissible to the Oral Examination. This will not count as an unsatisfactory performance.

The candidate may submit another case list the following year for the duration of his/her period of admissibility. Candidates are notified in writing regarding Case Lists that the Board has found to be inadequate to allow for selection of Case Reports. This decision is final and not subject to appeal.

The Board selects cases from the candidate's Case List and requests the candidate to prepare Case Reports for these selected cases. The selected Case Reports will be prepared in the same format and with similar requirements as in past years.

For the September 12, 13, 14, 2002, Oral Examination:

The Announcement Packet will be mailed to candidates by June 5, 2001. It includes the list of Board-selected cases for preparation as Case Reports, a *Booklet of Information*, Reply Card (green), and a hotel reservation card. Candidates are asked not to contact the Board office prior to that date with respect to the submitted case list.

Instructions and Information Pertaining to the September 12, 13, 14, 2002, Oral Examination

The Oral Examination will be conducted each fall or at such other time as deemed suitable by the Board. The examination will be given on the dates and at the times specified. No exceptions will be made.

Announcement Information and Admission to the Oral Examination

Candidates admissible to the Oral Examination will be mailed an Announcement Packet on June 5, 2002. This Packet includes a Booklet of Information, Reply Card (green), a Candidate Information Form, a hotel reservation card, and the list of five selected cases for preparation of case reports.

Candidates must signify intent to take the examination by completing and returning the Reply Card (green), Examination Fee of \$1,000, a Candidate Information Form, a photocopy of a valid unrestricted medical license, and verification of medical staff privileges in plastic surgery achieved during the case collection period from the primary hospital to the Board office by the close of the business day on July 8, 2002. Candidates must return all of the items above to be scheduled for the September 12, 13, 14, 2002, Oral Examination.

Important: Both sides of the Reply Card (green) must be completed. Candidates will not be scheduled for examination without a complete listing of hospital or academic appointments. Please note on the Reply Card if these privileges are pending with a full explanation of details.

Candidates are responsible for their own travel, hotel accommodations, and expenses.

Admission to Examination

Material received July 9, 2002, through July 19, 2002, will require a late penalty fee of \$700. Material received after the close of the business day on July 9, 2002, will not be accepted for admission to the Oral Examination.

The candidate will be mailed a case report preparation packet including materials for assembling and binding the selected case reports once scheduled for the Oral Examination. These materials include folders, tab indices, a Photographic Affidavit Sheet and

labels for the front of each folder. It is essential that candidates indicate the Board six-digit candidate number on each label to be affixed to the cover of each case report, along with the other required information.

The candidate will also be mailed an Admission Card (white) approximately 4 weeks before the examination. The Admission Card lists the candidate's name, current address, candidate number, date and location of the examination, and the examination schedule.

The candidate must advise the Board office immediately by telephone if the Admission Form (white) is lost prior to the examination or for any change in demographic information.

The Board reserves the right to independently corroborate medical records in case report submissions for the five Board-selected cases and to review issues related to informed consent.

Withdrawal from Examination

Candidates wishing to withdraw from the examination must provide written notification to the Board office at least 30 calendar days before the examination date. The examination fee will be refunded less a processing charge of \$700. Candidates who withdraw from the examination after this date or who fail to appear for the examination will forfeit the entire examination fee. The Board may waive this rule only if the circumstances warrant.

Requirements for Case Reports

The following materials, collated in the order below, must be present in each of the submitted case reports. Candidates are required to use Board-supplied folders and tab indices to assemble each of their Case Reports. This will facilitate review of Case Reports by the Examiners. The required materials are:

Before the First Tab:

- Selected Case List Summary Sheet (Before Case Report #1 only)
- One Photographic Affidavit Sheet (Before Case Report #1 only)
- Title Page for each Case Report

Tabs:

- A Narrative Summary
- Photographs and Patient Photographic Consent Forms (*Note:* Only one signed affidavit attesting that photographs for all five cases are unaltered; see above.)
- Photocopies of the operative notes
- Photocopies of the anesthesia records
- Photocopies of pertinent laboratory data
- Photocopies of pertinent pathology reports
- Photographs of the pertinent radiographs
- Progress Notes: Copies of hospital progress notes and office/clinic notes (separate office/clinic from hospital notes with divider sheet provided)
- Copies of bills including CPT codes
- Other if needed (eg, information from patient case before or after the 7-month case collection period if needed)

Candidates must use the 10 tab indices (provided by the Board) to divide the material compiled when assembling Case Reports for the required sections above.

See the detailed explanation of the requirements for each section below. The candidate is encouraged to read this section carefully. Improper or disorganized preparation of this material is sufficient cause to disqualify a candidate for continued examination.

Please note, in the event that more than one procedure is performed on the patient during the 7-month case list collection period, include all procedures and hospitalization(s) that fall within the 7-month collection period. Candidates are not required to document procedures that fall prior to or after the 7-month case collection period. However, if these procedures increase the understanding of the case, they may be included at the candidate's discretion. Documentation for procedures falling outside the 7-month case

collection period does not have to be complete—the candidate may be selective.

Note: If the records are not in English, an accurate and complete English translation must accompany them.

Explanation of Requirements

These guidelines, based on suggestions from previous candidates, are provided as assistance for candidates to produce uniform and consistent Case Book submissions for an equitable examination.

Before the First Tab:

- One Selected Case List Summary Sheet (before the first tab of Case Report #1 only)
Candidates must provide a Selected Case List Summary Sheet. Type each summary page on white bond paper. If necessary, copy multiple pages as a double-sided list on white bond paper. Bind the summary sheet(s) before Tab 1, at the beginning of the folder for Case Report #1. The list must be identified with the candidate name and candidate number.
- One Photographic Affidavit Sheet (before the first tab of Case Report #1 only—provided by the Board)
Affidavit Sheet must be signed and properly notarized, attesting that all photographs are the original and unaltered documentation of the patient cases presented for the Oral Examination.

Place the Photographic Affidavit immediately behind the Selected Case List Summary Sheet prior to the first Tab in Case Report #1.

- Title Page (before the first tab of each case report)

Each report must be typed or reproduced on standard, letter-sized white paper (8½-inch x 11-inch) with the candidate's full name, candidate number, the selected case number (ie, #1, 2, 3, 4, 5) not the assigned number in the case list, the hospital or other identifying number, the principal diagnosis, and the primary operation listed on the title page. Categorize cases exactly as was done on the 7-month case list compilation.

For each case, include the following title page information in front of the first Tab:

July 1, 2001, through January 31, 2002, for the September 2002 Examination

Board Case Number

<u>Category</u>	<u>Anatomy</u>
Aesthetic	Head and Neck
Burn	Breast
Cancer	Hand
Congenital	Upper Extremity
Skin	Trunk
Trauma	Lower Extremity
Other	Genitalia

Patient's hospital (or other) identifying number

Primary diagnosis

Procedure(s) done by the candidate

Tabs

- Narrative Summary (First Tab)
A brief (one-page) narrative summary of the preoperative, operative, and postoperative course of the patient is required. Include a final separate paragraph entitled "outcome." Indicate here the outcome of the treatment and the final condition of the patient.
- Photographs
Pre- and postoperative photographs, approximately 4-inch x 6-inch color or black-and-white prints glued on 8-inch x 11-inch white bond paper are preferred. The Board strongly recommends intraoperative photographs when they provide clarifying information. Digital photographs are accepted. Note the Photographic Affidavit Sheet (placed behind the Selected Case List Summary Sheet) applies to all submitted photographs. It must be signed and

properly notarized attesting that all photographs are original and unaltered documentation of patient cases presented for Oral Examination. Diagrams or simple drawings may be substituted for intraoperative photographs. Descriptive legends and dates of the photographs must be placed adjacent to or below each photograph.

- **Operative Report**

This should include photocopies of originals for all operative reports for procedure performed by the candidate on this specific patient during the 7-month period. Operative reports of minor procedures performed by the candidate in the office during the 7-month collection period should also be included. You may include copies of the operative reports of procedures performed outside the 7-month collection period or those that were performed by another surgeon if they clarify the patient's course. Group all operative notes together in chronological order.

- **Anesthetic Report**

Photocopies of the original anesthetic records are required. This should include all anesthetic records for procedures performed by the candidate during the 7-month collection period. You may include copies of the anesthetic reports of procedures performed outside the 7-month collection period or those that were performed by another surgeon if they clarify the patient's course. Group all anesthetic records in chronological order.

- **Laboratory**

Photocopies of pertinent laboratory data are required. Group the data together in chronological order. Candidates are encouraged to use their judgment when including this material.

- **Pathology**

Photocopies of any pertinent pathology reports are required. Group all pathology reports together in chronological order.

- **Radiology**

Photographs of pertinent x-rays or scans are required. (Actual x-rays are unacceptable.) Date each x-ray or scan in a manner that is easily visible. Photocopies of corresponding reports from the radiologist for each x-ray should be included in this section. Compile this material in chronological order, with reports placed adjacent to the corresponding reproduction of the radiograph.

- **Progress Notes—Hospital Progress Records and Office/Clinic Notes**

Photocopies of the original progress notes including the patient's history and physical examination, discharge summaries, and all postoperative and post-discharge progress notes, both in the hospital and from the office/clinic records, including the initial consultation. If legibility is a problem, also include a typewritten copy. Copies of physician orders, vital signs, and nursing notes are not necessary and may be included only if they are needed to clarify the patient's course. Organize all notes in chronological order. Separate Hospital notes and Office/Clinic progress notes with divider sheet provided by the Board.

When excessively long hospitalizations resulted in progress note sections of such thickness that they cannot be bound in one case folder, this section may be edited of nonessential notes, bound separately, and brought to the examination. The candidate retains the notes and does not turn them in with the Case Reports. A notation regarding the editing must appear at the beginning of the progress note section. The candidate will produce this extra material only upon the examiners' request.

- **Billing—including CPT Codes**

Each case must include a copy of a bill with the dollar amount omitted.

All CPT codes as listed on the Case List must be reported.

Each bill must be notarized by the individual responsible for generation of the bill. This could be a billing company representative, hospital billing clerk, or a candidate's office manager. The signature

should attest that the bill represents a copy of the actual bill sent or that the bill was not submitted to a patient or third party payor.

If coding was not generated for a procedure, the affidavit should attest that no coding or billing was required. However, the CPT codes as listed on the Case List should be noted.

These bills include, but are not limited to:

1. Health Insurance Claim Forms (HICF)
2. Electronically generated bills
3. Bills to patients not submitted to third party payors
4. Cosmetic procedures where no bill was sent
5. Procedures performed gratis or for charity
6. A computer-generated replacement for a missing bill

To facilitate review by examiners, procedures or CPT code descriptor must be included on the billing statement even though it may not be a part of the original bill.

CPT codes for Veterans Administration patients and services performed gratis, such as those on an individual in their office, should be coded exactly as any other case.

- **Other (Tenth Tab)**

Any additional material such as procedures performed on the patient before or after the case collection period may be added here. Edited material from long hospitalizations should not be included in this tab.

Note: Patient Photographic Consent Forms from the candidate's office should be included in the photographic section of the case report folder. Patient names should be blanked out as noted above.

Disqualification on Case Reports

If a candidate is disqualified for continuation in the examination process because the case reports are judged unacceptable (for whatever reason) it will not be recorded as a failure but is counted as one of the five opportunities to appear for the Oral Examination. However, because the Board has incurred expenses to provide a candidate with an examination, a refund of \$300, the examination fee less the processing charge of \$700, will be provided to the candidate.

Presentation of Case Reports

During the 40-minute examination, candidates must be prepared to defend the choice of operation and to present alternate treatment plans considered. Hospital and office records must clearly identify the candidate as the attending physician and surgeon. However, the candidate need not necessarily be the admitting physician, so long as he/she is clearly the attending plastic surgeon. Cases done by a resident under the candidate's supervision may be chosen by the Board and will be considered in the same way as cases done personally.

The Board regards the Case Reports submitted as important evidence of the candidate's basic ability to carry out plastic surgical procedures and to organize and present information in a succinct and complete fashion. Improper or disorganized preparation of this material will be sufficient cause to disqualify a candidate for continued examination.

Examination Schedule

The Oral Examination will occupy 2½ days. A detailed schedule is included in the Announcement Letter. Candidates are required to be present for each day of the examination at the times listed in the Announcement Letter. Late arrival may result in denial of admission to the examination.

Instructions and Procedures

Candidates will receive specific instructions concerning the examination at the Registration and Orientation Sessions on each morning of the examination. On each examination day, candidates will also be given a schedule showing the time and the room location for

the Case Report Session and the two Theory and Practice Sessions of the examination. Failure to appear on time for any session of the examination will lead to a failing grade on that section. Candidates should be outside the examination room 5 minutes before the scheduled time. It is not necessary for candidates to announce their presence. If, however, a candidate has not been invited into the examination room by the examiners by 10 minutes after the scheduled time, candidates should notify the temporary Board office immediately.

The Board has made every effort to assign candidates to examiners whose knowledge of the candidate's background would not bias their evaluation of performance. If a candidate finds that an examiner to whom he/she has been assigned played a role in the candidate's training, is a close friend or relative, is a close professional associate, or has examined the candidate previously, the temporary Board office must be notified immediately. However, unless conflicts are identified in advance of the actual examination, the conduct and grades of that session cannot be contested based on prior contact or knowledge.

Description of the Examination

Each examination session is designed to evaluate the candidate's breadth and depth of knowledge, the ability to apply it in the solution of a wide range of clinical problems, and matters related to ethics. Each session is structured in that the examiners are given a schema to be followed. This approach assures uniformity and prevents duplication. Each of the examiners on each team is expected to pose problems and questions to candidates.

The following criteria are provided to the examiners as guidelines.

The candidate:

1. Adequately identified and analyzed the general problems
2. Considered reasonable goals and selected appropriate options in the diagnosis and management of the cases
3. Applied proper principles to the specific problems
4. Identified risk/benefit ratios of varied approaches
5. Anticipated complications and dealt with unexpected problems adequately
6. Demonstrated the ability to structure an alternative plan if the initial solution to a problem was unsuccessful

The examination consists of one Case Report Session and two Theory and Practice Sessions.

Oral Examination Examiners

All examiners are diplomates of the ABPS, are active in the practice and/or teaching of plastic surgery, and have been certified by the Board for no less than 5 years. They are respected members of the profession and are known for their surgical knowledge, expertise, and scientific contributions. They have been instructed in the technique and purposes of the examination process. Each team includes a Senior Examiner and a Guest Examiner.

The Case Report and Theory Practice Sessions are considered as one total examination. Candidates will pass or fail on the strength of their combined performance on all portions of the Oral Examination.

At the conclusion of each examination session, candidates may be offered an opportunity to add to earlier answers, modify them, or simply comment on the examination process.

Three teams of two examiners will examine each candidate. All six examiners will give grades and all six grades combined will determine the passing or failing status of each candidate.

The Board is determined that the examination shall be as comprehensive and objective as practical. The intention is that every candidate be provided an equal opportunity to become Board

certified. The same standard is applied to each candidate insofar as is possible.

Change of Address

If a candidate's address, as it appears on the Admission Card (white), is incorrect, the corrected or new address must be indicated on the back of the Admission Form (white) in the space provided. This card is required when receiving the Result Letter on the last day of the Oral Examination.

Debriefing Session

On the evening of the last examination day, there will be a voluntary debriefing session, which the Board encourages candidates to attend for the purpose of evaluating the examination.

Distribution of Result Letters to Candidates

Result letters will be distributed after the conclusion of the last session on the third day of the examination. Candidates are required to present the Admission Form (white) or photo identification to the proctors in order to receive their Result Letter. Candidates not present for distribution of the Result Letters will have their letter mailed from the Board office the week following the Examination.

Examination Performance Critique (\$200)

Candidates receiving a failing grade who desire information concerning performance on their Oral Examination may request a critique by writing to the Board office. Requests must be received within 30 days of the date on the result letter. Candidates will be responsible for a charge of \$200 for information concerning their performance.

Cancellation of Examination

Should the ABPS, in its sole discretion, cancel the Oral Examination, or as a result of events beyond its control be unable to administer the Oral Examination at the appointed date, time, and location, or should ABPS fail to conclude a candidate's Oral Examination, the ABPS is not responsible for any expense the candidate may have incurred in connection with the cancelled Oral Examination, nor for any expense the candidate may incur for any substitute Oral Examination.

Fee Schedule

Processing	\$150
The processing fee of \$150 must be submitted with the Request for Evaluation of Training Form and is nonrefundable.	
Registration	\$500
The registration fee of \$500 must be submitted with the Application for Examination and Certification Form and is nonrefundable.	
Written Examination	\$1,250
The Written Examination fee of \$1,250 is a separate fee in addition to the Registration Fee of \$500 submitted with the Application for Examination and Certification Form. This Examination fee of \$900 must be submitted when the Reply Card (green) requesting examination is returned to the Board office. The fee for the Written Examination must accompany the Reply Card in order for the candidate to be scheduled for the examination.	
Written Examination Late Penalty Fee	\$500
Written Examination Score Validation Fee	\$200
Oral Examination	\$1,540 (Total)
Case List Review Fee	\$540

The Review Fee of \$500 must be enclosed with the case list to provide for review and selection of cases for preparation as Case Reports. This fee is nonrefundable.

Oral Examination Fee **\$1,000**

The balance of the examination fee of \$1,000 must be submitted with the Reply Card (green) in order to be scheduled for the examination.

Oral Examination Late Penalty Fee **\$700**

Written and Oral Examination Withdrawal Fee **\$700**

A withdrawal fee of \$700 will be deducted from the Written or Oral Examination Fee for candidates who provide written notice of withdrawal at least 30 days before the date of the examination. Candidates who withdraw from the examination less than 30 days before the date of the examination will forfeit the entire examination fee.

Credentialing Fee **\$150**

A Credentialing Fee of \$150 must be submitted with requests for special consideration by the Board for the Credentials and Requirements Committee.

Certificate Fee **\$100**

A new Certificate Fee of \$100 must be submitted to the Board with all requests for each additional certificate by diplomates.

Verification of Status Fee **\$25**

A Verification Fee of \$25 is required from all institutions and/or organizations who submit more than three requests within 1 month for written verification on the status of individuals. The \$25 fee applies to each additional request over and above three in 1 month.

Checks Returned for Insufficient Funds **\$50**

A charge of \$50 is applicable whenever a check received in payment of a fee is returned to the Board office from the bank for nonpayment due to insufficient funds. This charge must be included with the original fee when a new check is resubmitted to the Board.

Diplomate Annual Dues Fee **\$100**

An annual dues fee was initiated in 1999. The Board Office sends out announcements annually. Retired diplomates are excluded from the annual dues request.

Fees must be submitted in United States currency only. Foreign currencies, including Canadian, are unacceptable.

Fees are subject to change by the Board. The fee schedule applicable to current examinations will apply regardless of when a candidate is approved for admission to the examination process.

The Board is a nonprofit organization, and the fees of candidates are used solely for defraying the actual expenses of the Board. The directors of the Board serve without remuneration. Because of the limited number of plastic surgeons certified by this Board, it may be necessary for the Board to request a voluntary annual contribution from its diplomates.

Repeat Examination Fee

Fees for repeat examinations are the same as for the current original examinations.

Refunds

For the Written Examination, a refund of the examination fee (less a processing charge of \$700) will be granted provided the candidate submits a written request for withdrawal received in the Board office at least 30 calendar days prior to the date of the examination.

For the Oral Examination, a refund of the examination fee (less a processing charge of \$700) will be granted provided the candidate submits a written request for withdrawal received in the Board office at least 30 calendar days prior to the date of the examination.

For either the Written or Oral Examination, candidates who notify the Board office in writing less than 30 calendar days prior to the examination date of their intent to withdraw, or who fail to appear for examination, will forfeit the entire examination fee. The Board may waive this rule only if the circumstances warrant.

Special Situations

Appeals Policy

The Board has established a policy relative to resolution of questions or disagreements regarding its decisions on admissibility to examination; the form, content, administration, or results of the Written Examination; the administration of the Oral Examination; and the revocation of certificates. If an individual has a concern in any of these areas, it should be expressed in writing to the Board office, and a copy of the Appeals Policy will be sent to that individual.

Examination of Candidates with Disabilities

The ABPS has established a policy regarding examination of candidates with disabilities. If a candidate is requesting an accommodation based on a disability, the request should be expressed in writing to the Board office when submitting the Application for Examination and Certification Form. A copy of the policy regarding Examination of Candidates with Disabilities will be sent to that candidate. The ABPS complies with the Americans with Disabilities Act (ADA) and will provide reasonable accommodations to candidates with proven disabilities.

All materials submitted to document a disability must be received in the Board office in a timely fashion but no later than the deadline for all other documents required for admission to the examination for which accommodation is sought.

Examination Irregularities

The validity of scores on the Board's examinations is protected by every means available. The Board will not report a score which it has determined to be invalid, ie, which does not represent a reasonable assessment of the candidate's knowledge or competence sampled by the examination. The performance of all candidates is monitored and may be analyzed for the purposes of detecting invalid scores.

The Written Examination is supervised by proctors to ensure that the examination is properly conducted. If evidence by observation or analysis suggests that a candidate's scores may be invalid because of irregular behavior, the Board will withhold those scores pending further investigation and the affected candidate will be notified.

Examples of irregularities affecting the validity of scores would include (but not be limited to) the following: 1) using notes; 2) sharing information or discussing the examination in progress; 3) copying answers from another candidate; 4) permitting one's answers to be copied; or 5) unauthorized possession, reproduction, or disclosure of examination questions or other specific information regarding the content of the examination, before, during, or after the examination.

In such circumstances, upon analysis of all available information, the Board will make a determination as to the validity of the scores in question. If the Board determines that the scores are invalid, it will not release them, and notification of that determination may be made to legitimately interested third parties.

Candidates or other persons who are directly implicated in an irregularity are subject to additional sanctions. For example, the Board may bar such persons permanently from all future examinations, terminate a candidate's participation in an ongoing examination, invalidate the results of the candidate's examination, and withhold or revoke a certificate or take other appropriate action. Candidates or other persons subject to additional sanctions will be provided with a written notice of the charges and an opportunity to

respond to such charges in accordance with the reconsideration and appeal procedure established by the Board.

Substance Abuse or Chemical Dependency

Candidates with a history of abuse of a controlled substance or chemical dependency will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition and the Board is satisfied that they are currently free of such substance abuse or chemical dependency.

Certification

After candidates have met the requirements for admissibility and passed the examinations, the Board will issue certificates attesting to their qualifications in plastic surgery. A surgeon granted certification by the Board is known as a diplomate of the Board.

It shall be the prerogative of the Board to determine the fitness, professionally and ethically, of any candidate for a certificate, and the Board, for cause, may defer or deny certification to any candidate.

Certificates

Certificates issued by the Board shall be in such form as the Directors may from time to time determine. Certificates are signed by the chair, vice-chair, and secretary-treasurer of the Board and shall have placed upon them the official seal of the Board.

Certificates of the Board shall state that the holder has met the requirements of the Board and is certified by the Board as a medical specialist in plastic surgery and is entitled to be known as a "Diplomate of the American Board of Plastic Surgery, Inc." The names of all diplomates will be submitted to the American Board of Medical Specialties (ABMS) for publication in its directory. Diplomates should notify the Board in advance if they do not wish to be listed.

Additional certificates are available upon written request. A fee of \$100 for each certificate ordered should be included with the request. The diplomate's name should be listed, as it should appear on the certificate.

Maintenance of Certification (Recertification) Examination

Effective 1995, certificates issued by the Board are dated and will be valid for 10 years. Revalidation will be accomplished by the Board's Maintenance of Certification process. Certificates issued prior to 1995 are valid indefinitely. A diplomate may take the Maintenance of Certification examination during the 3 years preceding the Diplomate's original expiration date. The date of Maintenance of Certification certificate will be 10 years from the date of the primary certification.

The Recertification process has several key components, including evidence of: 1) professional standing, 2) lifelong learning, 3) practice profile, and 4) successful completion of cognitive exam. Professional standing will be evaluated through the application process and attestation of the chief of staff. Lifelong learning will be evaluated by evidence of CME activities. Practice profile will be monitored by an operative log collected over 6 months. The cognitive examination is planned as a computer based test (CBT) and will initially be offered in the spring of 2003. The examination consists of 200 multiple choice questions in a half-day format. Based on the Diplomate's practice profile, s/he will be assigned to one of four exams: (1) a Comprehensive examination of 200 questions or a subspecialty module consisting of 50 comprehensive plastic surgery questions and 150 questions in one of the following categories: (2) Cosmetic, (3) Craniomaxillofacial or (4) Hand Surgery. Recertification in the subspecialty of Surgery of the Hand will be accepted in lieu of the above examinations once the rest of the

Recertification application material is approved. Diplomates certified before 1995 are encouraged to voluntarily participate in the Recertification process. A diplomate's lifetime certification status will not be altered by the results of Recertification. Successful completion of the Recertification process will be reported as such with the 10-year expiration date for Recertification as an addition to the original certification, which continues to be valid indefinitely for those diplomates with lifelong certificates.

The American Board of Medical Specialists is in the process of making recommendations to its member Boards to phase out Recertification and phase in Maintenance of Certification. It is anticipated that ABPS will be introducing a Maintenance of Certification program in the next few years.

Revocation

Any diplomate of the Board will be subject to disciplinary action, including suspension and revocation, if at any time the Board determines, in its sole judgment, that the diplomate holding the certificate was not properly qualified to receive it or the diplomate holding the certificate has violated any of the following reasons for disciplinary action.

The Board may discipline a diplomate for just and sufficient reason, including, but not limited to, the following:

1. Conviction of a felony;
2. The diplomate did not possess the necessary qualifications and requirements to receive the certificate at the time it was issued;
3. The diplomate misrepresented his/her status with regard to Board certification, including any misstatement of fact about being Board certified in any specialty or subspecialty;
4. The diplomate engaged in conduct resulting in discipline by any medical licensing authority or in a revocation, suspension, qualification, or other limitation of his/her license to practice medicine in any jurisdiction;
5. The diplomate engaged in conduct resulting in the expulsion, suspension, disqualification, or other limitation from membership in a local, regional, national, or other organization of his/her professional peers;
6. Resignation from any organization while under investigation.

The diplomate will be given written notice of the reasons for the Board's action by registered or certified mail to the last address that the holder has provided to the Board. Discipline is final upon the mailing of the notification.

Individuals may appeal the decision imposing discipline by complying with the Appeals Policy. Failure to make a timely appeal will result in a loss of appeal rights.

Should the circumstances that justified discipline be corrected, the Board may, at its discretion, reinstate the diplomate after appropriate review of the diplomate's licensure and performance.

Each certificate issued by the Board shall be subject to revocation if the diplomate so certified has made any misstatement of material fact, or has failed to make any statement of material fact, in his/her application for such certificate or in any other statement or representation to the Board or its representatives, or has otherwise acquired the certificate by deception. Upon revocation, the certificate must be returned to the Board.

The Board shall have the jurisdiction and right to determine whether or not the information placed before it is sufficient to constitute grounds for the revocation of any certificate. The diplomate will be provided with a copy of the Appeals Policy of the Board, and this policy will be observed in pursuing resolution of the problem.

