

## Pediatric Otolaryngology Procedure Domains Minimum Number Requirements

### Review Committee for Otolaryngology – Head and Neck Surgery

The ACGME Case Log System is now available to be used by pediatric otolaryngology fellows to record the cases performed. Information to be entered includes operative procedure(s), patient age, and American Society of Anesthesiologists (ASA) classification. An updated list of procedures and their associated CPT codes for logging these cases are listed below. Also indicated are the expected minimum numbers in each of the seven categories for graduating fellows, effective July 1, 2021. Fellows must indicate their participation level for each case, but only cases performed as the Resident Surgeon and Resident Supervisor will count toward the minimum requirements. Progress towards achieving these minima may be monitored using the Minimums Report available in the ACGME Case Log System.

Age criteria are as follows:

- Neonate: younger than 28 days
- Infant/toddler: older than or equal to 28 days and younger than three years
- Child: older than or equal to three years and younger than 13 years
- Adolescent: older than or equal to 13 years and younger than 18 years
- Adult: older than 18 years

ASA criteria are as follows:

- I = healthy without co-morbidities
- II = co-morbidity not limiting activity
- III = co-morbidity affects activity
- IV = severely impacted by co-morbidity
- V = moribund/comatose
- VI = deceased (organ donation)