Certification and Recertification in the Subspecialty of Surgery of the Hand (formerly CAQSH)

The Board offers an examination for Certification and Recertification in the Subspecialty of Surgery of the Hand. The

examination is described in a separate Hand Surgery *Booklet of Information*, which may be obtained from the Board office upon request. There is no requirement nor necessity for a diplomate of The American Board of Plastic Surgery, Inc, to hold a Certificate in the Subspecialty of Surgery of the Hand in order to be considered qualified to include hand surgery within the practice of plastic surgery. Under no circumstances should a diplomate be considered not qualified to practice within an area of a subspecialty solely because of lack of subspecialty certification.

Foreign Certificates

A physician holding a foreign certificate issued by the Board between 1960 and 1973 must relinquish the certificate to the Board in the event that the individual returns to the United States for the purpose of practicing plastic surgery. A foreign certificate is not valid in the United States. Such individuals may apply for examination and certification in the manner described herein.

Inquiries as to Status

The Board does not consider a candidate's record to be in the public domain. When an inquiry is received by the Board regarding a candidate's status with the Board, a general, but factual, statement is provided which indicates that candidate's status within the process of certification. The Board provides this information only to individuals, organizations, and institutions with a reasonably valid "need to know" for professional reasons. Only written requests for verification of a candidate's status during the process of certification are accepted.

A charge of \$25 will apply to all institutions and/or organizations that submit more than three requests within 1 month, for written information on the status of individuals. The \$25 fee will apply to each additional request received over and above the allocated number of three requests per month.

Advertising

Although in the examination process, candidates may not advertise any status with the Board until certified after passing the Oral Examination. This includes, but is not limited to, statements, forms, or images that express or imply that one is a candidate, admissible, eligible, qualified, or affiliated of or with the Board prior to achieving certification.

Candidates will be deferred from the examination process for at least 1 year if the Board receives written documentation of such advertising.

Candidates are required to submit copies of all advertising materials to the Board. Examples of practice advertisements include, but are not limited to, business cards, letterhead, brochures, Web site content listing the candidate's qualifications, telephone book (yellow page) advertisements, and other print advertisements such as announcement flyers, magazines, and newspapers.

Candidates also may not represent themselves as members of the American Society of Plastic Surgeons (ASPS) by statements or use of the Society symbol as this can be regarded by the public as evidence of certification by the Board. The Board recommends that candidates and/or their senior partners contact the marketing department of ASPS to determine adherence to the Society's policies before placing practice advertisements in print.

The Directors may adopt such further rules and regulations governing requirements, examinations and issuance and revocation of certification as they may from time to time determine.

Requirements for Admission to Examinations

Each applicant for a certificate in aerospace medicine, occupational medicine, or public health and general preventive medicine must meet certain requirements to be admitted to the certifying examination. Such requirements are determined by the American Board of Preventive Medicine (ABPM).

Approval for admission to the examination can only be established after the review of a complete application by the full Board. No individual member of the Board is authorized to give an opinion on the admissibility of candidates, nor does the Board do preliminary credential reviews.

For the information of applicants, such requirements are summarized below. An applicant worksheet is available from the ABPM web site at www.abprevmed.org for use in comparing the ABPM requirements to an applicant's training and experience.

General Requirements

- Medical School:** Graduation from a medical school in the United States which at the time of the applicant's graduation was accredited by the Liaison Committee on Medical Education, a school of osteopathic medicine approved by the American Osteopathic Association, an accredited medical school in Canada, or a medical school located outside the United States and Canada that is deemed satisfactory to the Board.
- Current License(s):** Unrestricted and currently valid license(s) to practice medicine in the District of Columbia or a state, territory, commonwealth, or possession of the United States or in a province of Canada. No license may be restricted, revoked, or suspended or currently under such notice.

3. **Clinical Year:** A year of supervised postgraduate clinical training provided as part of a graduate medical education program accredited by the Accreditation Council for Graduate Medical Education (ACGME). Clinical training accredited by the Royal College of Physicians and Surgeons of Canada or the College of Family Physicians of Canada is also acceptable. The training must include at least 6 months of direct patient care comprising ambulatory and inpatient experience with hands-on patient care involving diagnostic workup and treatment of individual patients.
4. **Academic Year:** Successful completion of a course of graduate academic study and award of a Master of Public Health or equivalent masters or doctoral post-graduate degree, the course content of which shall include biostatistics, epidemiology, health services management and administration, and environmental health.
5. **Practicum Year:** Residency practicum of not less than 1 year that is accredited by the ACGME in the specialty area for which certification is being sought and that shall have provided supervised experience in the practice of that specialty area of preventive medicine and planned instruction, observation, and active participation in a comprehensive organized program.
6. **Current Practice:** The applicant must have been engaged in essentially full-time training for, or practice in, the specialty area for which certification is being sought for at least 1 of the 3 years preceding application for certification.

Special Requirements in Aerospace Medicine, Occupational Medicine, and Public Health and General Preventive Medicine

A period of not less than 1 year of supervised training and instruction, accredited by the ACGME in the specialty area for which certification is being sought, is required. (See No. 5 under "General Requirements," above)

Alternative Pathway to Certification

Persons graduating from a school of medicine or school of osteopathic medicine prior to January 1, 1984, who have not formally completed all of the components previously described, may be considered for admission to the examination if their training and experience are judged by the Board to provide a suitable alternative to formal training.

The Board will consider granting credit toward satisfying training requirements for such factors as:

1. Completion of 3-credit hour, postgraduate-level academic course work in each of the four core areas: epidemiology, biostatistics, health services management and administration, and environmental health or teaching one or more of the four courses at the postgraduate level and that is acceptable to the Board; and
2. Periods of full-time practice, research, or teaching in the specialty area of preventive medicine in which certification is sought. A total of 8 years of full-time practice is required if no other specialty certification is held, but may be reduced to 6 years if certification is held in another specialty recognized by the American Board of Medical Specialties (ABMS). For those with an MPH or equivalent masters or doctoral postgraduate degree but no practicum year, a period of 4 years of full-time practice is required in the specialty area of preventive medicine for which certification is being sought, a period that can be reduced to 3 years if other ABMS specialty certification is held.

Each applicant is considered individually by the Board in accordance with the existing guidelines. An applicant worksheet is available from the ABPM web site at www.abprevmed.org for use in comparing the ABPM requirements to an applicant's training and experience. Practice time needed for the alternative pathway to certification is summarized on this worksheet. Applications must be received by June 1 of each year. Requirements must be completed

by August 1 of the year in which the applicant wishes to sit for the examination.

Persons graduating from a school of medicine or school of osteopathic medicine after January 1, 1984, will be admissible to the examination only after completing ACGME-accredited residency training in preventive medicine. This alternative pathway to certification is not available for such graduates.

Special Pathway for ABPM Diplomates

Diplomates of ABPM who have graduated from medical school after January 1, 1984, may request consideration through a special pathway. In order to qualify for this special pathway, applicants must have completed an ACGME-accredited residency in a specialty area of preventive medicine, been certified in that specialty area, be applying for certification by ABPM in an additional preventive medicine specialty area, and have sufficient practice time to meet the requirements. A total of 2 years of essentially full-time practice is required in the specialty area for which the additional certification is sought. In addition, the applicant must have been engaged in essentially full-time training for, or practice in, the specialty area for which the second certification is being sought for at least 1 of the last 3 years.

Subspecialties

Medical Toxicology

Every 2 years the ABPM offers subspecialty certification in medical toxicology to ABPM diplomates who meet the appropriate requirements for medical toxicology. Applications for the 2002 examination cycle are available from the Board office and will be accepted with postmark dates through May 1, 2002.

Undersea and Hyperbaric Medicine

ABPM offers subspecialty certification in undersea and hyperbaric medicine in late fall each year to physicians who hold current certification by one of the ABMS member boards and meet the appropriate requirements in undersea and hyperbaric medicine. The American Board of Emergency Medicine (ABEM) also offers subspecialty certification in undersea and hyperbaric medicine. Diplomates of the ABEM must apply through that board.

Internet Web Site

www.abprevmed.org

ABPM has a Web site that includes the latest version of its application and other publications. Please refer to this Web site address for current information about the ABPM.

Application

There are three ways in which applicants may submit an application:

1. by entering the information online at the ABPM Web site;
2. by downloading the application from the ABPM Web site;
3. by requesting an application from the Board office.

In all cases, the signed application form must be mailed to the Board office with the appropriate fee. If the application is submitted online (option 1), there will be a \$25 credit applied to the application fee. Options 2 and 3 do not include a credit.

Applicants requiring special examination accommodations due to a disability should contact the Board office to obtain the Application for Testing Accommodations form. This form is required at the time the examination application is submitted.

Examination

The examination is a 1-day written examination given in the late fall of each year. It is a multiple-choice examination, with the morning portion covering the core knowledge of preventive medicine and the afternoon portion covering aerospace medicine, occupational medicine, or public health and general preventive medicine.

Reapplication and Reexamination

An applicant approved for admission to the examination who does not take the examination, or who fails to pass the examination within the 3-year approval period, is required to file a new application and pay a new application fee.

Applicants not approved for admission to the examination may request reconsideration of their applications on the basis of new or additional information within 2 years of the filing date of the original application, with payment of the re-review fee.

Candidates not passing the examination may, upon timely registration and payment of appropriate fee, be admitted to reexamination during their approval period.

A candidate who has failed the examination on two or more occasions may be required to have additional training, in accordance with recommendations from the full Board, before being admitted to further examination.

Beginning with the exam offered in 2001 applicants who pass only the Core or Specialty Area portion of the examination may achieve certification by retaking and passing the failed portion of the exam at the next offering (approximately 1 year later).

Multiple Certification

An individual may apply sequentially for admission to examination in more than one specialty area of preventive medicine. Applicants may not apply in more than one specialty area in a given year. An applicant must fulfill the individual requirements of each specialty area in which application is made and cannot double-count the same periods for practice time.

Beginning with applicants who pass both the Core and Specialty Area portions of the exam offered in 2001, diplomates may achieve certification in an additional specialty area by qualifying for, taking, and passing only the Specialty Area portion of the exam within 7 years of their initial certification.

Certification

Upon satisfactory completion of the examination, a certificate will be issued stating that the applicant has been found to possess special knowledge in the specified specialty area of preventive medicine. The certificate will be signed by officers of the Board and will have the seal of the Board affixed. Each certificate remains the property of the Board, but the person to whom it is issued is entitled to its possession unless it is revoked.

Any certificate issued by the Board may be revoked if evidence, satisfactory to the Board, is presented that the applicant was not eligible to receive it at the time of issuance; or that any pertinent fact had been misstated, misrepresented, or concealed; or that any license to practice medicine has been suspended or revoked. *Note:* The issuance of a certificate to a person does not constitute membership on the Board.

Time-Limited Certificates

Note: By action of the Board in August 1994, ABPM now issues 10-year, time-limited certificates. The first time-limited certificates were issued in 1998 to candidates who passed the certifying examination given in November 1997.

Notice of Certification

The examination results, without individual identifiers, are reviewed by the full Board during its January meeting. Final determination of candidates' certification status is made at that time.

Candidates who have taken the examination may expect to be notified of results by mail within 3 months after taking the examination.

Fees

The members of the Board serve without compensation. Fees are based on the actual expenses incurred in review of applications; examination development, administration, and scoring; and office administration.

A nonrefundable application fee of \$350* is required if the applicant holds an MPH or equivalent masters or doctoral post-graduate degree and has completed an ACGME-accredited residency in the specialty area of preventive medicine in which certification is sought.

A nonrefundable application fee of \$600* is required if the applicant is applying through the alternative pathway to certification.

A nonrefundable application fee of \$500* is required if the applicant is applying through the special pathway for ABPM diplomates.

The nonrefundable application fee is reduced by \$25 if the online application process is used.

A nonrefundable re-review fee of \$150* is required to reactivate an application within 2 years of the original review.

An additional fee of \$50* may be required for an incomplete application after the July 15 deadline.

The examination fee of \$1,300* is due 45 days prior to the examination. The examination fee is nonrefundable within 45 days of the examination.

Fees for the Subspecialty of Medical Toxicology

The total amount due with the application is \$1,420,* which includes a nonrefundable application fee of \$330* and the examination fee of \$1,090.* The examination fee will be refunded to those applicants not approved to sit for examination.

Fees for the Subspecialty of Undersea and Hyperbaric Medicine

A nonrefundable application fee of \$300* is required if the applicant is applying through the fellowship pathway.

A nonrefundable application fee of \$450* is required if the applicant is applying through the practice pathway.

The examination fee of \$1,100* is due 45 days prior to the examination. The examination fee is nonrefundable within 45 days of the examination.

**Note:* All fees are reviewed annually and are subject to change at the direction of the Board. Please contact the Board office for the current fee schedule.

Listing of Individuals Certified

A list, current to the date of publication, of persons to whom certificates have been issued by the Board may be found in *The Official ABMS Directory of Board Certified Medical Specialists*, the ABMS Web site, at www.abms.org, and the ABPM Web site, www.abprevmed.org.

Reporting of Changes of Address

Once certified, physicians should notify the following offices in writing of any changes of address:

1. The American Board of Preventive Medicine, Inc, by completing the online address change form at www.abprevmed.org.

2. The Physician Biographic Records Department, American Medical Association, 515 N State St, Chicago, IL 60610, the office that maintains a master file of all physicians in the US
3. Elsevier Science, 655 Avenue of the Americas, New York, NY 10010; 888 437-4636; fax 212 633-3820, publisher of *The Official ABMS Directory of Board Certified Medical Specialists*

Important Dates

- April 15: Deadline for receipt of action plans from candidates failing examinations on two or more occasions.
 - June 1: Deadline for completed application forms, application fees, and reapplication requests to be received in the Board office for the November examination.
- Deadline for receipt of re-review requests and fees.
- July 15: Deadline for receipt of additional information not included with the June 1 application.
 - August 1: Deadline for completion of requirements to sit for the November examination.
 - August: Meeting of the Board to determine admissibility of applicants to November examination. Letters of notification of admissibility for November examination are mailed to candidates after the August Board meeting. Notification is not given by telephone.
 - September/October: Deadline for examination fee 45 days prior to the examination. Date varies from year to year and is stated in the letter of admissibility.
 - November: Annual 1-day written examination in Chicago, Illinois. In 2002, the date of the examination is November 11; and in 2003, November 10.
 - January: Meeting of the Board to determine the pass/non-pass score for the previous November examination.
 - February: Results of November certifying examination are mailed to candidates after the January Board meeting. Notification is not given by telephone.

Applicants with Disabilities and Qualifications for Testing Accommodations

General Information

The Board recognizes that physicians with disabilities may wish to take the certifying examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the intent of the Americans with Disabilities Act (ADA). Applicants are reminded, however, that "auxiliary aids (and services) can only be offered if they do not fundamentally alter the measurement of skills or knowledge the examination is intended to test" (Americans with Disabilities Act, Public Law 101-336 (§309 [b][3])). To this extent, the Board will provide reasonable accommodations during testing to provide equal opportunity for persons with disabilities. The documentation requesting reasonable accommodations must identify a disability and provide a rationale for specified modifications to standard testing procedures.

Applicants who request accommodations because of a disability must advise the Board in writing no later than the deadline for submitting applications for examination. All documentation and other evidence substantiating the disability must be submitted to the Board no later than 30 days after the deadline for filing an application for examination. Required documentation includes completion of the Application for Testing Accommodations and appropriate checklists. If the Board deems it necessary, an independent assessment may be requested at the expense of the Board.

Documentation and other evidence substantiating the disability includes, but is not limited to, each of the following:

A report diagnosing the applicant's disability written by a professional appropriately qualified for evaluating the disability. The

report must be printed on the certified examiner's letterhead, with the examiner's credentials, address, and telephone number given in the letterhead or title. The report must include the candidate's name, date of birth, and date of testing, and it must be signed by the examiner.

A history of the disability, including previous settings in which accommodations have been granted. Having had prior accommodations granted does not necessarily influence the decision of the Board to grant or deny a current request for accommodation. If there is no history of prior accommodations, the examiner must explain why current circumstances necessitate accommodations.

Diagnostic information about the specified disability using standard nomenclature from sources such as the International Classification of Diseases and the American Psychiatric Association *Diagnostic and Statistical Manual of Mental Disorders*.

Specific recommended accommodations, with a rationale for why each accommodation is needed. A description of any functional limitations associated with the disability is important to the Board's evaluation of the request.

Review of Documentation

A letter detailing the specific accommodations requested because of a disability must be submitted for each examination and/or reexamination. Documentation should be marked "ADA Materials" and mailed to the attention of the executive director at the Board office.

Each report is reviewed carefully before accommodations are provided. If the Board does not find appropriate and sufficient evidence to grant accommodations, the applicant will be informed that the request has been denied.

Any applicant whose request for accommodations because of a disability is denied may submit a letter of appeal. All requests for appeal should be submitted to the Board office within 30 days of the original notice of denial and must be accompanied by any further information that rebuts the Board's original decision. The Appeals Committee will then review the materials and make a decision that will be final and binding for the Board and the applicant.

(Please note that this is not an official document of the American Board of Psychiatry and Neurology. The Board cannot accept responsibility for errors made in the printing of this material. Please contact the Board's executive office for official policies and procedures of the board.)

Throughout this section, the American Board of Psychiatry and Neurology may be referred to as the "Board" or as "ABPN."

The information in the ABPN section is effective for the November 6, 2002, Part I examination only. Contact the Board office for the most current information.

Deadlines for the November 6, 2002, Part I Examination

Part I Application	February 1, 2002
Part I Late Application	March 1, 2002
Completion of residency training	June 30, 2002
Written confirmation of completion of residency training	July 15, 2002
Part I Reexamination Fee	Board will notify applicant

(Contact the Board office if you have not received a billing statement by February 15, 2003.)

Part I Reexamination Late Fee	30 days after reexamination fee deadline
-------------------------------	--

Fee Schedule (Effective February 2002)

Part I Application Fee	\$475
Part I Examination Fee	\$525
Part I Late Application Fee (in addition to the above)	\$250
Part I Reexamination Fee	\$525
Part I Reexamination Late Application Fee (in addition to the above)	\$75
Part II Examination Fee	\$1,150

Psychiatry Part II Reexamination Fee	\$1,150
Neurology/Child Neurology Part II Reexamination Fee:	
One section	\$775
Two or three sections	\$1,150
Application/Licensure Appeal Fee	\$350
Part I Appeal Fee	\$300
Part II Feedback Fee	\$100
Part II Appeal Fee	
One section	\$750
Two or three sections	\$1,000
Duplicate certificate fee	\$50
Returned check charge	\$50

All fees must be submitted in US currency. The ABPN reserves the right to revise fee schedules.

I. General Information

A. Mission Statement

The mission of the American Board of Psychiatry and Neurology, Inc. is to serve the public interest by promoting excellence in the practice of psychiatry and neurology through lifelong certification, including competency testing processes.

B. Certificates

The Board currently issues the following 10 types of certificates:

1. Psychiatry
2. Neurology
3. Neurology with special qualification in child neurology
4. Child and adolescent psychiatry
5. Geriatric psychiatry
6. Clinical neurophysiology
7. Addiction psychiatry
8. Forensic psychiatry
9. Pain management
10. Neurodevelopmental disabilities

An applicant may be certified in more than one area and will receive a separate certificate for each area in which he or she qualifies. Each certificate shall be in such form and for such period of time as may be specified by the Board.

C. Recertification

As of October 1, 1994, all individuals achieving Board certification by the ABPN are issued 10-year, time-limited certificates. Certificates issued in the subspecialties of geriatric psychiatry, clinical neurophysiology, addiction psychiatry, and forensic psychiatry, including those issued prior to October 1, 1994, are 10-year, time-limited certificates. All ABPN time-limited certificates, regardless of their exact dates of issuance, are considered to expire 10 years later on December 31.

Diplomates who are not recertified before their certificates expire are no longer Board-certified in that area of certification. Once a former diplomate passes the recertification examination, however, he or she will regain certification status. There is no time limit on regaining certification status through recertification.

D. Revocation of Certificates

The Board has the authority to revoke any certificate issued by it or to place a certificate holder on probation for a fixed or indefinite period of time if (1) the certificate was issued contrary to, or in violation of, the bylaws or any rule or regulation of the Board, (2) the certificate holder is in violation of the bylaws or any rule or regulation of the Board, or (3) the person to whom the certificate was issued made any material misstatement or omission of fact to the Board in his or her application or otherwise.

Certification shall continue in force only so long as the holder has an unrestricted license to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada. A full and unrestricted medical license must be maintained even if a physician is out of the country for extended periods of time. An unrestricted license is a license to practice medicine issued by an appropriate licensing board that contains no restrictions, limitations, conditions, or contingencies on a physician's privilege to practice professionally. Any license that is revoked, suspended, or encumbered by a restriction, condition, negotiated agreement, stipulation, probation, or contingency is *not* an unrestricted license. Applicants in possession of any restricted license—even if the candidate also possesses an unrestricted license(s)—will not be scheduled for examination or issued certificates. *Restriction of a physician's license does not, however, include voluntary participation in an impaired physicians program or other appropriate, monitored alcohol or chemical substance-abuse recovery program, if the physician has not been reported to either the National Practitioner Data Bank or the Data Bank of the Federation of State Medical Boards.* It is the responsibility of the candidate/diplomate to inform the Board immediately upon a change in licensure status.

E. Irregular Behavior Including Unethical Behavior of Candidates

The Board believes that the ethics of candidates for certification are of concern. The following rules apply:

1. Falsification of credentials will be cause for the Board's refusal to admit a candidate to examination for up to 5 years.
2. The Board will consider legal action against anyone who forges an ABPN certificate, copies ABPN examinations or otherwise uses them in conflict with copyright laws, or in any other way violates the legal prerogatives of the Board. Such activities also will be cause for the Board's refusal to admit a candidate to examination for up to 5 years.
3. Scores on written examinations may be invalidated for reasons of irregular behavior. Statistical analyses may be used to confirm suspected cheating. If an examination score is invalidated, the candidate may submit a written appeal within 30 days of notice of invalidation. See below for a description of the appeal process. If an examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of up to 5 years, depending on the irregular behavior. A repeat application and examination fee will be required.
4. Irregular behavior on oral examinations may be considered sufficient reason to invalidate a candidate's score. If the examination score is invalidated, the candidate may submit a written appeal within 30 days of notice of invalidation. See below for a description of the appeal process. If an examination score is invalidated because of irregular behavior, the Board will not consider the candidate for examination for a period of up to 5 years, depending on the irregular behavior. A repeat application and examination fee will be required.
5. "Irregular behavior" shall include, but not be limited to, the following conduct: (a) copying answers from another candidate's examination; (b) knowingly permitting another candidate to copy one's answers on an examination; (c) unauthorized possession, reproduction, or disclosure (via oral, written, or electronic media) of examination materials or content, at any time; (d) use of audio equipment to record any part of an oral examination; (e) offering any financial or other benefit to any director, officer, employee, proctor, diplomate, or other agent or representative of the Board in return for any right, privilege, or benefit that is not granted by the Board to other similarly situated candidates or persons; (f) not complying with proctors' or examiners'

instructions; (g) disregarding time limits; and (h) any other form of disruptive behavior, including repeated or excessive verbal complaints.

6. Notification of the Board's action may be sent to legitimately interested third parties, including the American Medical Association, state medical societies, medical licensing boards, and appropriate specialty societies.

Appeal procedure for invalidation due to irregular behavior

A candidate whose examination scores are invalidated because of irregular behavior may appeal this decision by submitting the following materials to the executive vice president at the Board office:

1. A written request for a formal appeal of the invalidation of examination scores
2. The applicable appeal fee (see Fees, above)
3. Additional written information that rebuts the invalidation

The appeal materials must be sent together in a single mailing that is postmarked within 30 days of the date indicated on the letter of invalidation.

The appeal materials will be sent to the respective Appeals Committee, which will review the materials, deliberate, and make a determination. In all events, the Appeals Committee's determination is final and binding on both the Board and the candidate.

F. Board Eligibility

The American Board of Psychiatry and Neurology, Inc, in accordance with the policy of the American Board of Medical Specialties, does not recognize or use the term "Board eligible" and does not issue statements concerning "Board eligibility." The Board informs an applicant of admissibility to examination only when the applicant has an active, approved application on file in the Board office.

G. Conflict of Interest

In order to maintain the confidence of the public and the medical profession in the integrity of the Board, it is important for those doing its work to avoid certain activities that could provide the opportunity for an actual conflict of interest or the appearance thereof. A conflict of interest is defined as an instance wherein a competing outside activity or holding could influence or appear to influence the Board's activities in the area of policy development, evaluation of training programs, or examination development. Examples of such competing outside interests are compensated direct employment, paid advisory or consultant positions, significant personal investments, or other affiliations as an officer and/or director in a pharmaceutical or medical supply company.

As an alternative to regulating investment or employment, the Board has chosen to manage matters related to the appearance of a conflict of interest by encouraging disclosure of significant financial interests or relationships and abstention from participation in decision-making related to a matter that could give rise to a conflict of interest (due to a material financial interest or relationship).

Annually, Board members, test committee members, written examination proctors, the executive vice president, and staff members of the Board are required to complete a form disclosing the following general information:

1. License restrictions to practice medicine
2. Participation in board review courses or publication of materials in any media format, including the Internet, regarding board review in psychiatry or neurology
3. Significant financial holdings in any pharmaceutical or medical supply company
4. An affiliation in the capacity of trustee, officer, director, or other major capacity with any pharmaceutical or medical supply company
5. Any other affiliations that would present a potential or apparent conflict of interest or commitment

Any individual who participates in any review course that is publicized as being a Board review course, or in any course that could be construed as a Board review course, or who has edited or provided written or audiovisual materials for publications identified as preparation for Board examinations, or who copies, reproduces, or discloses (via oral, written, or electronic media) examination materials or content should not participate as an examiner in any oral examination, as a proctor in any written examination, or as a member of any Board committee for at least 12 months subsequent to the course or publication of any written or audiovisual materials.

All ABPN examiners are diplomates of the ABPN.

II. Requirements for Admission to Examination

A. General Requirements for All Applicants

In order to qualify to sit for examination, an applicant must:

1. Be a graduate of an accredited medical school in the United States or Canada, or of an international medical school listed by the World Health Organization.
2. Have an *unrestricted license* to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada. Applicants are required to submit a copy of their unrestricted licenses with their Part I applications. Any candidate submitting a temporary (education or training) license at the time of application for Part I will be required to submit a copy of his/her current unrestricted license, as described above, no later than December 15 of the year in which the candidate passed the Part I examination.
3. Have no restricted licenses in any state, commonwealth, territory, or possession of the United States or province of Canada. A restriction includes, but is not limited to, revocation, suspension, condition, negotiated agreement, stipulation, probation, or contingency. **Applicants in possession of any restricted license—even if the candidate also possesses an unrestricted license(s)—will not be scheduled for examination or issued certificates.** *Restriction of a physician's license does not, however, include voluntary participation in an impaired physicians program or other appropriate, monitored alcohol or chemical substance-abuse recovery program, if the physician has not been reported to either the National Practitioner Data Bank or the Data Bank of the Federation of State Medical Boards.* It is the responsibility of the candidate/diplomate to inform the Board immediately upon a change in licensure status.
4. Have satisfactorily completed the Board's specialized training requirements in psychiatry, neurology, neurology with special qualification in child neurology, or any of its subspecialties. Training requirements for the primary specialties are explained in the sections that follow.
5. Submit a completed official application form, including all required attachments and the appropriate application and examination fees, by the specified deadline. (*See above for the fee schedule and application deadlines. See Section III for a complete description of the application process.*)

B. General Training Requirements

References to "residency" refer to entry at the PGY-2 level unless otherwise stated. Residency training must be in the specialty in which the applicant seeks certification, except for residents who are in an approved combined training program. (*See section VI.D for more information about combined training programs.*)

Training programs approved by the Residency Review Committees and accredited by the Accreditation Council for Graduate Medical Education (ACGME) can be found in the current edition of the *Graduate Medical Education Directory*, published by the Ameri-

can Medical Association. This directory includes the program requirements for residency education.

Training may be completed on a part-time basis, provided that it is no less than half time. Training programs may develop individual leave or vacation time for residents in accordance with the overall institutional policy. Leave or vacation time may not be utilized to reduce the total amount of required residency training or to make up deficiencies in training.

C. Training in More Than One Residency Program

To ensure continuity of training, the Board requires that 2 of the 3 years of residency training, excluding the PGY-1, be spent in a single program. In addition, credit will not be given for less than 1-year blocks of training, including the PGY-1. The ABPN Credentials Committee will consider exceptions to these rules only under extraordinary circumstances. In such cases, respective program directors should contact the Board office, in writing, **prior to the transfer**. The letters should outline the resident's training content, duties, and responsibilities, include exact dates of training, and must indicate clearly that the resident will satisfy all ACGME program requirements as outlined in the *Graduate Medical Education Directory*. Each case will be considered on an individual basis.

If the Credentials Committee approves the request, the Board will notify the program directors. A copy of this letter should be given to the resident to submit with his/her Part I application. Residents who have not received prior approval from the Credentials Committee risk the possibility that the Board will deny their Part I applications.

When training is completed in more than one program, the training director of the first program should send to the training director of the second program a letter detailing the training satisfactorily completed, including exact dates of training, and areas of training that are deficient. After reviewing this documentation, the training director of the second program should inform the resident whether or not the second program will be able to provide the resident with the experience necessary to remove the deficits.

D. Psychiatry: Specific Training Requirements

Unless otherwise specified (*see sections on Canadian and other international training below*), all training must be completed in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

An applicant seeking admission to examination for certification in psychiatry must have satisfactorily completed an ACGME-accredited PGY-1 (*see below*) and 3 full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME. See the sections below for information regarding Canadian and other international training requirements. Different requirements apply for applicants who began training in psychiatry prior to 1986. These candidates should call the Board office if they have any questions.

Two patterns of training are acceptable:

1. Three-year psychiatry residency program

A broad-based clinical year of ACGME-accredited training in internal medicine, family practice, or pediatrics; or an ACGME-accredited transitional year program that included a minimum of 4 months of primary care; or an ACGME-accredited residency in a clinical specialty requiring comprehensive and continuous patient care.

and

Three full years of postgraduate, specialized residency training in a psychiatry program accredited by the ACGME.

or

2. *Four-year psychiatry residency program*

Four years of training in an ACGME-accredited program in psychiatry is acceptable. A first postgraduate year in psychiatry must include at least 4 months in internal medicine, family practice, and/or pediatrics. This training must be in a clinical setting that provides comprehensive and continuous patient care. No more than 1 month of this requirement may be fulfilled by an emergency medicine rotation, as long as the experience predominantly involves medical evaluation and treatment, rather than surgical procedures. Neurology rotations may *not* be used to fulfill this 4-month requirement.

Canadian training programs

Physicians entering residency training in psychiatry (PGY-2) on or after July 1, 2001, may apply to the ABPN for examination only if they:

1. Complete their training in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada.
and
2. Achieve certification by the Royal College of Physicians and Surgeons of Canada.
and
3. Possess a full, unrestricted license to practice medicine in a Canadian province.

Physicians entering residency training in psychiatry prior to July 1, 2001, may be granted credit for training completed in Canada if the training was completed in a program accredited by the Royal College of Physicians and Surgeons of Canada. These applicants must initiate the ABPN certification process by 2007 and should contact the Board office if they have any questions.

Other international training

Physicians entering psychiatry residency training on or after July 1, 1997, will not be granted credit for other international training. Physicians entering psychiatry residency training prior to July 1, 1997, may be granted credit for other international training *only* if they:

1. Achieve a national certificate accepted by the ABPN by the year 2005. The only certificates accepted by the ABPN are MRCPsych, FRANZCP, FF Psych (SA) and Israel's Specialty Certification of the Scientific Council of the Israel Medical Association. If a physician's training was not completed in its entirety (internship and residency training) in the country issuing the certificate, the physician must complete an additional year of approved primary care training in the United States.
and
2. Initiate the ABPN certification process by the year 2007.

Physicians who entered residency training in the United Kingdom prior to July 1, 1986, should contact the Board office for training credit information.

E. Neurology: Specific Training Requirements

Unless otherwise specified (*see sections on Canadian and other international training on next page*), all training must be completed in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

An applicant seeking admission to examination for certification in neurology must have satisfactorily completed an ACGME-accredited PGY-1 (*see below*) and 3 full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME. The PGY-1 must be completed prior to the 3-year residency training. See the sections below for information regarding Canadian and other international training requirements. Different requirements apply for applicants who began training in neurology prior to 1991. These candidates should call the Board office if they have any questions.

Two patterns of training are acceptable:

1. *Three-year neurology residency program*

A full year of ACGME-accredited training in internal medicine, or as an acceptable alternative, a full year in an ACGME-accredited program in which a minimum of 6 months of training must be in internal medicine, the details of which must be documented by the training director. The composition of these 6 months may *not* include rotations in neurology or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should emphasize progressive responsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. For candidates entering neurology residency training on or after July 1, 2001, at least 2 of the additional 6 months must be spent in internal medicine, pediatrics, family medicine, and/or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology.

and

Three full years of postgraduate, specialized residency training in a neurology program accredited by the ACGME.

or

2. *Four-year neurology residency training*

Four years of training in a neurology residency program accredited by the ACGME.

Effective for residents entering residency training in neurology as of July 1, 2002, 6 months of neurology credit may be granted for neurosurgery training provided the training has not been accepted by another board for certification. A letter from the neurology program director, detailing the proposed training, must be submitted to the Board office for review and approval. Documentation of the neurosurgery training should accompany the letter.

Canadian training programs

Physicians entering residency training in neurology (PGY-2) on or after July 1, 2001, may apply to the ABPN for examination only if they:

1. Complete their training in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada.
and
2. Achieve certification by the Royal College of Physicians and Surgeons of Canada.
and
3. Possess a full, unrestricted license to practice medicine in a Canadian province.

Physicians entering residency training in neurology prior to July 1, 2001, may be granted credit for training completed in Canada if the training was completed in a program accredited by the Royal College of Physicians and Surgeons of Canada. These applicants must initiate the ABPN certification process by 2007 and should contact the Board office if they have any questions.

Other international training

Physicians entering neurology residency training on or after July 1, 1997, will not be granted credit for other international training. Physicians entering neurology residency training prior to July 1, 1997, may be granted PGY-1 credit for training completed in an other international program *only* if they:

1. Achieve a national certificate accepted by the ABPN in internal medicine by the year 2005. The only internal medicine certificates accepted by the ABPN are MRCP(UK), MRACP, FCP, and MRCP(I).
and
2. Initiate the ABPN certification process by the year 2007.

F. Neurology With Special Qualification in Child Neurology: Specific Training Requirements

Proper preparation for the practice of child neurology requires that the practitioner be a qualified neurologist who has had additional training in pediatrics and child neurology. To qualify for this certificate a different type of preparation and certifying examination are required. The same diploma will be used, the only difference being that instead of certifying qualification in "neurology," it certifies qualification in "neurology with special qualification in child neurology."

Unless otherwise specified (*see sections on Canadian and Other International Training below*), all training must be completed in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME). Different requirements apply for applicants who began training in child neurology prior to 1991. These candidates should call the Board office if they have any questions.

Three patterns of training are acceptable for 2 of the 5 years of training:

1. General pediatrics

The usual pathway is 2 years of training in general pediatrics in an ACGME-accredited program. This is the only pathway that allows the applicant admission for examination by both the American Board of Pediatrics and the American Board of Psychiatry and Neurology.

or

2. General pediatrics/basic neurosciences research

One year of training in general pediatrics in an ACGME-accredited program and 1 year of research in the basic neurosciences. The basic neurosciences pathway was created as an alternative track for residents who are planning a research career in academic child neurology. The year of basic neurosciences must provide training in a research discipline related to child neurology and is intended to increase the trainee's knowledge base and competitiveness for federal and non-federal grant support. The trainee must make at least an 80% time commitment to basic neurosciences during this year of training.

For the purpose of this training track, basic neurosciences is defined as laboratory research related to the cellular or molecular basis of neurologic diseases. Examples of relevant basic disciplines include molecular neurogenetics, neurochemistry, neuropharmacology, neurophysiology, neuroanatomy, neuroimmunology, developmental neurobiology, biophysics, and cell biology.

Note: *This track of training must be approved by the Board prior to completion of the 5 years of training. The resident is encouraged to have this track of training approved prior to submitting his or her application for examination.* Letters from the mentor (and child neurology program director, if a different individual) must be submitted describing the research and explaining how the year of neuroscience relates to child neurology and to the trainee's academic career. Documentation must include exact dates of training.

or

3. General pediatrics/internal medicine

One year of training in general pediatrics and 1 year of training in internal medicine in ACGME-accredited programs. An acceptable alternative to the 1 year of internal medicine is a full year of ACGME-accredited training that includes a minimum of 6 months of internal medicine, the details of which must be documented by the training director. The composition of these 6 months may *not* include rotations in neurology, pediatrics, or emergency medicine. To ensure that these 6 months constitute a high-quality experience, they should emphasize progressive re-

sponsibility for the resident. At least 2 of the additional 6 months must be spent in internal medicine, pediatrics, and/or emergency medicine. For candidates entering child neurology residency training on or after July 1, 2002, at least 2 of the additional 6 months must be spent in internal medicine, pediatrics, family medicine, and/or emergency medicine. No more than 2 of the remaining 4 months may be spent in neurology.

and

In addition, all candidates will be required to complete 3 full years of postgraduate, specialized residency training in a child neurology program accredited by the ACGME.

Canadian training programs

Physicians entering residency training in child neurology (PGY-2) on or after July 1, 2002, may apply to the ABPN for examination only if they:

1. Complete their training in a Canadian program accredited by the Royal College of Physicians and Surgeons of Canada.

and

2. Achieve certification by the Royal College of Physicians and Surgeons of Canada.

and

3. Possess a full, unrestricted license to practice medicine in a Canadian province.

Physicians entering residency training in child neurology prior to July 1, 2002, may be granted credit for training completed in Canada if the training was completed in a program accredited by the Royal College of Physicians and Surgeons of Canada. These applicants must initiate the ABPN certification process by 2008 and should contact the Board office if they have any questions.

Other international training

Physicians entering child neurology residency training on or after July 1, 1998, will not be granted credit for other international training. Physicians entering child neurology residency training prior to July 1, 1998, may be granted up to 2 years of general pediatrics and/or 1 year of internal medicine credit for training completed in another international program *only* if they:

1. Achieve a national certificate accepted by the ABPN in pediatrics and/or internal medicine by the year 2005. The only certificates accepted by the ABPN for pediatrics and/or internal medicine are MRCP(UK), MRACP, FCP(SA), and MRCP(I).

and

2. Initiate the ABPN certification process by the year 2007.

III. Application for Certification

A. General Information

A physician who wishes to be examined by the Board shall complete, sign, and file with the executive vice president an application on the current official application form. *The Information for Applicants* booklet and *Application for Certification* are revised each year and may be obtained from the Board office or from the ABPN web site (www.abpn.com). Note: *Only applications submitted on the current application form will be accepted. Faxed copies of applications will not be accepted.*

An acknowledgment mailer accompanies each application. This mailer, when stamped, self-addressed, and enclosed with the application, will be returned to the applicant as acknowledgment that the application has been received by the Board office. Once the mailer is returned to the applicant, it may take up to 16 weeks for the applicant to receive further information regarding the status of the application. Applications are reviewed in order of receipt. An applicant who does not receive *any* notification from the Board regarding his or her application by August 1, 2002, should contact the Board office.

B. Deadlines and Fees

The deadline for receipt of completed applications in the Board office for the November 6, 2002, Part I examination is February 1, 2002. There is a nonrefundable late fee (*see fees, above*) for applications received in the Board office between February 2, 2002, and March 1, 2002. Applications received after March 1, 2002, will be returned. A complete list of fees is printed above.

Applications submitted without the appropriate fees will not be accepted. Fees received without applications will be returned. Part I application and examination fees are neither refundable nor transferable.

C. Completing the Application and Supporting Documentation

Indicate the specialty in which you are seeking certification.

Social Security Number

Provide your social security number.

Candidate Name

If your name differs from that indicated on your supporting documentation, you must include legal, certified documentation (marriage license, name change determination, etc) of the change. If your name changes at any time subsequent to the application, legal, certified documentation of the name change must be submitted to the Board office.

Mailing Address

This is an address at which the Board can contact you; therefore, do not use a temporary address. You are responsible for keeping the Board informed about any change of address. In addition to sending address change information via mail or fax, you now may notify the Board of an address change via the ABPN Web site (www.abpn.com).

Office and Home Telephone Numbers, Fax Number, and E-mail Address

Provide your *primary* office phone number, home telephone number, fax number, and e-mail address.

1. Date of birth

Provide your birth date.

2. Medical education

Include the complete name of each medical school attended along with graduation dates. Be certain to include the degree obtained (MD or DO).

3. Licensure

Note: *All questions regarding licensure must be answered. Do not leave any blanks.* In addition, enclose with the application a copy of either your unlimited medical license or the current renewal registration card for your unlimited license, whichever shows the license expiration date. An applicant in possession of a restricted, suspended, or revoked license will not be accepted for any examination. Restrictions include, but are not limited to, conditions, contingencies, probation, and stipulated agreements. *Restriction of a physician's license does not, however, include voluntary participation in an impaired physicians program or other appropriate, monitored alcohol or chemical substance-abuse recovery program, if the physician has not been reported to either the National Practitioner Data Bank or the Data Bank of the Federation of State Medical Boards.* It is the responsibility of the candidate/diplomate to inform the Board immediately upon a change in licensure status.

4. Have you ever applied to this Board before?

Indicate the name under which you applied.

5. Do you currently have another application on file with this Board?

A candidate may not have more than one application for certification in the same specialty or subspecialty on file with the board

office at any one time. Candidates completing training both in psychiatry and in neurology or child neurology may apply to sit for both Part I examinations during the same administration. Candidates who intend to follow this examination pattern should contact the Board office for further information.

6. Applicants with disabilities

Please refer to Section VII.

7. First postgraduate year (Or first 2 years for child neurology)

Enclose with the application a letter of verification from the PGY-1 training director describing the exact length and content of rotations completed during the PGY-1. All documentation must include exact dates (month/day/year to month/day/year) of training.

Psychiatry candidates only:

If the PGY-1 was a full year of internal medicine, pediatrics, or family practice, a photocopy of the certificate of completion, including exact dates, may be submitted in lieu of the letter from the PGY-1 training director.

Neurology candidates only:

If the PGY-1 was a full year of internal medicine, a photocopy of the certificate of completion, including exact dates, may be submitted in lieu of the letter from the training director.

Neurology with special qualification in child neurology candidates only:

If either of the first 2 years was a full year of internal medicine or pediatrics, a photocopy of the certificate(s) of completion, including exact dates, may be submitted in lieu of the letter from the PGY-1 and 2 training director.

Reapplicants only:

If you are reapplying for examination and were previously accepted for examination, you must complete the application form; however, you do not need to include the PGY-1 documentation with this reapplication.

8. Residency training

List all residency training in chronological order, including exact dates (month/day/year to month/day/year).

In addition, enclose with the application a copy of certificate(s) of training, including exact dates, or a letter of verification of training from the training director(s) including exact dates of training. If training was completed in child and adolescent psychiatry, the training director of the child and adolescent psychiatry program must document the child and adolescent psychiatry training.

If you are still in training, a letter from the training director must be submitted *with the application* documenting that you are in the final year of training and that training will be completed by June 30, 2002. **Note:** *This letter must include the date on which you started training and the anticipated completion date.* Immediately after you have completed training, the training director must submit to the Board a letter verifying successful completion of training or a copy of the certificate of training. All documentation must include exact dates of training. If documentation of successful completion of training is not received in the Board office by July 15, 2002, the candidate may be removed from the Part I roster.

Candidates who complete training after June 30, 2002, but no later than July 31, 2002, may submit a Part I application. The training director must submit a letter verifying successful completion of training to the Board by August 10, 2002. All documentation must include exact dates (month/day/year) of training. Applicants who complete training after July 31, 2002, will be denied opportunity to sit for the 2002 Part I Examination.

Due to the large volume of documentation that the Board office will be receiving on or before July 15, the Board asks that applicants **do not call** to verify that the Board received documentation from their residency program. Applicants should check with their

training director to confirm that documentation was sent to the Board office.

Reapplicants only:

If you are reapplying for examination and were previously accepted for examination, you must complete the application form; however, you do not need to include the residency training documentation with this reapplication.

Application Statement

Read, sign, and date the application statement. Applications with altered or unsigned application statements will not be accepted and will be returned.

9. Examination Site

From the list provided, select your top four preferences for examination site.

Part I sites are assigned based on the order in which applications are received and approved in the Board office. If a site is filled to capacity, the second choice will be assigned. If the second choice site is filled to capacity, the third choice will be assigned, etc.

10. Other Diplomate Information (if any)

List any other Board certifications.

D. Appeal Procedure for Negative Determinations Regarding Applications or Licensure

The rejection of credentials for admission to an examination is considered a "negative determination." An applicant who has submitted a formal application and receives a negative determination regarding his/her application may appeal this decision by submitting the following materials to the executive vice president at the Board office:

1. A written request for a formal appeal of the rejection of the application
2. The applicable appeal fee (*see fees, above*)
3. Additional written information that rebuts the negative determination

The appeal materials must be sent together in a single mailing that is postmarked within 30 days of the date indicated on the letter of negative determination.

The appeal materials will be sent to the respective Appeals Committee, which will review the materials, deliberate, and make a determination. In all events, the Appeals Committee's determination is final and binding on the Board and the applicant.

IV. Examinations

A. General Information Pertaining to All Examinations

The Board does not endorse or recommend any texts or other teaching aids identified as "Board preparation" material. Furthermore, the Board does not have any affiliation with, or responsibility for, programs identifying themselves as "Board Review Courses." Though the purpose of the examination is to test the qualifications of the candidate in psychiatry, neurology, or both, it must not be forgotten that these medical disciplines constitute part of the broad field of general medicine. The Board requires proficiency in neurology on the part of those it certifies in psychiatry and vice versa, but examines the candidate in accordance with the certificate he or she seeks.

The Board may conduct examinations at such times and places as it deems appropriate. The Board reserves the right to limit the number of candidates admitted to any scheduled examination. The administration and grading of all examinations shall be at the sole discretion of the Board. After completion of such examinations, the executive vice president will notify candidates in writing as to the results.

To become Board certified, each candidate must pass both Part I and Part II of the examination given by the Board. There is no limit on the number of times a candidate may apply for the Part I examination. In order to ensure that candidates have a current fund of knowledge at the time of certification, a passing grade on the Part I examination is valid for a period of 6 years, or three opportunities to pass the Part II examination, whichever comes first. Candidates will be scheduled for examination and reexamination, if necessary, until they have exhausted their opportunities. The Board anticipates that the three opportunities will not take the maximum of 6 years.

Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to retake the Part I examination

Each examination shall cover such subjects as the Board may determine. The ABPN currently uses *DSM-IV* as the primary authority on psychiatric diagnostic nomenclature for its examinations.

The Board will send the names of all those achieving certification or recertification to the ABMS for publication.

The Board is not liable for candidate travel and/or other related expenses incurred as a result of an examination cancellation.

General questions about requirements and logistics of ABPN examinations may be asked of ABPN staff by telephone or on site. Verbal complaints to staff, directors, proctors, or examiners that continue after explanation of ABPN policy may rise to the level of harassment, in which case they will constitute irregular behavior (*see Section I.H.*). At no time should a candidate discuss the administration or the grading of an examination with the examiners.

Note: Candidates are required to bring government-issued photo identification to the examination. They will be asked to present this ID at registration. Government-issued photo ID includes military IDs, passports, valid driver's licenses, and state IDs. If the name on the admission slip is different than the name on the photo ID, legal documentation verifying a name change also must be presented.

Candidates may not bring food, drink, wireless phones, pagers, books, or study materials into the examination. Candidates may not make telephone calls during an examination session.

B. Part I Examination Procedures

Successful completion of the Part I written examination is required of candidates seeking certification in psychiatry, neurology, or neurology with special qualification in child neurology. In order to successfully complete the Part I examination, a candidate must pass both parts of the two-part written examination at the same examination administration.

1. Scheduling

The Part I examination is given once a year, on a regional basis throughout the United States and Canada, as well as in selected sites outside North America. The Board will advise an applicant, in writing, of acceptance for examination.

Applicants will be expected to indicate, in order of preference, their choice of four examination sites. Every effort is made to accommodate candidates in the locale of their choice. Request for transfer to another site must be made in writing at least 90 days prior to the Part I examination. Changes will be made subject to space availability. One month prior to the examination candidates will receive an admission notice specifying their examination site and time to report for examination.

All applicants are required to sit for the Part I examination for which they have applied. Applicants who fail to do so will be required to submit a new application, copy of unrestricted license, and the application and Part I examination fees. **Note: Candidates who are unable to sit for their scheduled Part I examina-**

tion due to an emergency should contact the Board office in writing no later than 30 days after the date of the examination.

2. Reexamination

A candidate who fails the initial Part I examination may, upon payment of the Part I reexamination fee (*see fees, above*), repeat the examination the following year. There is no limit on the number of times an applicant may apply to take the Part I examination. Two negative determinations necessitate reapplication (new application, copy of unrestricted license, and payment of application and Part I examination fees). Reexaminees who do not sit for reexamination as scheduled also will be required to submit a new application, copy of unrestricted license, and payment of the application and Part I examination fees. Candidates applying for reexamination do not need to include another copy of their PGY-I and residency documentation.

C. Psychiatry Part I Examination Content

The psychiatry portion of the examination will include questions in the following areas:

- Development through the life cycle
- Neurosciences
- Behavioral and social sciences
- Epidemiology and public policy
- Diagnostic procedures
- Psychiatric disorders
- Treatment of psychiatric disorders
- Special topics in psychiatry (suicide, dangerousness, ethics, gender, and consultation-liaison and emergency psychiatry)

The neurology portion of the examination will include questions in the following areas:

- Basic science aspects of neurologic disorders
- Incidence/risk of neurologic disorders
- Diagnostic procedures related to neurologic disorders
- Clinical evaluation of neurologic disorders/syndromes
- Management and treatment of neurologic disorders

D. Neurology/Neurology with Special Qualification in Child Neurology Part I Examination Content

The neurology portion of the examination will include questions in the following areas of adult and child neurology:

- Neuroanatomy
- Neuropathology
- Neurochemistry
- Neurophysiology
- Neuropharmacology
- Neuroimmunology/neurovirology
- Neurogenetics/molecular neurology/neuroepidemiology
- Neuroendocrinology
- Neuroimaging
- Neuro-ophthalmology
- Neuro-otology
- Cerebrospinal fluid

The portion of the examination covering psychiatry, including cognition and behavior, will include questions in the following areas:

- Development and disorders of childhood
- Psychopathology and diagnostic criteria for common psychiatric disorders
- Physician-patient relationships
- Behavioral and personality changes associated with structural changes
- Alcoholism and other substance abuse
- Psychopharmacology
- Therapeutic modalities other than drugs

- Altered states of consciousness
- Memory disorders and cortical changes with dysfunction
- Diagnostic procedures
- Psychiatric/neurologic problems associated with medical disease
- Forensic psychiatry and neurology, epidemiology, transcultural psychiatry, public mental health, and systems-based practice

E. Appeal Procedure for Negative Determinations Regarding Part I Examinations

A failing grade on the Part I examination is considered a "negative determination." A candidate who receives a negative determination may appeal this decision by submitting the following material to the executive vice president of the Board:

- A written request to have the examination hand-scored
- The appeal fee (*see fees, above*)
- Additional written information in support of the appeal

Note: *The appeal materials must be sent together in a single mailing and must be postmarked within 30 days of the date indicated on the letter of negative determination.*

The candidate will be informed in writing of the results of the hand-scoring, which will be final and binding on the Board and on the candidate.

F. Part II Examination Procedures

1. Assignment and Scheduling

All successful Part I candidates will receive a notice of assignment (Part II billing statement) to a Part II examination, together with a request to submit the required examination fee. Candidates will be asked to sign a statement that they possess a current, unrestricted license to practice medicine in a state, commonwealth, territory, or possession of the United States or province of Canada. Candidates who submitted a temporary (education or training) license at the time of application to Part I will be required to submit a copy of their unrestricted licenses by December 15 of the year in which they took the Part I examination. **Note:** *Candidates who do not submit copies of their licenses by this deadline will not be scheduled for the Part II examination.* The candidate will not be invited for examination until a copy of the candidate's license is received by the Board office.

Note: *Candidates in possession of restricted, suspended, or revoked licenses in any state will not be scheduled for any examination or issued certificates.* Restrictions include but are not limited to conditions, contingencies, probation, and stipulated agreements. Restriction of a physician's license does not, however, include voluntary participation in an impaired physicians program or other appropriate, monitored alcohol or chemical substance-abuse recovery program, if the physician has not been reported to either the National Practitioner Data Bank or the Data Bank of the Federation of State Medical Boards.

Scheduling for the Part II examination will be made on a regional basis as often as possible. The limited space available and the complicated logistics involved in administering the Part II examination make it extremely difficult for the Board to allow candidates to select either the site or the date for examination.

Beginning with the May 2003 Part II examinations: candidates who decline or do not attend the Part II examination for which they are scheduled, unless excused (see Excused Absences, below), will forfeit an opportunity. They will be scheduled for the next available Part II examination until they have exhausted or forfeited their three opportunities or the 6 years to pass the examination.

One month prior to the date of the assigned Part II examination, a candidate will receive informational materials and an admission notice specifying the date, time, and place to report for registration. Candidates are requested to report for registration

only on the day and at the time indicated on the admission notice. Registration schedules are arranged to accommodate candidates in accordance with their examination schedules.

2. Fees and Applications

Beginning with the 2003 Part II examinations: Candidates who do not pay the Part II examination fee for their scheduled examination or reexamination by the deadline specified, unless excused (see Excused Absences, below), will forfeit an opportunity. Such candidates will be removed from the roster of candidates for that examination. They will be scheduled for the next available Part II examination until they have exhausted or forfeited their three opportunities or the six years to pass the examination.

Excused absences: Candidates who are unable to sit for their scheduled Part II examination due to a medical or other emergency may submit documentation of the emergency to the Board office, in writing, no later than 30 days after the date of the examination. The Board will then evaluate the documentation and determine whether the absence is "excusable."

3. Reexamination and No-Show Policy

In order to ensure that candidates have a current fund of knowledge at the time of certification, a passing grade on the Part I examination will be valid for a period of 6 years or three opportunities to complete the Part II examination successfully, whichever comes first. Beginning with the April 2000 Part II examination, an unexcused absence counts as an opportunity to take the Part II examination.

Candidates who are unsuccessful in the Part II examination during the allotted time period will be required to retake the Part I examination. These candidates must request and submit a new Part I application and the application and Part I examination fees.

Psychiatry candidates must pass both sections of the Part II examination. A candidate who fails one or both sections of the examination must repeat both sections at each subsequently scheduled examination until he or she passes both sections at the same examination.

Neurology candidates must pass all three (two adult and one child) sections of the Part II examination. A candidate must repeat the section or sections he or she failed at each subsequently scheduled examination until he or she passes all the sections.

Child Neurology candidates must pass all three (two child and one adult) sections of the Part II examination. A candidate must repeat the section or sections he or she failed at each subsequently scheduled examination until he or she passes all the sections.

All candidates taking the Part II examination are required to be examined in all sections for which they are scheduled. If a candidate does not appear for a section of his/her examination, the examination results for sections taken will be invalidated, no fees will be refunded, and it will count as an opportunity to take the Part II examination.

Exceptions: Candidates who are unable to sit for all sections of their scheduled Part II examination due to a medical or other emergency may submit documentation of the emergency to the Board office, in writing, no later than 30 days after the date of the examination. The Board will then evaluate the documentation and determine whether the absence is "excusable."

For candidates in **psychiatry**: If the Board classifies the absence as excusable, the examination results for completed sections will be invalidated, but the fees will be transferred or refunded. The examination will *not* count as an opportunity to take the Part II examination.

For candidates in **neurology** or in **neurology with special qualification in child neurology**: If the Board classifies the absence as excusable, the results for the section(s) that were completed will stand, and the grade for the section(s) not completed will be recorded as "incomplete." No fees will be refunded, and the examination will count as an opportunity to take the Part II examination.

Candidates who fail the Part II examination will be scheduled for the next available Part II examination, so long as they pay the reexamination fees and have not exhausted or forfeited their three opportunities or the 6 years to pass the examination.

Candidates who fail to take the reexamination at the time specified, as well as candidates who do not pay their reexamination fees by the specified deadlines, will forfeit an opportunity. Such candidates will be scheduled automatically for the next available Part II examination, provided that they pay the reexamination fees and have not exhausted or forfeited their three opportunities or the 6 years to pass the examination.

4. Grade letters and certificates

Candidates will receive written notification as to whether they passed or failed approximately 30 days after the Part II examination. Successful candidates will receive their certificates within 90 days of receiving their grade letters. It is the candidate's responsibility to notify the Board office, in writing, if he or she does not receive the certificate within the time frame specified in the grade letter. If a candidate does not do so, he or she will have to request a duplicate certificate and pay a processing fee (*see fees, above*).

5. Duplicate certificates

Requests for duplicates of ABPN certificates must include the diplomate's name, address, phone number, birth date, signature, and indication of how the diplomate wants his/her name printed on the certificate. The diplomate must include with the request copies of (1) his/her current unrestricted medical license stating the expiration date and (2) for security purposes, government-issued photo identification, such as a driver's license or passport. They must also include a check for the appropriate fee (*see fees, above*), payable to the American Board of Psychiatry and Neurology, Inc. A form for requesting a duplicate certificate may be obtained from the ABPN Web site (www.abpn.com). Certificates are printed approximately five times per year. Depending on when a duplicate certificate is requested, it may be 2 to 4 months until the diplomate receives the duplicate certificate.

G. Part II Examination Format

Part II, an oral examination, will include the examination of patients under the observation of one or more examiners. The manner of examining patients and the reasoning and deductions therefrom will constitute an important part of the examination. Knowledge of basic science principles, special diagnostic procedures, management recommendations, and assessment of risk are also essential parts of the examination, which focuses on evaluation of clinical skills.

Candidates are expected to discuss their findings with their examiners. Questions frequently cover such areas as diagnosis, differential diagnosis, evaluation, treatment, prognosis, and management. Reference to the basic sciences of psychiatry and neurology may be made.

Note-taking is permitted during oral examinations provided that only blank paper is used. *All* notes must be left in the examination room at the conclusion of the examination. Notes will not be used in the assignment of grades and will be destroyed. Failure to adhere to this policy will constitute irregular behavior (*see section I.H.*).

1. Psychiatry

Psychiatry candidates will take two examinations:

- One 1-hour examination in clinical psychiatry (patient)
- One 1-hour examination in clinical psychiatry (audiovisual)

In the patient section, the psychiatry candidate will be given approximately 30 minutes to examine a patient under the observation of one or more examiners. Following the examination of the patient, the discussion with the examiner(s), which will be approximately 30 minutes in length, will focus on physician-patient interaction, conduct of the clinical examination, capacity to elicit clinical data, formulation, differential diagnosis and prognosis, therapeutic management, and knowledge of therapies. Additional questions may be addressed to the basic science of psychiatry.

The audiovisual section will consist of a videotaped psychiatric examination, approximately 25 minutes in length, which the candidate will observe. Candidates will then be individually examined by one or more examiners with particular reference to the content of the tape. This discussion may also include other clinical topics.

2. Neurology and Child Neurology

Neurology candidates will take three examinations:

- One 1-hour examination in clinical neurology (patient)
- One 1-hour examination in clinical neurology (vignette)
- One 1-hour examination in clinical child neurology (vignette)

Child Neurology candidates will take three examinations:

- One 1-hour examination in clinical child neurology (patient)
- One 1-hour examination in clinical child neurology (vignette)
- One 1-hour examination in clinical neurology (vignette)

In the neurology and child neurology patient sections, the candidate will be given approximately 30 minutes to examine a patient under the observation of one or more examiners. During the patient examination, the candidate's ability to obtain a history and perform a neurologic examination will be observed. Following the examination of the patient, the discussion with the examiner(s), which will be approximately 15 minutes in length, will focus on the evaluation of the findings and discussion of the diagnosis, treatment, and management. Following discussion of the patient, written vignettes will be discussed for approximately 15 minutes. The examiners also may ask additional questions concerning the basic science of neurology.

Multiple written vignettes of patient encounters will be utilized as a basis for discussion of diagnosis and treatment in those sections in which there is no patient present.

Since candidates in child neurology are to be certified in "neurology with special qualification in child neurology," it is agreed that those candidates will be expected to pass a 1-hour oral examination in clinical neurology (vignette) that is set at the same level of difficulty established for neurology candidates. The pass/fail standards for that hour in clinical neurology (vignette) will be the same whether the candidate is seeking certification in neurology or in neurology with special qualification in child neurology.

H. Feedback and Appeal Procedures for Negative Determinations Regarding Part II Examinations

A failing grade on a Part II examination is considered a "negative determination."

1. Request for feedback:

A candidate who receives a negative determination may request feedback by submitting the following materials to the executive vice president at the Board office:

- A letter requesting feedback on his/her Part II examination
- The applicable feedback fee (see fees, above)

Note: The request for feedback must be postmarked within 30 days of the date indicated on the letter of negative determination.

Feedback shall consist of a checklist indicating those sections not passed. No other information will be provided as feedback.

2. Request for appeal:

A candidate who receives a negative determination may appeal the determination by submitting the following materials to the executive vice president at the Board office:

- A written request for a formal appeal of the negative determination
- The applicable appeal fee (see fees, above)
- Additional written information in support of the appeal

Note: The appeal materials must be sent together in a single mailing and must be postmarked within 60 days of the date indicated on the letter of negative determination, or within 30 days of the date indicated on the feedback letter.

The appeal materials will be sent to the respective Appeals Committee, which will review the materials, deliberate, and make a determination. In all events, the Appeals Committee's determination is final and binding on the Board and the candidate.

V. Subspecialization

For complete information about subspecialty certification, please contact the Board office to request the current editions of the following ABPN publications:

- *Information for Applicants for Certification in Child and Adolescent Psychiatry*
- *Information for Applicants for Certification in the Subspecialties of Geriatric Psychiatry, Clinical Neurophysiology, Addiction Psychiatry, Forensic Psychiatry, and Neurodevelopmental Disabilities*
- *Information for Applicants for Certification in the Subspecialty of Pain Management*

VI. Special Programs

A. Supplementary Certification

A candidate who has been certified in psychiatry, neurology, or neurology with special qualification in child neurology may apply for supplementary certification in another primary specialty upon submission of a new Part I application and Part I examination fee. The candidate will be scheduled for the next available Part I examination in the supplementary specialty. The credentials for such other certificate must be acceptable to the Board.

A candidate may have more than one application on file with the Board if the applications are for certification in different specialties or subspecialties. Candidates completing training both in psychiatry and in neurology or child neurology may apply to sit for both Part I examinations during the same administration. Candidates who intend to follow this examination pattern should contact the Board office for further information.

1. Dual certification in psychiatry and neurology

Note: Unless otherwise specified, all training must be completed in programs accredited by the Accreditation Council for Graduate Medical Education (ACGME).

Applicants seeking certification both in psychiatry and neurology who began residency training prior to January 1, 1988, must have completed 5 years of the following ACGME-accredited postgraduate training:

- A PGY-1 that meets requirements for either psychiatry or neurology (see sections II.C., II.D., and II.E.)
and
- Two years of ACGME-accredited residency training in psychiatry in a single training program

and

- c. Two years of ACGME-accredited residency training in neurology in a single training program.

Applicants seeking certification both in psychiatry and neurology who began residency training on or after January 1, 1988, must have completed one of the following training tracks:

1. ABPN-approved combined psychiatry/neurology training program (recommended)

A PGY-1 that meets the requirements for entry into a neurology program (see section II.E.)

and

Five years of residency training in an ABPN-approved combined psychiatry/neurology training program.

or

2. Individual psychiatry and neurology programs

A PGY-1 that meets the requirements for entry into a neurology program (see section II.E.)

and

Six full years of postgraduate residency training in ACGME-approved programs including 3 full years in psychiatry and 3 full years in neurology.

or

3. Non-ABPN-approved combined training programs

A PGY-1 that meets the requirements for entry into a neurology program (see section II.E.)

and

At the discretion and approval of both training directors, and in accordance with Residency Review Committee requirements, applicants may complete 5 full years of postgraduate training in ACGME-accredited programs including 2 full years of residency training in psychiatry in a single program, 2 full years of residency training in neurology in a single program, and a full year that is jointly sponsored and coordinated by the psychiatry and neurology training directors to allow the resident to successfully complete all of the requirements for an approved residency program in psychiatry and an approved residency program in neurology.

The 5 years of residency training usually are taken at one institution but may be taken at no more than two institutions. An application for examination may be submitted after completion of the PGY-1, the 2 full years of residency training in one specialty, and the full year of jointly sponsored residency training.

For residents entering residency training on or after July 1, 1999: Program directors must contact the Board office for a copy of the combined psychiatry/neurology guidelines and must submit to the Board for review, no later than the beginning of the PGY-3, a proposal for a resident to train in psychiatry and neurology that conforms to these guidelines.

2. Dual certification in neurology and neurology with special qualification in child neurology

Applicants who have achieved certification in neurology and who wish to be certified in neurology with special qualification in child neurology will need to obtain the additional training described below. **Note:** *Unless otherwise specified, all training must be completed in programs approved by the Accreditation Council for Graduate Medical Education (ACGME).*

Training requirements include:

- a. A minimum of 12 months of approved training in general pediatrics

and

- b. A minimum of 12 months of approved training in clinical child neurology

A maximum of 3 months of child neurology training obtained during a neurology residency may be applied toward the required 12 months of child neurology training only if the 3 months took

place in an ACGME-approved child neurology program and is documented by the neurology program director.

Candidates will be required to request and submit a new completed Part I application and the application fee. Such candidates will not be required to retake the Part I examination in neurology. The Part II examination fee will be requested after the application has been approved. Two 1-hour examinations in child neurology will be taken during the Part II examination.

3. Dual certification in child and adolescent psychiatry and in neurology with special qualification in child neurology

An applicant who wishes to obtain certificates both in child and adolescent psychiatry and in neurology with special qualification in child neurology must meet the following requirements:

- a. Certification by the Board in the specialty of general psychiatry prior to applying for examination in child and adolescent psychiatry (a minimum of 2 years of approved residency training in general psychiatry is required);

and

- b. Completion of the requirements for certification in child and adolescent psychiatry;

and

- c. Completion of the requirements for certification in neurology with special qualification in child neurology.

B. Joint Training in Pediatrics/Psychiatry/Child and Adolescent Psychiatry

The American Board of Pediatrics, the American Board of Psychiatry and Neurology, Inc, and the Committee on Certification in Child and Adolescent Psychiatry of the ABPN have approved programs for combined pediatrics/psychiatry/child and adolescent psychiatry residency training. This training consists of 24 months of pediatrics, 18 months of adult psychiatry, and 18 months of child and adolescent psychiatry. Completion of the program will satisfy the training requirements for certification in all three areas. Physicians pursuing training in these programs may not apply for examination until all training has been completed.

C. Joint Training in Neurology/Diagnostic Radiology/Neuroradiology

The American Board of Radiology and the American Board of Psychiatry and Neurology, Inc, have approved programs for combined training in neurology/diagnostic radiology/neuroradiology. Completion of the program will satisfy the training requirements for certification in all three areas. In order to be certified in neuroradiology, a resident must have completed certification in both diagnostic radiology and neurology.

In order to satisfy training requirements in neurology, a resident who resigns from a combined neurology/diagnostic radiology/neuroradiology training program must complete 36 months of residency training, of which 30 months of training must be completed in neurology. The Board will grant up to 6 months of credit for training in neuroradiology toward the 36 months of training. In addition, the program requirements for neurology as defined in the *Graduate Medical Education Directory* must be satisfied.

D. Combined Training Leading to Certification by Two Boards

Approved combined/joint training programs are listed in the *Graduate Medical Education Directory*. The Board currently has the following programs:

1. Dual certification in psychiatry/family practice

The American Board of Family Practice and the American Board of Psychiatry and Neurology, Inc, have approved guidelines for combined psychiatry/family practice residency training. In order to satisfy training requirements in psychiatry, a resident who resigns from the combined psychiatry/family practice training pro-

gram must complete 36 months of residency training, of which 30 months of training must be completed in psychiatry. In addition, the program requirements for psychiatry as defined in the *Graduate Medical Education Directory* must be satisfied.

2. *Dual certification in psychiatry/internal medicine*

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology, Inc, have approved programs for combined psychiatry/internal medicine residency. In order to satisfy training requirements in psychiatry, a resident who resigns from the combined psychiatry/internal medicine training program must complete 36 months of residency training, of which 30 months of training must be completed in psychiatry. In addition, the program requirements for psychiatry as defined in the *Graduate Medical Education Directory* must be satisfied.

3. *Dual certification in neurology/internal medicine*

The American Board of Internal Medicine and the American Board of Psychiatry and Neurology, Inc, have approved programs for combined neurology/internal medicine residency training. In order to satisfy training requirements in neurology, a resident who resigns from the combined neurology/internal medicine training program must complete 36 months of residency training, of which 30 months of training must be completed in neurology. In addition, the program requirements for neurology as defined in the *Graduate Medical Education Directory* must be satisfied.

4. *Dual certification in neurology/physical medicine and rehabilitation*

The American Board of Physical Medicine and Rehabilitation and the American Board of Psychiatry and Neurology, Inc, have approved programs for combined neurology/physical medicine and rehabilitation residency training. In order to satisfy training requirements in neurology, a resident who resigns from the combined training program must complete 36 months of residency training, of which 30 months of training must be completed in neurology. In addition, the program requirements for neurology as defined in the *Graduate Medical Education Directory* must be satisfied.

5. *Dual certification in neurology/nuclear medicine*

The American Board of Nuclear Medicine and the American Board of Psychiatry and Neurology, Inc, have approved guidelines for combined neurology/nuclear medicine residency training. Please check the ABPN Web site (www.abpn.com) for updated information on programs that have been approved for combined training in neurology/nuclear medicine.

VII. Applicants with Disabilities and Qualifications for Testing Accommodations

A. General Information

The Board recognizes that physicians with disabilities may wish to take the certifying examinations and will attempt to make accommodations for applicants with verified disabilities. The Board supports the intent of the Americans with Disabilities Act (ADA). Applicants are reminded, however, that "auxiliary aids (and services) can only be offered if they do not fundamentally alter the measurement of skills or knowledge the examination is intended to test." (Americans with Disabilities Act, Public Law 101-336 §309 [b][3]). To this extent, the Board will provide reasonable accommodations during testing to provide equal opportunity for persons with disabilities. The documentation requesting reasonable accommodations must identify a disability and provide a rationale for specified modifications to standard testing procedures.

Note: Applicants who request accommodations because of a disability must advise the Board in writing no later than the deadline for submitting applications for examination. All documentation and other evidence substantiating the disability must be

submitted to the Board no later than 30 days after the deadline for filing an application for examination. Required documentation includes completion of the *Application for Testing Accommodations*. **Note:** Candidates are asked to contact the Board office immediately if they require an *Application for Testing Accommodations*.

Note: If the Board deems it necessary, an independent assessment may be requested at the expense of the Board. Documentation and other evidence substantiating the disability includes, but is not limited to, each of the following:

- A report diagnosing the applicant's disability written by a professional appropriately qualified for evaluating the disability. The report must be printed on the certified examiner's letterhead, with the examiner's credentials, address, and telephone number given in the letterhead or title. The report must include the candidate's name, date of birth, and date of testing, and it must be signed by the examiner.
- A history of the disability, including previous settings in which accommodations have been granted. Having had prior accommodations granted does not necessarily influence the decision of the Board to grant or deny a current request for accommodation. If there is no history of prior accommodations, the examiner must explain why current circumstances necessitate accommodations.
- Diagnostic information about the specified disability using standard nomenclature from sources such as the *International Classification of Diseases (ICD)* and the *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*.
- Specific recommended accommodations, with a rationale for why each accommodation is needed. A description of any functional limitations associated with the disability is important to the Board's evaluation of the request.

B. Review of Documentation

A letter detailing the specific accommodations requested because of a disability must be submitted for each examination and/or reexamination. Documentation should be marked "ADA Materials" and mailed to the attention of the executive vice president at the Board office.

Each report is reviewed carefully before accommodations are provided. If the Board does not find appropriate and sufficient evidence to grant accommodations, the applicant will be informed that the request has been denied.

An applicant whose request for accommodations because of a disability is denied may appeal this decision by submitting the following materials to the executive vice president at the Board office:

- A written request for a formal appeal of the denial
- The applicable appeal fee (*see fees, above*)
- Additional written information that rebuts the negative determination

The appeal materials must be sent together in a single mailing that is postmarked within 30 days of the date indicated on the letter of negative determination. The appeal materials will be sent to the respective Appeals Committee, which will review the materials, deliberate, and make a determination. In all events, the Appeals Committee's determination is final and binding on the Board and the applicant.

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Radiology [ABR] to ascertain whether the information below is current.)

Certificates

A certificate will be issued to each candidate who has finished a prescribed and approved period of training and study and has passed written and oral examinations demonstrating an adequate level of knowledge and ability in diagnostic radiology or radiation oncology in accordance with the definitions as stated in the Bylaws and Rules and Regulations of the ABR.

A certificate granted by the Board does not of itself confer, or purport to confer, any degree or legal qualifications, privileges, or license to practice radiology.

Definitions

1. Diagnostic radiology is that branch of radiology that deals with the utilization of all modalities of radiant energy in medical diagnosis and therapeutic procedures utilizing radiologic guidance. This includes, but is not restricted to, imaging techniques and methodologies utilizing radiations emitted by x-ray tubes, radionuclides, ultrasonographic devices, and radiofrequency electromagnetic radiation emitted by atoms.

2. Radiation oncology is that branch of radiology that deals with the therapeutic applications of radiant energy and its modifiers and the study and management of cancer and other diseases.

Diagnostic Radiology Training Requirements

Candidates beginning their graduate medical education after January 1, 1997, will be required to have 5 years of approved training with a minimum of 4 years in diagnostic radiology. These 4 years must be spent in a department approved for training in diagnostic radiology by the Residency Review Committee (RRC) for Diagnostic Radiology of the Accreditation Council for Graduate Medical Education (ACGME), or by the Royal College of Physicians and Surgeons of Canada (RCPSC). A minimum of 6 months, but not more than 12 months, must be spent in nuclear radiology in the 4-year program. Candidates may spend no more than 8 months in rotations outside the parent institutions.

The other year must be accredited clinical training in internal medicine, pediatrics, surgery or surgical specialties, obstetrics and gynecology, neurology, family practice, emergency medicine, or any combination of these. This clinical year should be the first postgraduate year. No more than a total of 3 months may be spent in radiology, radiation oncology, and/or pathology. All clinical training must be in an ACGME, American Osteopathic Association (AOA), or equivalent approved program.

It is not the intent of the ABR for programs to use any of the 4 years for traditional fellowship training. The designation of "fellowship" is reserved for training beyond the 4-year residency.

In a 4-year approved residency program, not more than 12 months may be spent in a single discipline (research is considered a discipline).

In a 4-year program, the resident is expected to remain in that program for all 4 years. If a transfer to another program is necessary or desired, that transfer must have verification from the initial program director that the resident has successfully completed the training in their institution, with a listing of the specific rotations. This training must be accepted by the new program director.

Candidates will be considered for the physics portion of the written examination only when they have completed 12 months of diagnostic radiology training. After 24 months of diagnostic radiology training, the candidate will be allowed to sit for the clinical examination.

A candidate who has passed the written examination and will complete 60 months of approved training by September 30 in the year in which the exam is given will be considered for the oral examination. Admissibility to the oral examination is determined by the executive committee.

First-time applicants completing 5 years of training by the year 2001 will be issued a lifetime certificate in diagnostic radiology upon successful completion of the oral examination.

Residents completing 5 years of training by the year 2002 will be issued a 10-year-limited certificate in diagnostic radiology upon successful completion of the oral examination.

Radiation Oncology

Candidates beginning their graduate medical education after December 1995 will be required to have 5 years of approved training with a minimum of 4 years in radiation oncology. These 4 years must be spent in a department approved to train in radiation oncology by the RRC for Radiation Oncology for the ACGME, or by the RCPSC. The 4-year residency training period must include 36 months of clinical radiation oncology with exposure to pathology and medical oncology. A maximum of 3 months' training in diagnostic radiology will be allowed. Candidates may spend no more than 8 months in rotations outside the parent institution.

The other year, which must precede the radiation oncology training, must be ACGME-, AOA-, or RCPSC-accredited clinical training in internal medicine, surgery or surgical specialties, pediatrics, family practice, obstetrics and gynecology, transitional, or categorical radiation oncology, or any combination of these. Specialties other than those listed, including pathology, do not satisfy the PGI requirement of the ABR.

Candidates will be admissible to the written examination only after they have completed 4 years of approved training or if they will complete this amount of training by September 30 of the year in which the examination is given. This must include a PGY1 clinical year of training in the United States or Canada. Requests for credit for this training in other countries must be submitted to the executive committee.

The resident is expected to remain in the same radiation oncology training program for the duration of the training. If a transfer to another program is necessary or desired, the program director of the initial program must verify that the candidate has successfully completed the portions of the training that were undertaken in that program, and this training must be accepted by the program director of the new program.

A candidate who has passed the written examination and will complete 60 months of approved training by September 30 in the year in which the exam is given will be considered for the oral examination. Admissibility to the oral examination is determined by the executive committee.

Effective in 1995, successful candidates will be issued a 10-year, time-limited certificate in radiation oncology.

Certificate of Added Qualifications (CAQs) and Certificate of Special Competence

A 10-year limited certificate will be issued to each diplomate certified in either radiology or diagnostic radiology who has finished a prescribed and approved period of training and study and has passed an oral examination demonstrating an adequate level of knowledge and ability in the area of expertise for which he/she has applied in accordance with the definitions stated in the Bylaws and Rules and Regulations of the ABR.

Definitions

1. Neuroradiology is that branch of radiology dealing with (1) the brain and its coverings, (2) the skull base and ENT, and (3) the spine.
2. Pediatric radiology is the branch of radiology dealing with children.
3. Vascular and interventional radiology is the branch of radiology dealing with the diagnosis and treatment of diseases using percutaneous methods guided by various radiologic imaging modalities.
4. Nuclear radiology is the branch of radiology that involves the use of radionuclides and radiolabeled substances for diagnostic imaging and related in vivo techniques.

Certificates of Added Qualifications in Neuroradiology, Pediatric Radiology, and Vascular/Interventional Radiology

Have a minimum of 1 year full-time training (fellowship) following the completion of residency training and must have completed at least 1 year of practice or additional training (one third of that time) in the subspecialty. Fellowship training must be documented by letter from the program director. Practice experience must be verified by letter from the chief of service or department chairman.

A summary of experience data must be submitted with the neuroradiology and vascular and interventional applications.

Candidates are required to have successfully completed 1 year of fellowship training after residency in a program approved for such

training and accredited by the ACGME and 1 year of practice or additional approved training.

Diagnostic Radiology with Special Competence in Nuclear Radiology

Candidates will be required to have a minimum of 1 year of full-time training in nuclear radiology in a department approved for training in nuclear radiology by the RRC for diagnostic radiology or nuclear medicine by the RRC for Nuclear Medicine and accredited by the ACGME. Credit will not be given for any training obtained during the 4 years of diagnostic radiology residency.

Qualifications of Applicants for Certification by the ABR

Each applicant for admission to an examination for a certificate to be issued by the ABR in diagnostic radiology or radiation oncology shall be required to present evidence satisfactory to the Board that the applicant has met the following standards:

1. General Qualifications: That the applicant is a specialist in diagnostic radiology or radiation oncology as outlined in Article II, Section 2, of the Rules and Regulations and is recognized by his/her peers to have high moral and ethical standards in his/her profession.
2. General Professional Education: Graduation from a medical school accredited at the date of graduation by the Liaison Committee on Medical Education of the American Medical Association, the RCPSC, or from a college of osteopathic medicine approved by the AOA. If the applicant is a graduate of a medical school outside the United States or Canada, the applicant must be screened with approval by an agency acceptable to the Board of Trustees.
3. Special Training: The period of special training shall be as the Board of Trustees, by resolution or motion, shall determine from time to time. The Board of Trustees requires a written statement from the applicant's current program director, attesting that the applicant will have satisfactorily completed the required special training in radiology or radiation oncology by the appointed time and is prepared to take that examination.
4. In special instances these requirements may be modified by majority vote of the entire Board of Trustees or by the executive committee acting in its stead.
5. If the program director fails to indicate in writing that the applicant will have the required special training, documentation of the reason(s) must be submitted along with evidence that the candidate has been appropriately apprised of his/her deficiencies. The executive committee of the Board will notify the applicant in writing that an appeals mechanism exists as outlined in paragraphs 6 and 7 below.
6. In utilizing the appeals mechanism, the applicant must provide the executive committee of the Board with a written statement supporting the appeal. The executive committee may ask the program director to submit a written response to the applicant's appeal.
7. The executive committee must reach a final decision without delay in determining the candidate's admissibility to the examination.

Application and Fee

Application for examination must be made in exact duplicate (two original copies on prescribed forms that may be obtained from the ABR office). No photocopy or any other kind of copy will be accepted. These forms should be submitted with photographs, autographed on the front, and the current application fee (US currency) by the deadline established for filing. Applications for the written

examination to be given in any year will not be accepted prior to July 1 of the preceding year and must be filed no later than the deadline of September 30 of the preceding year. There is a nonrefundable fee for any application postmarked between October 1 and October 31. No application will be accepted after October 31.

Incomplete applications will not be accepted. The postmark affixed to the last item received to complete the application must be on or before the deadline date.

In the event of withdrawal of an application, only a portion of the fee can be refunded.

A candidate will have three consecutive opportunities to appear for and pass the written examination, beginning with the written examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and fee in effect at that time. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled written examination will be regarded as one of the three opportunities.

A candidate who has passed the written examination will have three consecutive opportunities to appear for and pass the oral examination, beginning with the oral examination for which he/she is first declared admissible. If a candidate fails to accomplish this, he/she must submit a new application and the fee in effect at that time and reinitiate the examination process, including the written examination. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled oral examination will be regarded as one of the three opportunities.

A candidate who finds it necessary for any reason to cancel after acceptance of an appointment for either the written or oral examination shall be required to submit an additional fee. This amount represents administrative costs to the Board. A candidate who fails to appear for an examination without notifying the office of the ABR at least 20 days prior to the first date of the examination will be charged the full application fee in existence at the time of payment.

Objectives of the Written Examination

In 1965 it became apparent to the Board of Trustees of the ABR that the then current oral examination could not cover the entire burgeoning field of radiology without the addition of more segments and, in turn, more examiners. This would impose a further burden not only on candidates but also on the Board itself. It was decided, therefore, to search for other methods of examination. At that time, it was agreed to adopt a written examination to be given annually as a prerequisite for the oral examination. The content of the examination was to include the basic sciences of anatomy, pathology, physiology, and pharmacology as these subjects relate to clinical practice. Also to be included were radiologic techniques, radiologic physics, and radiation biology.

Thus, the content of the examination in radiation oncology now includes the basic sciences of physics, radiation biology, and clinical oncology, as well as anatomy, pathology, physiology, and chemotherapy as these subjects relate to the clinical practice of radiation oncology.

A pool of multiple-choice questions was developed, and the first examination was given in 1969 to all candidates seeking certification in diagnostic radiology or radiation oncology.

Content of Written Examination in Each Field

Each examination consists of approximately 240 multiple-choice questions to be administered over a period of approximately 8 hours. About one half of the questions are distributed on the afternoon of one day, and the other half distributed on the morning of the following day.

New written examinations are formulated each year in all categories of radiology, and the content of the examinations is carefully evaluated in order to keep pace with new information and developments. The number of questions in each category may be changed as necessity dictates from year to year.

Failures

Candidates for the written examination will have three consecutive opportunities to appear for and pass the examination. A candidate who fails to accomplish this must submit a new application and the fee in effect at that time and retake the entire written examination. Failure to accept an appointment, cancellation of an appointment, or failure to appear for a scheduled examination will be regarded as one of the three opportunities.

Conditions

Effective 1997, a candidate conditioning the written examination will have three consecutive opportunities to appear for and pass the examination. If after three opportunities the candidate fails to pass the examination, he/she must submit a new application and fee in effect at that time and will be required to repeat the entire written examination.

Oral Examination

Oral examinations are given at a time designated by the Board of Trustees. At the present time, the oral examinations are conducted yearly in May or June.

Admissibility to the oral examination is determined by the executive committee.

No recording device of any kind may be brought to the examination.

A certificate will not be issued until verification has been received from the program director that all requirements have been fulfilled in the training program.

Content of Oral Examination for Diagnostic Radiology

Candidates applying for examination in diagnostic radiology will be examined for a period of 25 minutes each by ten examiners. The categories to be covered are musculoskeletal, cardiopulmonary, gastrointestinal tract, genitourinary tract, neuroradiology, vascular and interventional radiology, nuclear radiology, ultrasound, pediatric radiology, and breast radiology.

Content of Oral Examination for Radiation Oncology

Candidates applying for examination in radiation oncology will be examined for a period of 30 minutes each by eight examiners. The subject matter of this examination concerns the clinical management of malignant disease and is usually presented according to the anatomical site of the primary tumor. The anatomical sites are divided into the following eight categories: gastrointestinal tract; gynecologic malignancies; genitourinary tract; lymphoma/leukemia; head, neck, and skin; breast; central nervous system and pediatric malignancies; and lung and mediastinum, soft tissue, and bone.

Reexaminations

Failures

A candidate who fails the oral examination in diagnostic radiology or in radiation oncology may be scheduled for reexamination. The reexamination fee in effect at that time must be submitted.

A candidate who fails to pass the oral examination after three consecutive opportunities must start the examination procedure from the beginning with the submission of a new application and fee in effect at that time, and retake the entire written examination.

Conditions

Candidates in diagnostic radiology who have conditioned one, two, or three categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates in radiation oncology who have conditioned one or two categories in the oral examination will be reexamined by two examiners in each conditioned category. Candidates must pass the reexamination by both examiners in each category to remove the condition. Candidates conditioning in the oral examination will have three consecutive opportunities to appear for and pass the examination. If after three opportunities the candidate fails to pass the examination, he/she must submit a new application and fee in effect at that time and will be required to repeat the entire oral examination at the next opportunity.

Status of a Physician

The Board will reply to an inquiry concerning the status of a physician with one of the following statements:

1. The physician is Board certified.
2. The physician is in the examination process, that is, has an approved application on file but has not passed the examination.
3. The physician is neither certified nor in the examination process.

Note: No official status of Board qualified or Board eligible is recognized by the Board.

Final Action of the Board

The final action of the Board is based on the applicant's professional record, training, and attainment in the field of diagnostic radiology or in radiation oncology, as well as on the results of his/her examination. This Board has been organized, not to prevent qualified radiologists from obtaining certification, but to assist them in becoming recognized in their communities as men and women competent to practice diagnostic radiology or radiation oncology.

Revocation of Certificates

Certificates issued by this Board are subject to the provisions of Articles of Incorporation and the Bylaws. According to Article IX, Section 4, of the Bylaws, any certificate issued by the Board of Trustees shall be subject to revocation in the event that

1. the issuance of such certificate, or its receipt by the individual so certified, shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation of this, the ABR, or of these Bylaws or rules and regulations adopted by the Board of Trustees; or
2. the individual so certified shall not have been eligible in fact to receive such certificate; or
3. the individual so certified shall have made any misstatement of fact in the application, or in any other communication, to the corporation or its representatives; or
4. the individual so certified shall have been convicted by a court of competent jurisdiction of a felony or of any misdemeanor involving, in the opinion of the Board of Trustees, moral turpitude; or
5. the license to practice medicine of the individual so certified shall be revoked.

Before any such certificate shall be revoked, a notice shall be sent by registered or certified mail to the last known address of the holder of such certificate, as it appears on the records of this corporation, setting forth the act, omission, or conduct alleged or complained of and giving the holder of such certificate a reasonable opportunity to answer in writing thereto. Such certificate holder shall have not less than 30 days in which to reply thereto. The Board of Trustees may, at its discretion, make such further investigation as it deems necessary and proper.

The Board of Trustees of this corporation shall have the sole power, jurisdiction, and right to determine and decide whether the evidence or information before it is sufficient to constitute one of the grounds for revocation of any certificate issued by this corporation, and the decision of such Board of Trustees in the premise shall be final.

(The material below, published in 2001-2002, is under continual review and revision. For an up-to-date statement of requirements, request a current Booklet of Information from the Board, which will be issued annually as of July 1.)

Specialty of Surgery (General Surgery) Defined

The Board interprets the term "General Surgery" in a comprehensive but specific manner, as a discipline having a central core of knowledge embracing anatomy, physiology, metabolism, immunology, nutrition, pathology, wound healing, shock and resuscitation, intensive care, and neoplasia, which are common to all surgical specialties.

A general surgeon certified by the American Board of Surgery is one who has acquired during training specialized knowledge and experience related to the diagnosis, preoperative, operative, and postoperative management, including the management of complications, in nine primary components of surgery, all of which are essential to the education of a broadly based surgeon:

- Alimentary tract.
- Abdomen and its contents.

- Breast, skin, and soft tissue.
- Head and neck, including trauma, vascular, endocrine, congenital, and oncologic disorders—particularly tumors of the skin, salivary glands, thyroid, parathyroid, and the oral cavity.
- Vascular system, excluding the intracranial vessels and heart.
- Endocrine system, including thyroid, parathyroid, adrenal, and endocrine pancreas.
- Surgical oncology, including coordinated multimodality management of the cancer patient by screening, surveillance, surgical adjunctive therapy, rehabilitation, and follow-up.
- Comprehensive management of trauma, including musculoskeletal, hand, and head injuries. The responsibility for all phases of care of the injured patient is an essential component of general surgery.
- Complete care of critically ill patients with underlying surgical conditions, in the emergency room, intensive care unit, and trauma/burn units.

Additionally, the general surgeon is expected to have had significant preoperative, operative, and postoperative experience in pediatric, plastic, general thoracic, and transplant surgery. Also, the surgeon must have understanding of the management of the more common problems in cardiac, gynecologic, neurologic, orthopedic, and urologic surgery, and of the administration of anesthetic agents. In addition, the surgeon must be familiar with the unique requirements of the geriatric surgical patient and must have knowledge and skills in palliative care, including operative care, counseling patients and families, and management of pain, cachexia, and weight loss.

The general surgeon must have had significant experience in performing minimally invasive surgical procedures. The general surgeon must also be capable of employing endoscopic techniques, particularly proctosigmoidoscopy, colonoscopy, esophago-gastroduodenoscopy, laparoscopy, and operative choledochoscopy, and must have experience in other relevant diagnostic and therapeutic techniques including laryngoscopy, bronchoscopy, and fine needle aspiration. The general surgeon should also have experience with sentinel lymph node mapping and biopsy techniques for breast cancer and melanoma, and have the opportunity to become familiar with evolving diagnostic and therapeutic methods, including the following:

- Investigation and manipulation of the distal common bile duct (including sphincterotomy)
- Stereotactic breast biopsy techniques, including advanced breast biopsy instrumentation (ABBI), core needle biopsy, and mammotome techniques
- Physiologic testing and evaluation of the gastrointestinal tract
- Diagnostic ultrasonography of the following areas: Head and neck, breast, abdomen, including intraoperative and laparoscopic ultrasound, and endorectal
- Noninvasive diagnostic evaluation of the vascular system and invasive vascular interventional techniques

The Meaning of Certification

The Board considers certification to be based upon a process which includes the education and evaluation phases and an examination phase. It holds that undergraduate and graduate education are of the utmost importance and requires the program director's endorsement and attestation that the applicant has had an appropriate educational experience and has attained a sufficiently high level of knowledge, judgment, and skills to be prepared for designation by the Board's Certificate as a Specialist in Surgery, upon successful completion of the examinations, and to enter into independent practice of the specialty.

Graduate Education in Surgery

I. General Information

The purpose of graduate education in surgery is to provide the opportunity to acquire a broad understanding of human biology as it relates to disorders of a surgical nature and the technical knowledge and skills appropriate to be applied by a specialist in surgery. This goal can best be attained by means of a progressively graded curriculum of study and clinical experience under guidance and supervision of senior surgeons and which provides progression through succeeding stages of responsibility for patient care up to the final one of complete management. Major operative experience and senior/chief responsibility at the final stage of the program are essential components of surgical education. The Board will not accept into the process of certification anyone who has not had such an experience in the specialty of surgery, as previously defined, regardless of the number of years spent in educational programs.

The graduate educational requirements set forth on these pages are considered to be the minimal requirements of the Board and should not be interpreted to be restrictive in nature. The Board recognizes that the time required for the total educational process should be sufficient to provide adequate clinical experience for the development of sound surgical judgment and adequate technical skill. These requirements do not preclude additional desirable educational experience, and program directors are encouraged to retain residents in a program as long as is required to achieve the necessary level of qualifications.

The integration of basic sciences with clinical experience is considered to be superior to formal courses in such subjects. Accordingly, while recognizing the value of formal courses in the study of surgery and the basic sciences at approved graduate schools of medicine, the Board will not accept such courses in lieu of any part of the required clinical years of surgical education.

The Board may at its discretion require that a member of the Board or a designated diplomate observe and report upon the clinical performance of an applicant before establishing admissibility to examination or awarding certification.

While a program may develop its own vacation, illness and other leave policies for the resident, 1 year of approved residency toward the Board's requirements must be 52 weeks in duration and must include at least 48 weeks of full-time surgical experience. Furthermore, unused vacation and other leave time may not be accumulated to reduce the overall duration of residency expected by the Board.

All phases of the graduate educational process must be completed in a manner satisfactory to the Board.

II. Acceptable Programs

The residency programs in surgery in the United States which are reviewed and approved by the Residency Review Committee for Surgery and the Accreditation Council for Graduate Medical Education (ACGME) are acceptable to the Board as an adequate educational experience.

In Canada, those university residency programs in surgery which are accredited by the Royal College of Physicians and Surgeons offer an acceptable educational experience. Applicants from such programs must meet the Board's specific requirements and cannot receive credit for postgraduate education in countries other than the United States or Canada.

Except as mentioned above, participation in postgraduate surgical programs in countries other than the United States is not creditable toward the Board's educational requirements unless under the specific conditions set forth in the section "Credit for Foreign Graduate Education."

Listings of accredited programs in the United States may be found in the *Graduate Medical Education Directory*, published annually under the auspices of the ACGME.

Requirements for Certification in Surgery

I. General

- A. Must have demonstrated to the satisfaction of the authorities of the graduate educational program in surgery, to their peers, and to the Board, that one has attained the level of qualifications in surgery required by the Board.
- B. Must have a moral and ethical standing satisfactory to the Board and in conformity with the Statements on Principles of the American College of Surgeons, and its interpretations.
- C. Must be actively engaged in the practice of surgery as indicated by holding admitting privileges to a surgical service in an accredited health care organization, or be currently engaged in pursuing additional graduate education in a component of surgery or one of the other recognized surgical specialties.
- D. Must hold a permanent, unconditional, unrestricted, and unexpired license to practice allopathic or osteopathic medicine in a state or jurisdiction of the United States or province of Canada. The applicant must inform the Board of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the Board will determine whether the applicant satisfies the licensure requirement of the Board.

II. Educational

A. Undergraduate Medical

1. Must have graduated from an accredited school of allopathic or osteopathic medicine in the United States or Canada.
2. Graduates of schools of medicine from countries other than the United States or Canada must present evidence of Final Certification by the Educational Commission for Foreign Medical Graduates (ECFMG).

B. Graduate Education in Surgery

1. Must have satisfactorily completed a minimum of 5 years of progressive education, following graduation from medical school in a program in surgery accredited by the ACGME or the Royal College of Physicians and Surgeons of Canada.
2. Must have completed all phases of graduate education in surgery in a program in surgery so accredited. Experience obtained in accredited programs in other recognized specialties, although containing some exposure to surgery, is not acceptable. A flexible or transitional first year is not creditable toward the Board's requirements as a PGY-1 unless it is accomplished in an institution having an accredited program in surgery and at least 6 months of the year is spent in surgical disciplines.
3. Candidates must have, in a program accredited for a minimum of 5 years, at least 54 months of clinical surgical experience with progressively increasing levels of responsibility. There must be no less than 36 months devoted to the primary components of surgery (general surgery) as previously defined. The entire chief resident experience must be devoted to the primary components of the specialty of surgery. No more than 4 months of the chief residency may be devoted to any one of the primary components of surgery. During junior years, a total of 6 months may be assigned to nonclinical or nonsurgical disciplines which are clearly supportive of the needs of the individual resident and appropriate to the overall goals of the general surgical training program. Experience in surgical pathology and endoscopy is considered to be clinical surgery, but obstetrics and ophthalmology are not. No

- more than a total of 12 months during junior years may be allocated to any one surgical specialty other than general surgery.
4. Must have 12 months in the capacity of chief resident in general surgery. The Board considers the terms chief resident and senior resident to be synonymous and to mean the 12 months in the program in which the resident assumes the ultimate clinical responsibilities for patient care under the supervision of the teaching staff. The majority of the 12 months of chief residency must be served in the final year. However, to take advantage of a unique educational opportunity in a program during a resident's final year, a portion of the chief residency may be served in the next to the last year, provided it is no earlier than the fourth clinical year and has been approved by the Residency Review Committee for Surgery followed by notification to the Board. The Chief Residency must be spent only in the parent or an integrated institution unless rotation to an affiliated institution has been approved by the Residency Review Committee for Surgery.
 5. The Board expects a residency year to include no less than 48 weeks of full-time surgical experience. In order to provide programs with flexibility, the Board will accept as creditable a total of 144 weeks of experience during the first 3 clinical years and a total of 96 weeks during the last 2 clinical years.
 6. All phases of the graduate educational process must be in accordance with the Program Requirements for Residency Training in General Surgery as promulgated by the Accreditation Council for Graduate Medical Education and approved by the Residency Review Committee for Surgery.
 7. The Board believes that for optimal surgical education the resident should spend at least the final 2 residency years in the same program.

III. Operative Experience

Applicants for examination must meet the criteria established by the RRC, ie, a minimum of 500 procedures in 5 years and a minimum of 150 procedures in the chief/senior year. This must include operative experience in each of the areas of primary responsibility in the Definition of Surgery (General Surgery) set forth previously.

Each applicant must submit a tabulation of the operative procedures performed as surgeon, the number of patients for whom the applicant had primary responsibility that required critical care irrespective of previous operative history, and the number of patients with multiple organ trauma where a major general surgical operation was not required. Moreover, the applicant must indicate his/her level of responsibility (eg, surgeon chief, surgeon junior, teaching assistant, first assistant). The Board provides an Operative Experience form for this purpose to applicants when they obtain application material. The Board will accept alternative forms (such as the Resident's Record form available to program directors through the Residency Review Committee for Surgery) in lieu of the Board's form. However, such forms must contain all categories of experience listed on the Board form. This information must be in the proper sequence and again indicate the resident's level of responsibility.

In tabulating cases toward Board requirements, credit may be claimed "As Surgeon" when the resident has actively participated in the patient's care; has made or confirmed the diagnosis; participated in selection of the appropriate operative procedure; has either performed or been responsibly involved in performing the critical portions of the operative procedure; and has been a responsible participant in both pre- and postoperative care.

When previous personal operative experience justifies a teaching role, residents may act as teaching assistants and list such cases for the fourth and fifth year only. You may claim credit as a teaching assistant when you have actually been present and scrubbed and acted as an assistant to guide a more junior trainee through the

procedure. All this must be accomplished under the supervision of the responsible member of the senior staff. An individual cannot claim credit as both responsible surgeon and teaching assistant.

Applicants are advised to keep a copy of the lists of their submitted experience. The Board cannot furnish copies.

IV. Special Information for Program Directors

- A. Program directors are cautioned that appointment of residents at advanced levels, without being certain that their previous training is in accordance with the Board's requirements, may result in the affected residents not being accepted by the Board upon completion of the program. In any case in which there is question, program directors should make inquiry of the Board prior to taking action.
- B. According to the Program Requirements for Residency Training in General Surgery promulgated by the Accreditation Council for Graduate Medical Education, special approval of the Residency Review Committee for Surgery must be obtained (1) if a chief resident is assigned to an institution other than the parent one or an "integrated" one; (2) if rotations to any one approved "Affiliate" exceed 6 months; (3) if more than 1 year of the total program is spent away from the parent and integrated institutions; or (4) if more than 6 months' total is spent in any assignment outside the parent, the integrated, or approved affiliated institutions. The Board concurs in this and deviations from these stipulations will be considered unacceptable training.
- C. Since the Residency Review Committee does not act upon the adequacy of postgraduate surgical education outside the United States, program directors must request the Board's approval, in advance, if they wish periods of training abroad to be creditable toward the Board's requirements. The Board will rule on individual requests.

Credit for Military Service

Credit will not be granted toward the minimum requirements of the Board for service in the Armed Forces, the Public Health Service, the National Institutes of Health or other governmental agencies unless the service was as a duly appointed resident in an accredited program in surgery.

Credit for Foreign Graduate Education

Acceptance for examination and certification by the American Board of Surgery is based upon satisfactory completion of the stated requirements in accredited residency programs in surgery in the United States. Regardless of an individual's professional attainments here or abroad, no credit will be granted directly to an applicant for surgical education in a foreign country. The Board will consider granting partial credit only upon the request of the program director of an accredited program who has observed the applicant as a junior resident for 9 to 12 months and wishes to advance the applicant to a higher level in that program. The credit granted will not be valid until the applicant has successfully completed that program. If the applicant moves to another program the credit is not transferable and must again be requested by the new program director.

Applicants from accredited Canadian programs must have completed all of the requirements in the Canadian program or in combination with an accredited US program. No credit for postgraduate surgical education outside the US and Canada will be granted to those applicants seeking certification who completed a Canadian program. Applicants from Canadian programs must complete the Board's stipulated requirements.

Requirements Governing Admissibility to Examinations for Certification In Surgery

1. An applicant is admissible to the examinations only when all of the preliminary and graduate educational requirements of the Board, currently in force at the time of receipt of the formal Application, have been satisfactorily fulfilled; the operative experience has been reviewed and deemed acceptable; the general credentials are in order; the program director has certified to the Board in writing that the applicant has attained the required clinical skills; and the formal Application has been reviewed and approved. The applicant then must successfully complete the Qualifying Examination before becoming admissible to the Certifying Examination.
2. Applicants will be offered five opportunities to take the Qualifying Examination within the 5-year period following approval of their formal Application, at centers designated by the Board in accord with their last recorded address. Any applicant who does not take the Qualifying Examination within 2 years following approval of their Application will no longer have any status with the Board and will not be reconsidered for admission to examination. Applicants who entered a surgery residency program on July 1, 1995, and thereafter and who do not submit their Application to the Board within 3 years of completing a program accredited by the ACGME will no longer have any status with the Board and will not be reconsidered for admission to examination.

If Applicants are not successful in completing the Qualifying Examination within the stated admissibility period, the satisfactory completion of an additional year of education in general surgery will be required in order to be considered for readmission to examination under the same conditions as listed in (2) above. This must be in a general surgery program accredited by the ACGME and which has agreed to structure the additional year according to the Board's guidelines. The Board's approval of the proposed additional experience must be secured in advance. Upon successful completion of the additional year and following Board approval of a Candidate's Application for readmission to the Qualifying Examination, the candidate will then be offered five further opportunities within the ensuing 5 years. If not successful within that time a candidate cannot again be considered until satisfactory completion of 2 years of additional education in general surgery in a program accredited by the ACGME. As before, the Board's approval of the proposed additional experience must be secured in advance.

3. The Certifying Examination will be offered to those who have passed the Qualifying Examination and have thus become Candidates for Certification, at the earliest time consistent with the Board's geographical examination schedule.

Candidates will be offered three and only three opportunities to appear for examination during the 5 academic years after completion of the Qualifying Examination. The admissibility expiration date shall be established as June 30 of the fifth calendar year after passing the Qualifying Examination. An opportunity offered which is refused or not taken will be counted as one of the three available. Failure to respond in writing to the Examination Reply Card is considered an opportunity offered which is not taken and will therefore be counted as one of the three opportunities.

After three opportunities (ie, failure at Certifying Examinations and/or opportunities refused—including failure to appear for a scheduled examination), a candidate will no longer be admissible to examination, regardless of the original expiration date for admissibility. Satisfactory completion of an additional year of education in general surgery in an accredited program which has agreed to structure the additional year according to

the Board's guidelines, with a favorable endorsement to the Board from the Program Director, will be required in order to be considered for readmission to examination. This year must be approved in advance by the Board.

If the Board approves the Candidate's Application for readmission to the Certifying Examination upon completion of the specified additional year of education in general surgery, the candidate will then be offered three further opportunities within the ensuing 5 years. If not successful within that time, the Candidate cannot again be considered until completion of a minimum of 3 years of residency in general surgery, including a chief year, in an accredited program, and favorable endorsement to the Board by the program director. The candidate must then reapply as a new applicant. This necessitates submission of a Reapplication for Admission to Examination and all supporting documents, payment of the established fees, and successful completion again of the Qualifying Examination before advancing to the status of "Candidate for Certification".

4. Those who, 10 years after approval of their original Application or Reapplication, have not become certified and from whom there has been no written communication will no longer be considered active applicants. If they wish to reapply later they will be considered "New Applicants" and must fulfill the requirements then in place.
5. The Board, on the basis of its judgment, may deny or grant an "Applicant" or "Candidate for Certification" the privilege of examination whenever the facts in the case are deemed by the Board to so warrant.

Note: The Board does not use or sanction the terms "Board eligible" or "Board qualified." The standing of an individual with the Board varies according to the current status of credentials and will be so reported.

Certification in Surgical Subspecialties

The Board has been authorized by the American Board of Medical Specialties to award certification in certain disciplines related to the overall specialty of surgery to those diplomates of this Board who meet the defined requirements. These disciplines include vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

Those seeking subspecialty certification by the American Board of Surgery must have a currently valid Certificate in Surgery issued by the Board; must have completed the required additional education in the discipline beyond that required for general certification; must demonstrate operative experience and/or patient care data acceptable to the Board; must show evidence of dedication to the discipline by the means specified by the Board; must receive favorable endorsement by the director of the residency program in the particular discipline. Finally, successful completion of the prescribed examinations is required.

Those who are interested in obtaining information regarding certification in vascular surgery, pediatric surgery, surgery of the hand, or surgical critical care may obtain it from the Board upon request.

The Examinations Offered by the Board

The Board offers examinations leading to certification and recertification in surgery, vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care; also, in-training examinations in general surgery and in pediatric surgery.

The examinations for certification are offered to individuals, but the in-training examinations are offered to program directors for their use as an educational assessment of the individual resident's grasp of surgical fundamentals.

The Board notifies candidates for General and Subspecialty Certification of their performance on examinations. The Board also reports examinee performance to the director of the program in which the candidate completed the final year of residency. All reports pertaining to in-training examinations are provided only to program directors.

All examinations are developed by directors of the American Board of Surgery with contributions by examination consultants.

I. Examinations for Certification in Surgery

A. The Qualifying Examination

This examination is written and is offered once a year in the fall. It is given simultaneously in a number of locations in the United States.

Applicants whose applications have been approved by the Board are sent annually, throughout their period of admissibility, an announcement of the examination. With the announcement is a reply card which must be returned to the Board with other specified material if the applicant wishes to be scheduled for this examination. Shortly before the date of an examination an Admission Card is sent to the applicant indicating the specific location of the examination center and reporting times, with a pamphlet describing the examination and the types of questions to be expected.

The 1-day Qualifying Examination consists of multiple-choice questions designed to evaluate knowledge of general surgical principles and the basic sciences applicable to Surgery.

Successful completion of the Qualifying Examination is a requirement for all, to attain the status of "Candidate for Certification" and admission to the Certifying Examination.

Those unsuccessful on the Qualifying Examination may review the examination at the Board Office if such a request is made and the review is completed within 90 days after examination results are mailed. The review requires an appointment and payment of a fee.

B. The Certifying Examination

Examinations are held six times a year within the continental United States. Candidates for certification will receive an announcement of the examination to which they may be assigned, based on their geographic location, approximately 2 months prior to the examination session, with a reply card which must be returned at once if a candidate wishes to be included in that examination. Failure to return or late return of a card will result in that examination being counted as one of the three opportunities to be offered. If the Board cannot accommodate a candidate at that particular examination it will not be counted as an opportunity. A candidate assigned to an examination will be sent an Admission Card indicating the specific time and place to report for examination.

The examinations are conducted by members of the American Board of Surgery and selected associate examiners who are diplomates of the Board and usually from the local/regional geographic area.

The examinations consist of three oral sessions conducted by teams of two examiners, directed toward determining the candidate's understanding of clinical entities, level of surgical judgment, problem solving ability, and sensitivity to moral and ethical issues. During all sessions the ability to apply knowledge of anatomy, physiology, pathology, biochemistry, and bacteriology to clinical problems is also evaluated.

II. In-Training Examinations

The Board offers annually to directors of accredited residency programs in surgery and in pediatric surgery, written in-training examinations which are designed to measure the general level of knowledge attained by residents regarding the fundamentals of the basic sciences and management of clinical problems related to surgery

and to pediatric surgery. The In-Training Examination in Surgery designed to meet the first milestone required by the "Essentials" for residencies in general surgery. Directors of accredited programs in pediatric surgery should find the Pediatric Surgery In-Training Examination useful in the evaluation of all residents in their programs.

The Board will normally furnish pertinent information to the directors of all accredited programs in surgery and in pediatric surgery several months in advance of each year's examination, and ascertain the number of test booklets desired. The program directors at their discretion may administer the examination to anyone. The examinations, administered by the participating program directors, take place each winter.

Program directors should take note of the fact that the Board does not contact each integrated or affiliated institution in which residents are located, but depends upon the director of the program to order an adequate number of test booklets for all residents in the total program, which includes not only the parent institution but also all those included under the program designation in the *Graduate Medical Education Directory*.

It is important to note that the in-training examinations are not offered to individuals, but only to program directors.

The in-training examinations are not required by the Board as part of the certification process.

The in-training examinations are prepared by the Board as an evaluation instrument for program directors, to be used as an assessment of residents' progress and not as a pool of questions for study or other purposes. Duplication and improper use of the examination material defeats the purpose of the examinations and will not be tolerated by the Board. The examinations are protected by copyright. The Board reserves the right to withhold participation in the examination where there are cases of improper use, unacceptable test administration, or irregular behavior.

Application for Examination for Certification in Surgery

In the early spring the Board will mail a Booklet of Information and a Preliminary Evaluation Form to all residents who, according to the Board's records, will be expected to complete their residency that summer in surgery programs accredited by the ACGME. This form must be completed precisely and be received in the Board office no later than May 1. Applicants should not submit documents, testimonials, letters of recommendation, case reports, or other information unless requested to do so by the Board.

If, after review of the information submitted on the Preliminary Evaluation Form, it is determined by the Board that applicants have met or will meet the educational requirements for admission to examination in the past or current year, a formal Application for Admission to Examination will be sent to the applicant.

The Application for Admission to Examination must be completed and returned to be received in the Board office by no later than July 15. An application is not considered to be complete unless the form is accompanied by all required documents including an identification form with a photograph attached, a completed American Board of Surgery Operative Experience Form or a copy of the Resident's Record, and a check for \$225.

If the completed Application is received between July 15 and August 15, a late fee will be charged. No applications will be accepted after August 15.

Applicants who complete the educational requirements after September 30 will not be considered for admission to the Qualifying Examination in that year, but must wait until the following year. The acceptability of an applicant does not depend solely upon the completion of an approved program of education but also upon

information available to the Board regarding professional maturity, surgical judgment, technical capabilities, and ethical standing.

Applicants who have submitted an Application for Examination form will be notified regarding admissibility to examination.

Fees

Registration (prior to July 15) (payable with Application form and nonrefundable)	US \$225
Registration (Late, July 15 to August 15) (payable with Application form and nonrefundable)	US \$500
Qualifying Examination (payable with Reply Card)	US \$450
Certifying Examination (payable with Reply Card)	US \$675

Fees for reexamination are the same as shown above for each examination.

Each fee for examination or reexamination includes a US \$220 processing charge which is not refunded if an individual withdraws after being scheduled for an examination.

To withdraw, one must notify the Board Office at least 15 business days before a scheduled examination. Failure to appear for examination, or withdrawal without giving at least 15 business days' notice, will result in forfeiture of the entire fee for examination.

Fees are subject to change as directed by the Board.

The Board is a nonprofit organization. The directors of the Board, except those on the executive staff, serve without remuneration.

Issuance of Certificates

A candidate who has met all requirements and has successfully completed the examinations of the American Board of Surgery in one or another of the areas of certification will then be issued a certificate by this Board, signed by its officers, attesting to qualifications in that area.

The Board issues certificates in surgery, vascular surgery, pediatric surgery, surgery of the hand, and in surgical critical care.

Those Certified in surgery prior to December 31, 1975, were issued a certificate with no indication of time limited validity. All Certificates issued on or after January 1, 1976, bear a limiting date of 10 years, after which they are no longer valid.

Those whose Certificates have expired and who have not achieved recertification will no longer be listed in the *ABMS Directory of Board Certified Medical Specialists* as diplomates in the discipline concerned.

Recertification

The American Board of Surgery offers recertification in surgery to its diplomates and in all the disciplines in which it offers subspecialty certification. The Board considers recertification to be voluntary in the same connotation as is original certification.

The purpose of recertification is to demonstrate to the profession and the public, through periodic evaluations, that the surgical specialist has maintained continuing qualifications on a currently acceptable level in the diplomate's chosen area of practice. The American Board of Surgery believes that such periodic evaluation of its diplomates is in their own interest as well as in the public interest.

A diplomate can initiate the recertification process when certification has been held at least 7 years. Pamphlets outlining requirements for recertification in the various disciplines may be obtained from the Board upon request. To facilitate receiving the Board's mailings pertaining to the recertification process, it is important for all diplomates to notify the Board promptly whenever their addresses change.

Recertification in Surgical Subspecialties

Subspecialty recertification is offered to diplomates holding certificates in vascular surgery, pediatric surgery, surgery of the hand, and surgical critical care.

Details concerning requirements for recertification in the disciplines mentioned above are similar to those for recertification in surgery, and pertinent pamphlets may be obtained from the Board upon request.

Inquiry as to Status

The Board considers an individual's record not to be in the public domain. When a written inquiry is received by the Board regarding an individual's status, a general but factual statement is provided which indicates the person's location within the examination process.

Special Situations

Irregularities

The furnishing of false information to the Board or examination irregularities may result in the rejection of an application, the barring of an applicant from examination, the denial or revocation of a certificate, or other appropriate sanctions, as set forth more fully in the Application For Admission to Examination and the Instructions to Examinees.

Substance Abuse

Applicants with a history of substance abuse will not be admitted to any examination unless they present evidence satisfactory to the Board that they have successfully completed the program of treatment prescribed for their condition. Further, the Board must be satisfied that they are currently free of substance abuse.

Disabilities

The American Board of Surgery complies with the Americans with Disabilities Act by making a reasonable effort to provide Board applicants who have documented disabilities with modifications in its examination process which are appropriate for such disabilities but which do not alter the measurement of the skills or knowledge which the examination process is intended to test. Any disability which an applicant believes requires such a modification in the Board's examination must be identified and documented by the applicant within 60 days after the applicant is notified of admissibility to examination or within 60 days after the applicant learns of such disability, whichever is later.

Reconsideration and Appeals

The Board has adopted a policy with regard to reconsideration and appeals of decisions adverse to applicants regarding their individual credentials and admissibility to the examinations and questions regarding the form, administration, and results of examinations. A copy of that policy is available from the Board Office to anyone considering a request for reconsideration or an appeal. A request for reconsideration, which is the first step, must be made in writing to the Board office within 90 days of receipt of notice from the Board of the action in question.

Revocation of Certificate

Any Certificate issued by the American Board of Surgery, Inc. may be subject to sanction such as revocation or suspension at any time that the directors shall determine, in their sole judgment, that the diplomate holding the certificate was in some respect not properly qualified to receive it or is no longer properly qualified to retain it. The directors of the Board may consider sanction for just and sufficient reason, including but not limited to any of the following:

1. The diplomate did not possess the necessary qualifications nor meet the requirements to receive the certificate at the time it was issued; or falsified any part of the application or other required documentation; or made any material misstatement or omission to the Board, whether or not the Board knew of such deficiencies at the time;
2. The diplomate misrepresented his or her status with regard to Board certification, including any misstatement of fact about being Board certified in any specialty or subspecialty;
3. The diplomate engaged in conduct resulting in a revocation, suspension, qualification, or other limitation of his or her license to practice medicine in any jurisdiction;
4. The diplomate engaged in conduct resulting in the expulsion, suspension, disqualification, or other limitation from membership in a local, regional, national, or other organization of his or her professional peers;
5. The diplomate engaged in conduct resulting in revocation, suspension, or other limitation on his or her privileges to practice surgery in a health care institution.

The holder of a revoked or suspended certificate will be given written notice of the reasons for its sanction by registered or certified mail to the last address that the holder has provided to the Board. Sanction is final upon the mailing of the notification.

Upon revocation of certification, the holder's name shall be removed from the list of certified surgeons and the holder is required to return the certificate to the Board.

Individuals may appeal the decision to revoke or suspend a certificate by complying with the American Board of Surgery Policy Regarding Reconsideration and Appeals. Failure to make a timely appeal will result in a loss of appeal rights. Should the circumstances that justified revocation of a certificate be corrected, the Board of Directors may, at its sole discretion, reinstate the certificate after appropriate review of the individual's licensure and performance, using the same standards and requirements applied to the applicants for certification.

Victor F Trastek, MD, Scottsdale, Arizona

(These criteria and conditions are subject to change without notice. All applicants are advised to contact the American Board of Thoracic Surgery [ABTS] to ascertain whether the information below is current.)

General Requirements

Certification by the ABTS may be achieved by fulfilling the following requirements:

1. Certification by the American Board of Surgery (for information, the applicant should see the current Booklet of Information available from the American Board of Surgery, 1617 John F Kennedy Blvd, Philadelphia, PA 19103).
2. Completion of a thoracic surgical residency accredited by the Residency Review Committee (RRC) for Thoracic Surgery that provides adequate education and operative experience in cardiovascular and general thoracic surgery.
3. An ethical standing in the profession and a moral status in the community that are acceptable to the Board.
4. A satisfactory performance on the American Board of Thoracic Surgery examinations.
5. A currently registered full and unrestricted license to practice medicine granted by a state or other United States jurisdiction. The license must be valid at the time of application for admission to examination. A temporary limited license such as an educational, institutional, or house staff permit is not acceptable to the Board.

Residency Requirements

Candidates must have fulfilled all of the residency requirements of the Board in force at the time their applications are received.

Candidates for certification must complete a minimum of 24 months of residency training in thoracic and cardiovascular surgery in a program accredited by the RRC. This must include 12 months of continuous senior responsibility. The director of the thoracic training program is required to approve the application form by signature, certifying that the candidate has satisfactorily completed the residency in thoracic surgery as described above. Once an application is received, it is considered the official and only record. The Board assumes that the appropriate signatures authenticate the accuracy of the case lists and all other information submitted on the application.

Education and adequate operative experience in both general thoracic surgery and cardiovascular surgery are essential parts of any approved thoracic surgery residency program, irrespective of the area of thoracic surgery in which a candidate may choose to practice.

Operative Case Criteria

The operative experience requirement of the American Board of Thoracic Surgery has two parts. One is concerned with the intensity or volume of cases, and the other with the distribution of cases (index cases).

1. Surgical Volume (Intensity)

The Board's operative experience requirements include an annual average of 125 major operations performed by each resident for each year that the program is approved by the Residency Review Committee for Thoracic Surgery. In a 2-year program, this requirement is met if a resident performs a total of 250 major cases over the course of his or her residency; in a 3-year program, the resident must perform 375 major cases.

This guideline on intensity of cases conforms with the Program Requirements for Residency Education in Thoracic Surgery as published by the Accreditation Council for Graduate Medical Education and the Residency Review Committee for Thoracic Surgery.

The application of any candidate whose supervised operative experience fails to meet the requirement of an annual average of 125 major operations with a minimal number of 100 in any one year will be referred to the Credentials Committee for review.

2. Index Cases (Distribution)

Index cases are full credit cases only.

The applications of candidates whose operative experience does not include the required number of index cases as listed below will be sent to the Credentials Committee for review. The number of index cases required to meet the minimal acceptable standards in the various areas are:

- Lungs, pleura, chest wall — 50
 - Pneumonectomy, lobectomy, segmentectomy — 30
 - Other — 20
- Esophagus, mediastinum, diaphragm — 15
 - Esophageal operations — 8
 - Resections — 4
 - Other esophageal — 4
 - (A total of 8 esophageal operations are required; of that number 4 must be esophageal resections.)
 - Other — 7
- Congenital heart — 30
 - Full credit — 10
 - First assistant — 20
 - (Exposure to 30 congenital heart cases with a minimum of 10 cases for full credit)
- Adult cardiac — 100
 - Acquired valvular heart — 20
 - Mycardial revascularization — 60

- Reoperations — 5
- Other — 15
- Pacemaker implantation/closed EP — 10
- Bronchoscopy and esophagoscopy — 30
 - (must include at least 10 esophagoscopy)
- VATS — 10

Endoscopic procedures may be counted for credit whether they are performed as independent procedures or immediately preceding a thoracic operation.

Major vascular operations outside the thorax should be listed.

The Board recognizes that supervised operative experience in a well-organized teaching setting that is approved by the Residency Review Committee for Thoracic Surgery protects the patient, who, in most instances, is the personal and identifiable responsibility of a faculty surgeon. This supervised experience optimally prepares the candidate to begin the independent practice of cardiothoracic surgery after the completion of residency.

The Credentials Committee has been authorized by the Board to reject a candidate if his or her operative experience during the thoracic surgery residency is considered to be inadequate. The candidate, the program director, and the Residency Review Committee for Thoracic Surgery will be notified if such action is taken. If the Credentials Committee finds the applicant's operative experience inadequate and additional training is required, the additional training must be approved in advance. Should the program director determine that a resident needs additional training beyond the number of years that have been approved by the Accreditation Council for Graduate Medical Education and the Residency Review Committee for Thoracic Surgery, before submitting an application, this additional training must also be approved by the Board in advance.

Even though emphasis on one or another facet of thoracic surgery (pulmonary, cardiovascular, esophageal, thoracic trauma, etc) may have characterized a candidate's residency experience, the candidate is nevertheless held accountable for knowledge concerning all phases of the field, including extracorporeal perfusion (physiological concepts, techniques, and complications), cardiac devices, management of dysrhythmias, and thoracic oncology. In addition, a candidate should have had responsibility for the care of pediatric general thoracic surgical patients and be competent in video-assisted thoracoscopic surgery. The candidate should also have an in-depth knowledge of the management of acutely ill patients in the intensive care unit. This requires an understanding of cardio-respiratory physiology, respirators, blood gases, metabolic alterations, cardiac output, hyperalimentation, and many other areas. By virtue of his or her residency in thoracic surgery, the candidate is expected to be fully qualified in the surgical care of critically ill patients.

Operative Experience Credit

Credit will be allowed for supervised operative experience in a well-organized teaching setting only when the following criteria are met:

- a. The resident participated in the diagnosis, preoperative planning, surgical indications, and selection of the appropriate operation;
- b. The resident performed under appropriate supervision in a well-organized teaching setting approved by the Residency Review Committee for Thoracic Surgery those technical manipulations that constituted the essential parts of the procedure itself;
- c. The resident was substantially involved in postoperative care.

Supervision and active participation by the thoracic surgery faculty are required in preoperative, intraoperative, and postoperative care.

The Board also emphasizes that first-assisting at operations is an important part of resident experience, particularly in complex or relatively uncommon cases.

Applications

Before applying for examination, prospective candidates should consider whether they are able to meet the minimum requirements of the Board, which includes certification by the American Board of Surgery.

Residents who entered thoracic surgery residency training in July 2000 and later must meet the new operative case requirements. The new requirements are listed in this document and are available on the Board's Internet site: www.abts.org.

Utilization of the CTSNet Op Log function for recording operative cases is required of all residents who started training in 2000 or later. There is an exception to this new requirement for residents who began their training in July 2000, and these residents have the option of submitting their cases utilizing their insitutional databases as long as the reports are in the same format as the Board's forms, or the CTSNet Op Log version. However, residents who began their training in July 2001 are required to use both the online application and the CTSNet Op Logs. All residents must use the Summary Sheet, which may be printed from the CTSNet Op Log screen when they are ready to submit an application.

The standard paper application is still available upon request. However, the online application is an efficient and precise method for submitting the application and the operative case reports from CTSNet, and residents are strongly urged to use the online version for both. Access to the online application is through the Board's Internet site: www.abts.org.

Directions for utilizing the online application should be carefully followed since some of the forms must be printed from the Internet, signed by the appropriate individual, and sent to the Board office with a copy of the medical license and the registration fee. A list of the documents that must be submitted with the online application is available on the Web site. Be certain to include a copy of a your valid license to practice medicine.

When the resident is ready, the draft online application is reviewed by the program director. Once he/she approves the application, the program director submits it online to the Board office.

The operative case logs are considered the property of the resident and are not kept in the Board office once the resident is certified. Each applicant should consult with his or her program director regarding the correct way to complete the operative case list forms.

The application that is submitted, either the paper version or the online version, is considered a final document. The incomplete or incorrectly completed application may delay processing for 1 year. Residents are encouraged to address questions regarding the American Board of Thoracic Surgery requirements to their program director.

The deadline for submitting the completed application is August 1. Failure to meet that deadline will result in a delay of at least 1 year.

The American Board of Thoracic Surgery takes particular note of the problems facing those with a disability and stands ready to alter its examination procedures in such a way that individuals who are competent to practice thoracic surgery have the opportunity to take the Board's examination under circumstances that accommodate the individual's disability. Individuals requiring special consideration because of a disability should notify the Board at least 60 days before the August 1 deadline for submitting an application.

Candidates are notified of their eligibility for examination when their applications have been approved.

Examinations

It is the policy of the American Board of Thoracic Surgery to consider a candidate for examination only after he or she has completed a thoracic surgery residency program approved by the Residency Review Committee for Thoracic Surgery.

Separate written and oral examinations are held annually at times and places determined by the Board. Information regarding the dates and places of the examinations is published in the Examination and Licensure column of the *Journal of the American Medical Association*, the *Journal of Thoracic and Cardiovascular Surgery*, and the *Annals of Thoracic Surgery*.

The 2002 Part II (oral) examination will be held on June 7 and 8, 2002, in Chicago.

The 2002 Part I (written) examination is scheduled for November 24, 2002, in Chicago.

Part I—Written Examination

The examination consists of a written examination designed primarily to assess cognitive skills. The content of the questions on this examination represents uniform coverage of all aspects of the thoracic surgery specialty.

Part II—Oral Examination

Successful completion of the Part I (written) examination is a requirement for admission to the Part II (oral) examination. The oral examination is designed to test the candidate's knowledge, judgment, and ability to correlate information in the management of clinical problems in general thoracic and cardiovascular surgery.

Examination Sequence

Candidates should apply for the examination within 5 years of the satisfactory completion of their thoracic surgery residency. Any candidates applying for the examination 5 years or more after the satisfactory completion of residency will be considered individually, and recommendations for additional training will be made before they will be eligible to apply for examination.

After a candidate is declared eligible for the written examination (Part I), he or she must pass Part I within 4 years. The candidate who successfully completes Part I of the examination then must pass Part II within the succeeding 4 years.

Candidates who fail an examination (Part I or Part II) are eligible to repeat the examination the following year.

Candidates who fail either Part I or Part II of the examination three times, or do not pass either part of the examination within the allotted time period of 4 years, will be required to complete an additional thoracic surgical educational program which must be approved in advance by the Board before they will be permitted to re-take the examination. The required additional training must be completed within the succeeding 2-year period after failing either the written or the oral examination. Candidates who complete the required additional training must file an addendum to their application, have their eligibility for examination reviewed by the Credentials Committee, and pay a new registration fee. They will be given two more opportunities to take the examination (Part I or Part II) within the succeeding 2 years.

Candidates who fail Part I or Part II a fifth time will be required to complete another approved thoracic surgery residency before they will be eligible to reapply for examination by the Board.

Fees

Registration fee (not refundable)	\$445
Part I examination fee	\$1,075
Part I reexamination fee	\$1,075
Part II examination fee	\$1,150
Part II reexamination fee	\$1,150

Candidates who do not appear for their scheduled examination (Part I or Part II) or who cancel less than 6 weeks prior to either examination may forfeit their examination fee.

The Board is a nonprofit corporation, and the fees from candidates are used solely to defray actual expenses incurred in conducting examinations and carrying out the business of the Board. The directors of the Board serve without remuneration.

Appeals

Individuals who receive an unfavorable ruling from a committee of the Board may appeal such determination by mailing a notice of appeal to the office of the American Board of Thoracic Surgery within 30 days of the date such ruling was mailed. A copy of the appeals procedure will be mailed to the candidate.

The only appeal permitted if an applicant fails the written examination is a request for a hand rescoring to verify the accuracy of the score as reported. This request must be made within 30 days of the time the examination results are received by the candidate.

The only appeal with respect to the oral examination is the opportunity to request immediate reexamination following the completion of the oral examination. A candidate who believes that any of his or her examiners has been unfair or biased during a portion of the oral examination may request reexamination by another examiner. The grade on reexamination will be the final grade of the candidate for that portion of the examination.

Chemical Dependency

Qualified applicants who have a history of chemical dependency that has been reported to the Board and who submit documentation suitable to the Board that their dependency has been under control for a period of at least 2 years will be admitted to the examination process.

For candidates who are already in the examination process and develop a chemical dependency as reported to the Board, the process will be suspended until the candidate can provide documentation suitable to the Board that the condition has been under control for a period of 2 years. At that time, the candidate will be readmitted to the examination process. The requirement to be accepted for examination within 5 years of completion of an approved thoracic surgery residency will not be waived.

Certification

After a candidate has met the requirements for eligibility and passed the examination, a certificate attesting to the candidate's qualifications in thoracic surgery will be issued by the Board. The certificate is valid for 10 years.

Recertification (Maintenance of Certification)

Applicants who are certified in thoracic surgery are issued certificates that are valid for 10 years from the date of certification, after which the certificates will no longer be valid. Certificates can be renewed before expiration by fulfilling the requirements for recertification specified by the ABTS at that time. A Recertification (Maintenance of Certification) Booklet is available upon request.

Denial or Revocation of Certificate

No certificate shall be issued or a certificate may be revoked by the Board if it determines that:

- a. the candidate for certification or diplomate did not possess the required qualifications and requirements for examination, whether such deficiency was known to the Board or any Committee thereof before examination or at the time of issuance of the certificate as the case may be;

- b. the candidate for certification or diplomate withheld information in his or her application or made a material misstatement or any other misrepresentation to the Board or any Committee thereof, whether intentional or unintentional;
- c. the candidate for certification or diplomate was convicted by a court of competent jurisdiction of any felony or misdemeanor involving moral turpitude and, in the opinion of the Board, having a material relationship to the practice of medicine;
- d. the candidate for certification or diplomate had his or her license to practice medicine revoked or was disciplined or censured by any court or other body having proper jurisdiction and authority because of any act or omission arising from the practice of medicine; or
- e. the candidate for certification or diplomate had a history of chemical dependency or developed such during the certification process and failed to report same to the Board.

American Board of Urology

Stuart S Howards, MD
Executive Secretary
2216 Ivy Rd, Ste 210
Charlottesville, VA 22903
804 979-0059
804 979-0266 Fax

Martin I Resnick, MD, President, Cleveland, Ohio
Michael E Mitchell, MD, Vice President, Seattle, Washington
Paul F Schellhammer, MD, President-Elect, Norfolk, Virginia
Joseph A Smith, Jr, MD, Secretary/Treasurer, Nashville, Tennessee
Peter C Albertsen, MD, Simsbury, California
Peter R Carroll, San Francisco, California
Michael J Droller, MD, New York, New York
Robert C Flanigan, MD, Maywood, Illinois
Mani Menon, MD, Detroit, Michigan
Linda M Shortliffe, MD, Stanford, California
Howard M Snyder, MD, Philadelphia, Pennsylvania
Robert M Weiss, MD, New Haven, Connecticut

(These criteria and conditions are subject to change without notice. They are based on the 2001 Information for Applicants and Candidates handbook, the latest edition available at time of publication. All applicants are advised to contact the American Board of Urology to ascertain whether the information they have is current.)

Purpose of Certification

The American Board of Urology, Inc, hereinafter sometimes referred to as "the Board," is organized to encourage study, improve standards, and promote competency in the practice of urology. The objective of the Board is to identify for the public's knowledge those physicians who have satisfied the Board's criteria for certification and recertification in the specialty of urology. Certification by the Board does not guarantee competence in practice, but does indicate that the physician has completed basic training requirements and has demonstrated at the time of examination a fund of knowledge and expertise in the care of those patients whose cases were reviewed by the Board, as described elsewhere in this handbook.

Functions of the Board

The Board arranges and conducts examinations testing the qualifications of voluntary candidates and grants and issues certificates to accepted candidates duly licensed to practice medicine. The certificate is the property of the Board, and the Board holds the power to revoke such a certificate.

The Board endeavors to serve the public, hospitals, medical schools, medical societies, and practitioners of medicine by preparing a list of urologists whom it has certified. Lists of diplomates of this Board are published annually in the *Official ABMS Directory of Board Certified Medical Specialists* and in the *Directory of Physicians* of the American Medical Association.

The Board is not responsible for opinions expressed concerning an individual's credentials for the examinations or status in the certification process unless they are expressed in writing and signed by the President or Executive Secretary of the Board.

The nominating societies of this Board and sponsors of its activities are the American Urological Association, the American Association of Genito-Urinary Surgeons, the American Association of Clinical Urologists, the Society of University Urologists, the American

College of Surgeons, and the Section on Urology of the American Academy of Pediatrics.

The American Board of Urology and 23 other medical specialty boards are members of the American Board of Medical Specialties (ABMS), which includes as associate members the Association of American Medical Colleges, the American Hospital Association, the American Medical Association, the Federation of State Medical Boards, the National Board of Medical Examiners, and the Council of Medical Specialty Societies.

Limitations of Functions of the Board

Application for certification is entirely voluntary. Only one certificate for each qualified individual is issued by the Board.

The Board makes no attempt to control the practice of urology by license or legal regulation, and in no way interferes with or limits the professional activities of any duly licensed physician.

Requirements

An applicant may initiate application for certification by the Board during the final year of his or her residency training or at some point thereafter. For details of the certification process see below. Every applicant, however, must meet certain basic requirements as follows:

A. Prerequisites

- 1. Education & residency:** Except as noted below, which specifically refers to requirements for international medical graduates, the applicant must be a graduate of a medical school approved by the Liaison Committee on Medical Education or a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association, and have completed a urology residency program accredited by the Accreditation Council for Graduate Medical Education (ACGME) or Royal College of Physicians and Surgeons of Canada (RCPS[C]). ACGME training programs in urology are described in the American Medical Association *Graduate Medical Education Directory*, Section II, "Essentials of Accredited Residencies in Graduate Medical Education: Institutional and Program Requirements."
- 2. Postgraduate training requirements:** The American Board of Urology mandates a minimum of 5 clinical years of postgraduate medical training. The pre-urology requirements are 12 months of general surgery; 12 months of general surgery and/or urology, including a minimum of 6 months of general surgery/urology. Suggested guidelines for the remaining 6 months of the second 12 months are: 0-6 months of abdominal, endocrine, plastic, pediatric, urologic, vascular surgery; 0-2 months of ICU/critical care, transplant, ER/trauma, gynecology (not obstetrics), or nephrology; and 0-1 months of GU/invasive radiology, anesthesia, or genito-urinary pathology.

The remaining 36-48 months must be spent in clinical urology. Dedicated research rotations are permitted in and only in 6-year programs. Scholarly endeavors are permitted during primary clinical rotations within a 5-year program (2+3 or 1+4).

All of the above training must be in ACGME-accredited programs. Regardless of the training format provided, the final 12 months of training must be spent as a chief resident in urology. The chief residency should be part of a planned program curriculum as outlined in a preapproved rotation provided to the Board. A minimum of 12 months must be served as chief resident in urology with appropriate clinical responsibility under supervision in institutions that are part of the ACGME-accredited program.

For a program requiring more than 36 months of urology training, the candidate must complete the program as defined by the Residency Review Committee for Urology. Variances shall not be

granted for an individual to take pre-urology training out of sequence after the completion of his or her urology residency. Pre-urology credit will be given only to a physician who has trained in ACGME-accredited or RCPS(C)-approved training programs. Lesser degrees of training shall not receive such approval. Any resident who intends to transfer to another urology residency program during the urologic portion of the training must obtain the approval of the Board prior to the change. The resident must petition the Board in advance for said approval. The Board also requires the written acknowledgment and approval of both program directors.

In regard to leaves of absence for parental leave, illness, injury, disability, alcohol or substance abuse, and vacation during residency training in urology, the Board will follow the policies of the institution in question.

To be admissible to the certification process of the Board, the resident must have completed in a satisfactory manner the training requirements of his or her specific program in effect at the time of acceptance in the program, as established by the Residency Review Committee for Urology or the Accreditation Committee of the RCPS(C).

3. *Requirements for Canadian trainees:* To meet the requirements for admissibility to the certification process of the Board, a Canadian-trained urologist must have graduated from a US or Canadian medical school approved by the Liaison Committee for Medical Education and have completed the previously described pre-urology and urology requirements with the final year as chief resident, in programs approved by the Accreditation Council for Graduate Medical Education or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada (RCPS(C)). Upon successful completion of this training, the candidate may sit for the Qualifying (Part 1) Examination of the American Board of Urology. To be admissible to the Certifying (Part 2) Examination, the Canadian-trained candidate must be certified by the RCPS(C).
4. *Requirements for international medical graduates:* International medical graduates from schools outside the United States that provide an equivalent medical background and who have completed an ACGME-approved urology residency and the prerequisite ACGME-approved pre-urology training in the United States may qualify for examination by the American Board of Urology. All such applicants must have a valid certificate from the Education Committee for Foreign Medical Graduates.
5. *Licensure requirements:* Applicants seeking certification by the American Board of Urology must also have a valid medical license that is not subject to any restrictions, conditions, or limitations. The applicant must inform the Board of any conditions or restrictions in force on any active medical license he or she holds. When there is a restriction or condition in force on any of the applicant's medical licenses, the Credentials Committee of the Board will determine whether the applicant satisfies the licensure requirement.
6. *Clinical practice requirements:* In addition to the training and licensure requirements, the applicant must demonstrate acceptable clinical practice in urology. The Board will obtain evidence of this through a review of logs of cases performed by the applicant and by direct communication with the applicant's peers.
7. *Misrepresentation and nonresponse procedure:* Applicants for certification who misrepresent or do not respond to questions on the application will be, at a minimum, deferred from the process for 1 year.
8. *Requirements for applicants with a history of chemical dependency:* Such applicants will not be admitted to the Qualifying (Part 1) or Certifying (Part 2) Examinations unless they present

evidence to the Board that they have satisfactorily completed the program of treatment prescribed for their condition. In addition, any such applicants for the Certifying (Part 2) Examination may have a site visit of their practices by a representative of the Board.

B. Application

1. An application provided by the Executive Secretary shall be completed by the applicant and returned to the Board office by courier for guaranteed receipt. Applications must be in the Board office by November 1 in order to permit the applicant to be admitted for the Qualifying (Part 1) Examination the following June. Applications and documentation postmarked before but not received in the Board office by November 1 will incur a late fee of \$300. *No applications will be accepted after December 1. No application will be considered by the Credentials Committee or the Board unless it is submitted by the deadline set forth and is complete and includes all required supporting documentation.* The Executive Secretary will determine if an application is complete.
2. The application must be accompanied by a notarized copy of a graduation certificate from a medical school approved by the Liaison Committee on Medical Education or from a school of osteopathy approved by the Bureau of Professional Education of the American Osteopathic Association.
3. The candidate must provide specific verification (such as a notarized certificate or an original letter from the director of the program(s) where the applicant completed PGYs 1 and 2) of successful completion of the pre-urology postgraduate training requirement in a program approved by the ACGME. Pre-urology training must be documented separately from urology training. Graduates of medical schools not approved by the Liaison Committee on Medical Education, the Bureau of Professional Education of the American Osteopathic Association, or the Accreditation Committee of the Royal College of Physicians and Surgeons of Canada must furnish a notarized copy of a valid Education Commission for Foreign Medical Graduates (ECFMG) Certificate.
4. Examination fees and dates for the Qualifying (Part 1) Examination are described below in Fees and Deadlines
5. For each applicant, the director of the program where the applicant is finishing residency training must provide a letter to the Board office by January 1 confirming that the applicant is expected to have successfully completed 1 year of training in the capacity of chief resident during the calendar year in which the Qualifying (Part 1) Examination is to be taken. The program director must also complete an evaluation form supplied by the Board. This evaluation must be received in the Board office by March 1 preceding the Qualifying (Part 1) Examination given in June.
6. Applicants for certification must be approved by the Credentials Committee and the Board. Additional information may be requested by the executive secretary. No duty or obligation to assist any applicant in completing the application process is implied. The applicant is responsible for ensuring that all supporting documents are received in the Board office by the indicated time.
7. As a condition of application to the certification process, applicants must sign a waiver releasing, discharging, and exonerating the Board, its directors, officers, members, examiners, employees, and agents from any and all claims, losses, costs, expenses, damages, and judgments (including reasonable attorneys' fees) alleged to have arisen from, out of, or in connection with the certification process.
8. As a condition of application to the certification process, the applicant must sign a waiver allowing the Board to release

examination results achieved in the Qualifying and Certifying Examinations to the residency program director and to the Residency Review Committee for Urology.

9. Any applicant who requires special aids or assistance due to a physical or mental disability during the Board examinations should indicate this on the application. See Disability Accommodations Policy, below.

C. Fees and Deadlines

1. The current examination fees may be changed without notice. Fees reimburse the Board for expenses incurred in preparing and processing the applications and examinations of the candidate. Fees are refundable, less an administrative fee, in most cases of cancellation or deferral.
2. Payment of \$920 must accompany the initial application for the Qualifying (Part 1) Examination except in the case of chief residents, who shall pay \$820 as the fee for the initial application. Only chief residents may delay the fee payment until January 5. An additional fee of \$965 must accompany the application for the Certifying (Part 2) Examination. An applicant or candidate secures no vested right to certification as a result of paying an examination fee.
3. Cancellation fees are as follows: \$500 failure to appear; \$300 unexcused absence; \$200 excused absence (in cases of personal or family illness/death).
4. Only one excused absence is permitted at the discretion of the Board, and this extends the period of admissibility for 1 year. The excused absence fee of \$200 will be assessed. Following one excused absence, any subsequent absences are classified as unexcused. There will be no further extensions of admissibility and an unexcused absence fee and reinstatement fee, if any, will be assessed. Applications will be considered inactive if two successive examination appointments are canceled by the applicant. A reinstatement fee is assessed after two consecutive absences. If the candidate does not already exceed the 5-year time limit, he/she may regain active status by paying the reinstatement fee of \$600 plus an additional fee for an unexcused absence or for a nonappearance.
5. A \$300 late fee will be assessed for any application and/or documentation and/or fees not received in the Board office by the prescribed deadlines. Courier service for guaranteed receipt is recommended. A \$100 fee will be assessed for all returned checks.
6. The fee for the Preliminary Examination is \$475. If a Preliminary Examination appointment is canceled, a \$300 cancellation fee will be assessed.
7. The application fee for recertification, as described in Section XIII, is \$1,050.
8. The fee for a site visit by a Board representative is \$2,000 plus expenses.
9. Fees shall be refunded to candidates deferred by the Board, less a \$50 administrative fee, or, if deferred for an inadequate practice log, a \$175 administrative fee.

The Certification Process

Applicants approved by the Board to enter the certification process must complete both a Qualifying (Part 1) Examination and, after passing this examination, a subsequent Certifying (Part 2) Examination. Assessment of clinical practice through review of practice logs and peer review will also be carried out prior to admission to the Certifying (Part 2) Examination. Certification must be achieved within 5 years of the successful completion of residency.

Applicants who have not applied for or have not successfully completed the Qualifying (Part 1) Examination within 5 years of the

completion of their urological residency will be required to pass a written Preliminary Examination before being permitted to enter the certification process. The Preliminary Examination is given each November during the annual In-Service Examination.

After passing the Preliminary Examination, the applicant must take the Qualifying (Part 1) Examination one of the next two times it is offered. Any such candidate who fails to do so must successfully retake the Preliminary Examination to proceed with certification. Contact the Board office prior to the August 15 deadline for more Preliminary Examination information.

A. Qualifying (Part 1) Examination

The Qualifying (Part 1) Examination is a 2-day examination given in June of each year simultaneously at about 15 different locations. It includes three components: written, pathology, and urologic imaging (pathology and urologic imaging graphics are in booklet format). The examination is designed to assess knowledge of the entire field of urology and allied subjects. This includes, but may not be limited to, andrology (including infertility), calculous disease (including endourology and shock-wave lithotripsy), congenital anomalies, pediatric urology, urologic disorders of females, infectious diseases, neurourology and urodynamics, obstructive diseases, psychological disorders, renovascular hypertension and renal transplantation, sexuality and impotence, adrenal diseases and endocrinology, trauma, and urologic oncology.

The written, urologic imaging, and pathology examinations are all regarded as separate examinations. In the event of failure of any one or two of the three, only the failed examination need be repeated.

An applicant failing any component of the Qualifying (Part 1) Examination must repeat the failed component(s) the next year unless the absence is excused by the Board office. Failure to retake the failed component(s) at the first available opportunity will result in assessment of an unexcused absence fee on subsequent applications. The applicant must pass all components of the Qualifying (Part 1) Examination in sufficient time to allow for completion of the certification process within the allotted 5 years of active candidacy.

B. Certifying (Part 2) Examination

Candidates for the Certifying (Part 2) Examination must have met all training requirements and have passed the Qualifying (Part 1) Examination. The Certifying Examination includes assessment of clinical practice through review of practice logs, peer review, and oral examinations. In addition, the candidate must have engaged in a minimum of 18 months of urological practice with primary patient responsibility in a single community, an academic institution, or in the Armed Forces.

A yearly extension of the period of admissibility may be granted for approved fellowships relevant to urology of 1 year or longer. Credit is subject to Board approval; notarized documentation of fellowship training is required. A 6-month credit toward the 18-month practice period requirement may be awarded to an individual for fellowship training approved by the Board, effective with successful completion of the fellowship. The candidate must notify the Board in writing if he or she spends 1 or more years in postresidency fellowship training.

Application for admission to the Certifying (Part 2) Examination is made by completing the Supplemental Application form mailed from the Board office in May to all potential applicants. This application should be returned by courier for guaranteed receipt, and must be received in the Board office by July 1 prior to the Certifying (Part 2) Examination of the following year. In addition, a practice log of all major and minor surgical, office, and ambulatory care cases performed as the primary surgeon, including narrative

descriptions of deaths, complications, and errant diagnoses, prepared in accordance with the formats provided by the Board, must be received in the Board office by November 15 prior to the next Certifying (Part 2) Examination. Each log must document six consecutive months between May 15, 2000, and November 15, 2001. This log must be verified by the candidate and notarized. Courier service for guaranteed receipt is recommended.

Applicants will be assessed \$300 for logs received between November 15 and December 1. No practice logs will be accepted after December 1.

Extensions of the period to complete certification are granted by the Board because of extenuating circumstances (eg, involvement in a fellowship of 1 or more years' duration, subject to Board approval, and deferral for an inadequate practice log). The candidate should request such extensions in writing, and include the reason.

The candidate must successfully complete all components of the Certifying (Part 2) Examination within 5 years of the completion of residency, unless an extension has been granted. To reenter the process, it is necessary to pass a written Preliminary Examination and reenter the certification process at the Qualifying (Part 1) Examination level.

C. Steps in the Certifying (Part 2) Examination

1. *Assessment of clinical practice:* Urology is the specialty that deals with the medical and surgical disorders of the genito-urinary tract including the adrenal gland. Candidates must demonstrate knowledge and surgical experience in the broad domains of urology, such as infertility, impotence, calculous disease, endourology, extracorporeal shock wave lithotripsy, neurourology, urodynamics, urologic imaging, uropathology, female urology, pediatric urology, infectious disease, obstructive disease, psychological disorders, renovascular disease, transplantation, genitourinary sexuality, trauma, and oncology. Candidates for the Certifying (Part 2) Examination must be in the full-time practice of urology and must be licensed to practice medicine in the area of current practice activity. Notarized documentation of licensure is required.

The candidate must sign a waiver authorizing any and all third parties contacted by the Board to furnish to the Board such records and information, including confidential information related to the candidate's abilities and reputation as a urologist, as the Board (in its sole discretion) may deem necessary or advisable.

Under no circumstances will the source of peer review be revealed to any person other than Trustees and staff of the Board.

The candidate will be required to release, discharge, and exonerate the Board, its directors, officers, members, examiners, employees, and agents (including any and all third parties furnishing information to the Board) from any and all claims, losses, costs, expenses, damages, and judgments (including reasonable attorneys' fees) alleged to have arisen from, out of, or in connection with, the certification process.

As evidence of urologic clinical practice, the candidate must submit a practice log of his or her surgical, office, and ambulatory care cases performed as primary surgeon that is to be 6 consecutive months in length. Procedures done outside of the United States are acceptable. In the case of military or public health physicians subject to unexpected changes of assignment, the Board may accept cases from the previous assignment.

Candidates deferred on the basis of their practice log should submit a new log with their next application. The 5-year period of admissibility for completing certification will be extended one time by 1 year for candidates whose certification is delayed because of an inadequate practice log.

Copies of patient records from the patient care facility and/or office records of any one or more of the above cases may be requested by the Board. The candidate shall ensure that the patient records so disclosed do not contain any patient-identifying information. The candidate is expected to furnish such records within 1 month of the request.

Practice log review is an important component of the certification process. While there is no minimum number of cases established for an acceptable log, a practice experience well below the norm for the peer group may be cause for delaying the certification process until there is sufficient experience to assess adequately a candidate's practice pattern and management abilities. The Board will review the practice logs of urologic subspecialists in the context of the expected subspecialty experience.

To further ascertain and document the candidate's qualifications for certification, the Board will solicit information and comments from appropriate individuals, such as fellow practitioners, or from organizations, such as medical societies and licensing agencies.

Upon receipt of the practice logs and peer review information, the Credentials Committee of the Board will review the candidate's credentials. Evidence of ethical, moral, and professional behavior, and an appropriate pattern of urologic practice including experience with an adequate volume and variety of clinical material, will be sought. Areas of inadequacy may be cause for deferment or discontinuation of the certifying process until these areas are clarified or corrected. Actions of the Board to achieve clarification may include:

- a) Inquiry by the Credentials Committee of the Board into practice irregularities;
- b) Request for certified copies of candidate's health care facility and/or office records for review;
- c) Invitation to appear before the Board for a personal interview;
- d) A site visit to the candidate's community at the candidate's expense; and/or
- e) Other appropriate measures that may be deemed necessary assess apparent deviations from standard urologic practice.

The candidate will not be permitted to continue the certification process until the Board has satisfied itself of the appropriateness of the candidate's practice pattern and professional behavior. The Board may elect to defer continuation of the certification process pending investigation and resolution of any inadequacies or deviations. It may deny certification when serious practice deviations or unethical conduct are involved. These include, but are not limited to, cheating on or improper or disruptive conduct during any examination conducted by the Board, the solicitation or distribution of examination materials, and misrepresentation of an applicant's or candidate's status in the certification process.

2. *The Oral Examinations:* These examinations are given annually in February in Dallas, Texas. This is an interactive process between examiner and candidate during which an assessment is made of ability to diagnose and manage urologic problems. There are two exam encounters composed of three protocols each. Since the candidate has passed the Qualifying (Part 1) Examination, the examiner presumes in the oral examination that the candidate has a satisfactory degree of cognitive knowledge of urology. Therefore, the oral examination will concentrate on the following:

- a) Problem-solving ability. Evaluation is made of the candidate's ability to collect pertinent information systematically, integrate it, assess the problem, and propose appropriate solutions.

- b) Response to a change in a clinical situation. The candidate's ability to manage changing clinical conditions is evaluated through the flexible interaction between the examiner and the candidate. Changed clinical conditions may be posed by the examiner in order to assess various responses by the candidate, or may be developed by the examiner from the outcome of management recommendations offered by the candidate during the interview.
- c) Professional behavior in the role of a urologist. The candidate's attitude, interaction with the examiner, and expression of patient management concerns contribute to the assessment of professional behavior.

Disability Accommodations Policy

An applicant requesting accommodations during Board examinations due to a physical or mental disability that substantially limits a major life activity must indicate this request on the application provided by the Board. A recent evaluation and appropriate formal documentation substantiating the disability by a qualified professional must accompany the application. The Board may then have any and all documentation and/or evaluations submitted by the candidate reviewed by an additional qualified professional. This can be done at the Board's discretion and the Board will bear the cost of any additional review or evaluation. The Credentials Committee of the Board will make the final decision regarding the accommodations that will be offered if the request under consideration is made by a candidate for certification. The Recertification Committee of the Board will make the final decision regarding the accommodations that will be offered if the request under consideration is made by a diplomate and/or candidate for recertification.

Unforeseeable Events

Certain unforeseeable events such as a natural disaster, war, government regulations, strikes, civil disorders, curtailment of transportation, and the like may make it inadvisable, illegal, or impossible for the Board to administer an examination to a candidate at the scheduled date, time, and location. In any such circumstance, the Board is not responsible for any expense the candidate may have incurred to be present for the examination or may incur for any future or substitute examination.

Final Action of the Board

Final action regarding each applicant is the sole prerogative of the Board and is based upon the applicant's training, professional record, and performance in clinical practice, and the results of the examinations given by the Board.

Regardless of the sequence by which the various steps of certification may have been accomplished, the process itself is not considered complete until the Board's final action. At any point in the process, the Board may delay or even deny certification upon consideration of information that appears to the Board to justify such action.

The activities described in this document proceed from the Certificate of Incorporation and Bylaws, which state the nature of the business, objects, and purposes proposed to be transacted and carried out by this corporation.

"Board Eligible" Status

The American Board of Urology does not recognize or use the term "Board Eligible" in reference to its applicants or candidates. A candidate is not certified (ie, does not become a diplomate) until all components of the certification process have been successfully completed.

Inquiry as to Status

The Board considers a candidate's record not to be in the public domain. When a written inquiry is received by the Board regarding a candidate's status, a general but factual statement is provided that indicates the person's status within the examination process. The Board provides this information only to individuals, organizations, and institutions supplying a signed release of information from the candidate, and a charge of \$35 per request will apply.

Recertification

Certificates issued by the American Board of Urology on or after January 1, 1985, expire on the anniversary of the date of issue and are valid for 10 years only. A physician who fails to be recertified by the expiration date is no longer a diplomate of the Board, and his or her name is deleted from the *Official ABMS Directory of Board Certified Medical Specialists*. It is recommended, therefore, that diplomates possessing a time-limited certificate make plans to obtain recertification beginning up to 3 years before the expiration date of their current certificate.

The Board endorses the concept of lifelong learning in urology for its diplomates. Candidates for recertification must demonstrate their involvement in continuing urologic education by documenting 90 urology-related credits, 30 hours of which must be Category 1, within a 3-year period prior to September 1 of the year the recertification examination is to be taken. The office of the American Board of Urology will notify diplomates holding a time-limited certificate 3 years prior to its expiration. At that time a handbook detailing the recertification process entitled *Information for Applicants for Recertification* will be provided. This handbook is also available upon request from the Board office.

Diplomates are responsible for keeping the Board office informed of address changes.

Trademark and Seal

The trademark and seal of the American Board of Urology are registered. Any unauthorized use of the trademark or seal is prohibited without express permission of the Board.

Code of Ethics

Ethics are moral values. They are aspirational and inspirational, as well as model standards of exemplary professional conduct for all applicants for certification and all diplomates certified by the American Board of Urology. The term urologist as used here shall include all such candidates and diplomates.

The issue of ethics in urology is resolved by a determination that the best interests of the patient are served. It is the duty of a urologic surgeon to place the patient's welfare and rights above all other considerations. Urological services must be provided with compassion, respect for human dignity, honesty, and integrity.

A urologic surgeon must maintain qualification by continued study, performing only those procedures in which he or she is competent by virtue of specific training or experience, or with the assistance of one who is so competent. This competence must be supplemented with the opinions and talents of other professionals and with consultations when indicated.

Open communication with the patient or, if the patient is unable to understand a communication, the patient's relatives or other authorized representative is essential. Patient confidences must be safeguarded within the constraints of the law. The performance of medical or surgical procedures shall be preceded by the appropriate informed consent of the patient or the patient's authorized representative. Timely communication of the patient's condition to referring and consulting physicians should also be practiced.

Urologic surgery shall be recommended only after careful consideration of the patient's physical, social, emotional and occupational needs. The preoperative assessment must document indications for surgery. Performance of unnecessary surgery is an extremely serious ethical violation.

Fees for urologic services must not exploit patients nor others who pay for those services. In addition, a urologic surgeon must not misrepresent any service that has been performed or is to be performed nor the charges which have been made or will be made for that service. Payment by or to a physician solely for the referral of a patient (fee splitting) is unethical.

Delegation of services is the use of auxiliary health care personnel to provide patient care for which the urologic surgeon is responsible. A urologic surgeon must not delegate to an auxiliary those aspects of patient care within the unique competence of the urologic surgeon (which do not include those permitted by law to be performed by auxiliaries). When other aspects of patient care for which the urologic surgeon is responsible are delegated to an auxiliary, the auxiliary must be qualified and adequately supervised. A urologic surgeon may make different arrangements for the delegation of patient care in special circumstances, such as emergencies, if the patient's welfare and rights are placed above all other considerations.

Providing a patient's postoperative medical or surgical care until that patient has recovered is integral to patient management. The operating urologic surgeon should provide those aspects of postoperative patient care within the unique competence of the urologic surgeon (which do not include those permitted by law to be performed by auxiliaries). Otherwise, the urologic surgeon must make arrangements before surgery for referral of the patient to another urologic surgeon, with the approval of the patient and the other urologic surgeon. The urologic surgeon may make different arrangements for provision of those aspects of postoperative patient care within the unique competence of the urologic surgeon in special circumstances, such as emergencies or when no other urologic surgeon is available, if the patient's welfare and rights are placed above all other considerations. Fees should reflect postoperative medical or surgical care arrangements with advance disclosure to the patients.

Scientific investigations and communications to the public must be accurate. They must not convey false, deceptive, or misleading information through statements, testimonials, photographs, graphs, or other means. They must not omit material information without which the communication would be deceptive. Communications must not appeal to an individual's anxiety in an excessive or unfair way; they must not create unjustified expectations of results. If communications refer to benefits or other attributes of urologic procedures which involve significant risks, a realistic assessment of safety and efficacy must also be included, as well as the availability of alternatives, with descriptions and/or assessments of the benefits and other attributes of those alternatives when necessary to avoid deception. Communications must not misrepresent a urologic surgeon's credentials, training, experience or ability, nor contain material claims of superiority that cannot be substantiated. If a communication results from payment to a urologic surgeon, such must be disclosed, unless the nature, format or medium makes that apparent. Offering or accepting payment for referring patients to research studies for finder's fees is unethical.

Those urologic surgeons who are deficient in character or who engage in fraud, deception or substance abuse should be identified to appropriate local, regional, state and/or national authorities. A physically, mentally, or emotionally impaired urologic surgeon should withdraw from those aspects of practice affected by the impairment.

Disciplinary Action

The Board of Trustees of the American Board of Urology shall have the sole power to censure or suspend or revoke the certificate of any diplomate. Certificates issued by the Board are the property of the Board and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to censure or suspension or revocation of the certificate as described herein. The Board of Trustees shall have the sole power, jurisdiction, and right to determine and decide whether the evidence and information before it is sufficient to constitute one of the disciplinary actions by the Board. The levels of disciplinary action and manner of notification, appeal, and reinstatement shall be defined as follows.

Censure and Suspension: A diplomate may be censured or his or her certificate suspended if he or she has been found by the Board to be engaging in professional misconduct or moral turpitude or for violations of the Code of Ethics of the American Board of Urology not warranting certificate revocation. The Board of Trustees of the American Board of Urology shall have the sole power to determine the level of disciplinary action and the designated level of suspension.

Censure: A censure shall be a written reprimand to the diplomate. Such censure shall be made part of the file of the diplomate.

Suspension: A suspension shall require the diplomate to return his or her certificate to the Board for a designated time so determined by the Board. The Board shall have the sole power to determine the designated time of suspension. Prior to return of the certificate the diplomate must meet with the Board within 60 days prior to the end of the designated time period. Recertification will be necessary if a time-limited certificate expires during the period of suspension.

Revocation of Certificate: Certificates issued by this Board are the property of the Board and are issued pursuant to the rules and regulations of the Board. Each certificate is issued to an individual physician who, by signature, agrees to revocation of the certificate in the event that:

- a. The issuance of the certificate or its receipt by the physician so certified shall have been contrary to, or in violation of, any provision of the Certificate of Incorporation, Bylaws, or rules and regulations of the Board in force at the time of issuance; or
- b. The physician or party certified shall not have been eligible to receive such certificate, regardless of whether or not the facts constituting ineligibility were known to, or could have been ascertained by, the Trustees of the Board at the time of issuance of such certificate; or
- c. The physician or party so certified shall have made a material misstatement of fact in application for such certification or recertification or in any other statement or representation to the Board or its representatives; or
- d. The physician so certified shall at any time have neglected to maintain the degree of knowledge in the practice of the specialty of urology as set up by the Board, and shall refuse to submit to reexamination by the Board; or
- e. The physician so certified is convicted of a felony, scientific fraud, or a crime involving illicit drugs; or
- f. Any license to practice medicine of the physician so certified is surrendered, suspended, revoked, withdrawn, or voluntarily returned in any state regardless of continuing licensure in any other state, or he or she is expelled from any of the nominating societies, a county medical society, or a state medical association for reasons other than non-payment of dues or lack of meeting attendance; or

g. The physician so certified has been found by the Board of being guilty of serious professional misconduct or moral turpitude or for serious violation of the Code of Ethics of the American Board of Urology adversely reflecting on professional competence or integrity.

Notification and Appeal

Notification: If the action of the Board is to censure or suspend or revoke the certificate of a diplomate, the Board shall send written notice thereof to the diplomate. The notice shall state the reasons for the Board's decision.

Appeal: Please see Appeals Procedure below for details on the appeals process.

Reinstatement of Certificate: Should the circumstances that justified revocation of the diplomate's certificate be corrected, the Board may allow the candidate to reapply for certification. The Board of Trustees shall have the sole power to determine the time of initiation of the reinstatement process. The applicant whose certificate has been revoked may be required to complete the certification or recertification process at the discretion of the Board.

Prior to reinstatement of certification, the applicant must meet with the Board. The diplomate will be required to attest that he or she has read and understands the above provisions regarding disciplinary action and the procedures to be followed and agree to hold the Board, its officers, and agents harmless from any damage, claim, or complaint by reason of any action taken which is consistent with such procedures.

Appeals Procedure

1. **Adverse Decision Inquiries:** During the course of the certification or recertification process, a candidate may receive an adverse decision regarding one or more elements of the process. Inquiries regarding an adverse decision must be made in writing to the executive secretary within 30 days after mailing by the Board and will be promptly answered. The candidate will be guaranteed the following:
 - a) Hand scoring of the answer sheet for failures of the Qualifying (Part 1) Imaging, Pathology, and/or Written Examinations.
 - b) Review by the Executive Secretary of the examiners' scoring sheets for the failure of the Certifying (Part 2) Oral Examination.
 - c) Review of the record by the Chairman of the Credentials Committee or Recertification Committee for an adverse decision concerning peer review, practice logs, and/or professional responsibility experience.
2. **Adverse Decisions:** If the final action of the Board is a decision to deny certification to an applicant, to deny recertification to a diplomate with a time-limited certificate, or to revoke the certificate of a diplomate, the Board shall send written notice thereof to the applicant or diplomate. The notice shall state the reasons for the Board's decision. For those holding a time-limited certificate, their certificate shall stay in effect until the appeals process is completed.
3. **Request for Hearing:** An applicant or a diplomate who receives such a notice may, within 30 days after mailing by the Board, give written notice to the Board that he or she wishes to request a hearing to appeal the Board's decision. The written notice shall set forth the specific reasons given by the Board which are alleged to be erroneous and shall indicate whether the applicant or diplomate wishes to attend the hearing. Such applicant or diplomate is hereinafter referred to as the "appellant."
4. **Notice of Hearing:** If the Board receives the appellant's notice requesting a hearing in a timely manner, the Board shall set the date, time, and place of the hearing, and shall give the appellant at least 30 days' prior written notice thereof.

5. **Hearing:** The hearing shall be held before the Board of Trustees or before a hearing panel consisting of one or more persons appointed by the Board, as it may determine in its sole discretion. The president of the Board, or, if a hearing panel is appointed, a person appointed by the Board of Trustees, shall preside at the hearing. At the hearing, the burden shall be on the appellant to prove by a preponderance of the evidence that the Board's decision was erroneous.

6. **Failure to Appear:** Failure to appear at the hearing may result in the forfeiture of the right to a hearing, as the Board of Trustees may determine, in its sole discretion. Despite such failure to attend, the Board of Trustees (or the hearing panel) may nevertheless hold the hearing, consider the information submitted, and decide the appeal.

7. **Hearing Procedure:** The appellant may appear at the hearing to present his or her position in person, at the time and place specified, subject to any conditions established by the Board. A transcript of the proceedings shall be kept. The Board shall not be bound by technical rules of evidence employed in legal proceedings, but may consider any information it deems appropriate. The appeals process is a peer review process and neither party may be represented by, or bring along, legal counsel.

8. **Notice of Decision:** Within a reasonable time after completion of the hearing, the Board shall furnish written notice to the appellant of the decision, including a statement of the basis therefore.

9. **Finality:** The decision of the Board shall be final and binding on the Board and on the appellant.

10. **Notices:** All notices or other correspondence pertaining to the appeal should be sent to the following address:

The American Board of Urology
2216 Ivy Rd, Ste 210
Charlottesville, VA 22903
Attention: Executive Secretary

Fee Schedule

Qualifying (Part 1) Examination

Residents	820
Practitioners & Fellows	920

Reexamination

Pathology, Imaging	(each) 320
Written	600
Certifying (Part 2) Examination	965
Reexamination	320

Cancellation Fees

Excused absence	200
Unexcused absence	300
Failure to appear	500
Reinstatement after Two Successive Absences (plus cancellation fees)	600
Deferral of Admissibility to Part 2 Examination for Inadequate Practice Log (balance of fee returned)	175
Preliminary Examination	475
Cancellation Fee	300
Recertification	1,050
Late Fee (application, documentation, fees)	300
"NSF" Fee	100
Site Visit (plus expenses)	2,000
Administrative Fee	50
Official Verification of Status	35

Appendix C

Medical Schools in the United States

Note: The following medical schools were accredited by the Liaison Committee on Medical Education (LCME) as of January 16, 2002.

Alabama

- 00102 University of Alabama School of Medicine
Birmingham, AL 35294
00106 University of South Alabama
College of Medicine
Mobile, AL 37788

Arizona

- 00301 University of Arizona
College of Medicine
Tucson, AZ 85724

Arkansas

- 00401 University of Arkansas
College of Medicine
Little Rock, AR 72005

California

- 00502 University of California, San Francisco
School of Medicine
San Francisco, CA 94143
00506 Keck School of Medicine of the University
of Southern California
Los Angeles, CA 90033
00511 Stanford University School of Medicine
Palo Alto, CA 94305
00512 Loma Linda University School of Medicine
Loma Linda, CA 92350
00514 University of California, Los Angeles
School of Medicine
Los Angeles, CA 90024
00515 University of California, Irvine College of
Medicine
Irvine, CA 92717
00518 University of California, San Diego School
of Medicine
La Jolla, CA 92093
00519 University of California, Davis School
of Medicine
Davis, CA 95616

Colorado

- 00702 University of Colorado School of Medicine
Denver, CO 80262

Connecticut

- 00801 Yale University School of Medicine
New Haven, CT 06510
00802 University of Connecticut
School of Medicine
Farmington, CT 06032

District of Columbia

- 01001 George Washington University
School of Medicine
Washington, DC 20037
01002 Georgetown University School of Medicine
Washington, DC 20007
01003 Howard University College of Medicine
Washington, DC 20059

Florida

- 01102 University of Miami School of Medicine
Miami, FL 33101
01103 University of Florida College of Medicine
Gainesville, FL 32610
01104 University of South Florida
College of Medicine
Tampa, FL 33612

Georgia

- 01201 Medical College of Georgia School
of Medicine
Augusta, GA 30912
01205 Emory University School of Medicine
Atlanta, GA 30322
01221 Morehouse School of Medicine
Atlanta, GA 30314
01222 Mercer University School of Medicine
Macon, GA 31207

Hawaii

- 01401 University of Hawaii John A Burns
School of Medicine
Honolulu, HI 96822

Illinois

- 01601 Rush Medical College of Rush University
Chicago, IL 60612
01602 University of Chicago, Pritzker
School of Medicine
Chicago, IL 60637

- 05606 Medical College of Wisconsin
Milwaukee, WI 53226

Appendix D

Graduate Medical Education Glossary

Accreditation Council for Graduate Medical Education (ACGME)—An accrediting agency that has five member organizations:

- American Board of Medical Specialties
- American Hospital Association
- American Medical Association
- Association of American Medical Colleges
- Council of Medical Specialty Societies

Each member organization nominates four directors. The federal government names a representative to serve in a nonvoting capacity, and the ACGME chooses three public representatives. There is also a resident representative, and the chair of the Residency Review Committee Council sits as a voting representative. The mission of the ACGME is to improve the quality of health in the United States by ensuring and improving the quality of allopathic graduate medical education experience for physicians in training. The ACGME establishes national standards for graduate medical education by which it approves and continually assesses educational programs under its aegis. The ACGME accredits GME programs through its 27 review committees (26 Residency Review Committees, or RRCs, and the Transitional Year Review Committee).

Affiliated institution (see “Major participating institution”)—Term no longer used by the AMA or ACGME; it has been replaced by “major participating institution.”

American Board of Medical Specialties (ABMS) (see also “Certification”)—The umbrella organization for the 24 approved medical specialty boards in the United States. Established in 1933, the ABMS serves to coordinate the activities of its Member Boards and to provide information to the public, the government, the profession, and its members concerning issues involving specialization and certification in medicine. The mission of the ABMS is to maintain and improve the quality of medical care in the United States by assisting the member Boards in their efforts to develop and utilize professional and educational standards for the evaluation and certification of physician specialists. See Appendix B for more information.

Annual Survey of Graduate Medical Education Programs—see “National GME Census.”

Attending—see “Teaching staff.”

Categorical positions (see also “Graduate Year 1” and “Preliminary Positions”)—Positions for residents who remain in a given program or specialty until completion of the year(s) required for admission to specialty board examination.

Certification (see also “American Board of Medical Specialties”)—A voluntary process intended to assure the public that a certified medical specialist has successfully completed an approved educational program and an evaluation including an examination process designed to assess the knowledge, experience, and skills requisite to the provision of high-quality patient care in that specialty. Certification boards determine whether candidates have received appropriate preparation in approved residency training programs in accordance with established educational standards, evaluate candidates with comprehensive examinations, and certify those candidates who have satisfied the board requirements. Physicians who are successful in achieving certification are called diplomates of the respective specialty board. The boards also offer recertification for qualified diplomates at intervals of 7 to 10 years. See Appendix B for more information.

Combined specialty programs—Programs recognized by two or more separate specialty boards to provide GME in a particular combined specialty (listed below; see Appendix A for more informa-

tion). Each combined specialty program is made up of two or three programs at the same institution. The ACGME and its Residency Review Committees do not accredit combined programs; instead, they separately accredit the core specialty programs that form the combined program. Resident physicians completing these programs are eligible for board certification in both specialties. Current combined specialties are:

- Diagnostic radiology/nuclear medicine/nuclear radiology
- Internal medicine/emergency medicine
- Internal medicine/emergency medicine/critical care medicine
- Internal medicine/family practice
- Internal medicine/neurology
- Internal medicine/nuclear medicine
- Internal medicine/pediatrics
- Internal medicine/physical medicine and rehabilitation
- Internal medicine/preventive medicine
- Internal medicine/psychiatry
- Neurology/physical medicine and rehabilitation
- Neurology/diagnostic radiology/neuroradiology
- Neurology/nuclear medicine
- Pediatrics/emergency medicine
- Pediatrics/medical genetics
- Pediatrics/physical medicine and rehabilitation
- Pediatrics/psychiatry/child and adolescent psychiatry
- Psychiatry/family practice
- Psychiatry/neurology

Consortium—A group of healthcare organizations established to pursue joint objectives in patient care, education, research, or other areas. If a consortium is formally established as an ongoing organizational entity with a commitment to graduate medical education, it may serve as a sponsoring institution of a GME program.

Core discipline program (see “General specialty program”)—Term still appears, but is being replaced by “general specialty program.”

Chief resident—A position in the final year of the residency (eg, surgery) or in the year after the residency is completed (eg, internal medicine and pediatrics); the individual in this position plays a significant administrative or teaching role in guiding new residents.

Designated institutional official—An individual at an institution affiliated with one or more GME programs who has the authority and responsibility for the oversight and administration of programs.

Educational Commission for Foreign Medical Graduates (ECFMG)—A nonprofit organization that assesses the readiness of graduates of foreign medical schools to enter graduate medical education in the United States. ECFMG certification provides assurance to GME program directors, and to the people of the United States, that graduates of foreign medical schools have met minimum standards of eligibility required to enter such programs. This certification does not guarantee that such graduates will be accepted into these programs in the United States, since the number of applicants frequently exceeds the number of positions available. (For more information, refer to the *GMED Companion: An Insider's Guide to Selecting a Residency Program*.)

ECFMG number—The number assigned by the Educational Commission for Foreign Medical Graduates (ECFMG) to each international medical graduate physician who applies for certification from ECFMG. Almost all graduates of foreign medical schools must have an ECFMG certificate to participate in GME in the US.

Electronic Residency Application Service (ERAS)—A service for medical students through which residency applications, letters of recommendation, Dean's letters, transcripts, and other supporting credentials are transmitted via the Internet from medical schools

to residency program directors. For more information about ERAS, a service of the Association of American Medical Colleges (AAMC), consult www.aamc.org/eras or the *GMED Companion: An Insider's Guide for Selecting Your Residency Program*.

Fellow (also see “Resident or resident physician” and “Intern”)—A physician in an ACGME-accredited program that is beyond the requirements for eligibility for first board certification in the discipline. Such physicians may also be termed “resident” as well. Other uses of the term “fellow” require modifiers for precision and clarity, eg, “research fellow.”

Fellowship and Residency Electronic Interactive Database Access (FREIDA Online)—An online information resource, available through the AMA Web site at www.ama-assn.org/go/freida, that assists medical students and residents in selecting GME programs. It includes all ACGME-accredited residency programs and combined specialty programs, the majority with expanded listings that provide such information as program benefits (including compensation), resident-to-faculty ratio, work schedule, policies, and educational environment.

Fifth Pathway—One of several ways that individuals who obtain their undergraduate medical education abroad can enter GME in the United States. The Fifth Pathway is a period of supervised clinical training for students who obtained their premedical education in the United States, received undergraduate medical education in countries that do not grant the MD degree until the completion of 1 year of national service after medical school, and passed Step 1 of the United States Medical Licensing Examination. After these students successfully complete a year of clinical training sponsored by an LCME-accredited US medical school and pass USMLE Step 2, they become eligible for an ACGME-accredited residency as an international medical graduate. (For more information, refer to the *GMED Companion: An Insider's Guide to Selecting a Residency Program*.)

General specialty program (see also “Core discipline program”)—A primary specialty (eg, anesthesiology, family practice, internal medicine) that provides resident physicians, under supervision, with the knowledge and skills needed to be practitioners in a specified area of medical practice. General specialty programs function within an institution and are subject to all ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency in a general specialty program is one of the requirements of certification by a specialty board and is a prerequisite to subspecialty training.

Graduate medical education (GME) (see also “Postgraduate medical education”)—As the second of three major phases of medical education in the US, graduate medical education (GME) prepares physicians for the independent practice of medicine in a medical specialty. GME focuses on the development of clinical skills and professional competencies and on the acquisition of detailed factual knowledge in a medical specialty. GME programs are based in hospitals or other health care institutions and, in most specialties, utilize both inpatient and ambulatory settings, reflecting the importance of care for adequate numbers of patients in the GME experience. GME programs, including Transitional Year programs, are usually called “residency programs” and the physicians educated in them “residents.”

Graduate Medical Education Directory—Annual publication recognized as the official list of programs accredited by the ACGME. Known informally as the “Green Book,” the *Directory* lists all ACGME-accredited programs in 107 specialties and subspecialties, Board-approved combined programs in 14 specialties, current educational standards (“Program Requirements”) for

113 specialties and subspecialties, and the certification requirements of 24 medical specialty boards.

Graduate Year (see also “Program year” and “Postgraduate year”)—Refers to an individual’s current year of accredited GME; this may or may not correspond to the program year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics). The AMA does not use the term “postgraduate year” (PGY).

Graduate Year 1 (GY1)—Used in connection with residents and with residency positions to indicate the first year of training after medical school. Individuals in GY1 positions who plan to complete the entire program are counted as enrolled in Graduate Year 1 (GY1), Categorical. Individuals in GY1 positions who are using their first year in a residency program as a prerequisite to enter another specialty or subspecialty program are counted as enrolled in Graduate Year 1 (GY1), Preliminary. Not all specialties offer GY1 positions; in those specialties approved for GY1 positions, some programs do not offer them. Furthermore, although by definition residents in GY1 positions are not required to have prior GME, some residents who fill such positions may have had previous training.

Health care organizations/structures

- An *academic medical center* (or academic health center) is composed of a medical school, a teaching hospital, and one or more health professions schools. There are usually both inpatient and outpatient (ambulatory) sites for training within an academic medical center.
- An *ambulatory care site*—such as a physician’s office, outpatient or ambulatory clinic, or emergency room—provides care on an outpatient basis (ie, does not require an overnight stay in a licensed hospital or nursing home bed).
- A *group practice* involves physicians working in systematic association, with the joint use of equipment and technical personnel and with centralized administration and financial organization. Group practices may be multispecialty or single specialty, open panel or closed panel.
 1. A multispecialty group practice is made up of physicians practicing various specialties/subspecialties who work together.
 2. In a closed-panel system, a managed care organization (MCO) employs a select group of physicians—either directly (ie, staff-model HMO) or through a contract arrangement with a physician group (ie, group-model HMO)—who agree to provide care only to patients enrolled in the MCO.
- A *health maintenance organization* (HMO) handles the financing and the delivery of a broad range of health services to an enrolled population in exchange for a prepaid fee. Four common types of HMOs are:
 1. Staff model—owns and operates its own facilities and directly employs its physicians.
 2. Group model—contracts with an outside physician group practice to provide health care services to HMO enrollees.
 3. Network model—contracts with two or more outside physician groups.
 4. IPA model—contracts with physicians in independent practices (IPAs) to provide health care services to enrollees.

Institution—A *sponsoring institution* is the institution (eg, a university, medical school, hospital, school of public health, health department, public health agency, organized health care delivery system, medical examiner’s office, consortium, or educational foundation) that assumes the ultimate responsibility for a GME program. A *major participating institution* is an institution to which

residents rotate for a required experience of long duration and/or those that require explicit approval by the appropriate RRC prior to utilization. Major participating institutions are listed as part of an accredited program in the *Graduate Medical Education Directory*.

Note: Hospitals and other institutions that provide rotations of less than one-sixth of the program length or less than a total of 6 months are not listed in the *Directory*.

Intern (see “Resident or resident physician” and “Fellow”)—No longer used by the AMA or ACGME. Historically, “intern” was used to designate individuals in the first post-MD year of hospital training; less commonly, it designated individuals in the first year of any residency program. Since 1975, the *Graduate Medical Education Directory* and the ACGME have used “resident,” “resident physician,” or “fellow” to designate all individuals in ACGME-accredited programs.

International medical graduate (IMG)—A graduate from a medical school outside the US and Canada.

In-training examination (also known as “in-service examination”)—Examinations to gauge residents’ progress toward meeting a residency program’s educational objectives. Certification boards of the American Board of Medical Specialties (ABMS) and medical specialty societies offer in-training examinations on a periodic basis.

Liaison Committee on Medical Education (LCME)—The body that accredits educational programs in the US and Canada leading to the MD degree. The American Osteopathic Association (AOA) accredits educational programs leading to the doctor of osteopathy (DO) degree.

Licensure—The process by which a state or jurisdiction of the United States admits physicians to the practice of medicine. Licensure ensures that practicing physicians have appropriate education and training and that they abide by recognized standards of professional conduct while serving their patients. Candidates for first licensure must complete a rigorous examination designed to assess a physician’s ability to apply knowledge, concepts, and principles that are important in health and disease and that constitute the basis of safe and effective patient care. All applicants must submit proof of medical education and training and provide details about their work history. Finally, applicants must reveal information regarding past medical history (including the use of habit-forming drugs and emotional or mental illness), arrests, and convictions. For more information, see *State Medical Licensure Requirements and Statistics*, published by the AMA, or visit www.ama-assn.org/go/licensure.

Major participating institution—See “Institution.”

Match—See “National Resident Matching Program.”

Medical school affiliation—Institutions that sponsor an accredited GME program are not required to have a formal relationship with a medical school. Where such a relationship exists, the affiliation is identified by the dean of the medical school as major (M), graduate only (G), or limited (L). *Major* affiliation signifies that an institution is an important part of the teaching program of the medical school and plays a significant role in the clinical clerkship program. *Graduate only* affiliation indicates that the institution is affiliated with the medical school only for its graduate programs. *Limited* affiliation signifies that the institution is affiliated with the medical school’s teaching program only for brief, occasional, and/or unique rotations of students or residents.

Medical school number—Unique 5-digit identifier for each medical school. See Appendix C for a list of LCME-accredited medical schools and medical school numbers.

Medical Student Section (MSS)—A section of the AMA House of Delegates, the AMA-MSS represents 36,000 medical student members of the AMA. For more information, see www.ama-assn.org/go/mss.

National GME Census—Beginning in 2000, the AMA's Annual Survey of Graduate Medical Education Programs was replaced by the National GME Census, a joint effort of the AMA and the Association of American Medical Colleges (AAMC). All programs accredited by the ACGME and combined specialty programs approved by their respective boards are asked to complete this online census, available at www.aamc.org/gmetrack. The census collects data on program characteristics such as clinical and research facilities and the work and learning environment residents can expect, as well as biographical data on residents in the programs. Data collected from the census are used to produce the following products:

- *Graduate Medical Education Directory*
- *Graduate Medical Education Library on CD-ROM*
- *GME Companion: An Insider's Guide to Selecting a Residency Program*
- PREIDA Online (Fellowship and Residency Electronic Interactive Database Access)
- Medical Education issue of the *Journal of the American Medical Association*
- *State-level Data for Accredited Graduate Medical Education Programs in the US*
- AMA Physician Masterfile
- AMA Physician Select

National Resident Matching Program (NRMP)—Informally referred to as the "Match," this process matches GME programs and applicants to those programs. Managed by the Association of American Medical Colleges (AAMC), the NRMP system was developed to provide both applicants and residency program directors an opportunity to consider their options for accepting and offering appointments to residency programs, respectively, and to have their decisions announced at a specific time. For more information, consult www.nrmp.org or the *GME Companion: An Insider's Guide to Selecting a Residency Program*.

Participating institution—See "Institution."

Postgraduate medical education (see "Graduate medical education")—The AMA does not use the term "postgraduate medical education" to refer to any stage of physician education, including undergraduate (medical school), graduate (residency), and continuing medical education.

Postgraduate year (PGY) (see also "Graduate year")—The AMA does not use this term to describe any part of graduate medical education. The preferred term is graduate year (GY).

Preliminary positions (see also "Graduate Year 1")—Positions for residents who are obtaining training required to enter another program or specialty. Some residents in preliminary positions may move into permanent positions in the second year. Preliminary positions are usually 1 year in length and usually offered for Graduate Year 1. Internal medicine, surgery, and transitional year programs commonly offer preliminary positions.

Program—The unit of GME specialty training, comprising a series of learning experiences, which is evaluated for accreditation.

Program Accreditation System (PAS)—A database system developed by the ACGME to maintain information on programs, institutions, survey dates, accreditation status, codes, etc.

Program director—The individual responsible for maintaining the quality of a GME program so that it meets ACGME accreditation standards. Other duties of the program director include preparing a written statement outlining the program's educational goals; providing an accurate statistical and narrative description of the program as requested by the Residency Review Committee (RRC); and providing for the selection, supervision, and evaluation of residents for appointment to and completion of the program.

Program merge/split/absorption—In a merge, two programs combine to create one new program; the new program becomes the accredited unit and accreditation is voluntarily withdrawn from both former programs. In a split, one program divides into two separate programs and each program receives accreditation. In an absorption, one program takes over the other program; the absorbed program is granted voluntary withdrawal status, while the other program remains accredited.

Program year (see also "Graduate Year")—Refers to the current year of training within a specific program; this may or may not correspond to the graduate year. For example, a fellow in pediatric cardiology could be in the first program year of the pediatric cardiology program but in his/her fourth graduate year of GME (including the 3 prior years of pediatrics).

Resident and Fellow Section (RFS)—A section of the AMA House of Delegates, the AMA-RFS represents 40,000 resident members of the AMA. For more information, see www.ama-assn.org/go/rfs.

Residency Review Committees (RRCs)—The 27 review committees within the ACGME system (including the Transitional Year Review Committee) that meet periodically to review programs within their specialty and/or subspecialty, propose Program Requirements for new specialties/subspecialties, and revise requirements for existing specialties/subspecialties.

Resident or resident physician (see also "Fellow")—Any individual at any level in an ACGME-accredited GME program, including subspecialty programs. Local usage might refer to these individuals as interns, house officers, housestaff, trainees, fellows, junior faculty, or other comparable terminology. Beginning in 2000, the ACGME has used the term "fellow" to denote physicians in subspecialty programs (versus residents in specialty programs) or in GME programs that are beyond the requirements for eligibility for first board certification in the discipline.

Section on Medical Schools (SMS)—A section of the AMA House of Delegates with representation from the 125 LCME-accredited US medical schools. For more information, see www.ama-assn.org/go/sms.

Sponsoring institution—See "Institution."

Subspecialty program—Provides advanced GME in a narrow field of study within a medical specialty, eg, geriatric medicine within the field of internal medicine. Most subspecialty programs are subject to ACGME accreditation actions, policies, and procedures. Completing an ACGME-accredited residency/fellowship in a particular subspecialty program may qualify the physician to seek certification by the related subspecialty board. Some subspecialty programs are accredited independently of the related general specialty program and are not dependent on a general specialty program. Other subspecialty programs function only in conjunction with an accredited general specialty program, and the subspecialty program's accreditation status is related to the status of the accredited general specialty program. The Residency Review Committee (RRC) determines whether accreditation of a given subspecialty program is dependent on accreditation of the related general specialty program.

Teaching staff—Any individual who has received a formal assignment to teach resident physicians. In some institutions appointment to the medical staff of the hospital constitutes appointment to the teaching staff.

Transitional year program—Broad-based clinical training in an ACGME-accredited residency program that provides a balanced GME curriculum in multiple clinical disciplines. Developed for the year between medical school graduation and a specialty residency program, the transitional year is designed to facilitate the choice of and/or preparation for a specific specialty; it is not meant to prepare participants for the independent practice of medicine. To sponsor a transitional year program, an institution and its affiliate must conduct two or more ACGME-accredited programs that participate in the transitional year.

United States Medical Licensing Examination (USMLE)—A three-step examination that is required for licensure in the US. For more information, see www.usmle.org or refer to *State Medical Licensure Requirements and Statistics*, published annually by the AMA.

Web ADS—The Web Accreditation Data System (ADS) of the Accreditation Council for Graduate Medical Education (ACGME). This Internet-based data collection system contains the current data on file with the ACGME for all sponsoring institutions and programs, which are required to verify and update general information annually via this secured online system. In addition, programs are required to verify the accredited training of all residents and to communicate organizational changes as they occur. See www.acgme.org/ADS for more information.
